

Governor's Budget Summary

2021-22

To the California Legislature
Regular Session 2021-22

Gavin Newsom, Governor
State of California

GOVERNOR
Gavin Newsom

January 8, 2021

To the members of the Senate and the Assembly of the California Legislature:

I am proud to advance a Budget that will support and expedite our recovery from the health and economic crisis caused by COVID-19 so our state comes back stronger than before.

While the novel coronavirus presented us with new challenges, our North Star has remained the same: inclusion, economic growth and a brighter future for all. Our response to COVID-19, and in turn this Budget, advances investments that help improve access to healthcare, quality education, childcare and economic security through this pandemic and beyond. This Budget leverages California's many strengths, among them our people, our innovation and our diversity. It remains anchored in the principles of equity, opportunity and responsible governing that have undergirded our previous budgets.

Our shared prudent fiscal management provided the necessary foundation for our efforts to rise to the ongoing challenge of COVID-19. We are working with \$34 billion in budget resiliency—budgetary reserves and surplus—that will support our progress toward an equitable and broad-based recovery. Thanks to tough decisions in the past and present, we are better prepared to weather the storm and help struggling Californians where they need it most.

It is undeniable that the pandemic has laid bare, and indeed deepened, inequalities that threaten the California Dream. We have worked together to tackle these inequalities over the last two years—in healthcare, housing, education, the economy and more—and we must do so with even greater urgency to truly recover from COVID-19.

Always with an eye to the future, the Budget includes a total \$14 billion investment in our economic recovery—including early action beginning this month—to provide immediate relief for working families and small businesses most affected by the pandemic. It advances four priorities for immediate action: the Golden State Stimulus to put money into Californians' pockets, doubling down on our support to small business, an extension of the eviction protections that we worked in partnership to enact and supporting California schools in bringing students back safely for in-person instruction. Our investments in schools also focus on increasing educational opportunities for California's diverse youth and providing them with opportunities for extended learning time.

We are also proposing a California Jobs Initiative, investments in workforce development, housing infrastructure, and state deferred maintenance to accelerate job creation. The Budget also continues to build on our State's leadership in tackling climate change, including support for California's agricultural industry to advance the state's climate resilience objectives and our zero-emission vehicle goal by 2035.

The Budget also focuses on expanding opportunity with investments for Californians from early childhood to college—including expanded investments in transitional kindergarten programs to more funding for the University of California, California State University and community colleges.

The Budget also builds on our work to tackle the homelessness crisis and build more affordable housing. It advances investments in preventing and fighting wildfires.

Taken together, these proposals help us tackle the challenges we faced as a state before, during and through the pandemic. The Budget makes progress towards the goal we set when we took office to put the California Dream within reach of more Californians.

Thank you once again for your partnership throughout these times of unprecedented challenge for our state. I look forward to continuing to work together on these critical issues for all Californians and enact a 2021-22 Budget that gets us closer to California for All.

With respect,

/s/ Gavin Newsom

Gavin Newsom

INTRODUCTION

As California enters 2021, the state's health and economy are threatened by the highest infection rate of the COVID-19 Pandemic. However, with increasing distribution of vaccines, California is poised to begin an equitable and broad-based recovery. The state has benefited from years of fiscal prudence—enabling investments to position the state for this recovery. The Governor's Budget includes a \$14 billion investment—including early action beginning this month—to provide immediate relief for individuals and small businesses disproportionately impacted by the pandemic, the safe reopening of schools and for extended learning time, and investment in strategies for creating quality jobs.

The Budget also continues the Governor's sustained focus on expanding opportunity with investments for Californians from early childhood to college—including expanded transitional kindergarten programs and more funding for the University of California, California State University and California Community Colleges.

The Budget makes new proposals to address the affordability of health care and housing, and supports the increase in the state's minimum wage to \$14 per hour. The Budget includes significant new strategies to reduce the impacts of climate change, with focused investments to support the state's zero-emission vehicle goals and an additional \$1 billion to address a comprehensive wildfire and forest resilience strategy.

Finally, the Budget promotes effective government with additional investments to improve the state's ability to respond rapidly to emergencies and continues the critical

work to improve government efficiency and bring government services into the digital age.

The Budget continues to reflect the principle that maintaining a balanced budget and strong budget resiliency is a necessary predicate for expanding programs, especially given the increased uncertainty caused by the COVID-19 Pandemic.

OVERALL BUDGET STRUCTURE

The state entered the COVID-19 Recession on a strong fiscal foundation after years of building reserves, paying down debt, and a focus on maintaining structurally balanced budgets over the long term. This enabled the state to protect programs during the Recession while responding immediately to combat the pandemic.

The Budget reflects \$34 billion in budget resiliency—budgetary reserves and discretionary surplus—that will advance progress toward a broad-based and equitable recovery. Of this amount, the reserves include: \$15.6 billion in the Proposition 2 Budget Stabilization Account (Rainy Day Fund) for fiscal emergencies; \$450 million in the Safety Net Reserve; \$3 billion in the Public School System Stabilization Account; and an estimated \$2.9 billion in the state's operating reserve.

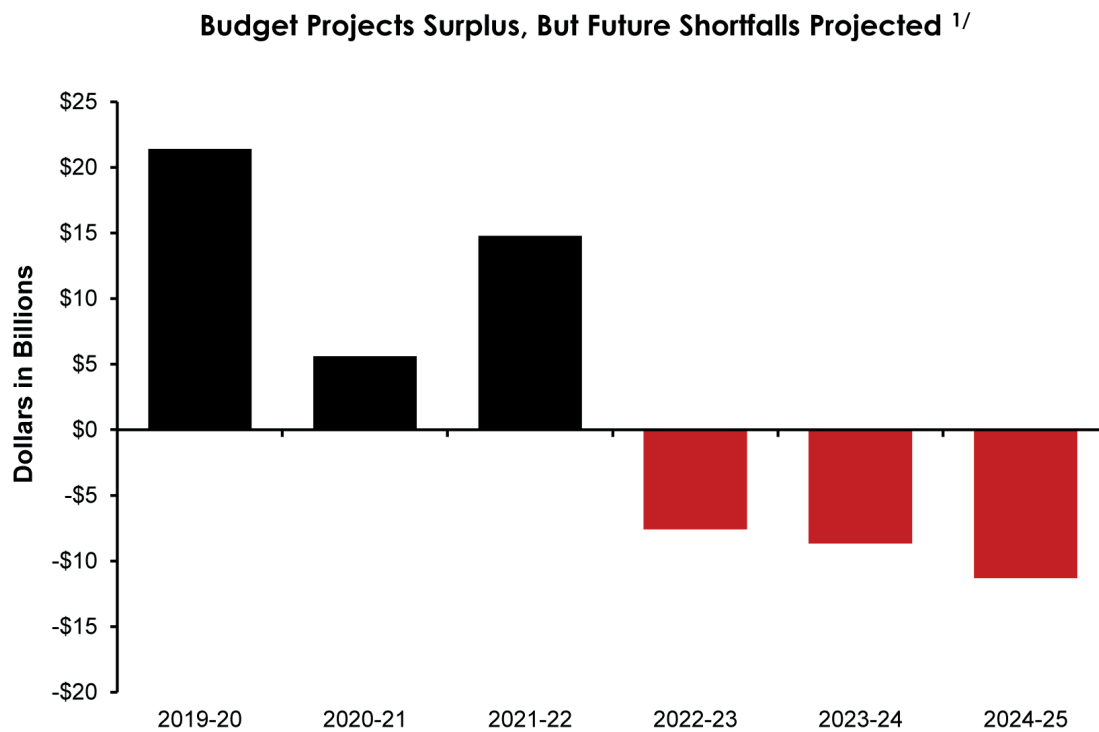

The Budget continues progress in paying down the state's retirement liabilities and reflects \$3 billion in additional payments required by Proposition 2 in 2021-22 and nearly \$6.5 billion over the next three years. In addition, the improved revenue picture allows the state to delay \$2 billion in scheduled program suspensions for one year.

Since the 2020 Budget Act, the economic outlook and revenue forecast have improved. However, risks to the forecast remain higher than usual, and economic inequality has intensified since the pandemic began. In December, over 4 million Californians were still receiving some form of unemployment benefits, and only about half of the jobs lost from the start of the pandemic had been recovered. The Budget forecast was finalized before the provision of critical federal relief in the Coronavirus Response and Relief Supplemental Appropriations Act, and the forecast will be updated in May to reflect the positive impacts of this Act. Further federal relief is critical to help people and businesses struggling to survive and recover from the pandemic.

Budget resiliency will be critical to protect programs in the future, as expenditures are projected to grow faster than revenues, with a structural deficit of \$7.6 billion projected for 2022-23 that is forecast to grow to over \$11 billion by 2024-25.

This will also constrain the state's ability to undertake expanded ongoing commitments.

Finally, initial estimates project that Proposition 4, the State Appropriations Limit or "Gann Limit," will be exceeded for just the second time since its passage in 1979. The limit is currently projected to be exceeded by \$102 million. Any funds above this limit are constitutionally required to be allocated evenly between schools and a tax refund. An updated calculation of this limit will be included in the May Revision.

^{1/} Budget shortfalls or surplus, measured by the annual Governor's Budget.

IMMEDIATE ACTIONS

In December, the state approved two vaccines for distribution and is expediting their equitable distribution. As the state continues to respond to the COVID-19 Pandemic, the Budget supports expanding hospital capacity, testing, contact tracing, and securing needed personal protective equipment. The state also continues efforts to support the health care workforce and vulnerable populations, including individuals experiencing homelessness, farmworkers, and seniors.

IMMEDIATE RELIEF TO INDIVIDUALS AND SMALL BUSINESSES

In recognition of the disproportionate impact the COVID-19 Pandemic has had on low-income Californians and small businesses, the Budget proposes \$3 billion of pandemic relief for immediate action in January. This package includes:

- \$2.4 billion for the Golden State Stimulus—a \$600 state payment to low-income workers who were eligible to receive the earned income tax credit in 2019.
- An additional \$575 million for grants to small businesses and small non-profit cultural institutions disproportionately impacted by the pandemic, bringing total relief this year for small businesses to over \$1 billion.
- Immediate and targeted fee relief for impacted industries, including restaurants and personal services.

The federal COVID-19 relief bill approved in late December extends unemployment benefits by 11 weeks and adds \$300 to weekly payments, provides one-time \$600 payments to individuals, and includes support for small business, local transit, and schools. (The Potential Estimates for California: Coronavirus Response and Relief Supplemental Appropriations Act figure summarizes the major provisions of the federal COVID-19 relief bill.) This relief package will provide needed support in the first few months of 2021 to households hardest hit by the pandemic. However, more federal relief is needed, as the economic impacts of the pandemic are projected to extend beyond the first quarter of 2021.

SAFE REOPENING OF SCHOOLS AND ADDRESSING PANDEMIC IMPACTS ON STUDENTS

The vast majority of California's K-12 and higher education students have shifted to distance learning since March 2020. While school districts and teachers have done a tremendous amount to improve the quality of education from the first emergency programs, continued distance learning poses challenges to student achievement and well-being—especially for the youngest students and those in special education.

The Budget proposes immediate action in January to provide \$2 billion for the safe reopening of schools beginning in February, with a priority for returning the youngest children (transitional kindergarten through 2nd grade) and those with the greatest needs first, then returning other grade levels to in-person instruction through the spring. These payments to school districts will be structured to extend only to those districts that are already open or make plans to return students to campus for safe in-person instruction. This will accompany guidance from the California Department of Public

Potential Estimates for California
Coronavirus Response and Relief Supplemental Appropriations Act
(Dollars in Billions)

Cost Areas	Available Nationwide	California Estimate
Individuals and Families	\$326.4	\$42.4

Broadband/Telehealth	\$7.0	TBD
Totals	\$887.0	\$105.5

Health on safety measures, including testing schedules for students, teachers and staff, as well as a revised framework for state technical assistance, transparency and enforcement.

The Budget also includes \$4.6 billion Proposition 98 General Fund for extending learning time, including summer school programs and other strategies to address the

pandemic's impacts on student learning. To provide time to plan for these interventions, the Budget proposes early action by the Legislature this spring to approve these funds.

EDUCATION, JOBS AND ECONOMIC RECOVERY

The K-12 and higher education systems are critical to positioning the state for sustained recovery and growth, and the Budget prioritizes funding for these systems. To accelerate job creation and an equitable recovery, the Budget includes targeted short-term business incentives, including micro-grants for entrepreneurship in underserved communities.

K-14 EDUCATION

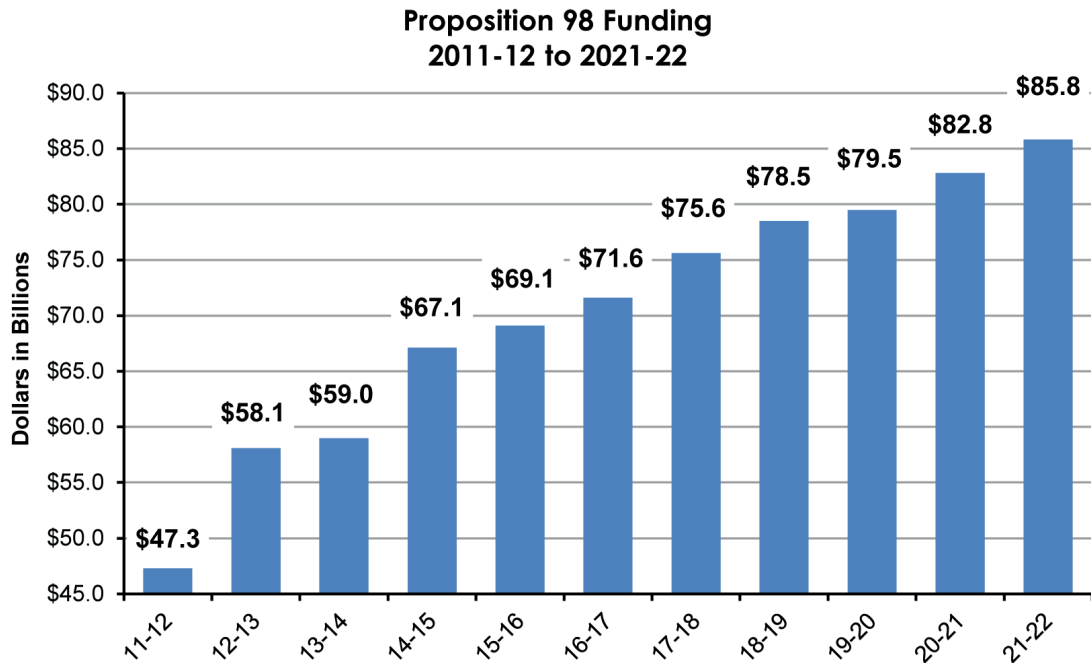

Under Proposition 98, the Budget's improved revenue estimate results in not only significantly more funding for schools, but also the highest funding level ever at \$85.8 billion. The 2020 Budget Act included a supplemental payment in addition to the Guarantee because of a projected anomaly in the school funding formula. Even though this anomaly no longer exists, the Budget continues to commit \$2.3 billion General Fund one-time in recognition of the additional costs schools face as they respond to the pandemic.

The Budget directs a significant portion of additional funding to paying down nearly two-thirds of the deferrals implemented last year and provides a 3.84-percent cost-of-living adjustment to the Local Control Funding Formula. The significant growth in capital gains and overall General Fund revenue growth also triggers deposits of roughly \$3 billion into the Public School System Stabilization Account, resulting in a statutory cap of 10 percent on local school district reserves in 2022-23.

ADDRESSING STUDENT MENTAL HEALTH

The Budget recognizes the toll the COVID-19 Pandemic has taken on mental health—especially students'—and proposes \$400 million in one-time funding to implement an incentive plan through Medi-Cal managed care plans, in partnership with county behavioral health departments, to increase the number of students receiving preventative and early intervention behavioral health services by schools.

The Budget also includes \$265 million one-time Proposition 98 General Fund to develop a range of community school models that holistically address the needs of children, \$50 million one-time Proposition 98 General Fund to create statewide resources and provide professional development on social emotional learning and trauma-informed

practices, and \$25 million one-time Mental Health Services Fund to fund partnership grants between county behavioral health departments and school districts.

EARLY EDUCATION AND CHILD CARE

Since 2019, the state has invested approximately \$400 million ongoing to expand early education and child care. The COVID-19 Pandemic has disrupted the child care system and federal funding has been critical to reducing long-term losses in this system. The Budget focuses on avoiding further loss in this system and builds on the recommendations made in the Master Plan for Early Learning and Care. It expands high-quality transitional kindergarten programs for all four-year-olds by allocating \$250 million one-time Proposition 98 General Fund in incentive funds for districts that expand these programs. The Budget also includes \$200 million one-time General Fund for transitional kindergarten and kindergarten facilities and \$50 million one-time Proposition 98 General Fund for professional development focused on preparing teachers for early childhood programs.

The Administration has already begun the collective bargaining process with representatives of child care providers to negotiate a memorandum of understanding that governs the payments made to these providers. The Budget also reflects \$44 million ongoing Cannabis Funds for 4,500 more child care vouchers, including \$21.5 million in 2020-21.

HIGHER EDUCATION AND WORKFORCE

California's higher education system continues to be exceptional, and more must be done to provide opportunities for underrepresented student groups and to reverse the significant pandemic-related decline in enrollment experienced in the community college system.

The Budget proposes early action for community college funding to provide emergency financial assistance and to re-engage students who have left higher education during the pandemic. The Budget also includes additional student supports for all three of the state's higher education systems for the coming year.

The Budget proposes a total of \$786 million General Fund for the University of California and the California State University with an expectation that they focus on measurable goals to address equity gaps, further maintain online educational opportunities, and expand dual admissions and other innovative strategies that reduce time to degree completion. The Budget also assumes resident tuition and fees remain flat in 2021-22.

The pandemic will likely have a permanent impact on the types of available jobs and the skills needed by employers. Workforce retraining, especially for those now unemployed, is a high priority in the Budget, which proposes for early action \$25 million one-time General Fund to immediately expand existing High Roads Training Program apprenticeship programs that will result in thousands of new jobs and training for new careers. The Budget also includes additional funding for the California Apprenticeship Initiative work-based learning opportunities through the community colleges.

The Budget proposes \$250 million one-time General Fund to support workforce development and better linkages between higher education and gainful employment. This will focus on communities that have been systematically excluded from opportunities to build skills and create wealth.

ACCELERATING ECONOMIC RECOVERY AND JOB CREATION

Advancing an equitable and broad-based recovery is a focus of the Budget as unemployment levels remain high and economic inequality has been exacerbated by the pandemic. This effort builds on actions taken in 2020 to support small businesses, including the elimination of the first year of the minimum franchise tax, expansion of small business loan guarantees, and creation of a new Main Street hiring tax credit. The Budget includes the following to accelerate economic recovery and job creation:

- \$777.5 million for a California Jobs Initiative to provide incentives targeted at accelerating investment and job creation;
- \$353 million for workforce development;
- \$1.5 billion for the infrastructure and incentives to implement the state's zero-emission vehicle goals;
- \$500 million for infill infrastructure to accelerate housing development;
- \$385 million for targeted investments to build a more sustainable agricultural industry; and
- \$300 million for deferred maintenance and greening of state infrastructure.

The Budget proposes early action on a portion of these incentives in the spring to accelerate recovery before the 2021-22 fiscal year begins in July.

The Governor's Future of Work Commission was established to develop recommendations to California leaders to support inclusive, long-term economic growth and prosperity for all Californians. The Commission plans to issue a report this month that will focus on the impact of technology on the workforce, job quality, wages and working conditions, worker safety nets, and workforce training.

ADDRESSING HEALTH CARE AFFORDABILITY AND AGING

The COVID-19 Pandemic has accentuated the need for health care for all. While responding to the COVID-19 Pandemic, the state continues to work on long-term plans to reduce the costs of health care by lowering prescription drug costs; the Budget includes the creation of a new Office of Health Care Affordability. The Office will increase quality and cost transparency, develop cost targets, and evaluate consequences for entities that fail to meet the targets.

During the pandemic, Covered California has extended enrollment periods to encourage individuals to enroll who may have lost their jobs and employer-based insurance due to the pandemic. The Budget also creates the Office of Medicare Innovation and Integration to support long-term care innovation in commercial Medicare Advantage Plans to leverage and integrate models under Medi-Cal, such as the Home and Community Based Services Waiver.

The Budget proposes to implement the California Advancing and Innovating Medi-Cal (CalAIM) initiative to reduce variation and complexity in the state's Medi-Cal program,

manage member risk and need, and improve outcomes through payment reform. CalAIM will target and coordinate care for vulnerable populations with complex health needs that currently drive high-costs. The effort will include housing-related services and flexible wrap-around services so health plans may avoid costlier alternatives to hospitalization, skilled nursing facility admission, and/or discharge delay.

The Budget recognizes the extraordinary challenges older Californians and their families face during the COVID-19 Pandemic, and proposes a range of investments to increase opportunities for Californians to age well over the next decade, including developing new strategies with the federal government to leverage Medicare to provide additional long-term services and supports.

HOUSING AND HOMELESSNESS

The state continues to make progress in addressing the housing availability and affordability crisis that has been exacerbated by the COVID-19 Pandemic. In addition to the \$500 million one-time General Fund for infill infrastructure mentioned earlier in this Chapter, the Budget also proposes an additional \$500 million in low-income housing tax credits to support low-income housing development. The Administration is streamlining and reorganizing state housing programs to maximize housing production, while also continuing to support below-market rate housing.

Through Homekey—a recent effort to acquire motels for homeless housing to respond to the COVID-19 Pandemic—the state has awarded \$846 million to 51 local agencies to secure over 6,000 units of permanent housing for individuals and families who had been homeless. However, a comprehensive response to homelessness requires a continuum of supports. For too long, the state and local governments have provided only short-term mitigation strategies, and have not developed a comprehensive framework for addressing permanent solutions. The Budget includes \$1.75 billion one-time General Fund to purchase additional motels, develop short-term community mental health facilities, and purchase or preserve housing dedicated to seniors. The Budget also proposes changes to the state's Medi-Cal system to better support behavioral health and housing services that can help to prevent homelessness.

EMERGENCY RESPONSE AND PREPAREDNESS

In 2020, the state experienced catastrophic wildfires that consumed over four million acres, far more than any previous year in the state's history. The historic emergency response, while combatting the COVID-19 Pandemic at the same time, strained the

state's emergency response capabilities. The Administration is developing a spring proposal to strengthen the Governor's Office of Emergency Services' ability to respond to emergencies and support recovery efforts, especially in vulnerable communities.

Building on significant investments in the state's firefighting capabilities, the Budget adds \$143 million General Fund to support 30 new fire crews, and also includes \$48 million to continue phasing in Black Hawk helicopters and large air tankers.

CLIMATE CHANGE ACTION

As mentioned earlier in this Chapter, the Budget proposes a \$1.5 billion comprehensive strategy to achieve the state's zero-emission vehicle goals by 2035 and 2045, including securitizing up to \$1 billion to accelerate the pace and scale of the infrastructure needed to support zero-emission vehicles.

The Budget proposes an additional \$1 billion to support a coordinated forest health and fire prevention strategy that maximizes technology and science-based approaches to protect state forestlands. The Budget proposes \$323 million for early action in the spring to start these forest health and fire prevention projects before the next fire season.

The Budget includes strategic investments for the Department of Fish and Wildlife to enhance its ability to protect the state's unique biodiversity in the face of climate change, and to support California's agriculture industry as it addresses continued challenges while also producing nutritious food and advancing the state's climate resilience objectives.

ENVIRONMENTAL JUSTICE

The Budget includes \$300 million one-time General Fund for toxic site cleanup and investigations of high-priority contaminated properties in impacted communities across the state, which will be prioritized based on public health risk criteria. Further, the Budget creates incentives to clean up and develop these sites for future housing. The Budget also proposes comprehensive governance and fiscal reform for the Department of Toxic Substances Control that will provide for the support needed in the long term to address future cleanups of orphan sites and the reduction of harmful toxic substances in the environment.

The Budget includes a multi-faceted approach to reducing harmful pesticides and supports the transition of the agricultural industry to integrated pest management and more regenerative practices.

RESULTS-ORIENTED GOVERNMENT AND DIGITAL TRANSFORMATION

The COVID-19 Pandemic has required many businesses to be flexible, creative, and innovative. As the employer of a workforce of over 250,000, the state also responded immediately by putting in place a statewide telework program and new ways to conduct state business. This shift has meant the state must also evaluate its portfolio of state leases to determine spaces that can be released and/or consolidated.

The Budget assumes a five-percent permanent reduction in state operations expenditures, challenging departments and agencies to find more efficient means to provide services to Californians.

The Budget also makes major investments to provide additional support to the California Department of Technology to bolster its ability to review and improve upon critical state information technology systems before a failure occurs. In addition, the Office of Digital Innovation continues to lead state government in the transformation of consumer-facing services.

PLANNING FOR THE FUTURE

There are considerable risks to the forecast, including more widespread bankruptcies and a fall in the stock market, which could affect higher-income workers who contribute heavily to revenues. A strong reserve has supported the state in its direct response to the COVID-19 Pandemic and protected the state's core funding responsibilities. Reserves will be critical to balancing the budget in future years along with other solutions to bring spending and revenues into alignment. For now, the state must do all that it can to avoid further hardship by continuing to fight the COVID-19 Pandemic and support the populations most impacted, while also making targeted investments to accelerate an equitable and broad-based recovery.

While the state is currently in the midst of a second and more serious wave of the COVID-19 Pandemic, vaccinations are arriving in the state and science and medicine continue to make advances in treating the virus. California will overcome this challenge as it has overcome challenges in the past. The state, its businesses and its people will recover and will emerge stronger and more resilient. The Budget allocates funding to

address the inequities exacerbated by the pandemic and to prepare the state for the future.

(Dollars in Millions)

Immediate Action Package
Safely Reopen Schools and Accelerate Economic Recovery
(Dollars in Millions)

Proposal	Description	Funding
Reopen Schools		\$2,000
Safe Reopening of K-12 Schools	Provide Proposition 98 General Fund for health and safety supplies and services to support in-person instruction for grades K-6.	2,000
Direct Support for Workers and Small Business		\$3,046
Low-Income Tax Refund	Provide tax refund payments of \$600 to nearly 4 million low-income Californians.	2,400
Small Business Aid	Provide additional funds for small business grants, including small non-profit cultural institutions.	575
Fee Waivers for Heavily Impacted Service Industries	Provide license and fee waivers for businesses and individuals heavily impacted by COVID-19, including those licensed by the Board of Barbering and Cosmetology and Department of Alcoholic Beverage Control.	71
Total Immediate Action Package		\$5,046

Early Action Package
Address Pandemic Impacts on Students and Accelerate Economic Recovery

(Dollars in Millions)

Proposal	Description	Funding
Student Supports		\$4,677
K-12		
Extended Learning Time	Provide Proposition 98 General Fund to expand learning time with an emphasis on increasing in-person instructional minutes and evidenced-based interventions and supports to students that are either one grade-level or more behind or credit deficient in core subject matters.	4,557
Higher Education		
Emergency Financial Assistance	Provide Proposition 98 General Fund for emergency financial assistance for community college students.	100
Community College Retention Rates and Enrollment	Provide Proposition 98 General Fund to support efforts to bolster community college student retention rates and enrollment.	20
Jobs and Workforce Training		\$973
Jobs and Regional Development—CalCompetes	Expand CalCompetes Tax credit, which includes making tax credits refundable.	340
Wildfire and Forest Resilience	Accelerate fire prevention projects before the 2021 fire season by increasing the pace and scale of existing fire prevention efforts to reduce wildfire risk and jumpstart economic recovery in the forest sector.	323
Jobs through Jump Starting Housing Development Locally	Provide Infill Infrastructure Grants to bolster housing production and support job creation.	250
Small Businesses—California Dream Start-up Grants	Provide micro-grants of up to \$10,000 to seed entrepreneurship and small business creation in underserved groups.	35
Workforce Development—High Roads Apprenticeship Program	Expand existing High Roads Training Program that will result in thousands of new apprenticeships and pre-apprenticeships, leading to thousands of new jobs and training for new careers.	25
Environmental Sustainability		\$561
Cap & Trade Expenditure Plan	Protect public health in disadvantaged communities and support implementation of Executive Order N-79-20 to accelerate zero-emission vehicles.	394
Sustainable Agriculture	Provide technical assistance for underserved farmers, support for regulatory relief efforts, farming water efficiencies, sustainable ground water management, and climate smart agriculture programs.	162
Bottle Bill	Expand pilot programs to increase consumer redemption of beverage containers in communities underserved by recycling centers.	5
Housing and Homeless		\$262
Homekey Housing	Expand Homekey competitive grants to local governments to purchase and rehabilitate housing and convert them into interim or permanent long-term housing.	250
Trial Court Workload for Eviction Protections	Provide trial courts with resources to process the anticipated increase in unlawful detainer and small claims filings resulting from AB 3088.	12
Other		\$56
County Probation Departments	Enhance services for juvenile and adult populations under the jurisdiction of county probation departments.	50
California Creative Corps	Provide resources for the Arts Council to partner with various organizations to develop a media, outreach, and engagement campaign to inspire safe and healthy behavior and increase the trust factor across California's diverse populations to increase vaccine adoption.	5
GO-Biz Staffing Resources	Administer various grant programs within the California Jobs Initiative and create an Energy Unit to facilitate the implementation of projects that will help to achieve climate goals and increase energy reliability.	1
Total Early Action Package		\$6,529

EQUITABLE AND BROAD-BASED RECOVERY

As it recovers from the COVID-19 Recession, California will continue to leverage what is unique to the state—a culture of innovation, a world-class educational system, a commitment to climate science, and a strong and skilled workforce.

The COVID-19 Pandemic and the resulting recession brought a halt to more than ten years of economic growth and ushered in a nationwide recession in February 2020. California's unemployment rate increased from a record low of 3.9 percent in February to a record high of 16.4 percent in April and May. The pandemic also exacerbated underemployment; the percentage of the working age population in the labor force decreased from 62.3 percent in the first quarter of 2020 to 59.8 percent in the second quarter, as parents and others dropped out of the workforce. Almost half of all leisure and hospitality workers, typically a low-wage sector, lost their jobs; higher wage sectors such as professional and business services largely were able to shift to working from home. There were still 1.4 million fewer employed Californians in November than in February. Before the recent federal COVID-19 relief bill, the Coronavirus Response and Relief Supplemental Appropriations Act was enacted in late December, millions of Californians were expected to lose needed unemployment insurance or other forms of support starting at the end of 2020.

Many businesses struggling now can return to profitability in the future as the economy recovers from the COVID-19 Pandemic. There will also be other opportunities for growth, but the pattern of jobs will likely be different, as will the types of businesses that are poised for growth.

EQUITABLE AND BROAD-BASED RECOVERY

The Budget proposes a broad-based recovery package to support businesses, individuals and job creation both during the pandemic and as the state recovers. It totals \$14 billion, including \$3.5 billion in immediate relief for individuals and small businesses disproportionately impacted by the pandemic. This package will support the next generation of innovators, and help prepare the workforce for the jobs of the future. Given the urgent need, the Administration proposes that the Legislature take action in early 2021 on the majority of the package. It is summarized in the table below.

Equitable and Broad-Based Recovery Package

(Dollars in Thousands)

Immediate Relief	2020-21	2021-22	Total	Timing
Golden State Stimulus	\$ 2,400,000	\$ -	\$ 2,400,000	Early Action
1st Round of Small Business Grants	\$ 500,000	\$ -	\$ 500,000	DREOA
2nd Round of Small Business Grants	\$ 550,000	\$ -	\$ 550,000	Early Action
Fee Waivers	\$ 70,600	\$ -	\$ 70,600	Early Action
Cultural Institutions Grants	\$ 25,000	\$ -	\$ 25,000	Early Action
Immediate Relief Total	\$ 3,545,600	\$ -	\$ 3,545,600	
<u>California Jobs Initiative</u>

Schools Reopening	\$ 2,000,000	\$ -	\$ 2,000,000	Early Action
Schools Extended Learning Time	\$ 4,557,000	\$ -	\$ 4,557,000	Early Action
Housing	\$ 250,000	\$ 250,000	\$ 500,000	Early Action/2021 Budget
Deferred Maintenance	\$ -	\$ 300,000	\$ 300,000	2021 Budget
Agriculture Package	\$ 162,400	\$ 222,200	\$ 384,600	Early Action/2021 Budget
Climate Catalyst Fund: Forest Resilience	\$ 47,000	\$ -	\$ 47,000	Early Action
Zero-Emission Vehicle Package	\$ 239,000	\$ 226,000	\$ 465,000	Early Action/2021 Budget
Zero-Emission Vehicle Securitization	\$ -	\$ 1,000,000	\$ 1,000,000	2021 Budget
Other Total	\$ 7,255,400	\$ 1,998,200	\$ 9,253,600	
Equitable and Broad-Based Recovery Total	\$ 11,213,500	\$ 2,716,100	\$ 13,929,600	

*The actual General Fund impact will be spread over multiple fiscal years.

