

#### CURRENT STUDENTS

Mt. SAC is in the final planning stages of bringing a bachelor's degree in Histotechnology to our campus. Would you continue in the program?

Response	%	#
Very interested. I'm ready to sign up.	61%	23
I definitely want to know more.	24%	9
Somewhat interested.	16%	6
No interest.	0%	0
Total	100%	38

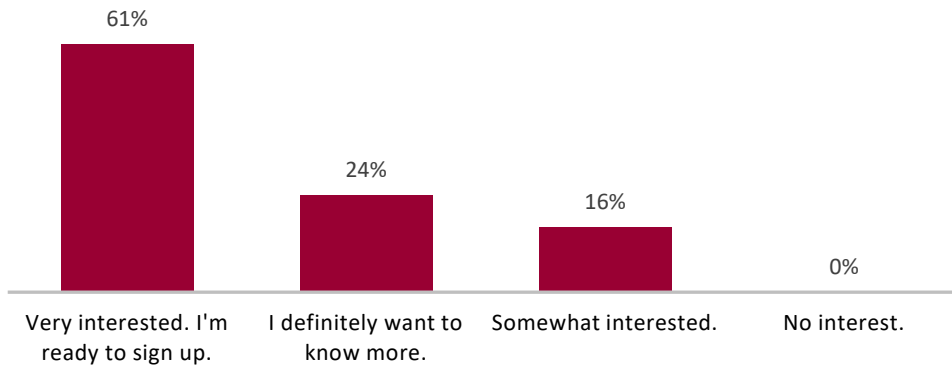

#### GRADUATES

Mt. SAC is in the final planning stages of bringing a bachelor's degree in Histotechnology to our campus. Would you continue in the program?

Response	%	#
Very Interested. I'm ready to sign up.	43%	32
I definitely want to know more.	36%	27
Somewhat interested.	11%	8
No interest.	9%	7
Total	100%	74

In the fall of 2021 current students and graduates of the Histotechnology program were surveyed to assess student interest in a BS in Histotechnology. A total of 38 current students responded to the survey. A significant majority of them, 61%, indicated they are very interested in a BS program and are ready to sign up. An additional 24% of current students indicated they definitely wanted to know more about a potential BS program. A total of 74 Histotechnology graduates responded to the survey. Approximately 80% of graduates indicated that they were either ready to sign up or definitely wanted to learn more. Survey results show that there is significant student interest in a possible Histotechnology BS program at Mt. SAC.
