

Energy Internship Funding Meeting  
03/07/2017

Hi Carol,

It was lovely meeting you, Bill, and Gary in person on Friday and hearing about so many fantastic sustainability projects that are happening on campus. Thank you again for letting me know when I could meet with Bill to discuss the energy internship and education funding opportunity that my nonprofit organization, Strategic Energy Innovations, is offering. We are currently working with 11 California colleges through our [Energize Colleges](#) program with the support of PG&E, SDG&E, SoCal Gas and Southern California Edison ratepayer dollars.

I'd like to schedule a time to meet with Gary and Bill in the coming week if possible to discuss signing up Mt. San Antonio into the program. I should emphasize that this month is the critical time for us to sign up the final college into Energize Colleges to benefit from paid energy-related student internships, mini grants for faculty to work on energy-related curriculum development with the support of our team, and a fully funded on campus program coordinator.

Could you please let me know a time in the coming week that I could meet with Bill and Gary? I have availability this Thursday, Friday and Monday and could meet in the afternoon next week as early as 2pm on Tuesday, Wednesday, and Thursday.

Thanks,

Liz Fitzpatrick  
Associate Project Coordinator