In addition to the other immediate relief for individuals and small businesses, the California Jobs Initiative and workforce development proposals described in this Chapter, the \$14 billion recovery package also includes the following components:

- **Safe Reopening of Schools**—Early action to support the safe return to in-person instruction will not only address the learning gap, but will allow parents who have been shouldering a heavy burden during the distance learning model to return to the workforce or regain full-time employment. The Budget includes \$2 billion for the safe reopening of schools beginning in February. See the K-12 Education Chapter for more information.
- **Student Learning Measures**—The Budget also proposes early legislative action on \$4.6 billion Proposition 98 General Fund for extending learning time, including summer school programs and other strategies to address the pandemic's impacts on student learning. See the K-12 Education Chapter for more information.
- **Zero-Emission Vehicle Investments**—The Budget includes \$465 million for zero-emission vehicles, to spur economic activity while supporting the state's zero-emission targets. The Budget also includes the securitization of approximately \$1 billion in future revenues for job-creating construction of electric vehicle charging and hydrogen fueling stations necessary to accelerate zero-emission vehicle adoption. See the Climate Change Chapter for more information.
- **Infill Infrastructure Grant Program**—The Budget includes \$500 million one-time General Fund, \$250 million for early action by the Legislature, to create jobs and long-term housing development. See the Housing and Homelessness Chapter for more information.
- **Agricultural Investments**—Recognizing that many agricultural sectors continue to struggle during the pandemic, the Budget includes a total of \$384.6 million to support farmers with technical assistance, regulatory changes, and climate smart agriculture investments. See the Sustainable Agriculture Chapter for more information.
- **Deferred Maintenance**—Maintenance of the state's existing infrastructure provides jobs to Californians. The Budget includes \$300 million one-time General Fund for the most critical statewide deferred maintenance, including greening of state infrastructure. See the Climate Change Chapter and the 2021 Five-Year Infrastructure Plan for further information.

Government investment in infrastructure projects also creates good jobs. While not enumerated in the recovery package, the Budget also includes \$10 billion—and a total of \$52 billion over the next five years—for state infrastructure such as highways, roads, High-Speed Rail, state buildings, and K-14 school buildings and will include the

acceleration of projects to the extent practicable. See the Infrastructure section below and the 2021 Five-Year Infrastructure Plan for further information.

IMMEDIATE RELIEF FOR INDIVIDUALS AND BUSINESSES

Even with the recent additional federal COVID-19 relief funding, Californians continue to face significant hardships—especially those with the lowest income levels who have been hardest hit by the COVID-19 Recession. The state will continue to work with Congress and the incoming Administration to advance the state's priorities for future stimulus packages, including additional support for state and local relief along with the flexibility to prioritize how the funds are used to address gaps in federal assistance and increases in programs to support those facing the greatest hardships.

The Budget includes additional state actions to provide immediate relief to low-income families, small businesses, and nonprofits that have been hardest hit by the pandemic. These proposals are for immediate action by the Legislature in early 2021.

GOLDEN STATE STIMULUS

As discussed in the Revenue Estimates Chapter, the Golden State Stimulus is a tax refund for low-income households intended to provide cash support to families who are most likely to have suffered economically from the COVID-19 Pandemic. Regardless of income, all Californians pay a variety of taxes, including on the purchase of taxable goods. Totalling \$2.4 billion, this proposal would refund \$600 of those taxes to all 2019 taxpayers who received a California Earned Income Tax Credit (Cal EITC) in 2020 as well as to 2020 taxpayers with individual tax identification numbers (ITINs) who receive a Cal EITC in 2021.

Focusing on EITC recipients allows for a timely identification and location of the population that likely started 2020 with few resources. Lower-wage workers also disproportionately lost their jobs during the pandemic. The payments would be sent mostly in February and March of 2021 (ITIN taxpayers would receive the additional tax refund after they file their 2020 tax return, typically in February through April of 2021). The timing of these refunds is meant to help low-income households immediately with expenses like food and rent.

SMALL BUSINESS GRANTS

In November, the Administration and the Legislature announced the creation of an emergency COVID-19 Relief Grant Program with a \$500 million one-time General Fund allocation. The program is administered by the California Office of the Small Business Advocate (CalOSBA) within the Governor's Office of Business and Economic Development (GO-Biz) for small businesses that have been impacted by the COVID-19 Pandemic and the related health and safety restrictions.

Grants up to \$25,000 will be distributed across the state, with priority given to regions and industries impacted by health and safety guidance and stay-at-home orders, disadvantaged communities, and underserved small business groups.

Relief is critical to small business retention and is more effective with layered support. CalOSBA's selected intermediary will partner with a statewide network of mission lenders and nonprofits with strong connections to the targeted small businesses to provide an equitable distribution and additional wrap-around services including loans and technical assistance.

To provide continued assistance to small businesses and nonprofits, the Budget includes an additional \$550 million one-time General Fund allocation for relief grants to impacted small businesses and nonprofits. This additional investment will bring total investments to \$1.05 billion to help meet the expected demand.

CULTURAL INSTITUTIONS

Cultural institutions have a mission to engage in the conservation, interpretation and dissemination of cultural, scientific, and environmental knowledge, and promote activities meant to inform and educate Californians on associated aspects of culture, history, science, and the environment. Smaller cultural institutions, including museums and art galleries, have been constrained by the COVID-19 Pandemic in their ability to educate the community and remain financially viable. The Budget includes \$25 million one-time General Fund to provide grants to the smallest cultural institutions in the state that have been impacted by the pandemic.

FEE WAIVERS FOR COVID-19 IMPACTED BUSINESSES

The Budget includes \$70.6 million one-time General Fund to provide fee waivers to individuals (including barbers, cosmetologists, and manicurists) and smaller entities

(restaurants and bars) heavily impacted by health and safety restrictions imposed in response to the pandemic. Licensees of the Board of Barbering and Cosmetology will receive relief from annual license renewals over the next two-year renewal period. Restaurants and bars will also be eligible for fee waivers in 2021.

CALIFORNIA JOBS INITIATIVE

More businesses start in California than anywhere else in the United States, including many green technology businesses. Many of California's new businesses have gone on to become industry leaders, a direct result of the state's world-class colleges and universities, state-of-the-art laboratories, skilled workforce, and the state's commitment to combating climate change.

In order to support California business owners as they reopen their doors, rehire staff, and expedite the state's economic recovery, the Administration proposes the California Jobs Initiative. This initiative focuses on job creation and retention, regional development, small businesses, and climate innovation.

JOBS AND REGIONAL DEVELOPMENT

INCREASED INVESTMENT IN CALCOMPETES

The California Competes Tax Credit (CalCompetes) has been in effect since 2014 and incentivizes businesses to locate in California or to stay, grow, and create quality full-time jobs in the state. Since its inception, the Governor's Office of Business and Economic Development (GO-Biz) has awarded nearly 1,100 businesses over \$1.2 billion in tax credits for commitments to create 124,000 new, full-time jobs and made over \$24 billion in capital investments in the state. The total credit amount is capped at \$180 million per year plus any unallocated or recaptured credits from the prior year. The competitive allocation is based on twelve different factors, including the number of full-time jobs created and whether the jobs are at risk of being created in another state. The CalCompetes credit is a non-refundable tax credit. If a business earns a credit (by achieving all of its contractual milestones for that tax year) in a particular year and the earned credit exceeds the business' current year tax liability, the business receives no immediate benefit from the excess credit, but the excess credit can be carried forward to offset tax in six subsequent tax years.

In recent years, the CalCompetes program has received applications far in excess of available credits. As California recovers from the COVID-19 Recession, the Budget

increases the amount of credit available for allocation by \$90 million in both 2020-21 and 2021-22 for a total of \$270 million per year. This will provide additional incentives to accelerate job creation in the state. This is part of a package of proposals on which the Administration requests the Legislature take early action in 2021.

INCREASED INVESTMENT IN CALIFORNIA'S BUSINESSES

The CalCompetes program has demonstrated tremendous success, but more needs to be done given the historic COVID-19 Pandemic. The Budget includes \$250 million one-time General Fund to increase business investment in California. This is part of a package of proposals on which the Administration requests the Legislature take early action in 2021. This funding will establish a grant component of CalCompetes with a more targeted focus. To be eligible for a grant, businesses will need to meet one or more of the following criteria: establish at least 500 net new jobs; make a significant infrastructure investment; commit to a high-need, high-opportunity area of the state; or receive a designation from the Director of GO-Biz that the application is a strategic priority of the state. Similar to the CalCompetes Tax Credit program, applicants will be brought to the CalCompetes Committee for approval.

Establishing a grant component in CalCompetes will expand the pool of businesses that can benefit from the program. There are three types of businesses that would benefit from grants: (1) companies that continuously reinvest profits into the business, generating either significant research and development tax credits and/or net operating losses (NOLs) resulting in little to no tax liability; (2) smaller businesses with relatively low income tax liability; and (3) startups with little to no tax liability.

A CalCompetes grant program is an additional incentive for businesses conducting multi-state site selection analyses for future growth, and is intended to improve the quality of the applicant pool in terms of job creation.

The new program will dedicate at least \$50 million of the \$250 million one-time General Fund to high-need, high-opportunity areas of the state.

SMALL BUSINESSES

Small businesses are critical drivers of economic growth and mobility—creating two-thirds of net new jobs, building wealth in communities, and innovating to solve global problems. California's 4.1 million small businesses represent 99.8 percent of all businesses and employ 48.5 percent of the private workforce. The COVID-19 Pandemic and its related economic impact have transformed the landscape of California's small

businesses. Opportunities exist for new business creation as entrepreneurs and small businesses innovate. The Budget includes several investments to assist small businesses in recovery and future growth and innovation.

MAIN STREET SMALL BUSINESS TAX CREDIT

Chapter 41, Statutes of 2020 (SB 1447) was enacted in September 2020 and created a hiring credit against California state income taxes or sales and use taxes for qualified small business employers. This credit is capped at an aggregate amount of \$100 million and is intended to help struggling small businesses. It also encourages hiring new employees and rehiring former employees. The Budget allocates an additional \$100 million in 2021-22 to create a similar hiring credit.

MITIGATING THE SALT DEDUCTION LIMITATION FOR S-CORPORATIONS SHAREHOLDERS

The Budget contains a provision that allows S-corporation shareholders a credit against tax equal to 13.3 percent of their S-corporation income in order to help them recoup some of the tax benefits lost by Californians when the State and Local Tax (SALT) deduction was limited as part of the 2017 federal Tax Cut and Jobs Act. The Elective S-corporation Tax is expected to on net to produce a revenue gain between \$0 and \$20 million starting in 2021-22.

THE CALIFORNIA DREAM FUND

The COVID-19 Pandemic has produced unprecedented market fluctuation, causing lenders and their investors to tighten restrictions on credit and reduce available capital, especially in higher-risk industries impacted by the pandemic. People of color, women and immigrants are the backbone of the state's economy, but these communities have historically had trouble accessing capital, particularly during volatile markets.

For illustrative purposes, based on 2012 census data, one report provides the following example: if the number of people of color and women-owned businesses matched their percentage of the labor force, and if their business revenues equaled traditional firms, they could have produced \$6.8 trillion in gross receipts nationwide—nearly three times their actual output of \$2.4 trillion in that year. Addressing this systemic inequity is critical as California is one of the most diverse states in the country with people of color accounting for 63 percent of the state's population.

The Budget includes \$35 million one-time General Fund to support micro-grants up to \$10,000 to seed entrepreneurship and small business creation in underserved groups that are facing opportunity gaps. These California Dream Fund startup grants will be

made available through small business technical assistance centers to eligible startups actively participating in trainings and advisory services to help provide greater acceleration rates and successful outcomes. This is part of a package of proposals on which the Administration requests the Legislature take action early in 2021.

IBANK'S SMALL BUSINESS FINANCE CENTER AND THE CALIFORNIA REBUILDING FUND

The California Infrastructure and Economic Development Bank's (IBank) Small Business Finance Center manages small business loan and disaster loan guarantees, Climate Tech guarantees, and direct lending programs such as Jump Start start-up loans; in addition, it can quickly add new programs aimed at small businesses. These programs provide financial assistance needed by small businesses and will contribute to the long-term recovery of California's economy.

The 2020 Budget Act provided \$25 million one-time General Fund as the anchor investment to help create the California Rebuilding Fund, intended to aggregate funding from private, philanthropic, and public sector sources to address the capital needs of California's small businesses as they reopen and recover from the impacts of the COVID-19 Recession. The California Rebuilding Fund is intended to serve the smallest of small businesses that make up an essential part California's economy. With recent state commitments of up to \$37.5 million, including the additional allocation of \$12.5 million one-time General Fund announced by the Administration on November 30, 2020, the Fund is expected to provide over \$125 million of capital available for loans to small businesses.

The Budget includes \$50 million one-time General Fund to use across IBank's programs, with a focus on programs that benefit underserved businesses in California.

IBANK SMALL BUSINESS LOAN GUARANTEE PROGRAM

Originally funded by the General Fund and the State Small Business Credit Initiative (SSBCI) created by the federal Small Business Jobs Act of 2010, the Small Business Loan Guarantee Program is the principal program of the Small Business Finance Center. The \$84 million authorization from SSBCI received in 2011 was used to guarantee up to 80 percent of loan amounts in support of small businesses and funds continue to revolve and serve thousands of additional small businesses through this year.

However, the program is approaching full capacity and requires additional funding. The current funds available for small business guarantees (from the IBank Small Business Loan Guarantee Program) will be fully leveraged by Summer 2021. The Budget includes \$50 million one-time General Fund so this program can continue to provide loans as

businesses recover from the COVID-19 Recession. This will be leveraged to provide up to \$250 million in loans. This program is utilized by larger small businesses with larger loan sizes (average amount of \$500,000 or more).

The IBank funding discussed in this Chapter will assist small business recovery once the influx of grants at the federal and state level are fully utilized.

CLIMATE INNOVATION

CALIFORNIA ALTERNATIVE ENERGY AND ADVANCED TRANSPORTATION FINANCING AUTHORITY (CAEATFA) SALES TAX EXCLUSION

The CAEATFA offers sales and use tax exclusions to innovative manufacturers that promote alternative energy and advanced transportation. To encourage economic development along with the development of green technologies, the Budget proposes an additional one-time investment of \$100 million in 2021-22 to the CAEATFA sales tax exclusion program.

CLIMATE CATALYST FUND

The 2020 Budget Act included statutory changes to establish the Climate Catalyst Fund, a financing tool to provide revolving loans for climate-related projects. The Budget includes \$47 million one-time General Fund in 2020-21 in the wildfire and forest resilience package and \$50 million one-time General Fund for agriculture-specific activities (i.e., methane reduction projects; equipment replacement; water efficiency; healthy soils; and energy efficiency for food processing) that will be deposited for use in the Climate Catalyst Fund. For additional information, see the Climate Change and Sustainable Agriculture Chapters.

WORKFORCE DEVELOPMENT

While exacerbating trends have been underway for years, the pandemic has increased the need for worker training programs—many new jobs may require more telework, and will necessitate the development of new skills. In many cases, getting Californians back to work after the COVID-19 Pandemic will require additional workforce retraining opportunities and further coordination between California's universities, colleges, community colleges, and local workforce partners. To address this need, the Budget includes one-time and ongoing investments totaling \$332.9 million General Fund and

\$35 million Proposition 98 General Fund, as specified below, in areas that will support an equitable recovery.

SUPPORTING LINKAGES BETWEEN HIGHER EDUCATION AND EMPLOYMENT OPPORTUNITIES

As referenced in the Higher Education Chapter, the Budget sets aside \$250 million one-time General Fund to support forthcoming proposals that are focused on workforce development, segment alignment, and improving linkages between higher education institutions and employers.

EXPANDING WORK-BASED LEARNING OPPORTUNITIES

As referenced in the Higher Education Chapter, California's Community Colleges are central to training and developing the skilled workforce needed for the state to meet its ever-changing workforce needs and the state must prepare students with the skills needed by employers not only today, but into the future. The Budget includes \$35 million Proposition 98 General Fund to support the following investments in work-based learning:

- \$15 million ongoing Proposition 98 General Fund to augment the California Apprenticeship Initiative which supports the creation of apprenticeship opportunities in priority and emerging industry sectors.
- \$20 million one-time Proposition 98 General Fund to expand work-based learning models and programs at community colleges, including working with faculty and employers to incorporate work-based learning into curriculum.

OTHER HIGHER EDUCATION INVESTMENTS SUPPORTING WORKFORCE DEVELOPMENT

As referenced in the Higher Education Chapter, the Budget reflects the following higher education workforce development related proposals:

- Connecting Student Learning Objectives with Workforce Needs—Given the proposed investments in the California Community Colleges, California State

University, and University of California, the Administration expects the segments to better connect student learning objectives to workforce and industry needs.

- California Institutes for Science and Innovation—The Budget provides \$20 million one-time General Fund to four science and innovation institutes established on University of California campuses to support stipends for students over a five-year period and for research teams to link with industry partners to better align educational programs with workforce needs.
- UC Programs in Medical Education (PRIME)—The Budget provides \$12.9 million ongoing General Fund to support and expand existing UC Programs in Medical Education and to establish a new UC Program in Medical Education focused on Native American communities. The University of California is also encouraged to use these funds to support PRIME programs that would serve underrepresented areas of the state, and may establish additional PRIME programs that are state priorities.
- Computing Talent Initiative—The Budget provides \$10 million one-time General Fund to the California State University, Monterey Bay to support the Computing Talent Initiative. The Initiative will support a computer science acceleration program that will guide several cohorts of underrepresented computer science college students through a series of educational and employment-related modules and workshops, and help connect these students with industry professionals who can help them obtain employment in the sector.

LABOR AND WORKFORCE DEVELOPMENT PROGRAMS

As referenced in the Labor and Workforce Development Chapter, the Budget proposal, upon which the Administration is asking the Legislature to take early action, includes an expansion of the High Roads Training Program. An additional \$25 million one-time General Fund through the California Workforce Development Board will provide over 2,000 new apprenticeships and pre-apprenticeships to support the state's economic recovery. The proposal includes:

- Construction—\$8.5 million to expand construction apprenticeship and multi-craft pre-apprenticeship programs that will result in approximately 650 jobs.
- Forestry and Agriculture—\$6.5 million for training center jobs with utility tree contractors for wildfire prevention, resulting in 500 jobs.

- Healthcare—\$4 million to expand training for allied health roles to address COVID-19-related health care needs, including respiratory technicians and medical assistants, and a pilot for Registered Dental Assistants in partnership with the California Dental Association, resulting in 350 jobs.
- Trade and Logistics—\$4 million through Youth Works for a pilot training partnership program for youth in Ontario, Los Angeles, Visalia, and the Bay Area, resulting in 500 jobs.
- Information Technology—\$2 million to expand cybersecurity apprenticeships with public and private employers, resulting in 200 jobs.

INFRASTRUCTURE

The Administration recognizes the important role that infrastructure investments make in promoting economic stimulus. While many capital projects were paused in 2020 due to fiscal uncertainties related to the COVID-19 Pandemic, the 2021 Five-Year Infrastructure Plan (Plan) demonstrates renewed commitment to these investments as a contributor to California's economic recovery.

In addition to statewide investments in climate resilience and broadband programs, the Plan proposes \$52 billion in state infrastructure over the next five years, with investments in projects to renovate state office buildings, state hospitals and correctional facilities, and to replace fire stations and courthouses, among others. These investments in core state infrastructure will create jobs to support economic growth and recovery.

In addition, the Administration continues to prioritize economic recovery and investments in California's transportation infrastructure. The Department of Transportation (Caltrans) has continued to use new transportation revenues to accelerate construction projects and support job creation in the transportation sector. Caltrans estimates that approximately 11,000 jobs are created for every billion dollars spent on highway infrastructure. The California Transportation Commission invested \$22 billion for more than 1,200 projects in 2020, which created thousands of jobs. The projects funded will support a safe, sustainable transportation system that reduces congestion, improves the environment, and facilitates job creation and economic development throughout the state.

Nearly 40 percent of the funds approved by the Commission during the past year come from SB 1, the Road Repair and Accountability Act of 2017, which increased and stabilized state transportation funding. Since this legislation became law, project

allocations made by the Commission from all state and federal sources have generated an estimated 350,000 jobs. While fuel tax revenues used to fund transportation projects have leveled off temporarily due to reduced travel during the COVID-19 Pandemic, the Budget maintains current planning and engineering staffing levels to continue developing and designing previously programmed projects. Not only does Caltrans plan to award all of the projects it currently has programmed for construction in the coming year, but the continued project development work will support preparedness as additional stimulus funding becomes available.

While these state infrastructure investments are important, the federal government needs to provide additional funding for public works projects to assist with a swift recovery.

COVID-19 PANDEMIC RESPONSE

Since the onset of the COVID-19 Pandemic, California has taken action to save lives by mitigating active community transmission of COVID-19, including issuing a statewide stay-at-home order and instituting the use of masks and physical distancing. Collectively, these actions have mitigated the significant early surges in cases and hospitalizations as seen in other states. The state then prepared further by securing a reliable supply chain of personal protective equipment (PPE), expanding COVID-19 testing capabilities, and building additional health care capacity, including alternate care sites. These actions gave hospitals and health care systems time to plan and better prepare for a surge in hospitalizations and intensive care unit (ICU) admissions. Altogether, these actions have saved the lives of many Californians.

STATEWIDE EMERGENCY RESPONSE

Under the authorities of the Emergency Services Act and other laws governing public health emergencies, jointly led by the Governor's Office of Emergency Services (Cal OES) and the Health and Human Services Agency (CHHS), the state responded swiftly—coordinating actions with local authorities and deploying federal, state, mutual aid, and private sector resources to support communities across the state. Many of the innovative programs established to serve the state are the first of their kind—establishing California as a leader in responding to the pandemic and developing a path for recovery and resiliency.

VACCINE DISTRIBUTION

COVID-19 vaccines are now available and California received its first shipments in mid-December. The state formed a Western States Scientific Safety Review Workgroup with Nevada, Oregon and Washington, comprised of immunization and public health experts to provide an independent review and recommendation for the states to ensure safety and maintain public confidence in vaccine implementation. The state is also planning a public awareness campaign to encourage vaccine adoption across the state's diverse communities.

While supplies of the vaccines are currently limited, they will be made available according to approved state guidelines. Health care workers and residents in long-term care settings have been approved to receive vaccines first, followed by other Californians at high risk of becoming infected or severely ill from COVID-19. The state continues to release guidance for the next phases of individuals prioritized for vaccinations. The state has formed a Drafting Guidelines Workgroup of subject matter experts, ethicists and academics to draft an allocation framework to prioritize each phase of vaccine distribution. A community Vaccine Advisory Committee was also formed to provide feedback to state health officials on the allocation framework. The state is working closely with community partners and stakeholders to help guide the planning process and expedite a fair and equitable distribution of the vaccine.

The Budget includes over \$300 million as an initial estimate for vaccine distribution, including a public awareness campaign to increase vaccine adoption.

SUPPORT FOR THE COVID-19 PANDEMIC RESPONSE

The COVID-19 Pandemic response includes the following core response efforts that have been critical to not only mitigating the spread of COVID-19, but also preparing and expanding the health care system for a surge of cases, as well as providing for the necessary supports to reopen schools.

- **PPE and Other Procurements**—One of the most important tools in the fight against the spread of the virus is the use of PPE. In the initial phase of the pandemic, it was critical that the state secure enough PPE for Californians, and the state responded to that need by implementing a comprehensive procurement and distribution strategy. The state built a dedicated PPE pipeline with manufacturers who produce N95 respirators, surgical masks, ventilators, hand sanitizer, gowns, face shields, and with those performing ventilator repair and refurbishment. As a result, the state has

provided nearly 1 billion units of PPE to various sectors. Most notably, 384 million units of PPE have been allocated to the health sector, 30 million units were supplied to the agriculture sector, and 136 million units were distributed to the education sector to support the safe return to in-person instruction.

- **Laboratory Testing**—Timely, equitable, and cost-effective testing supports California's goal of continuing to flatten the curve while enabling critical sectors of the economy to remain open. Despite efforts to expand the existing public and private laboratory footprint, the state's overall testing capacity remained inadequate, especially as flu season began. The state used its market power to combat global supply chain challenges and high testing costs by building its own laboratory—the Valencia Branch Laboratory—that has the capacity to process up to 150,000 tests per day. In addition, the state is pursuing broad-based testing in K-12 schools, and the May Revision will include estimated costs for Medi-Cal eligible students.
- **California Connected (Contact Tracing)**—Recognizing the need to conduct case investigations and notify those who may have been exposed to the virus of the need to quarantine, the state partnered with UC San Francisco to develop a training program for contact tracers. State departments identified over 3,000 employees as available for redirection to the contact tracing effort, and as of late-December 2020, roughly 1,900 employees were deployed to counties to assist. Through this effort, about 10,000 state and local employees are available to conduct contact tracing investigations statewide. Also in December, the state deployed a mobile exposure notification technology, CA Notify, to help notify Californians of potential exposure.
- **Health Corps**—Established to recruit and deploy health care professionals to facilities across the state to address the healthcare surge and to maintain capacity in the state's health care system, the Health Corps includes physicians, nurses, emergency medical technicians, paramedics, physician assistants, respiratory therapists and behavioral health professionals. They have been utilized in skilled nursing facilities, assisted living facilities, correctional facilities, alternative care sites, and general acute care hospitals. Since April, Health Corps has covered 2,892 direct patient care shifts in 143 facilities, as well as approximately 2,000 standby shifts across the state. Health Corps fills an essential role within emergency staffing. It serves as a critical option for facilities to provide staffing augmentations in non-acute care settings, stabilizing the patient and facility without transfer into a hospital.

- **Hospital Surge Preparation**—To assist with decompression from the hospital system of lower acuity patients, the state is adding COVID-19 hospital surge beds in addition to the surge beds that hospital systems have already added. Currently, the state has 11 alternate care sites that could be activated in 24-96 hours should they be needed. The total number of beds in these alternate care sites is 1,668. In addition to the alternate care sites, the state has 22 California Medical Stations, which are 50-bed field hospitals, that can be rapidly deployed. In total, the state has approximately 3,500 additional medical beds beyond surge capacity within the hospital system. Additionally, the state is helping to decompress hospitals through the use of residential care facilities for the elderly.
- **Hotels for Health Care Workers**—This program provides hotel rooms to health care workers providing critical care to COVID-19 patients or who may come in contact with those infected with the virus to help prevent them from bringing the virus home. The program has provided over 1.5 million free or subsidized hotel room nights for health care workers, first responders, correctional officers, and other workers while they isolate safely apart from their families between work shifts and quarantine when necessary.
- **Community Engagement**—Originally launched in 2019, the state has invested \$50 million in a preparedness campaign to bolster resiliency by connecting vulnerable populations with culturally and linguistically competent community support. Through partnerships formed with community based organizations, volunteer and service teams (including CERT and AmeriCorps), and a dynamic communication campaign, LISTOS was leveraged during the COVID-19 Pandemic to educate millions of Californians about emergency preparedness. The state has expanded the community outreach effort with an additional \$62.5 million General Fund appropriated in 2020 that is leveraging additional philanthropic resources to fund paid media and provide for direct engagement with trusted community organizations.

PROTECTING AT-RISK POPULATIONS

The state has implemented several programs to protect vulnerable populations from contracting COVID-19. In addition, the state continues extraordinary actions within its institutions to protect public health, including the State Hospitals and state prisons.

- **Great Plates Delivered**—This program provides meals to adults age 65 and older and adults age 60-64 who are at high risk, while also supporting local restaurants

and other food providers that have closed or are struggling to remain open. This program is jointly run and managed by Cal OES, CHHS, and California Department of Aging. Over 20.4 million meals have been served under this program.

- **Housing for the Harvest**—This program enables agricultural workers who test positive or are exposed to COVID-19 to safely isolate. The Housing for the Harvest program has provided over 900 hotel room nights for agricultural workers to keep these critical workers safe.
- **Project Roomkey**—This program provides hotel and motel rooms to people experiencing homelessness and who are at-risk of contracting COVID-19. Under this program, the state has made over 15,500 hotel rooms available, providing over 800,000 overnight stays for unhoused Californians.
- **State Hospitals**—To address the impacts of COVID-19 at the State Hospital system, the following activities have been implemented: isolation and testing at state hospitals, outside medical invoicing, surge capacity, increased PPE requirements, and other supports for patients and employees. State Hospitals are also taking a number of preparatory steps to ensure the effective delivery of vaccines for their health care workers and patients.
- **State Prisons**—CDCR has taken proactive measures to reduce the presence and spread of COVID-19 in its institutions, including: restricting inmate movement; activating spaces to create physical distancing; modifying the parole suitability hearing process to take place by video and telephone conference; restricting family visitation and instead providing inmates with free telephone calls and video visitation opportunities; and initiating a staff screening process upon entering facilities. CDCR has also implemented expanded employee testing at all institutions.

DATA-DRIVEN DECISION-MAKING

BLUEPRINT FOR A SAFER ECONOMY

In August 2020, California unveiled the *Blueprint for a Safer Economy*, a framework for managing restrictions on activities based on epidemiological data in counties.

California's framework for reopening also uniquely includes a health equity metric. This metric recognizes that a county cannot open more business sectors unless it addresses disease transmission in communities that are disproportionately impacted by economic, social, education, transportation, housing, and environmental factors. The metric requires counties to reduce test positivity rates in the least well-off communities to

match or approach the county average, which gives counties the incentive to test and trace contacts in the communities that have the greatest need.

In November, as case rates and hospitalizations surged in California and across the country, the state implemented a regional stay-at-home order. Absent this action, many hospital ICUs would have reached capacity more quickly. The state continues to use science and data to modify guidance and protective measures, including the updated guidance for school reopening.

DEPLOYMENT OF INNOVATIVE TECHNOLOGY

California has deployed and updated dashboards to collect, develop, and display data for decision-making and for public transparency. The state created a centralized portal to inform the public at covid19.ca.gov. California has utilized technology tools to accelerate the availability of information, including a website to connect businesses with PPE, a website to connect volunteers with opportunities to help, and a teachers' resource portal. Additionally, California has been able to track the impacts of policy decisions by looking at mobility data, venue visits, economic data, and survey data. These approaches have prioritized privacy.

In addition, the state has developed a model (California COVID Assessment Tool (ICAT)) that contains assessments of the spread of COVID-19, short-term forecasts of disease trends, and scenarios of the course of the disease from modeling groups across the country. Together, these tools allow scientists, researchers, technologists and all Californians to better understand the spread of COVID-19. To build on this model, the Budget includes funding for a newly created consortium that will engage public health decision-makers and investigators at the University of California to promote timely, actionable insights into public health problems in California.

DIRECT EMERGENCY RESPONSE EXPENDITURES

Current estimates of total direct COVID-19 Pandemic emergency response costs are approximately \$13 billion, with an estimated net General Fund impact of approximately \$2.5 billion. This represents costs incurred in the prior fiscal year as well as projected costs in fiscal years 2020-21 and 2021-22. Since the 2020 Budget Act, the Department of Finance has regularly updated these estimates on its website.

The 2020 Budget Act reflected a total of \$8.6 billion in state direct emergency response costs across 2019-20 and 2020-21, of which \$5.7 billion was for planned expenditures and an additional \$2.9 billion was for contingency costs. The following chart summarizes

current estimates compared to the estimates included in the 2020 Budget Act. These estimates will be refined as circumstances evolve and the Administration continues to maximize the use of federal funds.

Significant changes since the 2020 Budget Act include increased efforts to mitigate the spread of COVID-19 within state institutions, state laboratory testing, and emergency support for small businesses allocated in December. There are also some downward revisions of estimates reflecting changing conditions and more accurate projections related to additional PPE procurement and hospital surge efforts.

While total costs are projected to increase overall compared to 2020 Budget Act levels, federal funds are expected to offset a greater share of these costs, which has partially offset the net General Fund increase. The chart below reflects categories of the state's direct response efforts and their respective cost estimates. Many of these programs and categories are eligible for FEMA reimbursement. This chart does not include COVID-19 expenditures related to certain health and human services programs. (See the Health and Human Services Chapter for more details.)

