

Dual Enrollment Quarterly Update to President's Cabinet: April 28, 2020

Current dual enrollment courses and temporary remote instruction

Our current Winter 2020 and Spring 2020 dual enrollment faculty successfully transitioned to temporary remote instruction. All of our faculty were able to use either Canvas, Google Classroom, or other online platforms to continue instruction of their DE courses. There were few high school dual enrollment students who had accessibility issues due to not having internet or computer access from home. All of our school districts held laptop/tablet distributions to their high school students. Our students are receiving the same information regarding EW and P/NP grading options from our program and dual enrollment counselors.

MOUs for 2020-2021: MOUs are being submitted. AB288s were first priority for May board and Non-AB288s for June Board. We will only look into July Board submissions on emergency or last minute submissions if needed.

Dual Enrollment 2020-21 Academic Year: For the 2020-21 academic year, we are projected to have a 45-50% growth from the previous year. 2020-21 courses are being discussed and steadily being approved by department faculty and division. We have asked that in preparation for a possible move to online instruction for Fall 2020, that our instructors provide us with details of either going Synchronous, Asynchronous, or a combination of both.

New Partners for 2020-21: We are excited to bring on 6 possible new high school partners: Pomona Catholic (which would probably start a chain of partnership requests from other private high schools next year), Charter Oak, Garey, Pomona, Fremont Academy of Engineering, and Palomares Academy of Health Sciences.

Dual Enrollment counselors: Our DE Counselors have been very vital to the success of our program, especially during the transition to temporary remote learning. Students and high school administrators have expressed their gratitude of the services provided by the DE counselors. They hope to continue it again next academic year.

Articulation: In partnering with Marie Tyra and her Articulation team, we have shared notes and information from her current articulation agreements with our partner high schools to see how our program can support high school student success through dual enrollment course options.
