

Thank you for teaching--from a Veteran Marine
3/08/2016

Hello professors,

I wanted to take the time to let you both know that I appreciate the passion that you both shared for your expertise. Though I am a Marine veteran, who's brain has a militarized way of thinking, I appreciate how well you made it easy for me to succeed in your classes. I also appreciate the advice and support that helped me get through the lab projects and exams.

I attached my son's video from last year and a picture of him to show you that your teaching greatly forms the minds of the new generations. Your lectures have inspired me and guided me to better help my son obtain the valuable knowledge. It helped me immediately pass the knowledge to my then 3 1/2 year old son. Attached is a video of my son (at age 3/12). he is now 4 1/2 (as shown on photo) and he has advanced greatly in geology and the other sciences. I send you this video to show you how much I appreciate and respect your teachings. Again Thank You

Sergio M. Lopez

US Marine Corps Combat Veteran