COVID-19 Direct Response Cost Estimates: Total Expenditures

Cost Category	2020 Budget Act Estimate	2021 Governor's Budget Estimate	Difference
State Response Operations	\$589,128,000	\$2,529,273,000	\$1,940,145,000
State Hospitals	\$0	\$82,698,000	\$82,698,000
Testing	\$0	\$37,102,000	\$37,102,000
Surge Capacity (Norwalk)	\$0	\$2,568,000	\$2,568,000
Other Staffing and Operational Costs	\$0	\$43,028,000	\$43,028,000
National Guard	\$0	\$32,848,000	\$32,848,000
Corrections and Rehabilitations	\$17,300,000	\$1,418,988,000	\$1,401,688,000
Community Supervision	\$2,971,000	\$45,340,000	\$42,369,000
Temporary Suspension of Prison Intake	\$14,329,000	\$240,895,000	\$226,566,000
Reentry Housing	\$0	\$15,000,000	\$15,000,000
Project Hope	\$0	\$1,929,000	\$1,929,000
Personal Protective Equipment	\$0	\$89,296,000	\$89,296,000
Medical Surge/Tents	\$0	\$240,741,000	\$240,741,000
Testing (Employee)	\$0	\$378,926,000	\$378,926,000
Testing (Inmate)	\$0	\$175,533,000	\$175,533,000
Cleaning	\$0	\$29,180,000	\$29,180,000
Other Staffing and Operational Costs	\$0	\$202,148,000	\$202,148,000
Other State Agency Response Operations Costs	\$571,828,000	\$994,739,000	\$422,911,000
Procurements	\$4,363,764,000	\$3,366,496,000	-\$997,268,000
OES Masks Contract (Global Healthcare Product Solutions, LLC)	\$1,567,500,000	\$920,600,000	-\$646,900,000
DGS and Other Procurements	\$2,796,264,000	\$2,445,896,000	-\$350,368,000
Hospital and Medical Surge (to support 5,000 beds)	\$1,325,023,000	\$1,091,631,000	-\$233,392,000
Staffing Costs	\$854,523,000	\$768,421,000	-\$86,102,000
Facilities and Operating Costs	\$470,500,000	\$323,210,000	-\$147,290,000
Hotels for Health Care Workers/Support Staff	\$507,650,000	\$368,957,000	-\$138,693,000
Housing for the Harvest	\$0	\$9,623,000	\$9,623,000
Vulnerable Populations and Other Support Services	\$638,602,000	\$1,888,547,000	\$1,249,945,000
Project Roomkey	\$100,000,000	\$162,000,000	\$62,000,000
Food Banks	\$70,000,000	\$165,500,000	\$95,500,000
Support for Small Businesses	\$50,000,000	\$562,500,000	\$512,500,000
Great Plates Delivered	\$25,000,000	\$25,000,000	\$0
Other Program Allocations	\$393,602,000	\$973,547,000	\$579,945,000
Statewide Testing	\$527,000,000	\$2,544,045,000	\$2,017,045,000
PerkinElmer	\$0	\$1,365,363,000	\$1,365,363,000
Logistics Health, Inc. (Optum)	\$0	\$726,000,000	\$726,000,000
FedEx Specimen Transportation	\$0	\$19,989,000	\$19,989,000
Other Statewide Testing	\$527,000,000	\$432,693,000	-\$94,307,000
Contact Tracing and Tracking	\$173,750,000	\$646,339,000	\$472,589,000
Vaccine Task Force	\$0	\$372,400,000	\$372,400,000
Other Response Costs	\$470,122,000	\$0	-\$470,122,000
Community Engagement	\$0	\$162,500,000	\$162,500,000
Totals	\$8,595,039,000	\$12,979,811,000	\$4,384,772,000

CORONAVIRUS RELIEF FUNDS (CRF)

The 2020 Budget Act established a process to allocate \$9.5 billion in CRF provided in the federal Coronavirus Aid, Relief, and Economic Security (CARES) Act, the largest of the bills enacted early in the COVID-19 Pandemic. Based on data through September 30, the state had obligated or spent nearly \$8.7 billion of the \$9.5 billion authorized by the CARES Act and included in the 2020 Budget Act. These funds have been instrumental in helping to mitigate learning loss for students (\$4.4 billion), protect vulnerable populations from COVID-19, and support front-line efforts to combat the virus, including nearly \$1.3 billion to counties and \$500 million to cities to support local priorities.

At the state level, funds have supported nearly \$2.5 billion in costs for emergency operations, testing and contact tracing, and various medical and public health expenses. In addition, critical investments were made to provide additional housing for the homeless, and reduce the spread of COVID-19 in congregate shelters and camps. These funds were also used to purchase additional emergency food supplies and diapers to be distributed through California food banks. Finally, CRF was also leveraged to free up other federal funds to extend emergency child care benefits into 2021. The figure below details where funds pay for a portion of the state's direct disaster response costs.

Allocation of CRF for COVID-19 Direct Response Costs

Cost Category	2021 Governor's Budget Estimate	Estimated CRF Share
State Response Operations	\$2,529,273,000	\$574,695,000
Procurements	\$3,366,496,000	\$653,240,000
Hospital and Medical Surge	\$1,091,631,000	\$230,180,000
Hotels for Health Care Workers/Support Staff	\$368,957,000	\$32,544,000
Vulnerable Populations/Other Support Services	\$1,888,547,000	\$618,650,000
Statewide Testing	\$2,544,045,000	\$195,851,000
Contact Tracing and Tracking	\$646,339,000	\$155,977,000
Totals	\$12,435,288,000	\$2,461,137,000

While the deadline to spend to spend CRF was extended through December 31, 2021, the state has been finalizing the allocation and prioritization of the remaining \$800 million in funds to pay for additional emergency response costs, public health expenses, and public safety payroll costs as authorized by the U.S. Treasury. Through these actions, funds will remain in California and no funds will be returned to Washington.

FEDERAL RELIEF

To address the direct and indirect effects of COVID-19, the federal government provided additional funding to help pay for emergency response, testing and contact tracing, health care, and to provide financial relief to individuals, families, and businesses as well as state and local governments, including schools and higher education institutions. As of early December, the estimated funding that the state expects to receive from the four bills passed by Congress in the spring of 2020 totaled approximately \$136 billion. These funds support various state programs, such as unemployment insurance, Medi-Cal, and K-12 schools. Combined with direct payments to individuals and families, hospitals and medical providers, businesses, higher education institutions and college students, local housing authorities, airports, farmers, and local government, California and its economy will benefit from approximately \$298 billion provided through these federal actions.

This federal relief coupled with actions by the Federal Reserve helped stabilize the economy, with transfers mitigating the fall in wages. The stimulus checks, unemployment benefits, and Paycheck Protection Program allowed more people to continue to pay rent and utilities, and more businesses to retain workers and stay in business. As of November, U.S. personal income was 3.8 percent higher than November 2019. However, personal consumption expenditures are down by 1.3 percent, reflecting the disparate impacts on lower-income people and a higher savings rate by higher-income people.

RECENT FEDERAL COVID-19 RELIEF BILL

In late December, as many federal programs were expiring, Congress passed a fifth relief bill, the Coronavirus Response and Relief Supplemental Appropriations Act, totaling about \$900 billion, primarily to extend unemployment insurance and provide direct payments to individuals and families, businesses, and the health care industry, as well as to provide more funding for testing, contact tracing, and vaccine distribution. While California expects approximately \$100 billion, notably excluded from this most recent bill is additional funding for state and local government. However, this bill extends the deadline to spend the Coronavirus Relief Funds through December 31, 2021.

The passage of the federal relief bill will provide much-needed support for people and businesses until March 2021, especially those that remain unemployed due to the

COVID-19 Pandemic. However, additional federal support beyond this bill will be critical to help people and businesses struggling to survive and recover from the pandemic.

Over one-third of the recent relief will provide additional financial assistance to individuals and families facing hardships from the COVID-19 Pandemic. Key provisions to support individuals include the following:

- **Unemployment Insurance Benefits**—Extended benefits were made available to individuals who have lost their jobs due to COVID-19, including self-employed workers and provide an additional \$300 per week supplement. These benefits will be available for an additional 11 weeks through March 14, 2021.
- **Economic Impact Payments**—A second economic impact payment was included for individuals and families, including those who receive Social Security retirement, Supplemental Security Income, or disability benefits. The checks will be \$600 for each person in the household using the same income-based criteria in the CARES Act. Individuals in households with mixed immigration status will now be eligible for these payments, which will be retroactive to the CARES Act, providing \$1,200 per adult and \$500 per child.

The following chart reflects the estimates for California based on a preliminary review of the components of the recent federal relief bill.

Potential Estimates for California
Coronavirus Response and Relief Supplemental Appropriations Act
(Dollars in Billions)

Cost Areas	Available Nationwide	California Estimate
Individuals and Families	\$326.4	\$42.4
Unemployment Insurance Benefits	\$120.0	\$20.0
Economic Impact Payments (\$600 per person)	\$166.0	\$18.3
Food Assistance	\$13.0	\$1.3
Rental and Utility Assistance	\$25.0	\$2.6
Funeral/Burial Assistance	\$2.4	\$0.2
Test, Trace, Vaccinate	\$54.1	\$2.2
Testing and Contact Tracing	\$19.5	\$1.8
Testing in Rural and Underserved Communities	\$2.8	TBD
Vaccine Development	\$19.7	-
Vaccine Manufacturing and Distribution	\$8.8	\$0.4
Strategic National Stockpile (PPE)	\$3.3	-
Health/Mental Health	\$10.3	\$0.7
Provider Relief	\$3.0	\$0.2
Increase Medicare Provider Payments	\$3.0	TBD
Mental Health and Substance Use Disorders	\$4.3	\$0.5
Business and Transportation Support	\$408.1	\$50.1
Small Business Support/Paycheck Protection (excluding airlines)	\$310.0	\$45.2
Live Venues	\$15.0	TBD
Child Care/Head Start	\$10.3	\$1.0
Agriculture (Farmers, Ranchers)	\$13.0	\$0.6
Loans to Underserved Communities	\$15.0	TBD
Airlines (Paycheck Protection) and Airport Improvements	\$18.0	\$0.4
Transit/Bus/Amtrak	\$17.0	\$2.0
State Highways	\$9.8	\$0.9
Education	\$81.1	\$10.1
Primary and Secondary	\$54.3	\$6.8
Governor's Emergency Education Relief (GEER) Funds	\$1.3	\$0.2
GEER - Private Schools	\$2.8	\$0.2
Higher Education	\$22.7	\$2.9
Broadband/Telehealth	\$7.0	TBD
Totals	\$887.0	\$105.5

EMERGENCY RESPONSE

Over the past five years, the state has experienced unprecedented emergencies, including severe drought, earthquakes, intense storms with associated flooding, and now the historic COVID-19 Pandemic.

Additionally, the impacts of climate change continue to intensify and lengthen the fire season in California. In 2020, 9,000 wildfires burned over 4 million acres—more than all of the acres burned in 2017 and 2018 combined. Six of the largest wildfires in the state's history occurred in August and September of 2020.

Accordingly, the Budget builds on recent investments to continue to enhance the state's ability to prepare for and respond to future disasters and protect vulnerable communities.

OFFICE OF EMERGENCY SERVICES

The state is responsible for mitigating the effects of disasters and for protecting the lives and property of the people of California. Under the authorities of the California Emergency Services Act, the California Governor's Office of Emergency Services (Cal OES) serves as the state's leadership hub during all major emergencies and disasters. This includes responding, directing, and coordinating state and federal resources and mutual aid assets across all regions to support the diverse communities across the state.

Cal OES also supports local jurisdictions and communities through planning and preparedness activities, training, and facilitating the immediate response to an emergency through the longer-term recovery phase. During this process, Cal OES serves as the state's overall coordinator and agent to secure federal government resources through the Federal Emergency Management Agency. The Budget includes \$1.9 billion (\$443.1 million General Fund) and 1,119.2 positions for Cal OES.

STRENGTHENING CALIFORNIA'S EMERGENCY CAPACITY AND CAPABILITIES

California's emergencies and disasters have become more frequent, complicated, and often involve numerous counties and regions across the state. Consequently, Cal OES is developing a spring proposal to strengthen its ability to respond to increasingly complex disasters, security threats, and emergencies; lead multi-faceted, long-term recovery efforts across California; and strengthen equity and connections with vulnerable communities. The areas of focus for this proposal are:

- **Reducing Reliance on Redirected Staff**—When major emergencies or disasters occur, Cal OES redirects existing staff to operate the California's State Operations Center or Regional Emergency Operations Centers to respond to the events. Staff are also redirected to support Joint Field Offices embedded within the community to support recovery operations. Cal OES will explore ways to address the delays and incomplete work resulting from this coordinated redirection of staff and leadership teams from core Cal OES functions to support emergency response and recovery activities, which adversely impacts the organization's ability to fulfill its responsibilities and ultimately support response and recovery efforts.
- **Technology and Data Analytics**—The recent disasters have highlighted the need for greater technological capabilities to access and utilize data swiftly for situational awareness and in a manner that supports data-informed decision-making in real time. Cal OES has partnered with state technology experts to design dashboards to capture and utilize data, but more resources are needed to support technology and data capabilities on an ongoing basis.
- **Strengthening Equity and Connections with Communities**—California's disasters have had a significant impact on communities across the diverse state, but some communities have been hit harder than others. A strong connection between California's diverse communities and the emergency response network is key to better planning and preparation for disasters and swiftly meeting community needs during and after the emergency event. Cal OES is exploring ways to further

strengthen connections with all communities by building upon the work of the LISTOS campaign and reviewing approaches to advance equity and enhance cultural competence in delivering emergency response.

ENHANCING EMERGENCY PREPAREDNESS AND RESPONSE

The Budget includes an additional \$282 million General Fund for Cal OES for the following targeted investments:

- California Disaster Assistance Act (CDAA)—\$256.1 million one-time General Fund to assist local governments in serving their communities during and in the wake of emergency events. This funding will be used to repair, restore, or replace public real property damaged or destroyed during disaster events or reimburse local governments for eligible costs associated with emergency activities undertaken in response to a state of emergency proclamation by the Governor.
- California Earthquake Early Warning System—\$17.3 million one-time General Fund to support the California Earthquake Early Warning System while ongoing revenue options continue to be evaluated and pursued. Following years of research and development, initial operation of the system began in October 2019 and is anticipated to be fully operational statewide by June 2021. The system continues to improve and be integrated with critical infrastructure facilities, such as manufacturing, hospitals, schools, transportation systems, and public safety offices.
- Regional Hazardous Materials Response—\$3.6 million ongoing General Fund to build the state's ability to respond to regional emergencies involving hazardous materials. California has 12 Regional Hazardous Material Response teams positioned throughout the state to respond to hazardous material incidents. These teams are specially equipped to be immediate response resources to mitigate these types of emergencies. This will continue the state's investment to bolster this critical statewide emergency response function.
- Deferred Maintenance—\$5 million one-time General Fund to address identified deferred maintenance needs, as described in the Five-Year Infrastructure Plan.

Additionally, the early action package proposes \$25 million one-time General Fund in 2020-21 for Cal OES (\$21.9 million) and the Department of Forestry and Fire Protection (\$3.1 million) to support implementation of a home hardening pilot grant program, as referenced in the Wildfire and Forest Resilience Expenditure Plan section of the Climate Change Chapter.

DEPARTMENT OF FORESTRY AND FIRE PROTECTION

The Department of Forestry and Fire Protection (CAL FIRE) provides resource management and wildland fire protection services covering over 31 million acres. It operates 234 fire stations and also staffs local fire departments when funded by local governments. CAL FIRE contracts with county agencies in six counties to provide wildland fire protection services. The Budget includes \$2.9 billion (\$2 billion General Fund) and 8,735.1 positions for CAL FIRE.

In recent years, the state has made strategic investments to bolster the state's firefighting capabilities in light of the ongoing wildfire crisis. This has included adding more firefighters to provide surge capacity throughout the fire season and beyond based on fire conditions, increasing the number of year-round fire engines, and implementing enhanced technology such as wildfire prediction and modeling software and fire detection cameras.

However, the ongoing impacts of climate change on California's wildlands continue to drive critically dry fuel conditions and longer, more severe fire seasons. The Budget makes further investments to enhance CAL FIRE's fire prevention and suppression capacity.

- CAL FIRE Emergency Preparedness and Response: Additional Fire Crews—\$143.3 million one-time General Fund in 2021-22, \$124.5 million ongoing General Fund, and \$24.2 million one-time General Fund in out-years for related capital outlay costs for CAL FIRE and the California Conservation Corps (CCC) to support 30 additional fire crews, including 16 seasonal firefighter crews and 14 CCC crews. In recognition of the continuing climate impacts on fuel conditions and existing population trends in the California Department of Corrections and Rehabilitation's Conservation Camp program, these fire crews will enable CAL FIRE to respond to larger and more damaging wildfires throughout the fire season and complete priority fuel reduction projects to reduce wildfire risk in fire-threatened areas.
- Wildfire and Forest Resilience Strategy—The Budget also includes \$1 billion for a comprehensive package of resources to increase the pace and scale of forest health activities and decrease fire risk, including \$581 million for CAL FIRE in 2020-21 and 2021-22, as explained in the Climate Change Chapter.

Additionally, the Administration has initiated the integration of new firefighting aircraft into CAL FIRE's fleet to meet the challenges associated with increased wildfire activity. The Budget includes \$48.4 million to support the phasing in of these aircraft as quickly as possible to enhance CAL FIRE's ability to respond to wildfire incidents.

- **Black Hawk Helicopters**—The replacement of CAL FIRE's Vietnam War-era helicopter fleet with new technologically advanced S70i Black Hawk helicopters was initiated in 2017-18, and the 2020 Budget Act included funding to purchase the remaining 3 helicopters to complete the replacement of all 12 CAL FIRE helicopters. Three new Black Hawk helicopters have been deployed so far, and it is estimated that four more Black Hawk helicopters will be put into operation sometime during the 2021 fire season (for a total of seven). CAL FIRE expects to put the remaining five helicopters into operation in 2022.
- **Large Air Tankers**—The 2019 and 2020 Budget Acts included funding for CAL FIRE to phase in the seven large C-130H large air tankers that will be transferred from the federal government starting in 2021-22. The air tankers, currently owned by the U.S. Coast Guard, are being retrofitted by the U.S. Air Force utilizing \$150 million in federal funding. CAL FIRE is continuing to prepare for the arrival of these aircraft by training and certifying new dedicated flight crews and mechanics, and cross-training and certifying its existing pilots to fly the aircraft for maximum operational efficiency and effective wildland fire response. The Administration is actively working with its federal partners to meet the expected 2021-22 arrival of the aircraft.

The Budget also includes \$5 million one-time General Fund to provide a research grant to California State University, San Marcos to study enhanced firefighting equipment and strategies to protect firefighters from conditions present during wildfires in the wildland urban interface.

UTILITY WILDFIRE MITIGATION AND SAFETY

Chapter 81, Statutes of 2019 and Chapter 79, Statutes of 2019 established a new Wildfire Safety Division (Division) within the Public Utilities Commission effective January 1, 2020. In its first year, the Division has made significant progress towards fulfilling its mission of advancing long-term utility wildfire safety. This includes:

- Reviewing and approving utility wildfire mitigation plans, issuing safety certificates to electrical utilities, conducting safety culture assessments, and performing its statutorily mandated oversight responsibilities.
- Developing a strategic roadmap, through a public process, to guide the work of the Division in collaboration with key stakeholders—including CAL FIRE, Cal OES, and the Forest Management Task Force.
- Drafting performance metrics to evaluate wildfire mitigation plans as well as a field audit program to monitor utilities' compliance with their plan.

These wildfire mitigation efforts will continue in collaboration with local, state, and federal partners to help the state reduce the risks associated with utility-caused wildfires.

K-12 EDUCATION

California provides academic instruction and support services to nearly six million students in grades kindergarten through twelve in more than 10,000 schools throughout the state. A system of 58 county offices of education, approximately 1,000 local school districts, and more than 1,200 charter schools provides instruction in English, mathematics, history, science, and other core competencies to provide students with the skills they will need upon graduation to either enter the workforce or pursue higher education.

The upward revision of General Fund revenues has resulted in significant increases in the Proposition 98 Guarantee. Proposition 98 funding for K-12 schools and community colleges for 2021-22 is \$85.8 billion. This represents an increased investment of \$14.9 billion in schools and community colleges above the level funded in the 2020 Budget Act, and the highest level of funding for K-14 schools ever. When combined with a one-time supplemental allocation of \$2.3 billion and the benefit of CalSTRS and CalPERS rates (\$1.1 billion), the state funding available to schools increases to \$89.2 billion.

ADDRESSING IMMEDIATE NEEDS TO REOPEN SCHOOLS SAFELY

Since March 2020, as a result of the COVID-19 Pandemic, a majority of the state's school-age children have not had access to in-person instruction. These conditions are affecting children's learning, health, and social-emotional well-being. Additionally, a November 2020 report from the federal Centers for Disease Control and Prevention

reported that nationally the proportion of mental health–related visits (to hospital emergency departments) for children aged 5–11 years and adolescents aged 12–17 years increased by approximately 24 percent and 31 percent, respectively, compared with those in 2019.

The 2020 Budget Act included significant investments of more than \$6.7 billion to enable schools to mitigate COVID-19 Pandemic impacts on students, and provided schools with guidance and resources to maximize safe in-person services to students. The Administration continues to respond to the needs of the state's public education system in real time, recognizing that impacts of the pandemic on student learning and mental health continue. As part of these efforts, the Administration is working with the Legislature to take early action that will provide resources to address some of the most pressing needs of schools and students so that additional resources will be available for in-person learning in the 2020-21 school year.

IN-PERSON INSTRUCTION GRANTS

COVID-19 Pandemic-related disruptions to student learning and support services are best mitigated by providing students with access to in-person instruction. This is most important for students with other barriers to distance learning, especially those with disabilities, those struggling with behavioral health issues, and the state's youngest learners. It is the expectation of the Administration that as many of these students as possible have the option to receive in-person instruction in the 2020-21 school year, subject to public health directives, and that all students have access to in-person instruction in 2021-22.

To that end, the Budget includes \$2 billion one-time Proposition 98 General Fund available beginning in February 2021, to augment resources for schools to offer in-person instruction safely. This funding will be available on a per-pupil basis for all county schools, school districts, and charter schools (with the exception of non-classroom based charters schools and independent study programs) that are open for in-person instruction by specified dates. For schools that continue offering or begin offering in-person instruction for at least all TK-2nd grade students, all students with disabilities, youth in foster care, homeless youth, and students without access to technology or high-speed Internet by February 16, and all 3rd-6th grade students by March 15, base grant amounts will be \$450, increasing to more than \$700 per pupil for schools with a high enrollment of low-income students, youth in foster care, and English language learners. Schools with later start dates will qualify for a proportionally lower base grant, except those in counties with high rates of community spread. Schools in

counties with high rates of community spread will be eligible for the full February grant amount if they open for in-person instruction pursuant to state and local health guidance once their rates of community spread sufficiently decline. Funds may be used for any purpose that supports in-person instruction, including:

- Enhancing and expanding COVID-19 testing
- Purchasing personal protective equipment
- Improving ventilation and the safety of indoor or outdoor learning spaces
- Teacher or classified staff salaries for those providing and supporting in-person instruction
- Social and mental health support services provided in conjunction with in-person instruction

As a condition of receiving grant funds, schools will be required to complete a COVID-19 School Safety Plan in compliance with state Department of Public Health and occupational health safety requirements, and will be required to adopt and implement a plan for COVID-19 surveillance testing for staff and students that aligns with state public health guidance.

EXPANDED LEARNING TIME AND ACADEMIC INTERVENTIONS GRANTS

K-12 students have had significant educational disruptions related to the COVID-19 Pandemic school closures. Although the state has allocated significant additional funding to schools, including \$4.4 billion from the Coronavirus Relief Funds allocated to the state. These funds have helped districts distribute computers and mobile hot spots and support to improve on-line instruction. Nevertheless, the pandemic and distance learning poses challenges to student achievement and well-being, especially for the youngest students, students in special education, and students in jeopardy of not completing graduation requirements.

To address learning loss due to the pandemic, the Administration proposes to allocate \$4.6 billion in one-time Proposition 98 General Fund for early action by the Legislature. This will provide districts with time to design targeted interventions that focus on students from low-income families, English language learners, youth in foster care, and homeless youth, including an extended school year or summer school. These funds will be eligible for targeted strategies that address learning loss related to the pandemic, including community learning hubs.

FEDERAL COVID-19 RELIEF FUNDS

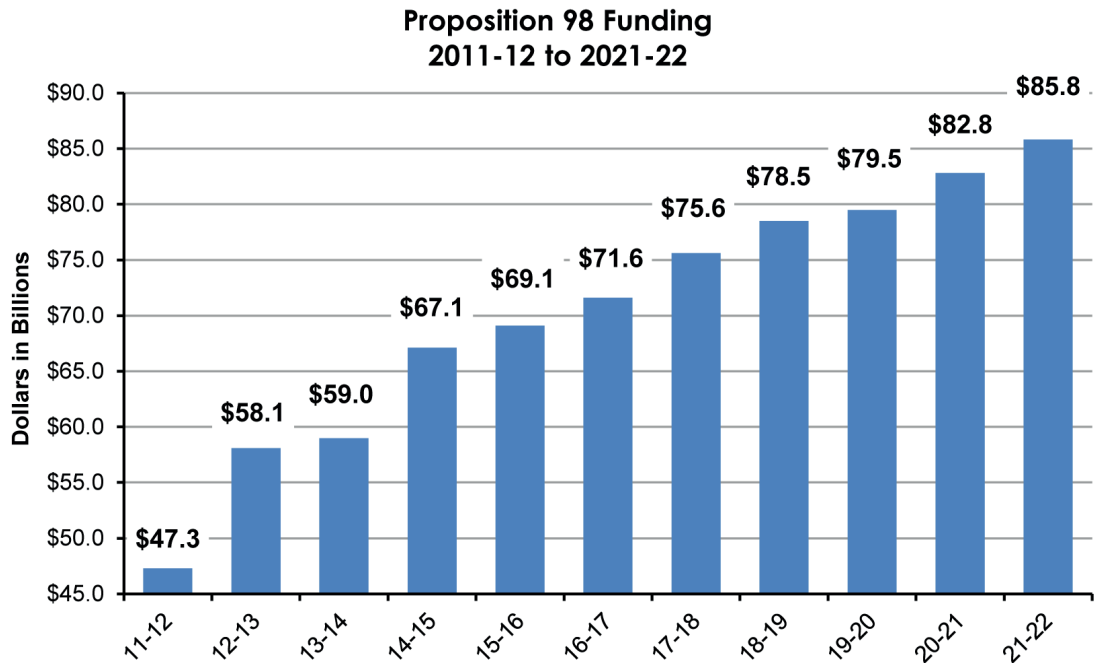

The recent federal COVID-19 relief bill provides \$54.3 billion Elementary and Secondary Schools Emergency Relief Fund (ESSER) for public K-12 schools and \$4 billion Governor's Emergency Education Relief Fund (GEER) for both public and private pre-kindergarten through higher education institutions. Based on prior allocations, California could receive more than \$6 billion ESSER (of which 90 percent would go directly to Title I schools) and \$400 million GEER. These resources will assist schools in reopening and remaining open for in-person instruction and addressing the immediate needs of students.

PROPOSITION 98

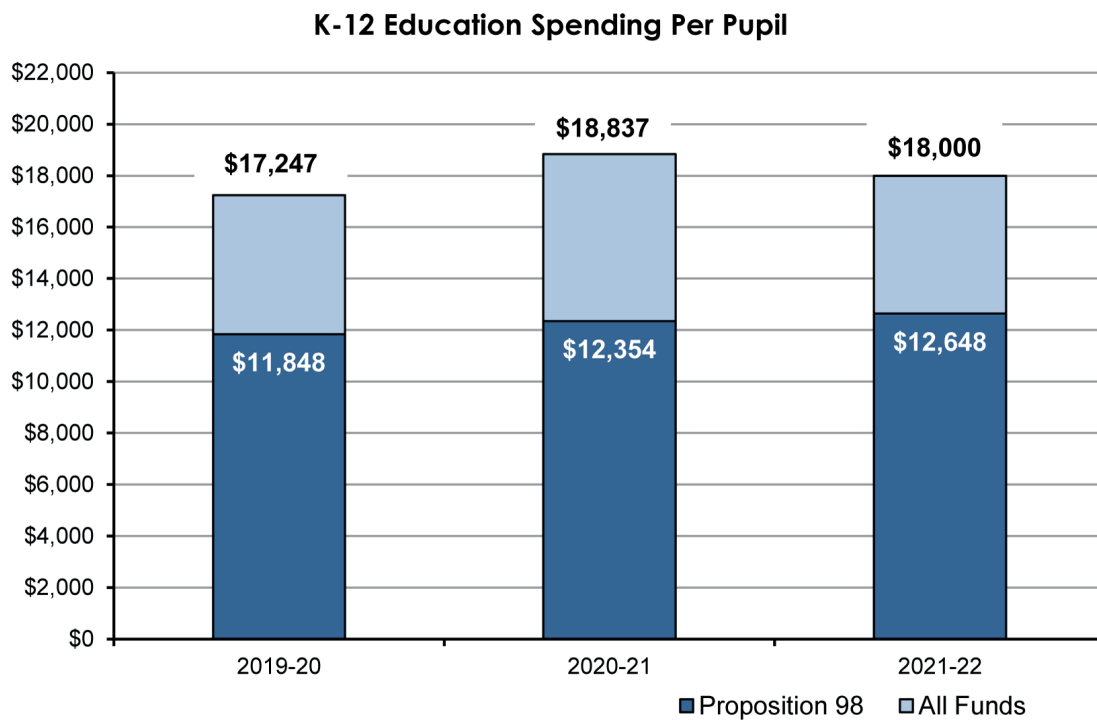

The annual funding level for K-12 schools and community colleges is determined by the Proposition 98 formula, a constitutional initiative approved by California voters in 1988 that guarantees K-12 schools and community colleges a minimum level of funding from state and local property taxes. Proposition 98 is designed to increase education funding each year by either: (1) funding K-14 education at its 1986-87 proportion of General Fund (known as Test 1), (2) applying growth in average daily attendance (ADA) and growth in per capita personal income to the prior year Proposition 98 funding level (known as Test 2), or (3) applying growth in ADA and growth in per capita General Fund to the prior year Proposition 98 funding level (known as Test 3). Largely due to projected increases in revenues and year-over-year declines in ADA, Test 1 is projected to be operative for all fiscal years 2019-20 through 2021-22.

Proposition 98 funding for K-12 schools and community colleges for 2021-22 is \$85.8 billion, the highest level of funding for K-14 schools ever (Proposition 98 Funding). This represents an increase of \$14.9 billion over the 2020-21 level funded in the 2020 Budget Act. The Proposition 98 funding levels for the 2019-20 and 2020-21 fiscal years increased from 2020 Budget Act levels by \$1.9 billion and \$11.9 billion, respectively, due almost exclusively to increased General Fund revenues in all fiscal years.

Reflecting the changes to Proposition 98 funding levels noted above, total K-12 per-pupil expenditures from all sources are projected to be \$18,837 in 2020-21 and \$18,000 in 2021-22—the highest levels ever (K-12 Education Spending Per Pupil). The decrease between 2020-21 and 2021-22 reflects the significant allocation of one-time federal funds in 2020-21. Ongoing K-12 per-pupil expenditures of Proposition 98 funds

are \$12,648 in 2021-22, an increase of \$1,994 per pupil over the level provided in the 2020 Budget Act.

LOCAL CONTROL FUNDING FORMULA (LCFF)

The Administration is committed to funding public schools through the LCFF to support all students, with greater support for students from low-income families, English language learners, and youth in foster care. The formula responds to research and practical experience that indicates that these students often require supplemental services and support to be successful in school. The formula includes the following major components:

- A base grant for each local educational agency per unit of ADA, including an adjustment of 10.4 percent to the base grant to support reducing class sizes in grades K-3, and an adjustment of 2.6 percent to reflect the cost of operating career technical education programs in high schools.
- A 20-percent supplemental grant for English learners, students from low-income families, and youth in foster care to reflect increased costs associated with educating those students.
- An additional concentration grant of up to 22.5 percent of a local educational agency's base grant, based on the number of English learners, students from low-income families, and youth in foster care served by the local educational agency that comprise more than 55 percent of enrollment.

The county office of education formula includes: (1) a base grant for each county office of education per unit of ADA to support instruction of students who attend community schools and juvenile court schools, and (2) unrestricted funding, inclusive of the resources necessary for administrative and technical support of local educational agencies in developing and approving local accountability plans based on the ADA of all students in the county.

Due to a significant reduction in available revenues, the 2020 Budget Act did not provide a statutory cost-of-living adjustment for the LCFF in 2020-21. To make up for this, the Budget funds the LCFF in 2021-22 with both the 2020-21 cost-of-living adjustment (2.31 percent) and the 2021-22 cost-of-living adjustment (1.5 percent), creating a compounded combined cost-of-living adjustment of 3.84 percent, and increasing ongoing LCFF funding by \$2 billion Proposition 98 General Fund, when adjusted for declining ADA. This increase brings total LCFF funding to \$64.5 billion, and funds all local educational agencies at their full LCFF target level.

PUBLIC SCHOOL SYSTEM STABILIZATION ACCOUNT

Proposition 2, enacted by voters in 2014, established the Public School System Stabilization Account, also referred to as the Proposition 98 Rainy Day Fund, within the Proposition 98 Guarantee as a mechanism to lessen the impact of volatile state revenues on K-14 schools. A deposit is made into the Account in a fiscal year when all of the following conditions are met:

- State General Fund revenues from capital gains exceed 8 percent of total revenues;
- Proposition 98 Test 1 is operative;
- Proposition 98 maintenance factor obligations created prior to 2014-15 have been paid;
- The Proposition 98 required minimum funding level is not suspended; and
- The Proposition 98 funding level is greater than the prior year's funding level less any deposits into the Account, adjusted for attendance growth and inflation.

