Great question, Allie.

I believe the nursing department will begin a ACUE ITTEL cohort this Spring. I will work with the Tech & Health data coach, Dan Garcia, outcomes coordinator Kelly Coreas, and Cathy Stute, along with the nursing faculty who will be facilitating the nursing cohort to make sure we have results of implemented strategies.

We will be collecting this data throughout Spring, and Cathy will work on it post-Spring.

All the best,

Tiffany

Tiffany it was great to see you and do some catalog brainstorming! As a follow up on my evidence request, Barbara mentioned today that she had a conversation with you last week about your work to help the Nursing Program close the gap between introductory and more advanced coursework. If you have evidence of techniques they have or plan to implement to reduce that gap, that would be really strong evidence since it is programmatic rather than individual.
