Mt. San Antonio College is pleased to present *Mind Extraction* a solo art exhibit of works by artist DavidR. This exhibit is a part of Mt. San Antonio College's *Gallery Design/Operation and Art Profession Certificate Program*, with certificate candidate, curator Diane Lynn Romero.

This exhibition consists of the artist's black and white drawings. The artwork presented demonstrates the artist's creative imagination through his innovative characters, and elaborate scenes. He is heavily influenced by science fiction as demonstrated by the characters and the worlds they occupy. Their world typically consists of "strange rooms and eerie landscapes that are inhabited by even stranger abstract biomechanical life forms."

DavidR is a self-taught artist that has created work for about ten years. His highly developed drawing skills and imaginative creations will definitely inspire and surprise the audience.