The Budget projects that deposits into the Account are required in 2020-21 and 2021-22. Pursuant to Proposition 2, the amount deposited into the Account is the difference between the Test 1 funding level and the prior year funding level adjusted for growth and inflation, but not more than the amount of capital gains revenues in excess of 8 percent of total revenues. This results in required deposits of \$747 million in 2020-21 and \$2.2 billion in 2021-22, for a projected Account balance of \$3 billion.

Under current law, there is a cap of 10 percent on school district reserves in fiscal years immediately succeeding those in which the balance in the Account is equal to or greater than 3 percent of the total K-12 share of the Proposition 98 Guarantee (approximately \$2.3 billion). The balance of \$3 billion in 2021-22 triggers school district reserve caps beginning in 2022-23.

DEFERRALS

Pandemic-driven revenue reductions anticipated at the 2020 Budget Act created the need to defer LCFF apportionments, in the amounts of \$1.9 billion in 2019-20, growing to more than \$11 billion in 2020-21. The Budget pays off the full K-12 deferral in 2019-20 and \$7.3 billion of the K-12 deferral in 2020-21, leaving an ongoing K-12 deferral balance of \$3.7 billion in 2021-22. At this new lower level, local educational agencies will experience only a few weeks of delay in receiving apportionment in 2021-22 (as

opposed to ten-months of delay in 2020-21), as it will only impact their June 2022 apportionment, which will be delayed into July 2022.

ADDITIONAL FUNDING FOR K-14 EDUCATION

The Budget reflects \$3.4 billion in non-Proposition 98 General Fund for K-14 education. In addition, K-14 schools are expected to receive billions of additional federal funds from the recently approved federal COVID-19 relief bill.

SUPPLEMENTAL PAYMENT

The 2020 Budget Act included a multi-year plan to supplement Proposition 98 and mitigate projected declines due to revenue reductions. Specifically, the 2020 Budget Act projected that the Proposition 98 funding levels in 2019-20 and 2020-21 would drop below the target funding level (Test 2), by a total of approximately \$12.4 billion. To accelerate the recovery from this anticipated funding reduction, the 2020 Budget Act included annual supplemental appropriations above the constitutionally required Proposition 98 funding level, beginning in 2021-22, in an amount equal to one and one-half percent of General Fund revenues per year, up to \$12.4 billion. The 2020 Budget Act also proposed to increase K-14 schools' share of the General Fund from approximately 38 percent of the General Fund in Test 1 years to 40 percent of General Fund.

Instead of a \$12.4 billion drop in Proposition 98 funding in 2019-20 and 2020-21, the Budget now projects a decline of \$511 million and the Guarantee is now at a level that, under previous projections, would have taken years to reach. As a result, the Budget proposes to remove the supplemental payment from statute. However, in recognition of the extraordinary needs of students and the public school system related to the COVID-19 Pandemic, the Budget includes a one-time supplementary payment to K-14 schools of \$2.3 billion in 2021-22.

CALPERS/CALSTRS CONTRIBUTIONS

The 2019 Budget Act included \$850 million one-time General Fund to buy down local educational agency employer contribution rates for the California State Teachers' Retirement System (CalSTRS) and the California Public Employees' Retirement System (CalPERS) in 2019-20 and 2020-21, as well as \$2.3 billion one-time General Fund to pay down the employers' share of long-term unfunded liability. To provide local educational agencies with increased fiscal relief, the 2020 Budget redirected the \$2.3 billion General Fund paid to CalSTRS and CalPERS towards long-term unfunded liabilities to instead

further reduce employer contribution rates in 2020-21 and 2021-22. For 2021-22, CalSTRS will apply \$820 million to reduce the employer rate from 18.1 percent to approximately 15.92 percent, and CalPERS will apply \$330 million to reduce the Schools Pool employer contribution rate from 24.9 percent to 23 percent.

OTHER POLICY ISSUES

AVERAGE DAILY ATTENDANCE (ADA) COLLECTION

The 2020 Budget Act included several policies designed to support funding stability for local educational agencies given the COVID-19 Pandemic. These policies included:

- An ADA hold-harmless for 2020-21 apportionment calculation.
- Requirements for distance learning supports for students with exceptional needs, English language learner students, youth in foster care, youth experiencing homelessness, and students in need of mental health supports.
- Requirements for minimum daily interaction with students in distance learning.
- Requirements for documenting student participation and engagement, and for creating and implementing tiered re-engagement strategies for students who do not participate.

Building on lessons learned from the 2020-21 school year, the Budget establishes new expectations for local educational agencies in how they serve students and how the state funds them. Specifically:

- The Budget assumes that in-person instruction is the default mode of instruction in 2021-22. In specific circumstances, and as a result of health and safety concerns, there may continue to be a need to offer alternative models of instruction for some students. The Administration is committed to working with the Legislature and stakeholders throughout the spring on the frameworks for out-of-classroom instruction, including the independent study program, to support more efficient and effective models of instruction, and allow local educational agencies to use well-designed models of instruction if in-person instruction is suspended temporarily for health and safety reasons in 2021-22 and beyond.
- The Budget does not include a new ADA hold harmless in 2021-22. However, because of the ADA hold harmless provided in the 2020 Budget Act, local educational agencies that experience enrollment declines in 2021-22 will retain the

ability to receive apportionment based on the higher of their 2019-20 or 2020-21 ADA, pursuant to the existing hold harmless provisions included in LCFF statute.

FISCAL ACCOUNTABILITY

As previously discussed, a critical component of the LCFF is the additional funding provided to local educational agencies through supplemental and concentration grants. The Administration remains focused on equity and ensuring that funds are allocated to support services for those students with the greatest need. The 2020 Budget Act provided funding for initiatives to increase transparency around local educational agencies' use of these funds, through the creation of an online local control and accountability plan (LCAP) portal and co-location of school accountability documents on a single website. These resources are currently under development and will complement recent changes to the LCAP template that provide additional information on the actual expenditure of supplemental and concentration grant funds.

To build on this work, the Budget includes statutory changes to address concerns that some local educational agencies allocate funds for increased and improved services and then leave them unspent, reallocating them for other purposes in future years. This statutory language requires that, once established, a local educational agency's responsibility to increase and improve services continues until fulfilled, and increases the specificity required of county offices of education in their review of local educational agencies' LCAPs.

ADULTS IN CHARTER SCHOOLS

State law does not allow charter schools to receive state apportionment funding for students above 19 years of age, unless a student has been continuously enrolled and is making satisfactory progress towards a high school diploma, or the charter school provides instruction exclusively in partnership with a specified state or federal job-training program. However, there is inconsistency in how some charter schools interpret the phrase "exclusively in partnership with" a state or federal job-training program. This has resulted in tens of millions of dollars in LCFF funding, at a rate that is increasing every year, being allocated for adult students in charter school programs that do not align with the intent of the existing statute. The Budget clarifies the existing law, eliminates any uncertainty, and provides the Department of Education with the authority to collect information from charter schools that receive funding for adult students and validate their compliance with the governing statutes. The proposal would preserve existing programs funded in 2019-20 after a review of the program.

ADDRESSING EQUITY

INVESTING IN EDUCATORS

The demands on teachers, administrators, and classified staff during the COVID-19 Pandemic have been intense and unprecedented. These essential workers have balanced the challenges of developing and delivering curriculum in a distance learning or hybrid context, providing intensive and targeted in-person instruction in small groups for those students most disadvantaged by distance learning, and addressing the acute needs of students and families experiencing elevated levels of stress and economic insecurity. Educators will continue to contend with a wide range of challenges as students return to campus. Additionally, in some cases the pandemic has accelerated retirements, reduced the number of prospective teachers, and otherwise led to changes exacerbating existing educator shortages.

The Administration is committed to providing educators with the tools they need, both in the short term and long term, to successfully meet the needs of students. The Budget includes a comprehensive \$315.3 million package for educator professional development, with emphases on developing quality training in high-need areas and providing timely access to training, specifically:

- \$250 million one-time Proposition 98 General Fund for the Educator Effectiveness Block Grant to provide local educational agencies with resources to expedite professional development for teachers, administrators, and other in-person staff, in high-need areas including accelerated learning, re-engaging students, restorative practices, and implicit bias training.
- \$50 million one-time Proposition 98 General Fund to create statewide resources and provide targeted professional development on social-emotional learning and trauma-informed practices (also referenced in the Student Health and Well-Being section below).
- \$8.3 million one-time Proposition 98 General Fund for the California Early Math Initiative to provide teachers with professional development in mathematics teaching strategies for young children pre-K through third grade through the statewide system of support.
- \$7 million one-time non-Proposition 98 General Fund to the University of California Subject Matter Projects to create high-quality professional development

on learning loss in core subject matter content areas like reading and math, and in ethnic studies (also referenced in the Higher Education Chapter).

- \$5 million one-time Proposition 98 General Fund to fund professional development and instructional materials for local educational agencies who are offering, or would like to offer, courses on ethnic studies.

The Administration is also committed to increasing the number of well-prepared teachers in the public school system. A well-prepared educator workforce is a significant factor in improving student achievement and in closing the achievement gap. This is especially true post-pandemic, as students deal with the long-term academic impacts of COVID-19. Current teacher shortages, further exacerbated by retirements and teachers leaving the profession due to the pandemic, require efforts to strengthen the teacher pipeline. The Budget includes \$225 million to improve the state's teacher pipeline, specifically:

- \$100 million one-time non-Proposition 98 General Fund for continued investment in the Golden State Teacher Grant Program, which provides grants to students enrolled in teacher preparation programs who commit to working in high-need fields and at schools with high rates of under-prepared teachers (also referenced in the Higher Education Chapter).
- \$100 million one-time Proposition 98 General Fund to expand the Teacher Residency Program, which supports clinical teacher preparation programs dedicated to preparing and retaining teachers in high-need communities and subject areas, including special education, bilingual education, and STEM.
- \$25 million one-time Proposition 98 General Fund to expand the Classified School Employees Credentialing Program, which provides grants to local educational agencies to recruit non-certificated school employees to become certificated classroom teachers.

Additionally, the Budget creates new pathways for prospective teachers to establish basic skills and subject matter competency, through coursework and upgrades to existing examinations.

FREE APPLICATION FOR FEDERAL STUDENT AID (FAFSA)

Historical data from the California Student Aid Commission indicate that underrepresented students are less likely to complete the FAFSA, thereby causing many

Pell grant-eligible students to forego available state and federal financial aid funding. Recent data trends indicated that FAFSA filings among underrepresented student populations have decreased this year.

To address these concerns, the Budget requires local educational agencies to confirm that all high school seniors complete a FAFSA or California Dream Act Application beginning in the 2021-22 academic year.

SPECIAL EDUCATION

Nationwide, local educational agencies are required by federal law to provide appropriate and comprehensive educational programs for students with disabilities, from ages 3 through 22. However, federal funding for support services for these students does not reflect the rising cost of special education services. Congress has set a goal of 40 percent for the federal share of costs of special education services, but averages only about 10 percent of costs in California. Additionally, the federal government provides the state with only a fraction of the funding necessary to support mandated services for preschool-age children with disabilities. Recognizing the federal funding deficiencies, the state significantly augments federal funding to local educational agencies for special education services, providing approximately \$3.9 billion in 2020-21, compared to the federal allocation of \$1.4 billion.

It is a priority of the Administration to improve local educational agencies' ability to effectively support students with disabilities. The achievement gap is most pronounced for children with disabilities. Many of California's children with disabilities are also English learners, come from low-income families, and/or are served by the foster care system, compounding equity challenges that have been exacerbated by the COVID-19 Pandemic. While investments described earlier in this section will provide local educational agencies with critical resources to address the acute needs of students with disabilities in the near term, the Administration remains dedicated to continuing to build out systemic supports to close the achievement gap of students with disabilities. Over the last two years, the Administration has worked with the Legislature to augment special education funding by more than \$1.5 billion, including adding \$545 million ongoing Proposition 98 General Fund to the special education base funding formula. These investments were targeted to effective strategies to address the complex needs of students with disabilities and their educators, including:

- Providing additional resources to local educational agencies for direct services for students,

- Investing in educators' professional development and expanding the educator pipeline,
- Expanding and improving supportive services for students and families, and
- Investing in improved collaboration and coordination among state and local agencies.

The Budget builds on these strategies by further investing in early interventions, which research suggests provide the best outcomes for students and long-term savings for local educational agencies, and improving the ability of local educational agencies to draw down federal funds for medical interventions. Specifically, the Budget provides:

- \$300 million ongoing Proposition 98 General Fund for the Special Education Early Intervention Grant to increase the availability of evidence-based services for infants, toddlers, and preschoolers.
- \$5 million one-time Proposition 98 General Fund to establish professional learning networks to increase local educational agency capacity to access federal Medi-Cal funds, and \$250,000 for a lead county office of education to provide guidance for Medi-Cal billing within the statewide system of support. The Administration will continue to evaluate the need for additional resources to support local educational agencies in accessing Medi-Cal reimbursement.
- \$500,000 one-time Proposition 98 General Fund for a study to examine certification and oversight of non-public school special education placements.

STUDENT HEALTH AND WELL-BEING

Conditions associated with poverty, including food insecurity, housing and employment instability, and inadequate health care, create substantial and compounding barriers to learning. These barriers have been further exacerbated by the COVID-19 Pandemic, which has increased economic challenges, particularly for low-income families. Approximately 3.7 million students, or 60 percent of the K-12 student population, are from socioeconomically disadvantaged households.

In order to stem the long-term effects of the pandemic, the Budget includes the following investments aimed at equipping schools and educators with the resources necessary to effectively partner with other governmental entities in addressing the overall well-being of the children they serve.

COMMUNITY SCHOOLS

Community school programs can help to mitigate the educational disadvantages associated with poverty and improve students' attendance, behavior, and achievement by making schools a hub for community resources. These programs offer a unique model to more efficiently and effectively provide integrated educational, health, and mental health services to students with a wide range of needs. Currently, some county offices of education and school districts support community school initiatives that offer coordinated access to a range of community services, on- or off-campus, including before and after school care.

The 2020 Budget Act included \$45 million in federal funds to county offices of education to support existing community school programs. The Budget builds on this investment with an additional \$264.9 million one-time Proposition 98 General Fund to enable local educational agencies to expand existing networks of community schools and establish new community schools, and to coordinate a wide range of services to these schools, with priority given to schools in high-poverty communities. This funding will be available to develop new and expand existing models of community schools.

STUDENT MENTAL HEALTH

Isolation and uncertainty caused by the COVID-19 Pandemic have impacted children as well as adults. Preliminary data suggest that depression and anxiety may have increased in children during the pandemic. These issues are complex and require the collaborative work of many across several state and local agencies.

To support children and families with behavioral health challenges and promote wellness on school campuses, the Budget includes several initiatives to increase services to children and improve coordination between county behavioral health departments and public school systems. As discussed in the Health and Human Services Chapter, the Budget provides \$400 million one-time in a mix of federal funds and General Fund, available over multiple years, for the Department of Health Care Services to implement an incentive program through Medi-Cal Managed Care Plans, administered by county behavioral health departments and schools. This innovative effort would build infrastructure, partnerships, and statewide capacity to increase the number of students receiving preventive and early intervention behavioral health services from schools, providers in schools, or school-based health centers.

The Budget also includes an additional \$25 million one-time Mental Health Services Fund, available over multiple years, to expand the Mental Health Student Services Act Partnership Grant Program, which funds partnerships between county behavioral health department and schools. Priority for the grants will be given to high-poverty and rural schools, with funds supporting suicide and drop-out prevention services, outreach to high-risk youth, and other strategies that respond to the mental health needs of students.

The Budget provides \$25 million ongoing Proposition 98 General Fund to fund innovative partnerships with county behavioral health to support student mental health services. This funding would be provided to local educational agencies to match funding in county Mental Health Services Act spending plans dedicated to the mental health needs of students.

SCHOOL CLIMATE SURVEYS

To support widespread access and use of school climate surveys, the Budget includes \$10 million one-time Proposition 98 General Fund for a county office of education to:

- Make information available on valid, reliable, and appropriate school climate surveys for purposes of helping local educational agencies better assess community needs stemming from the COVID-19 Pandemic and distance learning, including surveys for students, families, and educators.
- Provide grants to local educational agencies to implement enhanced survey instruments and support start-up costs associated with conducting annual school climate surveys.
- Provide training for local educational agencies on interpreting data and using responses collected to inform continuous improvement efforts.

EARLY LEARNING

Since 2019, the state has invested approximately \$400 million ongoing to expand early education and child care. The COVID-19 Pandemic has disrupted the child care system and federal funding has been critical to reducing long-term losses in this system. The Budget focuses on avoiding further loss in this system and builds on the recommendations made in the Master Plan for Early Learning and Care.

As discussed in the Health and Human Services Chapter, the Master Plan for Early Learning and Care was released on December 1, 2020, and provides recommendations and a multi-year plan for transforming the state's child care and early education systems. Specific to pre-kindergarten education programs, the Master Plan's recommendations include:

- Promoting school readiness by providing access to transitional kindergarten (TK) for all four-year-olds and to public preschool for all income-eligible three-year-olds, in full-inclusion settings;
- Improving quality of care by increasing access to full-day, full-year preschool programs, and enhancing educator competencies and providing affordable and accessible pathways for workforce advancement;
- Supporting equity by eliminating bias through practices and training, with specific focus on children with disabilities and dual language learners; and
- Expanding early learning and care infrastructure.

The Budget begins the implementation of the Master Plan by expanding access to TK. TK is the first year of a two-year kindergarten program, and is available to all children who turn five on or between September 2 and December 2 of each calendar year. Additionally, at their own discretion, many local educational agencies currently offer TK to children who turn five after December 2. These local educational agencies do not receive state funding for these students until they turn five.

To encourage more local educational agencies to offer TK to younger children (thereby expanding access to publicly-funded preschool), the Budget includes \$250 million one-time Proposition 98 General Fund, available over multiple years, to provide grants to local educational agencies that offer early access to TK, to help them cover up-front costs associated with expanding their TK programs. Additionally, to increase the number of highly qualified teachers available to serve TK students, the Budget includes \$50 million one-time Proposition 98 General Fund to support the preparation of TK teachers and provide both TK and kindergarten teachers with training in providing instruction in inclusive classrooms, support for English language learners, social-emotional learning, trauma-informed practices, restorative practices, and mitigating implicit biases.

Access to appropriate facilities is also essential to expanding access to TK, as well as full-day early education programming. The state has made significant recent investments in the development of kindergarten facilities, with the goal of moving more

programs from part-day to full-day to improve educational outcomes for children and to better accommodate working parents. The 2018 Budget Act included a total of \$100 million one-time General Fund for eligible school districts to construct new, or retrofit existing, facilities for full-day kindergarten programs. Building upon this investment, and consistent with the goal of converting existing part-day kindergarten programs to full-day programs, the Budget includes \$200 million one-time General Fund for school districts to construct and retrofit existing facilities to support TK and full-day kindergarten programs.

CRADLE-TO-CAREER DATA SYSTEM

California is developing a comprehensive longitudinal data system—the infrastructure that enables policymakers, practitioners, and the public to understand how individuals use state programs to move along a path to achievement. Accordingly, the state established the California Cradle-to-Career Data System Act in 2019 to guide the planning for, and development of, a longitudinal data system.

Since enactment, over a dozen state agencies, numerous data experts, and a wide range of stakeholders have engaged in an intensive and collaborative planning process involving over 50 public meetings. The process resulted in consensus regarding a series of concrete plans and proposals to connect information from early education providers, K-12 schools, higher education institutions, employers, other workforce entities, and health and human services agencies.

Learning lessons from other states and leveraging advances in technology, California's data system will lead the nation in multiple ways. First, the system will incorporate design principles that promote “futureproofing” to the greatest extent possible, avoiding challenges associated with outdated technical infrastructure. Second, the system will reflect a “whole child” approach to serving Californians from cradle to career, incorporating data from education-adjacent programs and institutions such as health and human services. Third, the system will focus not only on what can be learned from integrated data, such as insights about obstacles facing students transitioning from K-12 to postsecondary institutions, but also on what can be done with integrated data, such as developing tools for students and families to navigate those same institutions.

The COVID-19 Pandemic has underscored the importance of implementing the state's vision for the Cradle-to-Career Data System. Preliminary evidence on the adverse mental health impacts of the pandemic—and corresponding solutions—can be informed by actual data linked between educational and health systems. Furthermore,

as the state accelerates its economic recovery, the data system can support tools that empower students and families to plan for and pursue careers.

To support the continued development of the Cradle-to-Career Data System, the Budget provides \$15 million General Fund, of which \$3 million is one-time, to establish an office within the Government Operations Agency to provide support and resources for:

- The acquisition, development, and maintenance of the system's analytical tools, including data storage and querying functions;
- The administration and maintenance of the data system;
- Updating the K-12 California Longitudinal Pupil Achievement Data System (CalPADS) data system software to facilitate smoother system compatibility;
- Expanding eTranscript functionality to additional colleges and universities;
- The hiring of management level data system coordinators at the University of California, California State University, California Student Aid Commission, and California Community Colleges Chancellor's Office; and
- Governance and operational costs.

Additionally, the Budget provides \$3.8 million ongoing Proposition 98 General Fund to support the California Career Guidance Initiative (CCGI). CCGI provides an interface for student data between high schools, students, and families that will be integrated into the Cradle-to-Career Data System.

SCHOOL FACILITIES

The Kindergarten through Community College Public Education Facilities Bond Act of 2016 (Proposition 51)—approved by voters in November 2016—authorized \$7 billion in state General Obligation bonds to support K-12 school facilities construction. These funds support new construction, modernization, retrofitting, career technical education, and charter school facility projects. The Budget continues to allocate \$1.5 billion Proposition 51 bond funds to support school construction projects, which is more than double the amount allocated in 2018-19.

OTHER K-12 BUDGET ADJUSTMENTS

Other significant adjustments include:

- **Local Property Tax Adjustments**—An increase of \$54.1 million ongoing Proposition 98 General Fund for school districts and county offices of education in 2020-21 as a result of decreased offsetting property tax revenues, and a decrease of \$1.2 billion ongoing Proposition 98 General Fund for school districts and county offices of education in 2021-22 as a result of increased offsetting property taxes.
- **Cost-of-Living Adjustments**—An increase of \$85.7 million ongoing Proposition 98 General Fund to reflect a 1.5-percent cost-of-living adjustment for categorical programs that remain outside of the Local Control Funding Formula, including Special Education, Child Nutrition, State Preschool, Youth in Foster Care, Mandates Block Grant, Adults in Correctional Facilities Program, American Indian Education Centers, and the American Indian Early Childhood Education Program.
- **County Offices of Education**—An increase of \$10.2 million ongoing Proposition 98 General Fund to reflect a 1.5-percent cost-of-living adjustment and ADA changes applicable to the LCFF.
- **Instructional Quality Commission**—An increase of \$206,000 one-time non-Proposition 98 General Fund for the Instructional Quality Commission to continue its work on the development of model curriculum and frameworks.

HIGHER EDUCATION

California's economic prosperity and workforce of the future are directly supported by two of the state's most significant competitive advantages: its exceptional system of higher education and its increasingly educated workforce. The COVID-19 Pandemic has impacted the state's higher education systems. These impacts include a reported 8-percent decline in California Community College (CCC) enrollment that is disproportionately attributable to underrepresented students. The state has also seen declines of roughly 10 percent and 45 percent in first-time freshman Free Application for Federal Student Aid (FAFSA) completion rates, and California Dream Act application completion rates, respectively.

To support the state's system of higher education and to mitigate the impacts of the COVID-19 Pandemic, the Budget proposes investments in the CCCs, California State University (CSU), and University of California (UC) to enable them to close equity gaps, promote completion, fuel innovation, and support students' upward economic mobility. The investments are predicated upon an expectation that the state's colleges and universities focus on addressing equity gaps, furthering educational opportunities using online courses and programs, better connecting student learning objectives to workforce and industry needs, and establishing new dual admissions transfer pathways.

The Budget proposes total funding of \$36.1 billion (\$21.8 billion General Fund and local property tax and \$14.3 billion other funds) for higher education. The total reflects growth of \$951 million (\$1.3 billion General Fund and local property taxes and -\$349 million other funds) compared to revised 2020-21 expenditures. The figure on Higher Education Expenditures displays additional detail about funding for higher education. The figure

below does not include the estimated \$2.9 billion included in the recently passed federal COVID-19 relief bill.

Higher Education Expenditures (Dollars in Millions)

	2019-20 ⁴	2020-21	2021-22	Change from 2020-21	
				Dollars	Percent
University of California					
Total Funds ^{1/}	\$9,649.1	\$8,915.0	\$9,298.8	\$383.8	4.3%
Ongoing General Fund	3,724.3	3,465.3	3,601.3	\$136.0	3.9%
One-Time General Fund	214.0	0.7	225.3	-	-
California State University					
Total Funds ^{1/}	\$8,576.6	\$7,356.3	\$7,766.1	\$409.8	5.6%
Ongoing General Fund	4,351.9	4,041.5	4,241.5	\$200.1	5.0%
One-Time General Fund	328.4	14.2	225.0	-	-
California Community Colleges					
Total Funds	\$16,762.0	\$16,181.3	\$16,189.9	\$8.6	0.1%
General Fund & Property Taxes	10,367.1	10,727.8	11,092.6	\$364.9	3.4%
California Student Aid Commission					
Total Funds	\$2,468.8	\$2,680.0	\$2,826.3	\$146.3	5.5%
General Fund ^{2/}	1,388.0	2,244.4	2,405.7	\$161.3	7.2%
Other Higher Education ^{3/}					
Total Funds	\$97.1	\$65.8	\$67.9	\$2.1	3.2%
Ongoing General Fund	16.9	19.0	20.7	\$1.7	-
One-Time General Fund	26.1	-	-	-	-
Total Funds	\$37,553.6	\$35,198.3	\$36,149.0	\$950.6	2.7%
General Fund	\$20,416.8	\$20,512.9	\$21,812.1	\$1,299.2	6.3%

^{1/} These totals include tuition and fee revenues and other funds the universities report as discretionary.

^{2/} General Fund expenditures for the Cal Grant program are offset by reimbursements, including approximately \$400 million in federal Temporary Assistance for Needy Families (TANF) funds received through an agreement with the Department of Social Services.

^{3/} This category includes Hastings College of the Law and one-time funds in 2019-20 for the Scholarshare California Kids Investment and Development Savings Program.

^{4/} 2019-20 Total Funds include federal Coronavirus Aid, Relief, and Economic Security (CARES) Act funding provided directly to colleges and universities.

ADDRESSING IMMEDIATE NEEDS TO SUPPORT AND ENGAGE STUDENTS

According to initial survey data from the RP Group (an organization representing institutional research, planning, and effectiveness professionals in the CCC system), Fall 2020 CCC enrollment is down roughly 8 percent from the prior fall term. Initial indications suggest these declines are disproportionately attributable to the state's underrepresented student populations. The California Student Aid Commission recently noted that the preliminary year-over-year Free Application for Federal Student Aid

(FAFSA) completion rate for first-time freshman application completion is down roughly 10 percent and that the year-over-year California Dream Act application completion rate is down roughly 45 percent.

To mitigate these concerning trends and address immediate student needs, the Budget proposes early action on the following proposals:

- Provide \$100 million one-time Proposition 98 General Fund to support emergency student financial assistance grants for full-time, low-income community college students and other students who were previously working full-time, or the equivalent of full-time, who can demonstrate an emergency financial need.
- Provide \$20 million one-time Proposition 98 General Fund to support efforts to bolster CCC student retention rates and enrollment. These funds would be used to primarily engage former students who may have withdrawn from college due to the impacts of the COVID-19 Pandemic, and to engage current and prospective students who may be hesitant to remain enrolled or prospectively enroll in college due to impacts of the pandemic.
- Amend statute to delay the requirement for private nonprofit institutions to offer admission to at least 2,000 Associate Degree for Transfer students for the 2020-21 academic year in order to maintain the maximum Cal Grant tuition award for students attending private nonprofit institutions at \$9,084 in 2021-22. The delay shifts the requirement from applying in 2021-22 to applying in 2022-23.
- Amend statute to restore Cal Grant A eligibility for students impacted by a change in their living status due to the pandemic at an estimated cost of \$58.8 million ongoing General Fund starting in 2020-21.

LINKING HIGHER EDUCATION AND EMPLOYMENT OPPORTUNITIES

As referenced in the Equitable and Broad-Based Recovery Chapter, the Budget sets aside \$250 million one-time General Fund to support forthcoming proposals that are focused on workforce development, segment alignment, and improving linkages between higher education institutions and employers.

CALIFORNIA COMMUNITY COLLEGES

The CCCs are the largest system of higher education in the nation, serving roughly one out of every four of the nation's community college students, or approximately

2.1 million students. The CCCs provide basic skills, vocational, and undergraduate transfer education with 73 districts, 116 campuses, and 78 educational centers. In 2019-20, the CCCs awarded over 115,000 certificates and 196,000 degrees and transferred over 107,000 students to four-year institutions.

The 2020 Budget Act made adjustments that reduced the overall level of support for the CCCs by deferring approximately \$1.453 billion from 2020-21 to 2021-22. The CCCs have indicated the system received approximately \$612.4 million in federal higher education Coronavirus Aid, Relief, and Economic Security (CARES) Act funding, with roughly half of the funds required for emergency grants to students. The recent federal COVID-19 relief bill enacted in late December includes additional federal funding to support institutions of higher education; California higher education segments could receive \$2.9 billion.

REPAYING DEFERRALS AND CORE APPORTIONMENTS INVESTMENTS

Given expected increases in the Proposition 98 Guarantee relative to the 2020 Budget Act, the Budget proposes to reduce apportionment deferrals for the Student-Centered Funding Formula (SCFF) by more than \$1.1 billion to \$326.5 million Proposition 98 General Fund for 2021-22. The Budget also proposes \$111.1 million ongoing Proposition 98 General Fund to provide a 1.5-percent cost-of-living adjustment for apportionments and \$23.1 million ongoing Proposition 98 General Fund for 0.5-percent enrollment growth.

SUPPORTING STUDENTS DURING THE COVID-19 PANDEMIC

The COVID-19 Pandemic has had disproportionate impacts on low-income students, and the Administration is committed to supporting equity and access across the public higher education segments. In addition to the early action package already discussed, the Budget proposes the following targeted investments to alleviate student financial hardship and improve access to, and the quality of, online education:

- \$150 million one-time Proposition 98 General Fund for emergency financial assistance for full-time, low-income community college students and other students who were previously working full-time or the equivalent of full-time, can demonstrate an emergency financial need, and can demonstrate at least a 2.0 GPA in one of their last three semesters or four quarters. (As noted in the Addressing Immediate

Needs to Support and Engage Students section of this Chapter, there is an additional \$100 million for this purpose proposed for early action.)

- \$100 million one-time Proposition 98 General Fund to address food and housing insecurity among CCC students.
- \$30 million ongoing Proposition 98 General Fund to support student technological access to higher education by enabling students to have electronic devices and high-speed Internet connectivity, as well as increase student mental health resources.
- \$20 million one-time Proposition 98 General Fund for a systemwide effort to provide culturally competent online professional development for CCC faculty, including in leveraging technology to improve learning outcomes.
- \$10.6 million ongoing Proposition 98 General Fund to support the continuity of education and quality distance learning, including access to online tutoring, online counseling, and online student support services such as mental health services.

EXPANDING WORK-BASED LEARNING OPPORTUNITIES

The COVID-19 Pandemic has affected every sector of the state's economy and has caused record high unemployment. While the economy is showing some signs of improvement, millions of Californians remain unemployed. The CCCs are central to training and developing the skilled workforce needed for the state to meet its changing needs, and the state must prepare students with the skills needed by employers not only today, but into the future. The Budget includes \$35 million Proposition 98 General Fund to support the following investments in work-based learning:

- \$15 million ongoing Proposition 98 General Fund to augment the California Apprenticeship Initiative, which supports the creation of apprenticeship opportunities in priority and emerging industry sectors.
- \$20 million one-time Proposition 98 General Fund to expand work-based learning models and programs at community colleges, including working with faculty and employers to incorporate work-based learning into curriculum.

OTHER BUDGET ADJUSTMENTS

STUDENT-FOCUSED ADJUSTMENTS:

- Zero-Textbook-Cost Degrees—An increase of \$15 million one-time Proposition 98 General Fund to develop and implement zero-textbook-cost degrees using open educational resources.
- Instructional Materials for Dual Enrollment Students—An increase of \$2.5 million one-time Proposition 98 General Fund for community colleges to provide instructional materials for dual enrollment students.
- AB 1460 Implementation and Anti-Racism Initiatives—An increase of \$600,000 one-time Proposition 98 General Fund to support the implementation of the provisions of Chapter 32, Statutes of 2020 (AB 1460) as well as systemwide anti-racism initiatives.

