Subject: Feedback on the IDE Program

Hi Dean Blake-Judd,

My name is Constantine Firme and a vocational student here at Mt SAC, and I just wanted to mention how absolutely impressed I am with Stephen James and Shelley Takahashi. Mr. James in particular was one of the most helpful and involved professors I have ever met with a true passion for manufacturing and design. I have also never seen such a robust learning environment and I can say without a doubt that no institution for miles have as many manufacturing tools for students as the hanger on your campus. Your department is doing something truly game-changing and I plan to encourage my co-workers to attend Mt SAC tech/manufacturing/IDE for their continuing education. Thank you for creating something great.

Regards to you and your department,

Constantine Firme
