

Credit/Noncredit Headcount by Fall Semester

Mt. SAC's unduplicated enrollment from fall 2011 to fall 2015 has demonstrated a modest 2.5 percent change overall with the increase in noncredit student enrollment (4.8 percent) slightly higher than that of credit enrollment (1.9 percent).

The data provide a snapshot of the number of students accessing Mt. SAC programs in a semester. However, it is important to remember that fewer students are attending classes on campus on any single day, as their classes are scheduled Monday through Friday and sometimes Saturday. Also, some students participate in distance learning classes, which significantly reduces the amount of time they spend on campus. Although there has been some on-campus noncredit enrollment growth primarily in English as a Second Language, most noncredit growth has occurred in programs offered at off-campus locations.