APPORTIONMENTS ADJUSTMENTS:

- Augmentation for 2020-21 Apportionments—An increase of \$52.7 million one-time Proposition 98 General Fund in 2020-21 community college apportionments.
- Local Property Tax Adjustment—A decrease of \$292.7 million ongoing Proposition 98 General Fund as a result of increased offsetting local property tax revenues.

OTHER ADJUSTMENTS:

- CENIC Cost Increase—An increase of \$8 million ongoing Proposition 98 General Fund for cost increases associated with continued broadband access provided by the Corporation for Education Network Initiatives in California (CENIC).
- Adult Education Cost-of-Living Adjustment—An increase of \$8.1 million ongoing Proposition 98 General Fund to reflect a 1.5-percent cost-of-living adjustment for the Adult Education Program.
- Adult Education Technical Assistance Funding—An increase of \$1 million ongoing Proposition 98 General Fund to support technical assistance for the Adult Education Program.
- CCC Facilities—An increase of General Obligation bond funding of \$355.8 million, including \$2.2 million to start one new capital outlay project and \$353.6 million for the construction phase of 17 projects anticipated to complete design by spring

2022. This allocation represents the next installment of the \$2 billion available to CCCs under Proposition 51.

CALIFORNIA STATE UNIVERSITY

The CSU provides undergraduate and graduate instruction generally up to the master's degree. Its 23 campuses enroll approximately 486,000 students. In 2020-21, the CSU awarded 129,000 degrees. The CSU also provides opportunities for residents to enroll in professional and continuing education programs. The CSU strives to better fulfill its mission through the Graduation Initiative 2025, which aims to increase four-year graduation rates, increase two-year transfer graduation rates, and eliminate equity gaps. The CSU is an especially important institution for providing four-year education in some of the most underserved regions of the state, including the Far North, the Central Valley, and the Inland Empire.

The 2020 Budget Act made adjustments that reduced the overall level of support for the CSU by \$299.1 million ongoing General Fund. The CSU has indicated the system received approximately \$564 million in federal higher education CARES Act funding, with roughly half of the funds being required for emergency grants to students. The recent federal COVID-19 relief bill enacted in late December includes additional federal funding to support institutions of higher education; California's higher education segments could receive \$2.9 billion.

SIGNIFICANT INVESTMENTS AND EXPECTATIONS

The Budget includes \$144.5 million in ongoing General Fund to provide a three-percent increase in base resources to support the CSU's operational costs, support for the Basic Needs Initiative component of Graduation Initiative 2025, student basic needs focused on digital equity and the provision of mental health services, the adoption of a common intersegmental learning management platform, and enrollment at the CSU Stanislaus Stockton Campus.

In addition, the Budget includes \$225 million one-time General Fund to support emergency financial assistance grants to students in need, support for culturally competent professional development focused on the provision of online courses and programs, support for the Computing Talent Initiative, and for deferred maintenance.

These investments are provided with the expectation that CSU:

- Maintain resident undergraduate tuition and fees at current levels for the 2021-22 academic year;
- Take action to significantly reduce equity gaps with the goal of fully closing equity gaps by 2025;
- Adopt policies furthering educational opportunities using online learning programs;
- Better align student learning objectives with workforce needs; and
- Create a new stand-alone dual admissions pathway enabling first-time freshman applicants to be considered for guaranteed admission to CSU upon completion of an Associate Degree for Transfer at a California Community College.

GRADUATION INITIATIVE 2025

The CSU Graduation Initiative 2025, adopted by the Board of Trustees in 2016, commits the CSU to increasing the four-year graduation rate to at least 40 percent, increasing the two-year graduation rate to at least 45 percent, and closing achievement gaps between different groups of students by 2025.

The CSU continues to make significant strides to meet these goals. Based on preliminary 2020 data, the 2019-20 academic year resulted in a record high number of graduates, the highest number of two- and four-year rates for transfer students, and the highest-ever four- and six-year graduation rates for first-time students. The Administration supports the CSU's focus toward achieving the underlying goals of the Graduation Initiative, which will better improve students' timely degree completion and reduce students' total degree costs.

DETAILED BUDGET ADJUSTMENTS

ONGOING ADJUSTMENTS

- **Base Growth**—An increase of \$111.5 million ongoing General Fund, which represents an increase in base resources of three percent, with the expectation that the CSU will maintain resident undergraduate tuition and fees at existing levels for the 2021-22 academic year, reduce equity gaps, commit to aligning student learning objectives with workforce needs, adopt policies related to online course and program offerings, and create a new dual admissions pathway.
- **Student Basic Needs Focused on Digital Equity and Mental Health Services**—An increase of \$15 million ongoing General Fund to enable all students to have

necessary technological access to electronic devices and high-speed Internet connectivity, and to increase student mental health resources.

- Basic Needs Initiative Component of CSU Graduation Initiative 2025—An increase of \$15 million ongoing General Fund to sustain and expand support for the Basic Needs Initiative component of Graduation Initiative 2025. This Initiative seeks to support students experiencing food and housing insecurity, financial distress, and other challenges that could disrupt their academic success and degree completion.
- Learning Management Platform (Canvas)—An increase of \$2 million ongoing General Fund for CSU to adopt a common intersegmental learning management platform for online courses at each campus that aligns with the platform used by the California Community College system (Canvas), by the 2023-24 academic year.
- CSU Stanislaus, Stockton Campus—An increase of \$1 million ongoing General Fund to increase full-time equivalent student enrollment at the CSU Stanislaus Stockton campus by approximately 115 students.
- Corporation for Education Network Initiatives in California (CENIC)—An increase of \$246,000 ongoing General Fund for cost increases associated with continued broadband access provided by CENIC.

ONE-TIME ADJUSTMENTS

- Deferred Maintenance—An increase of \$175 million one-time General Fund to address deferred maintenance at CSU campuses.
- Emergency Student Financial Assistance—An increase of \$30 million one-time General Fund to support emergency financial assistance grants for full-time, low-income students and other students who were previously working full-time, or the equivalent of full-time.
- Faculty Professional Development—An increase of \$10 million one-time General Fund to provide culturally competent professional development for CSU faculty, including in leveraging technology to improve learning outcomes.
- Computing Talent Initiative—Provide \$10 million one-time General Fund to support the CSU Computing Talent Initiative through CSU Monterey Bay, to enable additional cohorts of computer science students in the program.
- Summer Financial Aid Program—The Budget shifts the suspension date for the CSU Summer Financial Aid program from December 31, 2021 to December 31, 2022. The suspension would be lifted if the Administration determines through the 2022 Budget

Act process that there is sufficient General Fund revenue to support all suspended programs in the subsequent two fiscal years.

UNIVERSITY OF CALIFORNIA

The UC offers formal undergraduate and graduate education. The UC is the public segment authorized to independently award doctoral degrees and is designated as the state's primary academic agency for research. Its 10 campuses enroll more than 285,000 students. In 2019-20, the UC awarded approximately 83,000 degrees. An additional 300,000 students participate in continuing education programs through the UC extension centers.

In keeping with its tradition of excellence and innovation, three UC faculty members, and one UC alumnus, were awarded Nobel Prizes in 2020, bringing the total number of UC faculty and staff who have been awarded Nobel Prizes since 1934 to 68 and the total number of Nobel Prizes received by those faculty and staff to 69.

The 2020 Budget Act made adjustments that reduced the base level of support for the UC by \$302.4 million ongoing General Fund. The UC has indicated the system received approximately \$267.5 million in federal higher education CARES Act funding, with roughly half of the funds being required for emergency grants to students. The recent federal COVID-19 relief bill enacted in late December includes additional federal funding to support institutions of higher education; California higher education segments could receive \$2.9 billion.

SIGNIFICANT INVESTMENTS AND EXPECTATIONS

The Budget proposes ongoing General Fund augmentations of approximately \$136 million to support a three-percent General Fund increase in base resources for UC campuses and the UC Office of the President; UC Payroll, Academic Personnel, Timekeeping & HR (UCPath); the Division of Agriculture and Natural Resources; student basic needs focused on digital equity and the provision of mental health services; UC Programs in Medical Education (PRIME); the adoption of a common intersegmental learning management platform; and other baseline adjustments for ongoing support.

In addition to this ongoing funding, the Budget proposes \$225 million one-time General Fund to address deferred maintenance and energy efficiency projects at UC campuses, support emergency financial assistance grants to students in need, support

the California Institutes for Science and Innovation, provide support for culturally competent professional development focused on the provision of online courses, provide the UC Subject Matter Projects resources for K-12 teacher professional development regarding learning loss mitigation and ethnic studies, and to support UC Fire Advisors.

These investments are provided with the expectation that UC:

- Maintain resident undergraduate tuition and fees at current levels for the 2021-22 academic year;
- Take action to significantly reduce equity gaps with the goal of fully closing equity gaps by 2025;
- Adopt policies furthering educational opportunities using online learning programs;
- Better align student learning objectives with workforce needs; and
- Create a new, stand-alone dual admissions pathway enabling first-time freshman applicants to be considered for guaranteed admission to UC upon completion of an Associate Degree for Transfer (ADT), or its UC equivalent, at a CCC. In designing a new, stand-alone dual admissions pathway that relies upon a UC ADT equivalent degree, the Administration expects the UC to identify for students: (1) courses that overlap between the existing ADT pathway and its UC equivalent pathway, and (2) courses that do not overlap between the existing ADT pathway and its UC equivalent pathway.

DETAILED BUDGET ADJUSTMENTS

ONGOING ADJUSTMENTS

- Base Growth—A total increase of \$103.9 million ongoing General Fund with the expectation that the UC will maintain resident undergraduate tuition and fees at existing levels for the 2021-22 academic year, reduce equity gaps, align student learning objectives with workforce needs, adopt policies related to online course and program offerings, and create a new dual admissions pathway. This investment reflects:
 - An increase of \$95 million ongoing General Fund to provide an increase in base resources available to campuses of three percent.

- An increase of \$8.9 million ongoing General Fund to provide an increase in resources for the UC Office of the President, UCPATH, and the Division of Agriculture and Natural Resources of three percent.
- Student Basic Needs Focused on Digital Equity and Mental Health Services—An increase of \$15 million ongoing General Fund to enable all students to have necessary technological access to electronic devices and high-speed Internet connectivity, and to increase student mental health resources.
- UC PRIME—An increase of \$12.9 million ongoing General Fund to support and expand existing UC Programs in Medical Education and to establish a new UC Program in Medical Education focused on Native American communities. UC is encouraged to use these funds to support PRIME programs that serve underrepresented areas of the state, and one-third of the funds will be used to augment need-based financial aid for UC PRIME students.
- Learning Management Platform (Canvas)—An increase of \$1 million ongoing General Fund for UC to adopt a common learning management platform for online courses at each campus that aligns with the platform used by the CCC system (Canvas), by the 2023-24 academic year.
- Graduate Medical Education—An increase of approximately \$1 million ongoing General Fund, growing to approximately \$1.8 million General Fund ongoing in 2022-23 and thereafter, to offset declining Proposition 56 revenue supporting a statewide grant program to maintain \$40 million ongoing for graduate medical residency slots.

ONE-TIME ADJUSTMENTS

- Deferred Maintenance and Energy Efficiency—An increase of \$175 million one-time General Fund to support deferred maintenance and energy efficiency projects at UC campuses.
- California Institutes for Science and Innovation—An increase of \$20 million one-time General Fund for four science and innovation institutes to support student stipends over a five-year period to better enable student workers to connect with industry employers, and for research teams to form industry partnerships to better align educational programs with workforce needs.
- Emergency Student Financial Assistance—An increase of \$15 million one-time General Fund to support emergency financial assistance grants for full-time,

low-income students and other students who were previously working full-time, or the equivalent of full-time.

- **UC Subject Matter Projects**—An increase of \$7 million one-time General Fund to provide resources to the UC Subject Matter Projects for K-12 teacher professional development regarding learning loss mitigation and ethnic studies.
- **Faculty Professional Development**—An increase of \$5 million one-time General Fund to provide culturally competent professional development for UC faculty, including in leveraging technology to improve learning outcomes.
- **UC Fire Advisors**—The Budget includes \$2 million one-time General Fund to support UC Fire Advisors through the UC Division of Agriculture and Natural Resources.
- **UC San Francisco—Department of Public Health Modeling Consortium**—The Budget includes \$1.25 million one-time General Fund that will be available over a two-year period to support a health modeling consortium partnership between UC San Francisco and the California Department of Public Health.
- **Summer Financial Aid Program**—The Budget shifts the suspension date for the UC Summer Financial Aid program from December 31, 2021 to December 31, 2022. The suspension would be lifted if the Administration determines through the 2022 Budget Act process that there is sufficient General Fund revenue to support all suspended programs in the subsequent two fiscal years.

CALIFORNIA STUDENT AID COMMISSION

Administered by the California Student Aid Commission, the state's primary financial aid program is the Cal Grant Program. The Cal Grant entitlement program provides financial aid awards to students who meet specified eligibility criteria, and who attend one of the state's qualifying public institutions or independent and private institutions. Students who are ineligible for the Cal Grant entitlement program can compete for financial aid awards available through the Cal Grant competitive program.

The Budget assumes total financial aid expenditures of \$2.8 billion, of which \$2.67 billion supports the Cal Grant Program and Middle Class Scholarship Program. In 2019-20, approximately 150,000 students received new Cal Grant awards, and approximately 233,000 students received renewal awards.

IMPROVING COLLEGE AFFORDABILITY

The state's Cal Grant entitlement program is estimated to provide over 412,000 financial aid awards to students who meet specified eligibility criteria in fiscal year 2021-22. Students who demonstrate financial need, but do not meet all of the criteria for entitlement awards, may qualify for one 50,000 proposed competitive Cal Grant awards. The majority of these awards provide a stipend to cover some living expenses, such as housing, food, and transportation. However, many students still struggle to afford the total cost of attending an institution of higher education in California and for many students, this has only been exacerbated by the impacts of the COVID-19 Pandemic. The Budget reflects an expectation that one of these costs—tuition and fees—remain flat at all three public higher education institutions in 2021-22 and also includes student basic needs investments, emergency financial assistance investments, and investments supporting expanded mental health services and students' access to electronic devices and high-speed Internet connectivity.

SIGNIFICANT ADJUSTMENTS

- **Competitive Cal Grant Increase**—An increase of approximately \$35 million ongoing General Fund to add 9,000 Cal Grant Competitive awards, increasing the total number of awards to 50,000.
- **Former and Current Foster Youth Access Award**—An increase of approximately \$20 million ongoing General Fund to increase the access awards for all former or current foster youth. Eligible new or renewal Cal Grant A students will receive an access award of up to \$6,000, eligible new or renewal Cal Grant B students will see their access award increase from \$1,648 to \$6,000, and eligible Cal Grant C students will see their book and supply award increase from \$1,094 to \$4,000.
- **Golden State Teacher Grant Program**—An increase of \$100 million one-time General Fund to support the Golden State Teacher Grant Program, which provides support for grants to students enrolled in teacher preparation programs who commit to working in a high-need field at school sites with the highest rates of non-credentialed or waiver teachers.
- **Tuition Award for Students at Private Nonprofit Institutions**—The Budget includes statutory changes to delay the requirement for private nonprofit institutions to offer admission to at least 2,000 Associate Degree for Transfer students for the 2020-21 academic year in order to maintain the maximum Cal Grant tuition award for

students attending private nonprofit institutions at \$9,084 in 2021-22. The delay shifts the requirement from applying in 2021-22 to applying in fiscal year 2022-23.

- **FAFSA or California Dream Act Application**—As referenced in the K-12 Education Chapter, the Budget includes statutory changes to require local educational agencies to confirm that all high school seniors complete a FAFSA or California Dream Act Application beginning in the 2021-22 academic year.
- **Cal Grant Program Adjustments**—A decrease of \$3.3 million one-time General Fund in 2020-21 and an increase of \$13.2 million ongoing General Fund in 2021-22 to reflect:
 - Revised estimates of the number of new and renewal Cal Grant awardees in 2020-21 and 2021-22.
 - An increase of \$58.2 million ongoing General Fund to restore Cal Grant A eligibility for students impacted by a change in their living status due to the COVID-19 Pandemic.

HASTINGS COLLEGE OF THE LAW

Hastings College of the Law is affiliated with the UC system, but is governed by its own Board of Directors. Located in San Francisco, it primarily serves students seeking a Juris Doctor degree, but also offers programs leading to Master of Laws and Master of Studies in Law degrees. In 2019-20, UC Hastings enrolled 944 full-time equivalent students. Of these, 921 were Juris Doctor students.

SIGNIFICANT ADJUSTMENTS

- **Base Growth**—An increase of \$2.1 million ongoing General Fund to support the College's general operations, with the expectation that resident tuition remain flat in 2021-22.

CALIFORNIA STATE LIBRARY

The California State Library serves as the central reference and research library for the Governor and the Legislature. The Library collects, preserves, generates, and disseminates information, and provides critical assistance to libraries across the state. The Library administers programs funded by state and federal funds to support local and public library programs.

SIGNIFICANT ADJUSTMENTS

- Online Service Systems (Zip Books)—An increase of \$1 million ongoing General Fund to support the online purchase and delivery of library books through the Zip Books Program. This no-cost service is an alternative to traditional interlibrary loan and enables library patrons to more efficiently request and receive books not available at their local library.
- Lunch at the Library—An increase of \$800,000 ongoing General Fund for library districts to develop summer meal programs for students in low-income communities.
- Community Outreach Vehicles and Bookmobiles—An increase of \$3 million one-time General Fund to provide grants to underserved local libraries for the purchase of a bookmobile or community outreach vehicle.
- Early Learning and After-School Programs—An increase of \$5 million one-time General Fund to provide grants to local libraries to support early learning and after-school programs.

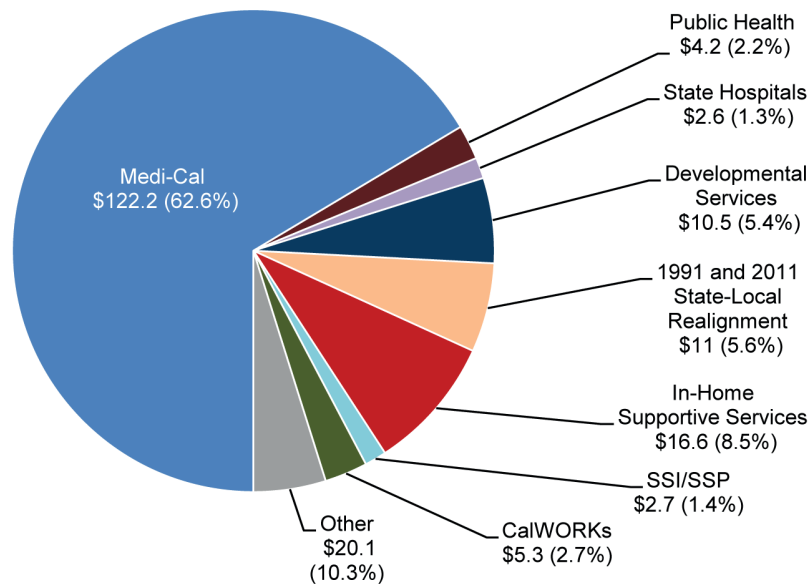

HEALTH AND HUMAN SERVICES

The Health and Human Services Agency oversees departments and state entities that provide health and social services to California's most vulnerable and at-risk residents. Along with the Governor's Office of Emergency Services, the Agency is leading the response to the COVID-19 Pandemic. The Budget includes \$195.1 billion (\$64.3 billion General Fund and \$130.8 billion other funds) for all health and human services programs. This does not include all pandemic response costs. (See COVID-19 Pandemic Response Chapter for more details.)

The COVID-19 Pandemic is having a significant impact on the programs under the Health and Human Services Agency. The Budget assumes that the COVID-19 Pandemic emergency response continues at some level until December 2021. This includes the enhanced Federal Medical Assistance Percentage (FMAP) provided to support the state's Medi-Cal program.

To help address projected structural deficits, the 2020 Budget Act assumed the suspension of various health and human services investments effective July 1, 2021 and December 31, 2021. Given the improved revenue outlook in the short term, the Budget proposes to delay these suspensions by one year. These suspensions include, but are not limited to, Proposition 56 supplemental payment increases, reversing the 7-percent reduction in In-Home Supportive Services hours, and Developmental Services payment increases.

Health and Human Services Proposed 2021-22 Funding^{1/}
All Funds
(Dollars in Billions)

^{1/} Totals \$195.1 billion for support, local assistance, and capital outlay. This figure includes reimbursements of \$17.9 billion and excludes \$305,000 in Proposition 98 funding in the Department of Developmental Services budget and county funds that do not flow through the state budget.

Note: Numbers may not add due to rounding.

Major Health and Human Services Program Caseloads

	2020-21 Revised	2021-22 Estimate	Change
Medi-Cal	13,970,800	15,603,800	1,633,000
California Children's Services (CCS) ^{1/}	14,571	14,571	0
CalWORKs	405,317	482,436	77,119
CalFresh	2,167,167	2,559,491	392,324
SSI/SSP (support for aged, blind, and disabled)	1,201,565	1,188,055	-13,510
Child Welfare Services ^{2/}	111,204	110,817	-387
Foster Care	56,923	57,899	976
Adoption Assistance	88,849	89,239	390
In-Home Supportive Services	570,411	592,829	22,418
Regional Centers	357,819	386,431	28,612
State Hospitals ^{3/}	6,162	6,361	199
Developmental Centers ^{4/}	322	322	0
Vocational Rehabilitation	108,000	108,000	0

^{1/} Represents unduplicated quarterly caseload in the CCS Program. Does not include Medi-Cal CCS beneficiaries.

^{2/} Represents Emergency Response, Family Maintenance, Family Reunification, and Permanent Placement service areas on a monthly basis. Due to transfers between each service area, cases may be reflected in more than one service area.

^{3/} Represents the year-end population at State Hospitals, county Jail-Based Competency Treatment programs, and Kern Admission, Evaluation and Stabilization center.

^{4/} Represents the year-end population.

MAKING HEALTH CARE MORE AFFORDABLE

More than ever, the COVID-19 Pandemic has underscored the need to expand coverage and increase affordability of health care for all. The state has made significant investments in recent years to expand coverage and increase the affordability of health care, including:

- Augmenting premium assistance for Covered California enrollees, making California the first state in the nation to provide additional state premium assistance for the middle class;
- Instituting a state individual mandate to stabilize the health insurance market;
- Expanding eligibility for no-cost Medi-Cal for persons aged 65 and older and persons with disabilities up to 138 percent of the federal poverty level;
- Extending Medi-Cal to income-eligible young adults regardless of immigration status;
- Addressing the high costs of prescription drugs;
- Restoring optional benefits (most were preventative services) and extending full-scope Medi-Cal coverage to new mothers with a maternal mental health diagnosis; and
- Expanding preventative services with a specific focus on screening for adverse childhood experiences.

These improvements are providing more Californians with coverage and strengthening the health care system during the COVID-19 Pandemic. Keeping people covered and healthy slows the growth of the average Californian's personal health care expenses and encourages the provision of preventative and primary care services.

The Budget takes additional steps to make health care more affordable, including establishing an Office of Health Care Affordability and a system to better use health data to improve health outcomes and address health equity.

OFFICE OF HEALTH CARE AFFORDABILITY

Improving the affordability of health coverage will benefit millions of working Californians, and this endeavor must be accompanied by efforts to address underlying cost drivers. The Budget builds on the Health Care Payment Database, which enables

the Office of Statewide Health Planning and Development to collect and analyze granular utilization and cost data.

Given the size and complexity of California's health care system, the Budget includes \$11.2 million in 2021-22, \$24.5 million in 2022-23, and \$27.3 million in 2023-24 and ongoing from the Health Data and Planning Fund to establish the Office of Health Care Affordability.

This Office will be charged with increasing transparency on cost and quality, developing cost targets for the health care industry, enforcing compliance through financial penalties, and filling gaps in market oversight of transactions that may adversely impact market competition, prices, quality, access, and the total cost of care. In addition to lowering costs, the Office will promote health care workforce stability and training needs, report quality performance and equity metrics on the entire health care system, advance payment models that reward high-quality, cost-efficient care, and promote investments in primary care and behavioral health.

The Office of Statewide Health Planning and Development's programs for data assets and health care workforce development and the Office of Health Care Affordability's focus on health care cost containment present an opportunity for the Administration to better align these priorities. The Administration will submit a proposal in the spring recasting the Office of Statewide Health Planning and Development and the proposed Office of Health Care Affordability under the umbrella of a Department of Health Care Affordability and Infrastructure. The Department will be the dedicated entity within state government with subject matter expertise on health care affordability and infrastructure.

UTILIZING HEALTH INFORMATION EXCHANGE

It is imperative that the state expand the use of clinical and administrative data to better understand the health and social needs of individual patients in order to achieve high-quality, efficient, safe, and timely service delivery while improving outcomes. These goals can be accomplished by building and supporting the infrastructure and information systems to facilitate secure and appropriate exchange of electronic health information among health care providers.

Despite significant federal investment over the past 10 years for adoption of electronic health records and creation of health information exchanges, most patients' medical information, including clinical histories, medications, and test results, is stored on paper or across hundreds of disparate electronic health record systems. The goals of improved

health outcomes and affordability cannot be achieved without unified patient health records and digital infrastructure to support a more integrated provision of health and human services.

To further build on the promise of health information exchange, the Administration is interested in accelerating the utilization and integration of health information exchanges as part of a network that receives and integrates health data for all Californians. The building and operation of the network of exchanges will leverage existing investments in health information exchange and look for additional federal funding in alignment with federal interoperability rules. To do this the state must:

- Enable the right access to health information at the right time resulting in improved health and outcomes for all Californians;
- Identify and overcome the barriers to exchanging health information between public programs, as well as with California providers and consumers; and
- Engage consumers and their providers in managing medical, behavioral and social services through appropriate, streamlined access to electronic health information.

The Administration envisions an environment where health plans, hospitals, medical groups, testing laboratories, and nursing facilities—at a minimum, as a condition of participating in state health programs such as Medi-Cal, Covered California and CalPERS—contribute to, access, exchange, and make available data through the network of health information exchanges for every person.

IMPROVING HEALTH EQUITY

The COVID-19 Pandemic has exposed long-standing health inequities seen among people of color. The pandemic has also highlighted systemic racism and discrimination that has created social, economic, and health inequities contributing to disproportionately higher infection and mortality rates for both chronic and infectious diseases; and COVID-19 incidence has been disproportionate in Black, Latinx, and Pacific Islander populations. The higher prevalence of underlying health conditions such as diabetes, obesity, and hypertension among communities of color increases the likelihood of more severe outcomes.

California was the first state in the nation to implement a health equity metric as part of the Blueprint for a Safer Economy framework. The equity metric requires counties to demonstrate an improvement in COVID-19 test positivity rates in neighborhoods facing

the most severe impacts. Addressing differential infection rates in disadvantaged communities is critical to safely reopening California's economy.

Health equity has been a key focus of the Administration and the COVID-19 Pandemic has accelerated the need for additional action. The Budget builds on these efforts to address the need for a more culturally and linguistically competent and responsive health and social services system. The Budget proposes the following initiatives expressly addressing health inequities:

- **Health Plan Equity and Quality Standards**—This spring, the Administration will propose an investment for the Department of Managed Health Care, in collaboration with other entities, to establish a priority set of standard quality measures for full service and behavioral health plans, including quality and health equity benchmark standards, and to take enforcement actions against non-compliant health plans.
- **Improving Equity Through Managed Care Plan Reprocurements**—As Medi-Cal and Covered California managed care plan contracts come up for renewal, the Administration will work to include a focus on health disparities and cultural and language competency through health plan contractual language with a framework similar to the Blueprint equity metric.
- **Analysis of COVID-19 Impacts**—The Budget includes \$1.7 million General Fund in 2021-22 and \$154,000 General Fund in 2022-23 and ongoing for the California Health and Human Services Agency to conduct an analysis of the intersection of COVID-19, health disparities, and health equity to help inform any future response.
- **Community Navigators**—The Budget includes \$5.3 million (\$3.2 million General Fund) for the Department of Developmental Services to contract with family resource centers to implement a navigator model statewide. The navigator model would utilize parents of individuals in the regional center system to provide education on resources, advocacy, and mentorship to other parents of individuals being served by the regional center system. The purpose of navigators is to increase service authorization and utilization in diverse communities, furthering health equity within the developmental services system. Funding includes resources for a one-time independent evaluation focused on improving the effectiveness of existing disparity projects.

Addressing health disparities created by systemic racism and discrimination are also central to many of the other budget proposals described later in this Chapter. In addition, the Budget includes \$4.1 million (\$3.7 million General Fund) in 2021-22 and

\$2.1 million (\$1.6 million General Fund) ongoing for the Health and Human Services Agency to further reorient the administration of its programs through the use of data and the development of an equity dashboard.

ADDRESSING AGING IN CALIFORNIA

In June 2019, the Governor issued an executive order calling for a 10-year Master Plan for Aging to support aging well across the lifespan. California's 65 and over population is projected to grow to 8.5 million by 2030, nearly doubling from 2010 and increasing from 11.5 percent of the population to 20 percent. The Governor also established a Task Force on Alzheimer's Prevention and Preparedness, chaired by Former First Lady Maria Shriver, to tackle the policy and health challenges faced by the growing number of people living with dementia—more than 690,000 Californians have a diagnosis of Alzheimer's and more than 1.6 million people are responsible for providing care.

Nearly 80 percent of all Californians who have died from COVID-19 in 2020 were age 65 or older. Moreover, nearly 40 percent of all Californians who died from COVID-19 in 2020 were living in nursing homes; early data suggest people with dementia have experienced especially high rates of cases and death. Millions more older and at-risk adults remained home to stay healthy and, as a result, faced isolation and interruption to essential activities, including caregiving. Black, Latinx, and Pacific Islander older Californians have been disproportionately impacted by COVID-19.

The Budget recognizes the extraordinary challenges older Californians and their families face during the COVID-19 Pandemic, and proposes a range of investments to increase opportunities for Californians to age well over the next decade, including developing new strategies with the federal government to leverage Medicare to provide additional long-term services and supports.

The Governor will appoint a Senior Advisor on Aging, Disability and Alzheimer's to advance cross-Cabinet initiatives and partnerships between government, the private sector, and philanthropy, such as closing the digital divide, transportation options beyond driving, and caregiving workforce solutions, for Californians of all ages. The Budget includes a \$5 million General Fund placeholder for spring proposals to further implement the Master Plan for Aging.

To drive innovation in top priorities identified in the Master Plan for Aging, the Budget makes the following targeted investments:

- **Medicare Innovation and Integration**—The Administration plans to submit a proposal in the spring for state operations to establish a new Office of Medicare Innovation and Integration that will explore strategies and models to strengthen and expand low- and middle-income Californians' access to high-quality services and supports, while developing new partnerships with the federal government.
- **Expanded Facilities to Support Housing**—The Budget includes \$250 million one-time General Fund for the Department of Social Services to acquire and rehabilitate Adult Residential Facilities (ARF) and Residential Care Facilities for the Elderly (RCFE) with a specific focus on preserving and expanding housing for low-income seniors who are homeless or at risk of becoming homeless. See the Housing and Homelessness Chapter for more information.
- **Aging and Disability Resource Connections (ADRC)**—The Budget delays suspension of and expands ADRCs, or “No Wrong Door,” networks currently serving approximately one-third of the state to serving the entire state. These centers provide people with “one stop” telephone and online access to information and assistance with aging, disability, and Alzheimer's, in multiple languages and with cultural competencies. The Budget provides \$7.5 million in 2021-22, half-year funding of \$5 million in 2022-23, and is subject to suspension on December 31, 2022.
- **IHSS COVID-19 Back-up Provider System**—The Budget includes \$5.3 million one-time General Fund in 2021-22 to extend the back-up provider system and back-up provider wage differential to avoid disruptions to caregiving until December 2021. The Administration will evaluate the need of an IHSS provider backup system for severely impaired individuals as the state recovers from the effects of the COVID-19 Pandemic.
- **Increased Geriatric Care Workforce**—The Budget includes \$3 million one-time General Fund for the Office of Statewide Health Planning and Development to grow and diversify the pipeline for the geriatric medicine workforce, as the increasing and diversifying numbers of older adults living longer lives require developing a larger and more diverse pool of health care workers with experience in geriatric medicine.

EQUITABLE PATH FORWARD ON ALZHEIMER'S

The Budget proposes a comprehensive and coordinated approach to Alzheimer's with an emphasis on communities of color and on women, who are disproportionately susceptible to the disease and the primary providers of caregiving. Investments to be administered by the Department of Public Health are five-pronged: \$5 million one-time General Fund for a public education campaign on brain health; \$4 million one-time

General Fund for new training and certification for caregivers; \$2 million one-time General Fund for expanded training in standards of care for health care providers; \$2 million one-time General Fund for grants to communities to become dementia-friendly; and \$4 million one-time General Fund for research to strengthen California's leadership on disparities and equity in Alzheimer's.

