

THE CHRONICLE

of Higher Education

SPECIAL REPORT

MARCH 31, 2017

A Springboard to College

Dual-enrollment courses are growing in popularity as a way to encourage students to take the leap earlier.

How Colleges Are Teaming Up With High Schools to Streamline Students' Paths ([link](#))

By Beth McMurtrie

Dual-enrollment courses are growing in popularity as a way to solve some of higher education's most vexing problems.

In Georgia, a Streamlined Program Draws Students ([link](#))

By Beth McMurtrie

The state's Move on When Ready plan has tripled the number of dual-credit enrollments in technical-college courses over five years.

In Idaho, a College Connects With Teachers ([link](#))

By Beth McMurtrie

Successful dual-enrollment programs are built on strong partnerships, like the ones between Boise State University and the high schools it works with.

Best Practices in Dual Enrollment ([link](#))

By Beth McMurtrie

Wide access, high quality, and easy transferability of credits are among the characteristics that can help programs succeed.

Key Research Studies on Dual Enrollment ([link](#))

By Beth McMurtrie

Research done in Colorado, Oregon, and elsewhere suggests that the programs help more students enroll in college and get their degrees.

Postsecondary Success Starts in High School ([link](#))

By Shannon W. Gilkey

"Speed up" strategies like dual enrollment are vital, but they must be accompanied by "catch up" strategies for the students who need more support.
