

	Physician	No current legislation
	CPR/AED Training	No current legislation
	EMS Notification	Any person or entity that supplies an AED shall notify an agent of the local EMS agency of the existence, location, and type of AED acquired.
	Maintenance Program	<p>The AED must be maintained and regularly tested according to the operation and maintenance guidelines set forth by the manufacturer, the American Heart Association, and the American Red Cross, and according to any applicable rules and regulations set forth by the governmental authority under the federal Food and Drug Administration and any other applicable state and federal authority. The AED must be checked for readiness after each use and at least once every 30 days if the AED has not been used in the preceding 30 days. Records of these checks shall be maintained.</p> <p>There must be a written plan that describes the procedures to be followed in the event of an emergency that may involve the use of an AED. The written plan shall include, but not be limited to, immediate notification of 911 and trained office personnel at the start of AED procedures.</p> <p>Building owners must ensure that tenants annually receive a brochure, approved as to content and style by the American Heart Association or American Red Cross, which describes the proper use of an AED, and also ensure that similar information is posted next to any installed AED.</p> <p>No less than once a year, building owners will notify their tenants as to the location of AED units in the building.</p>
	Notification of Use	Any person who renders emergency care or treatment on a person in sudden cardiac arrest by using an AED must activate the emergency medical services system as soon as possible, and report any use of the AED to the licensed physician and to the local EMS agency.