ADDRESSING BEHAVIORAL HEALTH

The COVID-19 Pandemic is having a myriad of impacts on individuals and families. Stay at home orders, which have been necessary to save lives, have also increased isolation for seniors. Families have also struggled with schools closed to in-person instruction and children without many normal physical and social outlets. In addition, the COVID-19 Pandemic induced recession has left many households with increased worry about how they will maintain food and shelter. With this backdrop, the Administration is focused on improving outcomes and expanding access to preventative services through county behavioral health departments and schools. These efforts build on resources provided in the 2020 Budget Act for the Department of Managed Health Care's behavioral health-focused investigations and enforcement of commercial health plan compliance with parity laws.

STUDENT MENTAL HEALTH

COVID-19 stay-at-home orders and school closures have impacted students and caused additional stress and anxiety. Early identification and treatment through school-based, or school-linked, services can reduce emergency room visits, crisis situations, inpatient stays, placement in high-cost special education settings, and out of home placement.

The Budget includes one-time \$400 million (\$200 million General Fund), available over multiple years, for the Department of Health Care Services to implement an incentive program through Medi-Cal managed care plans, in coordination with county behavioral health departments and schools. This innovative effort seeks to build infrastructure, partnerships, and capacity statewide to increase the number of students receiving preventive and early intervention behavioral health services from schools, providers in schools, or school-based health centers.

Additionally, the Budget includes \$25 million one-time Mental Health Services Fund, available over five years, for the Mental Health Services Oversight and Accountability Commission to augment the Mental Health Student Services Act Partnership Grant

Program, which funds partnerships between county mental health plans and school districts.

Further, the Budget includes \$25 million ongoing Proposition 98 General Fund to fund innovative partnerships with county behavioral health departments to support student mental health services. This funding would be provided to local educational agencies as a match to funding in county Mental Health Services Act (MHSA) spending plans dedicated to the mental health needs of students. See the K-12 Education Chapter for additional information.

STRENGTHENING COUNTY BEHAVIORAL HEALTH

County behavioral health programs are supported by a combination of 2011 Realignment, MHSA, and other county funding sources, and are responsible for organizing and overseeing local mental health and substance use disorder programs, including specialty mental health for Medi-Cal and uninsured patients. Counties work with Medi-Cal managed care plans to deliver mild and moderate services and provide specialty mental health services not included in managed care plans. The Budget includes several different efforts to improve and add needed infrastructure to county behavioral health programs, including support for individuals acutely impacted by mental illness.

The COVID-19 Pandemic has necessitated changes in the demand for behavioral health services and the delivery of these benefits. Therefore, the Budget proposes statutory changes to extend flexibilities in county spending of local MHSA funds that were included in the 2020 Budget Act in response to the COVID-19 Pandemic for an additional fiscal year. The statutory changes authorize counties to spend down their local MHSA prudent reserves, as opposed to requesting county-by-county authority from the state. Further, the changes authorize counties to spend funds within the Community Services and Supports program component regardless of category restrictions to meet local needs. Lastly, the changes authorize counties to use their existing approved MHSA spending plans, if a new plan is delayed because of COVID-19-related reasons.

As discussed later in this chapter, the Administration is proposing the California Advancing and Innovating Medi-Cal (CalAIM) Initiative to make Medi-Cal, including behavioral health benefits, more consistent and seamless, by among other things, revising behavioral health medical necessity, implementing payment reform, and working toward administrative integration.

The Budget also includes \$750 million one-time General Fund for competitive grants to counties to acquire and rehabilitate real estate assets to expand the community continuum of behavioral health treatment resources. These community resources are needed to address individuals experiencing a crisis and are a critical component of an overarching framework to solve and not just mitigate homelessness. The Administration is also exploring opportunities to repurpose relinquished adult jail bond financing to add to this effort. See the Criminal Justice Chapter for more information.

The Budget also proposes to greatly expand the community treatment programs for the felony incompetent to stand trial population. This includes a demonstration project that will streamline services to drive improved outcomes for individuals with serious mental illness and reduce recidivism in this population.

DEPARTMENT OF HEALTH CARE SERVICES

Medi-Cal, California's Medicaid program, is administered by the Department of Health Care Services. Medi-Cal is a public health care program that provides comprehensive health care services at no or low cost for low-income individuals. The federal government mandates that basic services be included in the program, including: physician services; family nurse practitioner services; nursing facility services; hospital inpatient and outpatient services; laboratory and radiology services; family planning; behavioral health; and early and periodic screening, diagnosis, and treatment services for children. In addition to these mandatory services, the state provides optional benefits such as outpatient drugs, adult dental services, home and community-based services, and medical equipment. The Department also operates the California Children's Services and the Primary and Rural Health programs, and oversees county-operated community mental health and substance use disorder programs.

The Medi-Cal budget is \$117.9 billion (\$22.5 billion General Fund) in 2020-21 and \$122.2 billion (\$28.4 billion General Fund) in 2021-22. The Budget assumes that caseload will increase approximately 10.1 percent from 2019-20 to 2020-21 and increase approximately 11.7 percent from 2020-21 to 2021-22. Medi-Cal is projected to cover approximately 15.6 million Californians, nearly 40 percent of the state's population, in 2021-22.

CALIFORNIA ADVANCING AND INNOVATING MEDI-CAL (CALAIM)

Medi-Cal has significantly expanded and changed over the last ten years, in large part due to California's implementation of the federal Patient Protection and Affordable Care Act. Since implementing the Act, the Department has undertaken many initiatives

and embarked on innovative demonstration projects to improve the beneficiary experience.

Today, some Medi-Cal enrollees may need to access six or more separate delivery systems, including managed care, fee-for-service, mental health, substance use disorder, dental, developmental, and/or In-Home Supportive Services. Fragmentation of service delivery increases the need for care coordination, increases complexity, and results in greater health inequities. To improve clinical outcomes and assist beneficiaries with navigating this complex system, the Department is seeking to better coordinate and integrate these delivery systems to achieve more equal health outcomes for all across the entire continuum of care.

To this end, the Department is launching CalAIM, which builds upon the critical successes of waiver demonstration programs such as Whole Person Care, the Coordinated Care Initiative, Health Homes, and public hospital system delivery transformation. CalAIM proposes to provide a wider array of services and supports for patients with complex and high needs.

CalAIM has three primary goals:

- Identify and manage member risk and need through whole person care approaches and addressing social determinants of health;
- Make Medi-Cal more consistent and seamless by reducing complexity and increasing flexibility; and
- Improve quality outcomes, reduce health disparities, and drive delivery system transformation and innovation through value-based initiatives, modernization of systems, and payment reform.

Transformation of the delivery system is necessary to improve outcomes for Medi-Cal beneficiaries as well as to achieve long-term cost avoidance. The reforms proposed through CalAIM represent a comprehensive approach to achieving these goals. These changes will position the state to better connect individuals—including children and youth in foster care, individuals experiencing homelessness, individuals with mental health challenges and substance use disorders, and individuals involved in the justice system—to the services they need. Attaining these goals will have significant impacts on individuals' health and quality of life and through iterative system transformation, will ultimately reduce healthcare costs over time.

To implement CalAIM effective January 1, 2022, the Budget includes \$1.1 billion (\$531.9 million General Fund) in 2021-22, growing to \$1.5 billion (\$755.5 million General Fund) in 2023-24.

This investment will provide for enhanced care management and in lieu of services, necessary infrastructure to expand whole person care approaches statewide, and build upon existing dental initiatives. Beginning in 2024-25, the Administration proposes to phase out infrastructure funding, resulting in ongoing costs of about \$846.4 million (\$423 million General Fund) per year.

This effort will be complemented by \$750 million one-time General Fund for competitive grants to counties to acquire and rehabilitate real estate assets to expand the community continuum of behavioral health treatment resources. The Administration is also exploring opportunities to repurpose relinquished adult jail bond financing to add to these efforts. See the Criminal Justice Chapter for additional details.

Other Significant Adjustments:

- **2020-21 Budget**—The Budget reflects lower expenditures in the Medi-Cal program of approximately \$1.2 billion General Fund in 2020-21 compared with the 2020 Budget Act. The decrease is due primarily to reduced COVID-19 caseload costs, additional enhanced Federal Medical Assistance Percentage (FMAP), reduced costs associated with the state-only claiming adjustment, and additional Hospital Quality Assurance Fee (HQAF) savings. These reduced General Fund costs are partially offset by a one-time retroactive correction to managed care rates associated with dual-eligible beneficiaries and an increase in deferred federal fund claims.
- **COVID-19 Medi-Cal Caseload Impacts**—The Budget projects an average monthly caseload of 14 million beneficiaries in 2020-21 and 15.6 million beneficiaries in 2021-22, and includes \$5.4 billion (\$1.7 billion General Fund) in 2020-21 and \$13.5 billion (\$4.3 billion General Fund) in 2021-22 for increased caseload attributable to the COVID-19 Pandemic. Caseload is projected to peak at 16.1 million beneficiaries in January 2022, driven by the federal continuous coverage requirement related to the COVID-19 Public Health Emergency and the COVID-19 induced recession.
- **Additional COVID-19 Impacts**—The Budget includes net costs of \$1.9 billion total funds (\$2 billion General Fund savings) for COVID-19 impacts, including enhanced FMAP savings, vaccine administration costs, and federal waiver flexibilities. The

Budget assumes enhanced FMAP savings and flexibilities will remain in effect through the last quarter of calendar year 2021.

- **State-Only Claiming Adjustment**—The Budget includes \$249.8 million General Fund in 2020-21 and \$279.1 million General Fund in 2021-22 for retroactive and ongoing dental, pharmacy, and managed care, targeted case management, and behavioral health costs associated with state-only populations.
- **Medi-Cal Rx**—The Budget includes costs of \$219.9 million (\$70.2 million General Fund) in 2020-21 and savings of \$612.7 million (\$238.2 million General Fund) in 2021-22 associated with the carve-out of the Medi-Cal pharmacy benefit from managed care to fee-for-service, effective April 1, 2021. Full annual savings are projected to be approximately \$1.2 billion (\$419 million General Fund) by 2023-24.
- **Reinstatement of Adult Acetaminophen and Cough/Cold Products**—The Budget reflects annual savings of \$21 million (\$7.8 million General Fund) to reinstate over-the-counter adult acetaminophen and cough/cold products as covered Medi-Cal benefits effective July 1, 2021. Coverage of these products was temporarily reinstated effective March 1, 2020, as part of the state's federally approved COVID-19 waiver flexibilities.
- **Medi-Cal Coverage of Continuous Glucose Monitors**—The Budget includes \$12 million (\$4.2 million General Fund) in 2021-22 and ongoing to add continuous glucose monitors as a covered Medi-Cal benefit for adult individuals with type 1 diabetes, effective January 1, 2022. This proposal increases health equity.
- **Telehealth Flexibilities in Medi-Cal**—The Budget includes \$94.8 million (\$34 million General Fund) ongoing to expand and make permanent certain telehealth flexibilities authorized during COVID-19 for Medi-Cal providers, and to add remote patient monitoring as a new covered benefit, effective July 1, 2021. This effort will expand access to preventative services and improve health outcomes, thereby increasing health equity.
- **County Administration**—The Budget includes an ongoing increase of \$65.4 million (\$22.9 million General Fund) in 2021-22 for county eligibility determination activities based on growth in the California Consumer Price Index.

PROPOSITION 56 SUPPLEMENTAL PAYMENT PROGRAMS

Given an improved revenue outlook in the short term, the Budget delays the suspension of Proposition 56 programs by 12 months and includes a total of \$3.2 billion (\$275.3 million General Fund, \$717.8 million Proposition 56 Fund, and \$2.2 billion federal

funds) for these programs in 2021-22. (The Budget would have otherwise included \$759.9 million General Fund savings if the suspensions were not delayed.) The General Fund partially supports supplemental payment programs at current levels now that program costs exceed declining tobacco tax revenues, due primarily to the assumed implementation of the ban on flavored tobacco and vaping products pursuant to Chapter 34, Statutes of 2020 (SB 793).

The Budget assumes Proposition 56 suspensions effective July 1, 2022, except for supplemental payments to intermediate care facilities for the developmentally disabled, freestanding pediatric subacute facilities, and Community Based Adult Services, which will be suspended December 31, 2022, due to the managed care calendar rate year. Payments for Women's Health, Family Planning, and the Loan Repayment Program are exempt from suspension. The Budget also proposes to exempt supplemental payments for the Behavioral Health Integration program, the AIDS waiver, Home Health, and Pediatric Day Health from suspension because they would not be deemed eligible by the federal government.

OTHER SUSPENDED PROGRAMS

Given an improved revenue outlook in the short term, the Budget proposes to delay suspensions by one year for the following:

- **Medi-Cal Post-Partum Eligibility Extension**—The Budget delays the suspension of Medi-Cal post-partum extended eligibility by 12 months to December 31, 2022, for a cost of \$27.1 million General Fund in 2021-22.
- **Medi-Cal Adult Optional Benefits Extension**—The Budget includes \$47 million (\$15.6 million General Fund) in 2021-22 to delay by 12 months the suspension of audiology and speech therapy services, incontinence creams and washes, optician and optical lab services, and podiatric services to December 31, 2022.

DEPARTMENT OF SOCIAL SERVICES

The Department of Social Services (DSS) serves, aids, and protects needy and vulnerable children and adults in ways that strengthen and preserve families, encourage personal responsibility, and foster independence. The Department's major programs include CalWORKs, CalFresh, In-Home Supportive Services (IHSS), Supplemental Security Income/State Supplementary Payment (SSI/SSP), Child Welfare Services, Community Care Licensing, and Disability Determination. Beginning July 1, 2021, child care and nutrition programs will transition from the California

Department of Education (CDE) to DSS. The Budget includes \$36.2 billion (\$14.4 billion General Fund) for DSS programs in 2021-22.

Significant Adjustments:

- **Food Banks**—The Budget includes \$30 million one-time General Fund above program base funding levels for the Department of Social Services to fund existing Emergency Food Assistance Program providers, food banks, tribes, and tribal organizations to mitigate increases in food needs among low-income and food-insecure populations. The recently enacted federal COVID-19 response and relief bill includes increased benefits for CalFresh and the Emergency Food Assistance Program.
- **Supplemental Nutrition Benefit and Transitional Nutrition Benefit Programs Adjustment**—The Budget includes \$22.3 million ongoing General Fund to reflect adjusted benefit amounts mitigating the effects of the elimination of the SSI Cash-Out policy.
- **California Food Assistance Program (CFAP) Emergency Allotments**—The Budget includes \$11.4 million one-time General Fund for CFAP households to receive the maximum allowable allotment based on household size.

CALIFORNIA WORK OPPORTUNITY AND RESPONSIBILITY TO KIDS

The CalWORKs program, California's version of the federal Temporary Assistance for Needy Families (TANF) program, provides temporary cash assistance to low-income families with children to meet basic needs. It also provides welfare-to-work services so that families may become self-sufficient. Eligibility requirements and benefit levels are established by the state. Counties have flexibility in program design, services, and funding to meet local needs.

Total TANF expenditures are \$9.3 billion (state, local, and federal funds) in 2021-22. The amount budgeted includes \$7.4 billion for CalWORKs program expenditures and \$1.9 billion in other programs. Other programs include expenditures for Child Care, Child Welfare Services, Foster Care, Department of Developmental Services programs, the Statewide Automated Welfare System, Work Incentive Nutritional Supplement, California Community Colleges Child Care and Education Services, Cal Grants, and the Department of Child Support Services.

The average monthly CalWORKs caseload is estimated to be 482,436 families in 2021-22, a 19 percent increase from the revised 2020-21 projection. Prior to COVID-19, the

CalWORKs caseload had decreased every year since 2010-11. Due to the COVID-19 Pandemic's impact on the economy and initial spikes in caseload in the immediate months following the pandemic, the CalWORKs caseload was projected to grow significantly at the 2020 Budget Act. This caseload did not materialize likely due to expanded and extended unemployment insurance benefits and direct stimulus payments. The Budget includes revised caseload projections, driven by updated assumptions and the uncertainty surrounding further federal relief and duration of the public health emergency.

Significant Adjustments:

- **CalWORKs Time on Aid Exemption**—The Budget includes \$46.1 million one-time General Fund (TANF) block grant funding to temporarily suspend any month in which CalWORKs aid or services are received from counting towards the CalWORKs 48-month time limit based on a good cause exemption due to the COVID-19 Pandemic.
- **CalWORKs Grant Increase**—The Budget reflects a 1.5-percent increase to CalWORKs Maximum Aid Payment levels, effective October 1, 2021, which is estimated to cost \$50.1 million in 2021-22. These increased grant costs are funded entirely by the Child Poverty and Family Supplemental Support Subaccounts of the Local Revenue Fund.

IN-HOME SUPPORTIVE SERVICES

The IHSS program provides domestic and related services such as housework, transportation, and personal care services to eligible low-income aged, blind, and disabled persons. These services are provided to assist individuals to remain safely in their homes and prevent more costly institutionalization. The Budget includes \$16.5 billion (\$5.3 billion General Fund) for the IHSS program in 2021-22, a 10-percent increase in General Fund costs over the revised 2020-21 level. Average monthly caseload in this program is estimated to be 593,000 recipients in 2021-22, a 3.9-percent increase from the revised 2020-21 projection.

Significant Adjustments:

- **IHSS Service Hours Restoration**—The Budget includes \$449.8 million General Fund in 2021-22 and \$242.6 million General Fund in 2022-23 to reflect a delay in suspending the 7-percent across-the-board reduction to IHSS service hours. The increased funding for IHSS service hours is now proposed to be suspended on December 31, 2022. The suspension will be lifted if the Administration determines

through the 2022 Budget Act process that there is sufficient General Fund revenue to support all suspended programs in the subsequent two fiscal years.

- **Minimum Wage**—The Budget reflects \$1.2 billion (\$557.6 million General Fund) to support projected minimum wage increases to \$14 per hour on January 1, 2021 and \$15 per hour on January 1, 2022.
- **IHSS County Administration**—The Budget no longer assumes savings to hold county administration funding at the 2019-20 level, resulting in county administration costs being updated for 2021-22 to include \$17.8 million General Fund to reflect caseload and Consumer Price Index adjustments.

SUPPLEMENTAL SECURITY INCOME/STATE SUPPLEMENTARY PAYMENT (SSI/SSP)

The federal SSI program provides a monthly cash benefit to eligible aged, blind, and disabled persons who meet the program's income and resource requirements. In California, the SSI payment is augmented with an SSP grant. These cash grants assist recipients with basic needs and living expenses. The federal Social Security Administration administers the SSI/SSP program, making eligibility determinations, computing grants, and issuing combined monthly checks to recipients. The state-only Cash Assistance Program for Immigrants (CAPI) provides monthly cash benefits to aged, blind, and disabled legal noncitizens who are ineligible for SSI/SSP due solely to their immigration status.

The Budget includes \$2.69 billion General Fund in 2021-22 for the SSI/SSP program. This represents a 0.6-percent decrease from the revised 2020-21 level. The average monthly caseload in this program is estimated to be 1.18 million recipients in 2021-22, a 1.1-percent decrease from the 2020-21 projection. The SSI/SSP caseload consists of 69.4 percent persons with disabilities, 29.3 percent persons who are aged, and 1.4 percent blind.

Effective January 2021, the maximum SSI/SSP grant levels are \$955 per month for individuals and \$1,598 per month for couples. The projected growth in the Consumer Price Index is 2.2 percent for 2022. As a result, the maximum SSI/SSP monthly grant levels will increase by approximately \$17 and \$26 for individuals and couples, respectively, effective January 2021. CAPI benefits are equivalent to SSI/SSP benefits.

CHILDREN'S PROGRAMS

Child Welfare Services include family support and maltreatment prevention services, child protective services, foster care services, and adoptions. California's child welfare

system provides a continuum of services to children who are either at risk of or have suffered abuse and neglect. Program success is measured in terms of improving the safety, permanence, and well-being of children and families served. The Budget includes \$700.1 million General Fund in 2021-22 for services to children and families in these programs, a decrease of \$22.6 million General Fund, or 3.1 percent, compared to the 2020 Budget Act. When federal and 1991 and 2011 Realignment funds are included, total funding for children's programs is in excess of \$8.9 billion in 2021-22. The net decrease is primarily attributable to decreased caseload under the Continuum of Care Reform and one-time funding related to child welfare services included in the 2020 Budget Act.

Significant Adjustments:

- **COVID-19 Related Supports for Child Welfare Services**—The Budget includes \$61.1 million General Fund in 2021-22 to support services related to quarantine needs for foster youth and caregivers, temporary extension of assistance payments to emergency caregivers, support to Family Resource Centers, state-administered contracts for youth and family helplines, provision of laptops and cellular phones to foster youth, assistance to families with youth who are at-risk of entering foster care, and temporary provision of assistance payments to youth who turn 21 years of age while in extended foster care after April 17, 2020, through December 31, 2021, and for any nonminor dependent who met eligibility requirements for the Extended Foster Care program and lost their employment or has experienced a disruption in their education program resulting from COVID-19, and cannot otherwise meet any of the participation requirements.
- **Federal Family First Prevention Services Act Implementation**—The Budget includes \$61.1 million (\$42.7 million General Fund) to begin implementation of Part IV of the federal Family First Prevention Services Act (FFPSA). FFPSA Part IV sets out new criteria for non-foster home placement settings eligible for federal Title IV-E Foster Care maintenance payments.
- **Child Welfare Workforce Development**—The Budget includes \$10.1 million (\$5.9 million General Fund) ongoing to establish an additional child welfare social workers regional training academy in northern California (bringing the statewide total to five academies), increase ongoing training for social workers and supervisors, assess training effectiveness, and modernize how social worker training is monitored and used to inform workforce development planning.

- **Delay Suspension of Various Children's Issues**—The Budget proposes to extend the temporary augmentation to the Emergency Child Care Bridge Program, foster family agencies, Child Welfare Public Health Nursing Early Intervention Program, and the Family Urgent Response System from December 31, 2021, to December 31, 2022. Estimated costs to delay the suspension in 2021-22 are \$54.5 million General Fund. The suspension will be lifted if the Administration determines through the 2022 Budget Act process that there is sufficient General Fund revenue to support all suspended programs in the subsequent two fiscal years.
- **Youth Returning from Out of State**—In partnership with the Legislature, \$5.2 million one-time General Fund was allocated in December 2020 for the Department of Social Services to support youth in their transition back to California. These resources are supporting county capacity building and supportive services for the returned youth, COVID-related quarantine costs, and technical assistance to support counties in placing the returning youth.

IMMIGRATION SERVICES

The Department of Social Services funds qualified nonprofit organizations to provide immigration services to immigrants who reside in California via the unaccompanied undocumented minors and Immigration Services Funding programs. The Budget continues to include \$75 million General Fund ongoing for immigration services.

Significant Adjustments:

- **Rapid Response Program**—The Budget includes \$5 million one-time General Fund for the Rapid Response Program to support entities that provide critical assistance/ services to immigrants during emergent situations when federal funding is not available.

CHILD CARE

Since 2019, the state has invested approximately \$400 million ongoing to expand early education and child care. The COVID-19 Pandemic has disrupted the child care system and federal funding has been critical to reducing long-term losses in this system. The Budget focuses on avoiding further loss in this system and builds on the recommendations made in the Master Plan for Early Learning and Care.

The 2020 Budget Act shifted early learning, child care and nutrition programs from the Department of Education to the Department of Social Services. This transition, which

becomes effective July 1, 2021, will align all child care programs within a single department in state government.

Significant Adjustments:

- **State Operations**—The Budget shifts \$31.7 million (\$0.9 million General Fund) and 185.7 positions from the Department of Education to the Department of Social Services to administer early learning, child care, and nutrition programs.
- **Local Assistance**—The Budget includes \$3.1 billion (\$1.3 billion General Fund) and shifts the following programs, including: General Child Care, Alternate Payment Programs, CalWORKs Stage 2 & Stage 3, Resource & Referral Programs, Migrant Child Care Program, Severely Disabled Program, California Child Care Initiative, Quality Improvement Activities, Local Planning Councils, and Child and Adult Care Food Program.
- **COVID-19 Related Support**—The Budget includes \$55 million one-time General Fund to support child care providers' and families' needs as a result of the pandemic.

Updated Proposition 64 cannabis tax revenues will provide an additional \$21.5 million for child care slots in 2020-21 and \$44 million ongoing. These funds will provide for 4,700 new child care slots.

For the first time, the Administration has begun the collective bargaining process with Child Care Providers United representing child care providers to negotiate a memorandum of understanding that governs the payments made to these providers. The California Department of Human Resources is the Governor's designee to meet and confer regarding matters within the scope of representation. DSS will support bargaining and work to meet goals articulated in the Master Plan on Early Learning and Care.

RESPONDING TO THE IMMEDIATE NEEDS OF CHILD CARE PROVIDERS

While conclusive data continue to be collected on the impact of the COVID-19 Pandemic on the state's child care system, preliminary findings and anecdotal evidence suggest that the loss of capacity in the state has been significant. Regardless, many child care providers have gone to great lengths to continue to provide care to children in a safe environment, and have taken on the added responsibility of helping children in distance learning access their public school education. It is a priority for the Administration to support these providers to the greatest extent possible, to preserve the

existing system of care, and provide additional ongoing investments to improve and expand the system.

Despite significant fiscal limitations, the 2020 Budget Act preserved funding for early learning and care programs to the greatest extent possible, with a focus on serving the children of income-eligible essential workers. This included:

- Additional access to subsidized child care for children of essential workers
- Stipends for child care providers
- A funding hold harmless for child care providers that contract directly with the state and have to close for health and safety reasons
- Paid non-operational days when a provider accepting vouchers has to close for health and safety reasons
- Provider reimbursement at a child's maximum certified level of need for all providers accepting vouchers
- Family fee waivers for all families through August 31, 2020, with additional fee waivers for families eligible for, but not receiving, in-person care due to COVID-19, through June 30, 2021

The Administration took further action in October to provide \$110 million to child care providers to reimburse them for the cost of waived family fees and extend the length of care for children of essential workers with temporary vouchers.

FEDERAL RELIEF

In late December, Congress passed a fifth stimulus bill, the Coronavirus Response and Relief Supplemental Appropriations Act that includes approximately \$10.3 billion for child care and Early Start. The state is expected to receive approximately \$1 billion. The 2020 Budget Act included language to guide the prioritization of additional federal funds as follows:

- Up to \$100 million for providers accepting vouchers to extend access to child care for children of essential workers, at-risk children, and other eligible children
- Up to \$90 million in child care provider stipends
- Up to \$35 million to increase the number of paid non-operational days for providers accepting vouchers that must close for health and safety reasons

- Up to \$30 million for reimbursing child care providers for family fees waived for families enrolled, but not receiving in-person care, from September 1, 2020, to June 30, 2021 (these costs were addressed by the Administration through the October action)
- Up to \$30 million to increase capacity for up to two years for subsidized child care and preschool
- Up to \$15 million to assist child care providers with the costs of re-opening

MASTER PLAN FOR EARLY LEARNING AND CARE

The 2019 Budget Act included \$5 million one-time General Fund for a long-term roadmap to universal preschool and a comprehensive, quality, and affordable child care system. The Master Plan for Early Learning and Care was released on December 1, 2020, and provides recommendations and a multi-year plan for transforming the state's child care and early education systems. Specific to child care programs, the Master Plan's recommendations include:

- Streamlining program requirements to unify state child care program.
- Promoting school readiness by increasing access to high-quality preschool.
- Improving quality of care by enhancing educator competencies and providing affordable and accessible pathways for workforce advancement.
- Supporting equity by eliminating bias through practices and training, with specific focus on children with disabilities and dual language learners.
- Adopting a comprehensive reimbursement rate structure that considers care setting, costs associated with quality, characteristics of children served, and workforce competencies.
- Developing data infrastructure that supports the quality of care by aggregating data on the ways that families and educators experience the system.

Implementation of the Master Plan will require years of consistent investment and reform. The 2020 Budget Act began implementation of the Master Plan with funding dedicated to transition child care programs into a single agency. This transition improves the ability of state government to streamline and unify all early childhood services and eases the administration of child care provider collective bargaining, which began in late 2020. The Budget builds on this work by providing an increase of \$44.3 million Cannabis Fund to expand access to child care vouchers for more than

4,500 children, with \$21.5 million available starting in 2020-21. The K-12 Education chapter includes additional information about investments in early learning programs.

DEPARTMENT OF PUBLIC HEALTH

The Department of Public Health is charged with protecting and promoting the health and well-being of the people of California. The Budget includes \$4.2 billion (\$1.1 billion General Fund) in 2021-22 for the Department.

COVID-19 DISASTER RESPONSE

The Budget reflects over \$1 billion in 2020-21 which represents state and federal support for emergency response measures including supporting enhanced laboratory capacity and testing, data-driven investigation, response and prevention, coordination with local partners, and the Valencia Branch Laboratory. This total mainly reflects emergency funds and federal grants processed as of late Fall 2020; additional anticipated current year funding as of the Governor's Budget is reflected elsewhere in the budget.

The Budget includes over \$820 million in 2021-22 to continue and build on the emergency response measures described above.

Significant Adjustments:

- **New Cannabis Department**—The Budget proposes to transfer 119 positions and \$29.0 million in 2021-22 from the Department of Public Health to support the consolidation of resources for the new Department of Cannabis Control.
- **Licensing and Certification**—The Budget includes \$19.1 million for year three of the Los Angeles County contract and \$4.5 million to support increased medical breach and caregiver investigation workload.
- **Childhood Reading Augmentation**—The Budget includes \$5 million one-time General Fund for the Department of Public Health to provide books to low-income children to improve child development and literacy.

DEPARTMENT OF DEVELOPMENTAL SERVICES

The Department of Developmental Services (DDS) provides individuals with developmental disabilities a variety of services that allow them to live and work independently or in supported environments. California is the only state that provides

services to individuals with developmental disabilities as an entitlement. The Budget includes \$10.5 billion (\$6.5 billion General Fund) and estimates that approximately 386,753 individuals will receive developmental services by the end of 2021-22.

COVID-19 IMPACTS

The Budget includes \$211.7 million (\$150.4 million General Fund) to address COVID-19 impacts on the developmental services system. Funding supports utilization increases for purchase of services above base funding levels and direct response expenditures for surge capacity at the Fairview and Porterville Developmental Centers and other operating costs in state-operated facilities.

REGIONAL CENTER EMERGENCY RESPONSE

In the last five years, DDS has been impacted by various emergencies and disasters including wildfires, earthquakes, and public safety power shutoffs. The Budget includes \$2 million (\$1.4 million General Fund) ongoing for regional center emergency coordinators. Each regional center will receive a dedicated position to coordinate emergency preparedness, response, and recovery activities for DDS consumers.

Other Significant Adjustments:

- **Youth Returning from Out-of-State Foster Care**—The Budget includes ongoing \$5.8 million (\$3.5 million General Fund) for DDS to support approximately ten youth in their transition back to California. In partnership with the Legislature, one-time \$2.9 million (\$1.8 million General Fund) was allocated in December, 2020 for these purposes.
- **Supplemental Rate Increase**—The Budget includes \$454.6 million (\$261.2 million General Fund) in 2021-22 to continue the supplemental rate increases included in the 2019 and 2020 Budget Acts. The supplemental rate increases will be suspended on December 31, 2022. The suspension will be lifted if the Administration determines through the 2022 Budget Act process that there is sufficient General Fund revenue to support all suspended programs in the subsequent two fiscal years.
- **Uniform Holiday Schedule**—The Budget includes \$55.9 million (\$35.8 million General Fund) in 2021-22 to suspend implementation of the Uniform Holiday Schedule. The funding will be suspended on December 31, 2022. The suspension will be lifted if the Administration determines through the 2022 Budget Act process that there is sufficient General Fund revenue to support all suspended programs in the subsequent two fiscal years.

DEPARTMENT OF STATE HOSPITALS

The Department of State Hospitals (DSH) administers the state mental health hospital system, the Forensic Conditional Release Program, the Sex Offender Commitment Program, and the evaluation and treatment of judicially and civilly committed patients. The Budget includes \$2.5 billion (\$2.3 billion General Fund) in 2021-22 for support of the Department. The patient population is expected to reach 6,361 by the end of 2021-22, including patients receiving competency treatment in jail-based settings.

COVID-19 IMPACTS

The Budget includes \$51.9 million one-time General Fund in 2021-22 to address the impacts of COVID-19 including, but not limited to, isolation and testing capacity at state hospitals, outside medical invoicing, and other supports for patients and employees. As an additional safeguard, and to provide for increased surge capacity, DSH has contractually secured a portion of the Norwalk facility to use as an alternate care site. Due to the recent increase in COVID-19 cases this facility was activated in mid-December to provide for additional isolation space at DSH-Patton hospital.

FELONY INCOMPETENT TO STAND TRIAL POPULATION

The Department continues to experience a growing number of incompetent to stand trial (IST) commitments who are referred from trial courts and are awaiting admission to the state hospital system, which has been further exacerbated by the COVID-19 Pandemic. The number of ISTs pending placement into the state hospital system was approximately 1,428 individuals in December 2020.

