Data Projects

What is a Data Coach?

Data Coaching is a campus initiative aimed at creating a culture of inquiry at Mt. SAC. Data coaches will be part of a cohort of faculty members who will provide direct support to their peers whereby educators work together to analyze student data, identify equity gaps, pilot new instructional strategies, and measure the impact of these new pedagogies on student outcomes. Imparting this information on a cross-section of the faculty will lead to greater instances of collaborative inquiry at Mt. SAC.

Faculty Data Coaches 2020-2022

Coordinator: Dr. Tiffany Kuo (/profiles/tkuo14.html)

THE POWER OF OUR DATA
Know the ABCs of Data: Access, Baseline, Change
April 8, 2022 | 9:00 am - 12:00 pm | Virtual

Learn how Mt. SAC is using research and data to improve student learning. Participants attending this 3-hour virtual event will connect with colleagues, be inspired by success stories, and grow their knowledge of how each of us can learn how to *access our data, discover our baselines, and make meaningful changes.*

If this activity was completed during assigned work hours, or pay was received for attending this activity, no credit hours can be claimed.
