

## Scott Guth Named Carnegie National Faculty

August 1, 2019

Dear Dr. Scroggins,

As you know, the strength and vitality of the Pathway's Networked Improvement Community lies in its members and their commitment and leadership. As the network and its work expand, leaders from within the network itself play an increasingly important role in guiding the direction of the Pathways NIC.

For this reason we have established the Carnegie National Faculty, a select group of network members who have demonstrated leadership within the community and who have an interest in further developing the leadership capacity and governance structure of the network. Because of the leadership and extensive contributions of Scott Guth, we have invited him to join the group of thirty-two existing Carnegie National Faculty.

We are delighted that he has chosen to accept this invitation to join the Carnegie National Faculty and work with his colleagues, myself, and others at Carnegie Math Pathways to further strengthen network leadership and develop a governance structure for our community that meaningfully includes faculty voices within it. It is clear that Scott shares a commitment to the students we serve, a passion to see improved performance in serving them through the Pathways, a belief in the theory of improvement that underlies those Pathways, and a commitment to the improvement science that enables and tests innovations to better address our shared problem.

Sincerely,

Karon
