

I.C.3 evidence:

From the Dance Department, an example of **faculty-established criteria for success** in the department's Planning for Institutional Effectiveness (PIE) (or commonly known outside of Mt. SAC as "program review")

Provide quality instruction and experiences for student success.

Example: Live musical accompaniment to improve student's musicality, allow for various tempos for different levels and to provide an authentic collegiate and professional experience. Students will improve in musicality as measured in course level SLO's as well as keeping the Mt. Sac Dance program competitive with other area programs that use live music in dance classes. We will also be able to stack different class levels which aides in student completion and course enrollment levels.

As we returned to campus in fall 2021, the use of a live accompanist was reinstated. The awarded lottery funds were shifted to reinstate the accompanist, since that went dormant as we were teaching online. The department will continue to request funding to enhance musicality and student success. The department has also requested the funding for an upright piano in 2022-2023.
