

Spice Zee Nectarplum Interspecific

Mt. San Antonio
College
Horticulture Unit

"college educated plants"

A interspecific, white-fleshed, nectarine-peach-plum hybrid. Skin is dark maroon at fruit set, and turns pale pink when ripe. Fully ripe fruit is unparalleled in flavor, and both nectarine and plum traits are easily detectable. Very productive tree is also quite ornamental. Tremendous purplish pink bloom in the spring, followed by a flourish of red leaves which mature into lush green in late summer. Self-fruitful. Harvest June-July.
