Spring Semester (2/26/18)																																							

- Furniture
- AV installation / coordination
- IT / network
- IT / Computer Installation
- Move in

Construction activity will be completed by December 1 with equipment set up continuing through early January. The "cable management" activity runs concurrent with move in to allow our IT staff and furniture consultants to incorporate individual desktop tools such as printers, adding machines, and task lighting as faculty and staff move in to their office spaces. This schedule provides for teaching in the new facility for the spring 2018 semester.
