INTRODUCTION

During the fall of 2011, the Institutional Effectiveness Committee (IEC) evaluated the Planning for Institutional Effectiveness (PIE) process (i.e., the program review process) and gathered information on the status of the College’s 2010 to 2011 Strategic Plan. Based on these evaluations and summaries the following report represents the 2011 to 2012 Mt. SAC Strategic Plan.

The contents of this paper include a section on the history of the College, a section on PIE and integrated planning and how both are used to help create an internal and external view of events for the College and used to evaluate the College’s mission and goals. The College’s vision and core values are also noted and their relationship to the College’s mission.

The main section is the specific strategic objectives (SOs) proposed from teams across campus based on their connection with the College goals. During the academic year, the teams will complete many activities to accomplish their suggested SOs.

MT. SAC’S HISTORY

The Mt. San Antonio Community College District (Mt. SAC) was created in December, 1945 when voters of four local high school districts approved the formation of a community college district. Initially named Eastern Los Angeles County Community College, the institution was later renamed after Mt. San Antonio, the imposing, snow-capped mountain (popularly known as Mt. Baldy), prominently visible in the distance above the campus.

The 421 acre College site was originally part of the 48,000 acre La Puente Rancho. During World War II, the facility was converted into an army hospital and later a Navy hospital.

Mt. SAC opened in the fall of 1946 with 635 students occupying a few Spanish-tiled buildings and temporary Navy barracks clustered below the San Jose Hills. Walnut, not yet an incorporated city, consisted of very little except dirt roads, cacti, and grasslands covered in the spring with wild mustard grass.

Quite naturally, the growth of Mt. SAC has mirrored that of the local area. From its humble beginnings with an initial enrollment of 635 students, the college now serves in a semester about 40,000 men and women from diverse backgrounds and generations. The College District boundaries encompass the communities of Baldwin Park, Bassett, Charter Oak, Covina, Diamond Bar, the southern portion of Glendora, Hacienda Heights, City of Industry, Irwindale, La Puente, La Verne,

Pomona, Rowland Heights, San Dimas, Valinda, Walnut, and West Covina.

Mt. SAC has emerged as a leader in education not only in the San Gabriel Valley, but in the state. It is the largest, single-campus community college district in California.

PLANNING FOR INSTITUTIONAL EFFECTIVENESS (PIE) AND INTEGRATED PLANNING

PIE is the model used at Mt. SAC to capture and document the planning and program review done at the unit and team levels, and to relate this planning to current and future institutional goals and objectives. This process is conducted annually by each unit of the college, and all unit participation is documented in ePIE, the College’s electronic program review system. Evaluation of the PIE process is continuous. Each year, IEC requests and receives feedback via the manager and team summaries on process clarity, utility, ease of use, effectiveness of documents and training, etc. This feedback is included in adjustments for the following year’s PIE process. The PIE process clearly exemplifies an evaluative, integrated planning effort (i.e., more than one stakeholder is required to participate in the plan in order to achieve the desired outcome similar to master plans such as the Educational Master Plan, Facilities Master Plan and the Technology Master Plan).

Integration of plans is important. There are many ways that unit planning and integrated planning is occurring across campus, including PIE, student learning outcomes, basic skills, VTEA, administrative systems planning, Banner, reviewing new processes, class schedules and enrollment, hiring, etc. Because it is vital that each team not work in a vacuum, it is important that the teams continue to integrate their planning and plans and provide documentation or evidence of their work. Unit level planning is the first step of the ladder.

PIE and integrated planning are used to help create an internal and external view of events for the College and used to evaluate the College’s mission. Based on the unit and college-level plans, data are used to identify and act upon issues and make decisions as needed. The data can be found throughout the PIE document such as in the internal and external conditions, College generated data reports, from other data sources (e.g., licensing examination results) and within the evaluation section based on the research, evaluation and assessment work done by the unit. The information collected through these multiple means provide information to drive the decision-making process. Each unit decides how their plan for that year maybe re-worked to account for these conditions and data points and work with their teams to improve their services.

COLLEGE MISSION, VISION AND CORE VALUES

Mt. SAC is committed to integrity and a process for providing high quality education congruent with the College’s mission, created based on the student and community need that is “to welcome all students and to support them in achieving their personal, educational, and career goals in an environment of academic excellence.” It is through this mission statement that all work is derived. The College’s vision statement and core values are derived from the mission statement and also guide the College’s work.

STRATEGIC OBJECTIVES

This main section represents the specific strategic objectives (SOs) proposed from teams across campus based on their connection with the College goals. All SOs are connected to and support the College’s goals which in turn are connected to and support the College’s mission statement. Most of these SOs are carried over from the previous year’s SOs per the recommendations of each team. A few SOs are new based on the creation of new goals and the need to have a well-rounded perspective of measurable SOs. As the SOs were solicited from Teams across campus, these efforts represent a bottom-up approach to collaborative, integrated planning endeavors. During the fiscal year, the teams will complete many activities to accomplish their suggested SOs.

CONCLUSION
The Research and Institutional Effectiveness department will monitor the Strategic Plan accomplishments and ask IEC to contribute toward the review and evaluation of the results and planning processes. By the summer a summary of the status of the SOs will be compiled and presented to IEC for final consideration and then to PAC for review. Based on this evaluation and review process, the next Strategic Plan will be proposed shortly thereafter to both IEC and PAC and the monitoring and evaluation cycle will continue. As per the previous status report on the College’s Strategic Plan, the next plan should be more comprehensive and include more objectives from major plans across campus such as the Technology Master Plan, Facilities Master Plan, etc. A thematic grouping of the many College goals is being discussed as well as how to leverage the mission, vision and core values as a major piece of the planning process at Mt. San Antonio College.
