None

Student Learning Outcomes/General Education Outcomes
Student learning outcomes (SLOs), like general education outcomes (GEOs), are statements that define specific measurable results expected from students that have undergone a learning experience at Mt. San Antonio College. The difference with GEOs is that determining and assessing GEOs may involve cooperation among multiple disciplines, which reflects the nature of the Mt. SAC general education (GE)

  - Expiration Date: Jun 20, 2010
  - Author: Eric Arvo Kaljumagi

The Technology Master Plan (TMP) is available for your review in a summary article in the Planning for Excellence newsletter. The Mt. SAC TMP is intended to integrate with all institutional planning as well as integrate into the Educational Master Plan (EMP) and the Facilities Master Plan (FMP). Information Technology (IT) is an integrated function of the College and it is important that the TMP embody this integration and allow for an evaluative component.