The Budget includes the followings proposals to address the number of ISTs pending placement by increasing local capacity to provide treatment, housing, and other necessary supports:

- Community Care Demonstration Project for Felony IST (CCDP-IST)—The Budget includes \$233.2 million General Fund in 2021-22 and \$136.4 million General Fund in 2022-23 and ongoing to contract with three counties to provide a continuum of services to felony ISTs in the county as opposed to state hospitals. This proposal seeks to demonstrate the effectiveness of streamlining services to drive improved outcomes for individuals with serious mental illness. This proposal is projected to serve up to 1,252 ISTs in the county continuum of care settings in 2021-22.

- Expansion of Community Based Restoration (CBR)—The Budget includes \$9.8 million General Fund in 2020-21, \$4.5 million General Fund in 2021-22, and \$5 million General Fund in 2022-23 and ongoing to expand the current Los Angeles County CBR program beginning in 2020-21 and establish new CBR programs in additional counties in 2021-22. This proposal is projected to increase capacity by up to 250 beds in 2021-22.
- Reappropriation and Expansion of the IST Diversion Program—The Budget includes \$46.4 million one-time General Fund, available over three years, to expand the current IST Diversion program in both current and new counties. Additionally, the Budget includes five-year limited-term funding of \$1.2 million General Fund annually to support research and administration for the program. Further, the Budget authorizes the reappropriation of existing program funds set to expire in 2020-21.
- Expansion of the Jail-Based Competency Treatment Program—The Budget includes \$785,000 General Fund in 2020-21 and \$6.3 million General Fund in 2021-22 and ongoing to expand the Jail-Based Competency Treatment program to seven additional counties. This expansion is estimated to increase capacity by up to 31 beds in 2021-22.
- Forensic Conditional Release Program (CONREP) Mobile Forensic Assertive Community Treatment (FACT) Team—The Budget includes \$5.6 million General Fund in 2021-22, \$8 million General Fund in 2022-23 and 2023-24, and \$8.2 million General Fund in 2024-25 and ongoing to implement a FACT team model within CONREP, in lieu of the typical centralized outpatient clinic model, to expand community-based treatment options for both ISTs and non-ISTs in counties and backfill State Hospital beds with IST patients. This expansion is estimated to increase capacity by up to 100 beds in 2021-22.
- CONREP Continuum of Care Expansion—The Budget includes \$3.2 million General Fund in 2020-21 and \$7.3 million General Fund in 2021-22 and ongoing to increase the step-down capacity in the community in order to transition more stable non-IST patients out of state hospital beds and backfill state hospital beds with IST patients. This expansion is estimated to increase capacity by up to 40 beds in 2021-22.

OTHER HEALTH AND HUMAN SERVICES ADJUSTMENTS

- Supporting Local Child Support Agency Administration—The Budget includes \$24.9 million (\$8.5 million General Fund) ongoing for local child support agencies to improve child support collections and services and \$23.8 million (\$8.1 million General

Fund) ongoing for local child support courts and state operations child support funding.

- Office of Youth and Community Restoration—The Budget includes \$3.4 million General Fund in 2021-22 and \$3.1 million ongoing General Fund to develop reports on youth outcomes in the juvenile justice system, staff a Child Welfare Council committee focused on improving outcomes for justice-involved youth, and create an Office Ombudsperson.
- Center for Data Insights and Innovation—The Budget proposes to consolidate existing resources to establish a Center for Data Insights and Innovation within the Agency. The Center will focus on leveraging data to develop knowledge and insights to improve program delivery and drive system transformation across health and human services.

1991 AND 2011 REALIGNMENT

The programs for 1991 and 2011 Realignment are funded through two sources: state sales tax and vehicle license fees. These fund sources are projected to increase by 5.6 percent from 2019-20 to 2020-21 and decrease by 1.9 percent from 2020-21 to 2021-22.

2011 Realignment Estimate at 2021 Governor's Budget

(\$ millions)

	2019-20	2019-20 Growth	2020-21	2020-21 Growth	2021-22	2021-22 Growth
Law Enforcement Services	\$2,600.4		\$2,633.8		\$2,682.7	
Trial Court Security Subaccount	558.2	0.0	567.0	\$10.1	563.7	0.0

HOUSING AND HOMELESSNESS

HOUSING

The COVID-19 Pandemic exacerbated California's already existing housing crisis. The Administration remains focused on addressing the housing crisis and fostering an equitable economic recovery through targeted investments and reforms, continued resources to increase the supply of very-low, low- and moderate-income housing, and focused provision of stability for households most impacted by the COVID-19 Pandemic.

RECENT ACTIONS AND INVESTMENTS

The state has invested billions of dollars and taken other actions in recent years to bolster housing production through dedicated revenue sources, low-income housing tax credits, planning and infrastructure grants, mixed-income construction loans, and opportunities to build affordable housing on state excess lands. Recent investments include ongoing revenue for affordable housing through real estate transaction fees (approximately \$277 million in 2021-22), a \$4 billion voter-approved housing bond to finance existing housing programs, including infill infrastructure grants and the Multifamily Housing Program, and \$1 billion to provide housing purchase assistance for veterans. In 2014, the state also began investing 20 percent of Cap and Trade auction proceeds (\$426 million in 2021-22) in the Affordable Housing and Sustainable Communities program to fund land-use, housing, transportation, and land preservation

projects to support infill and compact development that reduces greenhouse gas emissions.

In addition, the 2019 Budget Act made significant one-time investments of \$1.75 billion to support efforts to accelerate housing production statewide. This included \$500 million for infrastructure grants, \$500 million to finance the production and preservation of low- and moderate-income housing, and \$250 million for technical assistance and planning. Additionally, the 2019 and 2020 Budget Acts allocated a total of \$1 billion in expanded state housing tax credits. These investments spurred production and bolstered preservation of low- and moderate income housing across the state.

COVID-19 PANDEMIC IMPACTS ON HOUSING

The COVID-19 Pandemic created a historic disruption in the economy that has had a disproportionate impact on low-wage workers. As of December, over 4 million were on some form of unemployment benefits and many households were closer to exhausting benefits as economic impacts continued because of the pandemic. As a result, in a November survey, more than one in four renter households in California were uncertain whether they would be able to pay December rent.

PREVENTING EVICTIONS AND FORECLOSURES

The COVID-19 Pandemic has resulted in losses of income negatively impacting renters and some homeowners across California, particularly low-wage workers and communities of color. Direct federal assistance and expanded and extended unemployment insurance have helped individuals to pay rent. Some local governments have also allocated Coronavirus Relief Funds towards additional housing supports. Homeowners, including landlords, have also been impacted and many have been able to obtain a forbearance of up to one year due to financial hardship; for all federally backed loans, a loan servicer may not foreclose until the end of February. In addition, interest rates have remained at historically low levels, allowing many landlords and homeowners to refinance at lower rates and with lower payments. There are also multiple federal and state loan programs that have provided assistance to impacted property owners.

Last August, Chapter 37, Statutes of 2020 (AB 3088) was enacted—the nation's strongest statewide eviction protections. While this measure prevented California from experiencing a wave of evictions that other states are now facing by protecting many tenants from evictions, many provisions of this law expire on January 31, 2021. The Budget includes \$11.7 million one-time General Fund in 2020-21 for trial courts to process

the anticipated increase in unlawful detainer and small claims filings resulting from AB 3088. (More information can be found in the Judicial Branch Chapter.)

AB 3088 also charged Business, Consumer Services and Housing Agency (BCSH) with engaging stakeholders on strategies and approaches the state can take to direct potential future federal stimulus funding to most effectively provide relief to distressed tenants, landlords, and property owners. Most stakeholders advocated for prioritizing assistance to low-income households and small landlords.

In late December, a federal COVID-19 relief bill was enacted that included \$25 billion in rental assistance, approximately \$2.6 billion of these funds are estimated to be directed to California, split between the state and local governments with populations over 200,000. This rental assistance will be used to support low-income tenants under 80 percent of Area Medium Income (AMI), with a priority for those under 50 percent of AMI. These resources can be used to address rent and past due utilities as well as future rental payments.

The bill also expanded and extended unemployment benefits by an additional 11 weeks and provides \$600 economic impact payments to certain individuals. These resources will be critical for households to pay rent.

More needs to be done to protect low-income renters. The Administration is seeking an immediate extension to AB 3088 to extend eviction protections past January 31, 2021. This will allow the state to implement new federal resources to be allocated in an effective and equitable manner while allowing individuals and families to remain housed.

The Budget is also asking the Legislature to take immediate action to refund \$600 to all 2019 taxpayers who received a California Earned Income Tax Credit (Cal EITC) in 2020 as well as to 2020 taxpayers with individual tax identification numbers (ITINs) who will receive a Cal EITC in 2021 to help pay rent. (More information on this proposal can be found in the COVID-19 Pandemic Response Chapter.)

OTHER EFFORTS

- **Fair Housing Enforcement**—The Administration seeks to further fair housing and equity principles to assist Californians impacted by housing instability caused by the pandemic. To this end, the Budget proposes \$2 million General Fund for the Department of Fair Employment and Housing, the state's civil rights agency, to

conduct outreach education campaigns, housing surveys, and prosecute violations of anti-housing discrimination laws.

- National Mortgage Settlement Program—\$331 million in National Mortgage Settlement funds are helping to prevent avoidable foreclosures and evictions. In 2020-21, the Judicial Council provided \$31 million to local legal service organizations and the California Housing Finance Authority (CalHFA) has recently provided the remaining funds to more than 90 certified housing counselors throughout California. CalHFA also plans to provide mortgage assistance funds in 2021-22, helping homeowners keep their homes during the COVID-19 Pandemic and beyond.

ECONOMIC RECOVERY INVESTMENTS

The Budget proposes investments and continued reforms to stimulate economic recovery and bolster long-term fair and affordable housing production, building on successful legislative and Administration initiatives in recent years.

INFILL INFRASTRUCTURE GRANT PROGRAM

The Budget includes \$500 million General Fund for the Infill Infrastructure Grant Program to accelerate economic recovery through the creation of jobs and long-term housing development. The Administration is asking the Legislature to take early action on \$250 million of the Infill Infrastructure Grant investment in 2020-21. This will provide needed funds for investments that will stimulate housing construction as developers navigate a housing market impacted by the COVID-19 Pandemic. Furthermore, the proposed investment could be available for housing projects that also include necessary site remediation, ultimately unlocking additional sites for affordable housing, and enhancing the state's broader environmental and equity goals.

LOW-INCOME HOUSING TAX CREDITS

Tax credits attract private investment in affordable housing by offering a dollar-for-dollar credit against an investor's state or federal taxes owed. The 2019 and 2020 Budget Acts authorized an additional \$500 million in low-income housing tax credits each year. To maximize the allocation of these credits, the California Tax Credit Allocation Committee and the California Debt Limit Allocation Committee adopted regulations aimed at increasing affordable housing production, containing costs, and maximizing public subsidy and benefit of the credits. To continue this valuable

investment in affordable housing production, the Budget proposes a third round of \$500 million in low-income housing tax credits. This will further reduce funding gaps in affordable housing units statewide.

EXCESS STATE LAND DEVELOPMENT

The Administration is committed to using excess state lands more effectively to address the housing crisis. The state has solicited affordable housing developers to build projects that use innovative, creative, and streamlined approaches to build affordable housing on identified state excess lands. Currently, three projects are underway in Sacramento, Stockton and South Lake Tahoe, and the state has an additional nine sites in the pipeline in the coming calendar year. The Budget proposes statutory changes to encourage additional innovative development, including authorizing market-rate and commercial development that will provide flexibility and financial feasibility to subsidize fair and affordable housing production on excess lands.

CONSTRUCTION APPRENTICESHIPS

Housing can be developed in alignment with workforce development goals as a comprehensive strategy to support equitable economic recovery and resiliency. The Budget proposes \$8.5 million one-time General Fund through the California Workforce Development Board to expand access to state-approved construction apprenticeships through multi-craft pre-apprenticeship programs and High Road Training Partnerships. See the Equitable and Broad-Based Recovery Chapter for further information.

MAXIMIZING HOUSING PRODUCTION AND ACCOUNTABILITY LAWS

LOCAL ACCOUNTABILITY FRAMEWORK

The state has enacted a variety of planning and zoning laws in recent years to increase and streamline production and to encourage local pro-housing decision-making, thereby making progress on the state's housing and equity goals. With these strong laws in place, more must be done to hold local governments accountable for meeting their obligations by assisting them in complying with state law and enforcing these laws through existing powers, so that communities build housing to meet the needs of their residents.

Local governments must fully implement their duties under existing housing laws like density bonuses, streamlining, and requirements to plan for adequate new housing. These strong laws, many of which have been enacted in the past several years, already enable streamlining and approval for millions of units. The Administration will work

closely with local government partners to provide technical assistance and education about local responsibility to plan for and permit housing. In the rare case that a local government disregards its obligations, the state intends to engage in a cohesive and comprehensive process to pursue legal remedies available under existing state law.

The Budget includes resources to create a Housing Accountability Unit at the Department of Housing and Community Development (HCD) to further facilitate affordable housing production through monitoring, technical assistance, and enforcement of existing housing production laws. This includes \$4.3 million General Fund for HCD to provide technical assistance to help local governments meet planning and zoning requirements to provide proactive engagement before enforcement becomes necessary. These additional resources will allow HCD to act as an ombudsman and help local governments navigate and comply with state housing laws and make sufficient progress toward their Regional Housing Needs Allocation (RHNA).

Meanwhile, the state continues to work to improve the overall RHNA process to set more ambitious housing planning goals. HCD continues to work with local governments to pursue pro-housing policies such as reduced parking requirements, reduced development impact fees, and by-right zoning, by providing additional points or scoring preferences in various competitive state grant programs. Promulgation of the pro-housing regulations is targeted for early 2021.

TARGETED ENVIRONMENTAL EXEMPTIONS

While many important streamlining and exemption provisions already exist in current law, incongruent definitions or processes sometimes make these benefits complicated, if not impossible, to access. One-time California Environmental Quality Act streamlining for Homekey projects in 2020 demonstrated the importance of clear, usable streamlining provisions. The Homekey exemptions enabled the state and local jurisdictions to bring an unprecedented number of new affordable housing units online in record time. Continued strategic and targeted use of CEQA exemptions will be an important component of making affordable housing production more objective, aligning key definitions and administrative processes, reducing costs and time spent in CEQA litigation, all while not limiting the fundamental purpose of environmental protections.

IMPROVING AFFORDABLE HOUSING FUNDING PROCESSES

The Administration is committed to improving the efficient allocation of affordable housing funding. The state has many different housing funding programs, each with its

own scoring criteria and timelines. While steps have been taken to begin to improve coordination across all state housing agencies, more work remains. This includes:

- **Improving HCD's Funding Process**—The Administration continues to streamline housing funding programs to facilitate an efficient allocation of recent significant state investments. Recently enacted legislation, Chapter 192, Statutes of 2020 (AB 434) directed HCD to align its major rental housing programs with a single application and scoring system by 2022. To assist in these streamlining efforts, the Budget includes \$2.7 million General Fund for HCD to implement AB 434.
- **Harmonizing State Programs**—In addition to actively implementing AB 434, BSCCH and the Treasurer's Office have established a working group to improve and coordinate a variety of housing finance programs. HCD also implemented a short pause on issuing new Notices of Funding Availability so that the billions of dollars awarded to affordable housing projects around the state align with the regulations promulgated by the California Debt Limit Allocation Committee and Tax Credit Allocation Committee.

HOMELESSNESS

Recent state budgets have provided local jurisdictions with historic levels of funding to address homelessness. Since 2018, \$1.45 billion has been provided to local governments for the Homeless Emergency Aid Program and the Homeless Housing, Assistance and Prevention Program to support regional coordination and immediate homelessness challenges. These investments demonstrate California's commitment to working collaboratively with local partners to mitigate this crisis.

However, to find solutions to homelessness and achieve housing for all, there must be increased attention to solving—and not just mitigating—this crisis. To truly achieve a functional end to homelessness, it is imperative that both state and local governments, with support from the federal government, focus on the following five components of an effective framework to end homelessness: prevention, shelter, housing, long-term supportive services, and conservatorship.

HOMELESS COORDINATING AND FINANCING COUNCIL

The Homeless Coordinating and Financing Council (HCFC), within BSCCH, is continuing to build the first-ever statewide homelessness data warehouse with cooperation from all 44 California Continuums of Care. In October 2020, the HCFC adopted a two-year

framework and goals to strengthen coordination across state, regional and local partners with a focus on strengthening homelessness systems, people experiencing unsheltered homelessness, sheltering and interim housing, permanent housing, and homelessness prevention.

HOUSING VULNERABLE POPULATIONS DURING THE PANDEMIC

Early in the COVID-19 Pandemic, the state acted swiftly by partnering with local governments to provide safe, non-congregate shelter through the securing of hotel and motel rooms for vulnerable individuals experiencing homelessness to avoid being exposed or prevent the spread of the COVID-19 virus in a congregate setting. In March 2020, \$150 million in federal Coronavirus Relief Funds (CRF) was allocated to HCFC and the Department of Social Services (DSS) to assist local jurisdictions with securing hotel and motel rooms, acquiring trailers to safely house homeless populations most at risk, and providing hygiene stations and outreach to unsheltered individuals. This was followed by \$300 million in flexible grants to local governments to address homelessness during the pandemic. Then in November 2020, an additional \$62 million was made available from the Disaster Response-Emergency Operations Account for continued Project Roomkey site operations and to begin transitioning those residents to permanent housing. Since March 2020, Project Roomkey has successfully provided medically necessary interim housing for over 23,000 people over 42 counties.

As part of the state's continued response to the public health emergency, the 2020 Budget Act allocated \$550 million of the state's direct allocation of federal CRF to purchase hotels, motels, residential care facilities, and other housing that can be quickly converted and rehabilitated to provide permanent housing for persons experiencing homelessness, and who are also at risk of COVID-19. The HCD provided grants to local jurisdictions to acquire these facilities, which are owned and operated at the local level. Due to unprecedented demand from local jurisdictions, an additional \$200 million CRF was subsequently provided to enable counties and tribes to acquire additional sites for permanent housing. In addition, \$50 million one-time General Fund and \$45 million in philanthropic funding was directed to this effort. As of December 2020, HCD has awarded \$846 million to 51 local agencies for 94 projects, providing over 6,000 housing units for individuals or families and helping to stop the spread of COVID-19 among this vulnerable population.

EXPANDED FACILITIES TO SUPPORT HOUSING FOR ALL

Building upon the success of Homekey, the Budget proposes \$1.75 billion one-time General Fund to further develop a broader portfolio of housing needed to end homelessness through continued acquisitions and creation of new units.

- **Continued Homekey Acquisitions**—The successful pace of the first round of Homekey funding demonstrates the need for additional investments, particularly in the midst of a pandemic. The Budget includes \$750 million one-time General Fund for HCD to continue to provide competitive grants for local governments to purchase and rehabilitate housing, including hotels, motels, vacant apartment buildings, and other buildings, and convert them into interim or permanent long-term housing. To sustain this momentum and meet local governments' demand for additional funding, the Administration is asking the Legislature to take early action to approve \$250 million one-time General Fund in 2020-21 to continue funding Homekey projects. As part of this early action, the Administration proposes the same streamlining benefits provided by the Legislature in 2020 be extended to all future Homekey acquisitions and rehabilitation projects so that local governments can continue to successfully expend funds at the pace necessary to match the urgency of the homelessness crisis.
- **Behavioral Health Continuum Infrastructure**—As the state broadens the range of services provided through California Advancing and Innovating Medi-Cal (CalAIM) and the Serious Mental Illness/Serious Emotional Disturbance Waiver, the Department of Health Care Services aims to reduce homelessness, incarceration, unnecessary hospitalizations, and inpatient stays by appropriately utilizing community-based models of care. Increased investment in behavioral health continuum infrastructure is a key part of these efforts. Infrastructure is critical to make outpatient treatment options more widely available and to help counties treat individuals in less restrictive, community-based, residential settings of care. The Budget proposes \$750 million one-time General Fund, available over three years, for the Department of Health Care Services to provide competitive grants to counties for the acquisition and rehabilitation of real estate assets to expand the community continuum of behavioral health treatment resources. These resources seek to improve the comprehensive continuum of services by providing short-term crisis stabilization, acute needs, peer respite, and other clinically enriched longer-term treatment and rehabilitation opportunities for persons with behavioral health disorders, in the least-restrictive and least-costly setting. The Administration estimates that this proposal will result in the addition of at least 5,000 beds, units, or rooms.

Counties will be required to provide a match of local funds. The Administration is also exploring opportunities to repurpose relinquished adult jail bond financing to invest in short-term residential mental health facilities. (See the Criminal Justice Chapter for additional information.)

- **Expanded Facilities to Support Housing**—The Budget proposes \$250 million one-time General Fund for the Department of Social Services to counties for the acquisition or rehabilitation of Adult Residential Facilities (ARF) and Residential Care Facilities for the Elderly (RCFE) with a specific focus on preserving and expanding housing for low-income seniors.

TOTAL HOUSING AND HOMELESSNESS INVESTMENTS

The state continues to make progress in meeting its Housing for All goals through a multi-pronged approach including housing grants, loans, tax credits, property acquisitions, and supportive services. In total, the Governor's Budget includes more than \$8 billion in housing resources and \$2 billion in homelessness resources, as detailed below.

2021-22 Affordable Housing Funding
(Dollars in Millions)

<i>Department</i>	<i>Program</i>	<i>Amount</i>
Department of Housing and Community Development	Veterans and Affordable Housing Bond Act Programs (Prop 1)	\$490.0
	No Place Like Home Program	\$400.0
	Building Homes and Jobs Fund Programs (SB 2)	\$277.0
	Infill Infrastructure Grant Program Economic Recovery Investment	\$500.0 ^{1/}
	Federal Funded Programs for Housing	\$78.6 ^{2/}
	Veterans Housing and Homelessness Prevention	\$75.0
	Various	\$17.0
California Housing Finance Agency ^{3/}	Single Family First Mortgage Lending	\$3,000.0
	Multifamily Conduit Lending	\$1,200.0
	Multifamily Permanent Lending	\$410.0
	Mixed-Income Loan Program	\$40.0
	Single Family Down Payment Assistance	\$95.0
	Special Needs Housing Program	\$15.0 ^{4/}
Tax Credit Allocation Committee	Low Income Housing Tax Credits (State)	\$602.7
	Low Income Housing Tax Credits (Federal)	\$330.9 ^{5/}
	Farmworker Housing Assistance Tax Credits	\$4.2
Strategic Growth Council	Affordable Housing and Sustainable Communities	\$426.0 ^{6/}
Department of Veterans Affairs	CalVet Farm and Home Loan Program (Prop 1)	\$170.0
Office of Emergency Services	Domestic Violence Housing First Program	\$23.0
	Transitional Housing Program	\$18.0
	Specialized Emergency Housing	\$10.0
	Domestic Violence Assistance, Equality in Prevention and Services, Human Trafficking Victim Assistance, North American Domestic Violence and Sexual Assault	- ^{7/}
California Department of Corrections and Rehabilitation	Specialized Treatment of Optimized Programming, Parolee Service Center, Day Reporting Center, Female Offender Treatment and Employment Program, Proposition 47 Grant Program	- ^{7/}
Department of Social Services	CalWORKS Housing Support Program	\$95.0
	CalWORKS Family Stabilization, Housing Component	\$6.4 ^{8/}
Department of Public Health	Housing Opportunities for Persons with AIDS (HOPWA)	\$5.0
	Housing Plus Program	\$1.0
	HIV Care Program	- ^{7/}
Total		\$8,289.8

^{1/} Of this amount, \$250 million is proposed for early action in 2020-21, for the Infill Infrastructure Grant Program to stimulate economic recovery.

^{2/} This amount reflects programs that receive federal funds, such as the Community Development Block Grant program. Unawarded COVID-19 related relief funds (e.g., CARES Act) are not reflected. Additional federal funds related to COVID-19 response may become available in 2021-22.

^{3/} CalHFA is self-supporting and its single family and conduit lending programs do not rely on the state General Fund. Funding estimates are based on lending activities from 2019-20, available program resources, volume cap allocation, and multifamily lending pipeline projections.

^{4/} Funding estimate represents voluntary allocations of local Proposition 63 funds from 16 participating counties.

^{5/} This represents the estimated 9 percent tax credits to be allocated in 2021 and the estimated amount of 4 percent credits to be awarded in 2021 based on current data and remaining bond cap. Most disaster credits were allocated in 2020 and excluded from 2021 9 percent tax credits estimate.

^{6/} The Affordable Housing and Sustainable Communities program amount reflects 20 percent of projected Cap and Trade revenues.

^{7/} The state provides a number of wrap-around supportive services through these programs including housing, which cannot be separated from the program's overall budget.

^{8/} Of the \$48.5 million available for CalWORKs Family Stabilization in 2020-21, \$6.4 million is estimated to be spent on housing.

2021-22 Homelessness Funding
(Dollars in Millions)

<i>Department</i>	<i>Program</i>	<i>Amount</i>
Department of Housing and Community Development	Continued Homekey Acquisitions	\$750.0 ^{1/}
	Federal Funded Programs for Homelessness	\$43.0 ^{2/}
	Transitional Housing Program	\$8.0
Office of Emergency Services	Various Homeless Youth Programs	\$1.0
	Youth Emergency Telephone Network	\$0.6
Department of Social Services	Expanded Facilities to Support Housing	\$250.0
	CalWORKS Homeless Assistance Program	\$38.5 ^{3/}
	Housing and Disability Advocacy Program	\$25.0
Department of Health Care Services	Behavioral Health Continuum Infrastructure	\$750.0
	Project for Assistance in the Transition from Homelessness	\$8.8
Department of Transportation	Homeless Encampment Cleanup on the State Highway System	\$12.4
California Community Colleges	Basic Needs Funding - Student Hunger and Homelessness Programs	\$100.0 ^{4/}
	Rapid Rehousing	\$9.0
California State University	Basic Needs Funding - Student Hunger and Homelessness Programs	\$15.0 ^{4/}
	Rapid Rehousing	\$6.5
University of California	Basic Needs Funding - Student Hunger and Homelessness Programs	\$15.0 ^{4/}
	Rapid Rehousing	\$3.5
Total		\$2,036.3

1/ Of this amount, \$250 million is proposed for early action in 2020-21, for continued Homekey acquisitions.

2/ This amount reflects programs that receive federal funds, such as the Emergency Solutions Grant program. Unawarded COVID-19 related relief funds (e.g., CARES Act) are not reflected.

3/ Amount reflects cost of recent policy changes, but not base funding since program expenditures are embedded within the overall CalWORKs grants expenditures and cannot be extracted.

4/ These programs support basic needs partnerships for low-income students facing housing or food insecurity. These amounts exclude basic needs funding provided to address student mental health and digital equity needs.

CLIMATE CHANGE

Climate change continues to have a significant impact on California. The months of August through October were the hottest on record in California. In 2020, catastrophic wildfires consumed over four million acres, far more than any previous year in the state's history. Climate-related disasters are occurring at a speed and scale not expected until the end of this century.

In the face of this challenge, the Administration is taking actions to transform the state's transportation system, responsible for more than half of California's climate change-inducing greenhouse gas emissions. Executive Order N-79-20 established aggressive statewide targets to accelerate the shift toward zero-emission vehicles. The state also made bold commitments to conserve more of California's land and coastal waters, and use the state's natural and working lands to provide solutions to the climate crisis.

The Budget builds on these commitments and also supports a comprehensive wildfire and forest resilience strategy to reduce wildfire risks to vulnerable communities and critical habitats. These efforts put California on a path to accelerate the state's transition to a resilient, equitable, carbon neutral future that creates economic prosperity. Sustainable economic growth requires sustainable environmental policies, as preventing crises is less disruptive than responding to them. Additionally, the Administration is committed to developing the next round of scientific assessments of climate change impacts to inform the state's investments and programs and will work with the Legislature, philanthropy and other stakeholders to accomplish this goal.

WILDFIRE AND FOREST RESILIENCE

In 2020, 9,000 wildfires burned over four million acres across the state, more than the 2017 and 2018 fire seasons combined and significantly higher than the most recent five-year average of acres burned. Hotter, drier conditions in the state's forests, driven by climate change and the consequences of a century-old legacy of fire suppression, have generated unparalleled fuel conditions that result in significant wildfire risk.

In August 2020, the Administration entered into a shared stewardship agreement with the U.S. Forest Service, mapping out a 20-year, science-based framework to improve wildfire resilience and forest health, including a commitment to complete forest management projects on one million acres of California's state and federal forest and rangeland every year.

To address the scale and urgency of these wildfire risks, the Budget includes \$1 billion to support the Forest Management Task Force's Wildfire and Forest Resilience Action Plan, including \$323 million proposed for early action in 2020-21 to accelerate fire prevention projects that protect communities and other efforts to jumpstart economic recovery in the forest sector.

This comprehensive strategy supports investments in the following priorities:

- Expanding appropriate forest management to reduce catastrophic wildfire risk and restore the ecological health of forests;
- Securing more fuel breaks around vulnerable communities to protect residents and property; and
- Supporting hardening homes and infrastructure in communities to mitigate wildfire damages.

This proposal will improve public safety across California's most wildfire-vulnerable communities and significantly increase the pace and scale of forest management projects. This investment will also enable regional efforts to build a pipeline of wildfire resilience projects, expand fire-adapted homes and communities, improve stewardship on state lands, and create high-road jobs while jumpstarting small businesses that meet California's climate objectives.

The \$1 billion Wildfire and Forest Resilience Expenditure Plan includes the following investments:

Wildfire and Forest Resilience Expenditure Plan
(Dollars in Millions)

Investment Category	Department	Program	Early Action 2020-21	Budget Year 2021-22	Total
Resilient Forests & Landscapes	CAL FIRE	Forest Health Program	\$70	\$100	\$170
		Forest Improvement Program for Small Landowners	\$10	\$40	\$50
		Forest Legacy & Reforestation Nursery	\$8	\$17	\$25
		Urban Forestry	\$10	\$13	\$23
		Tribal Engagement	\$1	\$19	\$20
	State Parks, Fish & Wildlife & State Lands Commission	Stewardship of State-Owned Land	\$19	\$123	\$142
	Sierra Nevada & Tahoe Conservancies	Project Implementation in High-Risk Regions	\$21	\$61	\$82
Wildfire Fuel Breaks	CAL FIRE	CAL FIRE Unit Fire Prevention Projects	\$10	\$40	\$50
		Fire Prevention Grants	\$50	\$80	\$130
		Prescribed Fire & Hand Crews	\$15	\$35	\$50
	California Conservation Corps	Forestry Corps & Fuel Reduction Projects	\$0	\$20	\$20
	Department of Conservation	Regional Forest & Fire Capacity	\$25	\$60	\$85
Community Hardening	Cal OES & CAL FIRE	Home Hardening	\$25	\$0	\$25
	CAL FIRE	Defensible Space Inspectors	\$0	\$6	\$6
	CAL FIRE & University of California	Land Use Planning & Public Education Outreach	\$0	\$7	\$7
Science-Based Management	CAL FIRE	Ecological Monitoring, Research & Adaptive Management	\$3	\$17	\$20
	Natural Resources Agency	Remote Sensing	\$0	\$15	\$15
	Air Resources Board & Water Board	Permit Efficiencies	\$0	\$4	\$4
Forest Sector Economic Stimulus	IBank	Climate Catalyst Fund	\$47	\$2	\$49
	CAL FIRE	Workforce Training	\$6	\$18	\$24
	Office of Planning & Research	Market Development	\$3	\$0	\$3
Total			\$323	\$677	\$1,000

- **Resilient Forests and Landscapes**—\$512 million to enhance wildfire resilience across California's diverse landscapes by thinning forests, replanting trees and utilizing prescribed fire, which will also improve biodiversity, watershed health, carbon sequestration, air quality, and recreation. Programs include a forest health grant program, support for post-fire watershed recovery, a direct investment for Tribes, support for small landowners to sustainably manage their forest lands, and a targeted investment to better manage state landholdings, which are comprised of some of the most unique landscapes in California.
- **Wildfire Fuel Breaks**—\$335 million for the Department of Forestry and Fire Protection (CAL FIRE) and the California Conservation Corps to complete at least 45 to 60 strategic fuel breaks projects each year over the next several years. This funding builds on the success of the 35 emergency fuel reduction projects completed in 2019, which played a critical life-saving role this past fire season. Grant funds will enable local communities to develop their own fire safety projects. Targeted regional investments will provide technical support to develop cross-jurisdictional regional plans, identify projects, prepare those projects and then receive targeted grants for project implementation.
- **Community Hardening**—\$38 million to increase the resilience of the state's most fire-vulnerable communities. One in four Californians live in a high fire risk zone. A home that has defensible space and retrofits to "harden" it against embers has a significantly higher chance of survival in a wildfire. The Budget supports educational programs, defensible space outreach, and basic retrofits for homes of low-income Californians. The Administration will explore leveraging opportunities with the federal government to enhance home hardening efforts.
- **Science-Based Management**—\$39 million to support rigorous monitoring and robust scientific inquiry necessary to achieve effective, long-term forest health and restoration in the face of a dynamic environment of high-severity wildfire and climate change. Investing in remote sensing, research, and science-based monitoring will enable the state to effectively build wildfire and forest resilience in the face of climate change.
- **Forest Sector Economic Stimulus**—\$76 million to invest in innovative projects and workforce preparedness in the forest sector. Investments in wildfire and forest resilience are a driver for economic growth in California communities. Expanding wood product markets to utilize the material being thinned from forests will create incentives for private forest-land management and help the state meet its carbon goals. By establishing a low-interest lending program and exploring supply chain guarantees through the Climate Catalyst Fund, the state will remove key barriers to

launch these markets. Investments in growing the workforce through the California Conservation Corps and expanding community college and vocational training programs will expand access to existing forest management jobs, as well as in the growing wood products industry.

