

## **My Path Demonstration Notes November 20**

November 21, 2018

Thank you all for attending the My Path demonstration on November 20<sup>th</sup>.

Here are some quick notes on My Path. In addition, I have placed a link to the My Path recorded webinars below.

My Path is integrated with CCCApply so that students who entered an application are directed to the College to continue the onboarding steps. This is in contrast to the “We’ll get back to you” message that a student currently receives from CCCApply.

My Path has a rule engine and a communication engine. The rule engine uses My Path’s “cards” that can be configured to lead a student down the proper path by using the information garnered from CCCApply. The communication engine can utilize the rule engine to provide targeted communication, via email or text, to the student to send reminders or other necessary communication.

Students would complete the CCCApply application, and then they are routed to the College’s My Path site. We can also place a link on a public facing website that would allow students to access My Path. This would allow a student to go directly to My Path to follow up on their progress. It would also allow students to access Career Coach prior to filling out the application so the data is more accurate.

There are multiple webinars on this site for My Path. The one from November 14 gives a good overview of the project. The one from October 17 describes how and why Sierra College implanted My Path.
