

Building a Faculty Network for Success in Math

Explore a new grass roots faculty-led network that is currently forming to support college efforts to close the opportunity gap in mathematics education.

Join us this fall in northern or southern California to exchange information and influence the future development of this network. These events are opportunities to:

- Consider perspectives on equitable mathematics outcomes and the daunting realities that prompted AB 705
- Hear directly from students about the impact of math education on their lives
- Ask questions of our AB 705 Expert Panel
- Connect with faculty and administrators who are already implementing successful strategies such as stretch courses, co-requisite courses, OER materials, Statway, and Quantway
- Engage with your team to strategize for the year ahead
- Shape the network's priorities by sharing your ideas and needs

ATTEND ONE OF THE UPCOMING EVENTS WITH YOUR COLLEGE TEAM

*Colleges are encouraged to bring cross-functional teams that include a mix of **faculty and administrators from instruction and student services**, particularly those who are already involved with local efforts to implement guided pathways, close the opportunity gap in mathematics education, and respond to AB 705.*

Northern CA: Friday, Sept. 21, 2018
9:00AM-4:00PM
American River College, Sacramento, CA
RSVP for this location: [Register now](#)

Southern CA: Friday, Sept. 28, 2018
9:00AM-4:00PM
