## Programs of Study Leading to Transfer

Mt. San Antonio College offers lower division transfer courses to meet the requirements for most baccalaureate majors offered by accredited colleges and universities in the United States. Students should meet with an Educational Advisor in the Advisement, Career, and Transfer Center (ACT) for information about transfer courses in their major. It is advised that the student visit the ACT Center far in advance of the next registration rush period.

The student must also develop an educational plan and receive transfer information by enrolling in COUN 50—Educational Planning and College Orientation, a .5 unit course offered each semester by the Career Counseling office.

Below you will find a list of possible majors that are offered at various campuses of the California State University (CSU) and/or the University of California (UC).

In many cases, you can complete important preparation courses for those majors at Mt. San Antonio College. In most cases, you can complete the necessary lower division (freshman-sophomore) general education courses here. You might also complete many interesting and highly recommended elective courses that can complement your major course of study.

Although a serious attempt was made to make this list a comprehensive one, it is not an exact list of every single major available. To find out exactly what major is available at any particular school please visit the ACT Center. All CSU and UC catalogs are available there for your use. If you are undecided about which major is right for you, please make an appointment with a counselor in Student Services Center, Ext. 4380.
