

CONTINUING EDUCATION ACTION PLAN

(Revised October 2012)

Growth Area 1

The Division, in collaboration with College systems personnel, will improve the collection, integration, and reporting of data in order to meet accountability standards, enhance planning & decision making, and improve student learning.

Rationale:

There are several peripheral data collection systems throughout the Division. Ideally these systems would have a dynamic interface with, or be incorporated into, the College's administrative system (Banner) to provide a single data collection and retrieval point. Additionally, the state of California is moving increasingly toward outcome based funding models for Community Colleges.

Goals Addressed:

Division Goal(s):

- Goal 1. Data – Improve in the use of data to track, assess, and report student access and outcomes.

College Goal(s):

- Goal 5. The College will utilize and support appropriate technology to enhance educational programs and services
- Goal 13. The college will improve integration of campus-wide planning activities

Growth Area 2

Faculty, with support from the Division and programs, will improve in the use of systematic processes in which data are analyzed and used for improvement of student learning.

Rationale:

The focus on the initial SLO process was compliance with the adopted Mt. SAC model of accountability and SLO tracking. Although meaningful data was collected, the results were not used systematically within the model. There is a need for the Division faculty to shift to consistent application of the use of results from SLO assessments to inform improvement of student learning in a cyclical model. Additionally, not all programs have developed systematic means of analyzing student learning outcomes. At the program level there is a need to develop better modes of information sharing, assure follow up of the use of results for course/certificate SLOs, and more fully connect students with SLGs in programs that use independent study as the primary instructional mode.

Goals Addressed:

Division Goal(s):

- Goal 2. Student Learning – Improve student learning through continual development, implementation and assessment of Student Learning Goals and Student Learning Outcomes.

College Goal(s):

- Goal 2. The College will prepare students for success through the development and support of exemplary programs and services.
- Goal 13. The college will improve integration of campus-wide planning activities

Growth Area 3

The current state budget crisis has significantly impacted Continuing Education's ability to meet student demand for classes and support services. The Division will need to continue to explore funding resources beyond the usual state funding sources.

Rationale:

State cuts have already reduced class schedules for the past 3 years. Support to student services was cut by more than 50% in 2009 and has not been restored. State legislators and the governor are exploring alternatives should a tax initiative not pass in the November 2012 ballot.

Alternative funding sources could provide an opportunity to supplement support for existing programs and explore expansion in class offerings or student services. Additional services and class offerings in fee-based and contract education can enhance income/funding needed to run division operations.

Goals Addressed:

Division Goal(s):

- Goal 8. Partnerships – Develop internal and external partnerships in order to improve students' educational and career opportunities.
- Goal 9. Advocacy for Noncredit – Collaborate with state and national organizations to improve support for noncredit student populations.

College Goal(s):

- Goal 1. The College will secure funding that supports exemplary programs and services.
