

You're Invited to the 2018 Winter Institute!

Winter Institute
February 1 - 2, 2018

AMERICAN RIVER COLLEGE, SACRAMENTO, CA

Carnegie Math Pathways is transforming how students learn and succeed at mathematics. Since launching six years ago, Statway and Quantway have served over 30,000 students in 15 states and achieved triple the student success rates in half the time as compared to students in the traditional math sequence.

We invite faculty, administrators, and advisors from interested institutions and newly-joined campuses to join us in February 2018 at our annual Winter Institute. This event will provide teams an opportunity to:

- meet members of our national network,
- receive hands-on access to Quantway and Statway resources and tools, and
- leave with an action plan of next steps to further explore and effectively implement the Pathways.

We hope to see you in Sacramento!
