

# Volunteer/ Vet Assistant Opportunity

My name is Michelle Douglas and I'm the lead vet assistant at Chino Hills Parkway Pet Hospital. I'm leaving this summer to go to vet school and I am looking for candidates to either volunteer or be hired as a vet assistant. Positions will be given based on knowledge, experience, and availability.

**Minimum requirements-** Candidates should have a basic knowledge of vaccines, how to handle animals, and how to clean the hospital. Everything else will be taught during training.

**Previous animal experience is preferred but not required**

**Hospital Info-** Chino Hills Parkway Pet Hospital is a small animal hospital located in Chino Hills off of Chino Hills Parkway and Pipeline. It has been owned and operated by Dr. Singh since 2003. He is the only veterinarian and there are currently two other vet assistants that work part-time. We do not have RVTs or receptionists positions available. Working here is a great opportunity to learn skills quickly and gain experience.

If hired, we will train you in all aspects of running the hospital from client check-in to check-out.

**Personal experience-** I started volunteering when I a student and the Dr. worked with my schedule. I started with basic knowledge of the field and worked my way up. I like that it's a smaller private practice because there is better communication and a more personal environment. There are no RVTs so you are able to learn through hands-on experience and gain responsibility quicker than at other hospitals.

If interested, Please bring in a resume and file out a application. If you have any questions please call the hospital at 909-606-8900

Sincerely,

Michelle Douglas
