

## Mt. SAC CCD Survey - Measure RR Parking Structure project

11/20/14

I have a message from Catherine Lew, Lew-Edwards Group, with the results of the survey question on the parking structure. We used the specific term "parking garage," and found that 73% of respondents considered the project at least somewhat important, 49% indicating the project was very important or extremely important.

I was able to track down a draft of the survey done as part of the Measure RR planning work. John Fairbank was the consultant that ran the survey for us, sometime in early 2008, and the instrument does have a question specific to the parking structure (page 6), quoted below.

Mt. San Antonio College

11. As you may know, community college bond money can only be spent on buildings, classrooms, infrastructure such as wiring and plumbing and community college grounds. Please tell me how important it is to you personally that money from a new Mt. San Antonio College bond measure be issued to pay for each of the following – is it extremely important, very important, somewhat important, or not too important?