The Budget also includes statutory changes to make \$200 million of Cap and Trade funding for CAL FIRE's forest health and fire prevention programs available for an additional five years, beyond the existing 2023-24 sunset date specified in Chapter 626, Statutes of 2018.

ZERO-EMISSION VEHICLES

Executive Order N-79-20 directly addresses California's transportation emissions challenge by positioning state agencies to work with stakeholders to aggressively scale the zero-emission vehicle market in ways that benefit all Californians. The order sets the following zero-emission targets: 100 percent of in-state sales of new passenger cars and trucks by 2035, 100 percent of medium- and heavy-duty vehicles in the state by 2045 and by 2035 for drayage trucks, and 100 percent of off-road vehicles and equipment operations by 2035, where feasible.

To support implementation of these targets, the Budget focuses on two interrelated priorities: equity and scale. A focus on equity prioritizes public investments in communities suffering most from a combination of economic, health, and environmental burdens. A focus on scale brings down the transition cost, accelerates private capital investment, and reduces the need for direct public investment. The Budget includes the following investments to meet zero-emission vehicle goals:

- **Zero-Emission Vehicle Infrastructure**—Securitization of approximately \$1 billion of future revenues to increase the pace and scale of the construction of electric vehicle charging and hydrogen fueling stations necessary to accelerate zero-emission vehicle adoption. The Budget proposes statutory changes to extend existing vehicle registration fees currently set to expire in 2024 and to authorize the securitization of these future revenues to support the expansion of the California Energy Commission's Clean Transportation Program. A portion of this funding will be used for loans that will leverage additional private sector capital to build the necessary infrastructure.
- **Greening of State Infrastructure**—\$50 million one-time General Fund to support the installation of zero-emission vehicle charging stations at state-owned facilities.

- **Zero-Emission Vehicles**—\$465 million one-time Cap and Trade funds to improve access to new and used zero-emission vehicles, including passenger cars and trucks, medium- and heavy-duty vehicles, and off-road equipment. The Budget includes additional investments in existing transportation equity programs such as Clean Cars 4 All, Clean Mobility Options, and Financing Assistance, as well as heavy-duty vehicles programs such as the Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project and the Clean Off-Road Equipment Voucher Incentive Project. These investments will be further complemented by the Low Carbon Fuel Standard-funded Clean Fuel Rewards program, which provides a new, stable consumer incentive for plug-in passenger vehicles using existing revenue generated by utilities and existing funds in the Clean Vehicle Rebate Project. The Budget also proposes to extend existing fees scheduled to sunset in 2024 to support incentive programs to accelerate the turnover of existing light-, medium-, and heavy-duty vehicles and equipment, including off-road construction and agricultural equipment and locomotives.
- **Delayed Property Tax Assessment of Zero-Emission Vehicle Charging and Fueling Stations**—The Budget proposes statutory changes to exclude the construction or addition of electric vehicle charging and hydrogen fueling stations completed by January 1, 2024 from the definition of accessible new construction for ten years. This proposal would create additional incentives for investment in zero-emission vehicle charging and fueling stations.

Each of these investments will help consumers adopt zero-emission vehicle technology, as will the ongoing effort to simplify and align local, state, and federal funding programs through the Zero-Emission Vehicle Market Development Strategy process. The Administration will continue to evaluate the role of the Clean Vehicle Rebate Project in meeting the state's zero-emission vehicle goals.

NATURAL AND WORKING LANDS

Natural and working lands comprise more than 90 percent of the state's geography.

Executive Order N-82-20 accelerates biodiversity protection and habitat restoration actions across all landscapes, such as the state's forests, agricultural lands, and conservation lands, and underscores how smart land management advances California's climate goals while increasing food and water security, protecting California's globally recognized biodiversity, expanding recreation and equitable access to nature, and building sustainable economies. The Executive Order also

establishes the goal of conserving 30 percent of California's land and coastal waters by 2030 to address the joint crises of climate change and biodiversity loss.

The Budget reflects California's commitment to improving management of natural and working lands to advance the state's climate change goals of achieving carbon neutrality, expanding carbon sequestration, and building climate resilience across the state's diverse landscapes.

Significant adjustments:

- Restoration of Natural Areas and Ecosystems—\$248.6 million
 - \$125 million one-time Proposition 68 for the Natural Resources Agency to support multi-benefit water quality, water supply and watershed protection and restoration projects.
 - \$79.9 million one-time from various bond funds for the Wildlife Conservation Board to support multi-benefit ecosystem and watershed protection and restoration projects including, but not limited to, the Lower American River Conservancy Program, the Pacific Flyway program, and Wildlife/Fish Passage programs.
 - \$43.7 million in 2021-22, and a total of \$69.6 million over five years, from various fund sources for the Department of Water Resources to support restoration projects through the Riverine Stewardship and San Joaquin Restoration programs, ecosystem enhancement projects in the Delta, and a plan to increase watershed resilience in the San Joaquin Basin.
- Flood Management—\$183 million
 - \$81 million in 2021-22, and a total of \$102.3 million over three years, from various bond funds for the Department of Water Resources Delta Levees System Integrity Program.
 - \$67 million in 2021-22, and a total of \$224.9 million over four years, General Fund for the Department of Water Resources to leverage \$1.8 billion in federal funding for the flood risk reduction American River Commons Features project.
 - \$28.5 million one-time Proposition 68 for the Department of Water Resources to support collaborative flood risk management.
 - \$6.5 million in 2021-22, and a total of \$9.5 million over three years, Proposition 1 for the Department of Water Resources to support emergency flood response in the Delta.

- Coastal Protection—\$6.5 million
 - \$6.5 million in 2021-22, and a total of \$17.4 million over two years, Proposition 68 for the Natural Resources Agency/Ocean Protection Council to support projects that improve biodiversity and climate resilience by increasing coastal and marine ecosystem health.

WORKFORCE TRAINING AND JUST TRANSITION ROADMAP

The Budget proposes \$25 million one-time General Fund as an early action in 2020-21 to expand the High Road Training Partnership model in several, industry-specific sectors. This Partnership, administered by the California Workforce Development Board, is a workforce development strategy that builds regional partnerships among workers, employers and community-based organizations to expand access to high-quality jobs in targeted industries. This additional investment will focus on growing sectors of the economy that support the state's equitable economic recovery and climate goals, including construction, forestry and agriculture, healthcare, trade and logistics, and information technology.

In addition, per Executive Order N-79-20, the Labor and Workforce Development Agency and Governor's Office of Planning and Research will deliver a Just Transition Roadmap in July 2021. This roadmap will inform future actions to prepare California's workforce to build the transition to a carbon neutral economy across multiple regions and sectors, with a focus on both displaced workers and providing opportunities for communities most in need.

CAP AND TRADE EXPENDITURE PLAN

The Budget proposes a \$1.37 billion Cap and Trade Expenditure Plan for existing programs, including several early actions for 2020-21. The proposed Expenditure Plan advances the state's priorities on environmental justice and protects public health by delivering clean air and safe and affordable drinking water. The Expenditure Plan also promotes implementation of the Governor's recent Climate Executive Orders N-79-20 and N-82-20 on zero-emission vehicles and natural and working lands.

The Cap and Trade Expenditure Plan prioritizes investments to protect public health in disadvantaged communities. Specifically, the Budget provides \$325 million one-time to support the Community Air Protection Program (AB 617), which reduces emissions in

Cap and Trade Expenditure Plan

(Dollars in Millions)

Investment Category	Department	Program	Early Action 2020-21	Budget Year 2021-22	Total
Equity Programs	Air Resources Board	AB 617 - Community Air Protection	\$125	\$140	\$265
		AB 617 - Local Air District Implementation	\$0	\$50	\$50
		AB 617 - Technical Assistance to Community Groups	\$0	\$10	\$10
	Water Board	Safe and Affordable Drinking Water (\$130 million total)	\$30	\$24	\$54
Low Carbon Transportation & ZEV Strategy	Air Resources Board	Clean Trucks, Buses, & Off-Road Freight Equipment	\$165	\$150	\$315
		Agricultural Diesel Engine Replacement & Upgrades	\$90	\$80	\$170
		Clean Cars 4 All & Transportation Equity Projects	\$74	\$76	\$150
Natural & Working Lands	CAL FIRE	Healthy & Resilient Forests (SB 901) (\$75 million included in 2020 Budget)	\$125	\$200	\$325
	Department of Food & Agriculture	Healthy Soils	\$15	\$15	\$30
Total			\$624	\$745	\$1,369

communities with disproportionate exposure to air pollution through targeted air monitoring and community emissions reduction programs. This support includes grants to community-based organizations, implementation funding for local air districts, and incentives for cleaner vehicles and equipment. The Budget also includes funding necessary to maintain full implementation of the Safe and Affordable Drinking Water Program.

Building on the continuously appropriated programs that support sustainable community strategies, including high-speed rail, transit programs and projects, and transit-oriented affordable housing, the Cap and Trade Expenditure Plan includes \$635 million one-time dedicated to reducing emissions from the transportation sector, the largest source of California's greenhouse gas emissions. Key programs target truck, bus, off-road, and agricultural vehicles. These programs also reduce harmful air pollutants that have a disproportionate impact on disadvantaged populations in both urban and rural communities. Other programs proposed for funding include targeted incentives for low-income consumers to retire older, higher-polluting vehicles in favor of new or used zero-emission or cleaner vehicles, as well as support for innovative mobility pilot projects that respond to community-identified transportation needs in low-income

and disadvantaged communities. As the state works to achieve carbon neutrality by mid-century, the agricultural and forestry sectors will be essential to both reducing emissions and sequestering carbon. Consistent with the Natural and Working Lands Executive Order N-82-20, the Budget includes \$355 million (\$200 million ongoing) for multiple land-based carbon removal programs, including \$30 million one-time for the Healthy Soils Program to provide grants for on-farm soil management practices that sequester carbon and \$23 million one-time for the Urban Forestry Program. For additional information on the healthy forest and healthy soils programs, see the Wildfire and Forest Resilience section of this Chapter and the Sustainable Agriculture Chapter, respectively.

CLIMATE RISK DISCLOSURE

In 2019, the Governor issued Executive Order N-19-19 to incorporate climate risk and climate opportunity into state investments. In September, the Administration released a Climate Investment Framework for the California Public Employees' Retirement System, the California State Teachers' Retirement System, and the University of California Retirement Plan. The Framework includes an analysis of sound investment practices and where each pension fund currently stands in relation to statewide climate goals. The Framework also calls for the creation of a working group on climate disclosure standards, which will explore the standardization of the many terms and definitions used to discuss climate change from an economic perspective.

In October, California joined the Coalition for Climate Resilient Investment, a group of public and private sector entities dedicated to supporting the inclusion of climate risk in investment decisions around the world. In alignment with these efforts, the state pension funds have adopted official investment policies that incorporate climate risk into their standard practices, routinely disclose the carbon footprint of their investment portfolios, and engage with private partners to encourage widespread climate risk disclosure.

SUSTAINABLE AGRICULTURE

California is the nation's top agricultural producing state with over 400 different crops, including a number of crops grown only in California. Nearly 70,000 farms and ranches generate approximately \$50 billion in annual sales and are a crucial economic driver in many rural communities. However, it is also an industry that faces many challenges, including climate change and water uncertainties, but also growing scientific knowledge about the harmful health impacts of traditional pesticides on farmers, farmworkers and surrounding communities.

To address these challenges, farmers and ranchers continue to innovate by adopting agile technology, expanding in local and global markets, and developing sustainable, climate-smart agricultural practices. As the state begins to recover from the COVID-19 Recession, agriculture will play an important role in the economic recovery in certain regions of the state. The federal COVID-19 relief bill provides \$13 billion nationwide for direct payments, purchases, and loans to farmers and ranchers who have suffered losses as a result of the COVID-19 Pandemic. It also includes funds to support the food supply chain through food purchases, donations to food banks, and support for local food systems. The state's agricultural producers will benefit from this economic relief, and the Budget builds on this federal support.

To complement federal stimulus efforts, the Budget includes strategic investments to support California's agriculture industry as it addresses continued challenges while also producing nutritious food and advancing the state's climate resilience objectives.

COVID-19 AND PROTECTING FRONTLINE AGRICULTURAL WORKERS

The COVID-19 Pandemic has taken a significant toll on the state's food system, and close to half of the food supply chain was disrupted due to the closure of food service and hospitality businesses. Additionally, the food and agricultural industry was impacted by changes in agricultural product demand as a result of disruptions in the export markets and distribution, packing, and supply chain logistics. Farmers, farmworkers and the entire food and food-value chain moved swiftly and effectively to redirect supply lines from food service to retail and on-line platforms where possible.

At the same time, California agriculture harvested and donated food that lost its market to food banks, schools, and local charities. In addition to those donations, the Farm to Family program of the California Association of Food Banks has received and delivered 170 million pounds of fresh fruits and vegetables, and 47 million pounds of shelf-stable foods to local food banks, equivalent to 260 million meals.

As the COVID-19 Pandemic continues, the need remains to protect the state's frontline workers, their families, and their local communities, including agricultural employees. In partnership with the California Governor's Office of Emergency Services and the County Agricultural Commissioners, the Department of Food and Agriculture has distributed over 21 million surgical masks, 2 million cloth masks, 6 million N-95 masks, 1.8 million gloves, and 313,000 units of hand sanitizers for agricultural workers.

The Housing for the Harvest program was established in July 2020 to provide temporary housing options for farm and food processing employees to self-isolate if they test positive for, or are exposed to, COVID-19. The program consists of a partnership between the state, counties, and local community-based organizations.

SMALL AND MID-SIZE FARM SUPPORT

Recognizing that many sectors in agriculture continue to struggle, the Budget includes \$6.7 million one-time General Fund (\$3.35 million in 2020-21 and \$3.35 million in 2021-22) to contract with the University of California Cooperative Extension to provide direct technical assistance and grants to technical assistance providers and small, mid-sized, and underserved farmers. These resources will help farmers with business planning, navigating regulatory compliance, and accessing and leveraging additional state and federal funds.

CLIMATE SMART AGRICULTURE

Building on California's leadership in reducing greenhouse gas emissions and protecting communities and natural places from climate impacts, the Budget includes investments to support the agriculture industry advance Climate Smart Agriculture.

- Funding Agricultural Replacement Measures for Emission Reductions (FARMER)—\$170 million one-time Greenhouse Gas Reduction Fund (\$90 million in 2020-21 and \$80 million in 2021-22) for the Air Resources Board to provide funding that supports the replacement of agricultural harvesting equipment, agricultural pump engines, tractors, and other equipment used in agricultural operations to reduce greenhouse gas emissions.
- Healthy Soils Program—\$30 million one-time Greenhouse Gas Reduction Fund (\$15 million in 2020-21 and \$15 million in 2021-22) for the Department of Food and Agriculture to provide grants for on-farm soil management practices that sequester carbon.
- Climate Catalyst Fund—\$50 million one-time General Fund to the California Infrastructure and Economic Development Bank (IBank) to support Climate Smart Agriculture loans to advance projects that may include but are not limited to: methane reduction; equipment replacement; water efficiency; healthy soils; circular economies; on-farm bioenergy; energy efficiency for food processing; and renewable energy systems and energy storage for agricultural operations.

WATER EFFICIENCY AND SUSTAINABLE GROUNDWATER

A significant number of groundwater basins in the Central Valley are critically over-drafted. Agricultural water demand will likely continue to outpace available water supplies into the future. In recognition that the amount of groundwater available for use will be lower than historical pumping levels that have depleted aquifers, the Administration is supporting local communities and the agriculture industry transition to sustainable groundwater use by aligning state investments and policies to enable implementation of the Sustainable Groundwater Management Act. The Budget proposes \$100 million one-time General Fund, which includes \$50 million as part of the Administration's proposed early action to support water efficiency projects and a transition to sustainable groundwater.

- Sustainable Groundwater Management Act Grants—\$60 million one-time General Fund (\$30 million in 2020-21 and \$30 million in 2021-22) to the Department of Water Resources for grants to support economic mitigation planning and groundwater implementation projects across critically over-drafted basins.
- State Water Efficiency and Enhancement Program Grants—\$40 million one-time General Fund (\$20 million in 2020-21 and \$20 million in 2021-22) to the Department of Food and Agriculture to provide incentives that help farmers reduce irrigation water use and reduce greenhouse gas emissions from agriculture pumping.

CALIFORNIA'S IMPLEMENTATION OF THE FOOD SAFETY MODERNIZATION ACT

The Budget includes \$8.7 million in ongoing federal fund authority and 24 positions to continue and expand the Department of Food and Agriculture's Produce Safety Program. The Food Safety Modernization Act established federal science-based minimum standards for the safe growing, harvesting, packing, and holding of fruits and vegetables grown for human consumption. The Act enables the United States Food and Drug Administration to better protect public health by strengthening the food safety system and focusing more on preventing food safety issues rather than reacting to problems after they occur.

The Produce Safety Program was created within the Department of Food and Agriculture to address the planning of enhancements needed to bring California farms into compliance with the Act. These resources will enhance the Department's ability to create a more robust inspection program, conduct inspections on a minimum of ten percent of farms covered, provide education and outreach to California produce farmers, develop and validate the existing farm inventory database, and provide assistance during a food-borne outbreak crisis.

FARM TO SCHOOL

Farm to School programs improve the health and well-being of California school children through integrated nutrition education and healthy food access. Hundreds of millions of meals are served each year in California schools, and expanding opportunities for local food procurement that is tied to nutrition education is essential for establishing healthy eating habits that children can carry into adulthood.

Procurement of more California grown food also supports connecting California's agriculture to California consumers.

The Budget includes \$10 million one-time General Fund to continue the Office of Farm to Fork's Farm to School Program. This funding will build upon the success of the pilot program established in the 2020 Budget Act and continue to support California farmers and expand healthy food access by providing grants to schools to establish programs that coordinate local and California grown food procurement and utilization in school meals. The funding will also support food and agriculture education in classrooms and cafeterias through experiential learning opportunities in school gardens, on farms, and other culinary and agricultural pathways.

IMPACT ASSESSMENT AND ALIGNMENT OF REGULATORY REPORTING REQUIREMENTS FOR AGRICULTURE

The agriculture industry is subject to regulatory and reporting requirements across various state agencies. The Budget includes \$6 million one-time General Fund for regulatory alignment and efficiencies, including \$4 million in 2020-21 to engage a consultant to evaluate and implement the alignment of regulatory reporting activities across state agencies to reduce unnecessary burdens to farmers and ranchers in their efforts to meet regulatory compliance. The Budget also includes \$2 million in 2021-22 to support a business assessment to explore the establishment of a unified licensing portal at the Department of Food and Agriculture.

NETWORK OF CALIFORNIA FAIRS

The Network of California Fairs consists of 74 fairgrounds with different governance structures. A total of 53 fairgrounds are state-affiliated, have state civil service employees and are subject to various state requirements.

In 2020, the impact of the COVID-19 Pandemic adversely affected the ability of fairgrounds to generate revenue. Fairground revenue is generated by holding mass gatherings for social, commercial, and community events, including an annual fair. The annual fair event is the primary revenue generator for a fairground to cover the expenses of the event and to fund costs of daily operations and payroll throughout the year. At the same time, many fairgrounds continued as a component of the state's emergency network, serving as base camps and shelter during fires, COVID-19 testing sites, and food bank distribution sites. The COVID-19 Pandemic has negatively

impacted fairgrounds financially, but also has created an opportunity to improve the current business model.

Recognizing the significant economic hardship on fairs, the 2020 Budget Act included \$40.3 million one-time General Fund to support state-affiliated fairs that are projected to have insufficient reserves to pay legally mandated costs that may be incurred during the state civil service layoff process. The Administration plans to use a portion of anticipated remaining funding to also support general fairgrounds operational costs not limited to the staff layoff process.

The Administration is also in the process of evaluating alternative business and governance structures to enable fairs to operate more efficiently, meet local community needs and serve public health and safety roles in the state's emergency response system.

The Budget includes \$50 million one-time General Fund in 2021-22 to continue supporting state-affiliated fairgrounds operational costs while the state evaluates alternative business models. The Budget also includes \$10 million one-time General Fund to support fairground deferred maintenance, with a priority on fairgrounds that are used to support emergency operations.

INTEGRATED PEST MANAGEMENT (IPM) PROGRAMS

To facilitate the transition to safer, sustainable pest management, the Budget includes \$3.75 million ongoing (General Fund through 2023-24, transitioning to Department of Pesticide Regulation Fund in 2024-25) for the Department of Food and Agriculture to continue development of innovative pest management strategies, including the Interregional Research Project No. 4, Proactive IPM, and the Biologically Integrated Farming Systems grant program. These programs support non-conventional pest management technologies for specialty crops, research exotic pests that are likely to arrive in California to proactively identify mitigation strategies, and provide outreach of biologically integrated plant-based farming systems that reduce chemical insecticide use.

The Budget also includes \$8 million ongoing (General Fund through 2023-24, transitioning to Department of Pesticide Regulation Fund in 2024-25) to the Department of Food and Agriculture to expand CSU and UC research and extension capacity for IPM through cooperative agreements. As discussed in the Environmental Protection Chapter, the Budget proposes to replace the current flat-fee mill assessment on

pesticide sales with a risk-based tiered mill assessment, assessing a higher fee on higher toxicity pesticides, which will be phased-in over four years. Over the course of four years, General Fund support for these programs will decrease and be offset by the Department of Pesticide Regulation Fund as the tiered mill assessment is gradually phased in.

This page intentionally blank to facilitate double-sided printing.

NATURAL RESOURCES

The Natural Resources Agency consists of 26 departments, boards, commissions and conservancies responsible for administering programs to conserve, restore, and enhance the natural, historical, and cultural resources of California. The Budget includes total funding of \$7.4 billion (\$4.6 billion General Fund, \$2 billion special funds, \$812.6 million bond funds) for the programs included in this Agency.

The Agency's departments help the state become more climate resilient, expand equitable access to parks and wildlands, and conserve California's remarkable biodiversity. The Budget includes investments in each of these areas, and several related items are referenced in the Climate Change and Emergency Response Chapters.

DEPARTMENT OF WATER RESOURCES

The Department of Water Resources plans for the sustainable management of California's water resources and helps to implement the Administration's Water Resilience Portfolio. The Portfolio prioritizes actions to maintain water reliability, protect natural systems, and build regional capacity to adapt to an uncertain climate future.

Implementation of Portfolio actions is well underway, and the Budget continues state investments to advance the Portfolio across the Natural Resources Agency, California Environmental Protection Agency, and Department of Food and Agriculture. These agencies are coordinating closely to prepare for drought and flooding; advance

projects of statewide scale and importance; provide resources, tools and standards that support regional leadership; and help coordinate and address challenges that are beyond the scope of any region.

The Budget makes important investments to support local agencies as they work to build regional water resilience, including:

- Sustainable Groundwater—\$60 million one-time General Fund (\$30 million in 2020-21 and \$30 million in 2021-22) for grants to support local planning and implementation of Groundwater Sustainability Plans across critically over-drafted basins. Historic groundwater laws enacted in 2014 require local agencies to bring basins into sustainable conditions within 20 years of implementing their sustainability plans. This additional funding for existing Department grant programs will help local agencies address known data gaps, plan and implement projects, and address deficiencies in initial groundwater sustainability plans. Additional investments in agricultural irrigation efficiency, as referenced in the Climate Change and Sustainable Agriculture Chapters, will also support local agencies as they work to balance groundwater pumping and recharge.
- Flood Preparedness—\$183 million in 2021-22, \$365.2 million over the next four years, from various fund sources to leverage \$1.8 billion in federal funds for the flood risk reduction American River Common Features project, the maintenance and strengthening of levees, the support of emergency flood response activities in the Sacramento-San Joaquin Delta (Delta), and the support of collaborative flood risk management.
- Deferred Maintenance—\$75 million one-time General Fund for critical levee repair projects to enhance the state's resilience to catastrophic flooding.
- Delta Resilience—\$43.7 million in 2021-22, \$69.6 million over the next five years, from various fund sources to support ecosystem restoration and watershed resilience work on the San Joaquin River and for projects that improve water quality or ecological conditions within the Delta.

DEPARTMENT OF PARKS AND RECREATION

During the COVID-19 Pandemic, many have relied on state parks to provide relief from the pressures that COVID-19 has placed on Californians' daily lives. The Administration is committed to enabling safe, equitable, and enjoyable access to parks, open spaces, natural resources, and recreational amenities for all Californians.

ADVANCING PARKS FOR ALL

The Budget includes \$82 million in 2021-22 to improve access to state parks and builds upon last year's investments through the Parks for All initiative. Highlights include the following:

- \$20 million one-time General Fund to support critical deferred maintenance projects throughout the state park system to enable improved access and an enhanced visitor experience.
- \$12.7 million ongoing Cannabis Tax Fund to the Natural Resources Agency for the Youth Community Access Grant Program, which funds projects and programs that support youth access to natural and cultural resources with a focus on low-income and disadvantaged communities. Programs include, but are not limited to, community education and recreational amenities to support youth substance use prevention and early intervention efforts.
- \$10 million one-time General Fund and \$23.4 million one-time reimbursements from Federal Emergency Management Agency funds for the continuation of Woolsey Fire restoration projects to restore destroyed facilities and trails.
- \$6.3 million one-time General Fund and \$6.3 million one-time federal reimbursements to provide state matching funds to leverage the recent increase in the federal Land and Water Conservation Fund. These funds will be used to complete high-priority inholding acquisitions, which will increase access to existing state parks and add additional acres to the state park system. These inholding acquisitions will not increase operational costs.
- \$2.7 million one-time Proposition 68 bond funds to provide the design of the initial core improvements to further public access and recreation enhancements at Candlestick Point State Recreation Area.
- \$585,000 ongoing State Park and Recreation Fund to continue community liaison programs that engage underserved and underrepresented communities in urban areas.

PROTECTING FORESTS IN STATE PARKS

The 1.6 million-acre state park system protects the most significant natural, cultural, and historic resources in the state, including unique forestlands and other ecosystems at risk from high severity fires. As with other forest lands, a century of fire suppression and the impacts of climate change have increased the risk of devastating wildfires that threaten historic buildings and rare habitats in the state parks system. In 2020, fires burned over 115,000 acres across 22 state parks. The Department of Parks and Recreation continues to assess funding needs for post-wildfire recovery in these parks and will identify those priority needs through the spring budget process.

The Budget includes \$85 million one-time General Fund to increase the pace and scale of forest management at state parks as referenced in the Climate Change Chapter.

CREATING FISCAL STABILITY FOR BOATING PROGRAMS

The primary fund that supports boating-related activities, the Harbors and Watercraft Revolving Fund, has become structurally imbalanced over the last decade. The Administration has explored various revenue and expenditure options and proposes a balanced approach that: 1) reduces ongoing annual expenditures by \$13 million, 2) increases ongoing annual revenues by \$20.6 million through adjusting the vessel registration fee, 3) provides \$10 million annually for two years from the General Fund to offset transfers for recreational costs at State Water Project facilities, and 4) maintains programs that are vital to boater access and safety. The Administration will seek input from stakeholders to explore longer-term revenue options, such as a tiered vessel registration fee based on vessel length.

DEPARTMENT OF FISH AND WILDLIFE

The Department of Fish and Wildlife serves as a trustee for California's environment and natural resources. The state is a global biodiversity hotspot, but this natural abundance is increasingly under threat from climate change and other stressors.

Chapter 51, Statutes of 2018 directed the Department to conduct a service-based budget review to identify current service levels and activities, cost estimates, and staffing requirements to meet the Department's mission and statutory requirements, and perform an analysis of the Department's existing revenue structure. The service-based budget is the culmination of nearly a decade of discussion about how to

enable the Department to meet its mission. Charting a strategic vision, completing the service-based budget process, modernizing department functions, and advancing sustainable resources are critical pieces of saving California's natural resources for future generations.

Chapter 51 requires the Department to issue a final report on the service-based budget analysis to the Legislature in January 2021. This report will highlight the breadth of the Department's mission, identify gaps in existing staffing, and highlight opportunities for process improvements and operational efficiencies to better meet that mission. Although the Department will be evaluating and implementing opportunities to streamline and improve the effectiveness of programs, identifying areas where redeployed resources could better align with identified needs, and evaluating alternatives for sustainable funding, targeted one-time investments that create efficiencies will help close the level of service gap identified in the analysis.

To advance implementation of the service-based budget recommendations, the Budget includes \$45.1 million one-time (\$41.8 million General Fund and \$3.3 million bond funds) for strategic investments in equipment, technology, and process improvements to deliver more effective and efficient services with existing staff resources. These investments will implement the Governor's Executive Order N-82-20 and better allow the Department to conserve the environment and maintain biodiversity, including:

- Wetlands Management—\$9.8 million one-time (\$9 million General Fund and \$800,000 Proposition 12) to modernize the Department's water conveyance systems into managed wetlands, which will improve habitat, reduce staff maintenance costs, and buffer against climate-driven threats.
- Human Wildlife Conflict Response—\$7 million one-time General Fund to respond to increased human-wildlife conflict incidents across the state. Over 6,500 human-wildlife conflicts occur annually and is rising as communities expand into established wildlife territory and create competition for resources. To better resolve these conflicts and reduce lethal outcomes, the Department will strengthen education in local communities, update its supply of non-lethal traps and other equipment to safely capture wildlife for relocation, and purchase proven technologies to reduce conflicts.
- Access for All and Biodiversity Resiliency—\$6 million one-time (\$3.5 million General Fund and \$2.5 million Proposition 12) to support access and biodiversity resiliency across ecological reserves and wildlife areas. The Department owns and operates approximately 1.2 million acres across more than 700 properties in the state.

Recreational use of these areas is increasing dramatically, especially during the COVID-19 Pandemic. Most of these properties lack visitor amenities that the public expects when visiting state-owned open spaces, such as restroom facilities and basic signage. To protect natural biodiversity and increase equitable access, the Department will generate needed interpretative signage that highlights the ecological importance of and tribal relationships to the area, facilitate community access, and install visitor amenities within underserved communities.

- Hatchery Operations—\$7 million one-time General Fund to modernize the Department's hatchery facilities and equipment to provide greater operational reliability and improve fish survival once released into rivers.
- Vegetation Mapping—\$5.5 million one-time General Fund to generate a high-resolution vegetation classification map of nearly one million acres of the Northern California coast. The map will provide a baseline for close monitoring of changes to critical ecosystems and species, including the iconic coastal redwoods, estuaries and wetlands, all of which are vulnerable to climate change.
- Air Support to Protect Natural Resources—\$4.5 million one-time General Fund to purchase a fixed-wing aircraft to continue replacement of an aging airborne patrol fleet. This plane will monitor species populations such as whales migrating along the coastline, identify declines that could lead to drastic effects on commercial and recreational fisheries, and patrol impacts to fish and wildlife across the state.
- Offshore Patrol Vessel to Protect Marine Resources—\$4.5 million one-time General Fund to purchase a large offshore patrol vessel to continue replacement of the Department's aging patrol fleet. This replacement vessel will provide reliable protection of California's Marine Protected Areas and reduce ongoing maintenance costs.
- Fishing and Hunting Licenses Modernization—\$750,000 one-time General Fund to modernize the licensing platform for customers' ease of use, provide a mobile application to display fishing and hunting licenses, and other improvements related to licenses.

DEPARTMENT OF CONSERVATION

The Department of Conservation's California Geologic Energy Management Division (CalGEM) protects public health, safety, and the environment in its oversight of the oil, natural gas, and geothermal industries, while working to achieve the state's climate change and clean energy goals.

The Budget proposes additional resources to strengthen CalGEM's enforcement of existing laws and regulations, reduce the state's financial liability for orphaned well operations, improve transparency of data and information, and implement recent legislation.

Significant Adjustment:

- CalGEM Oversight—\$4.8 million and 26 positions phased in over three fiscal years to:
 - Increase field presence to perform regulatory inspections to protect the health and safety of those living near oil and gas wells and attendant facilities.
 - Enhance CalGEM's regulatory programs including enhanced focus on compliance through timely enforcement actions.
 - Review pipeline management plans and testing of tanks.
 - Review and approve idle well management plans to confirm there is adequate financial coverage for idle and orphaned wells.
 - Improve public transparency and data reliability.

This page intentionally blank to facilitate double-sided printing.

ENVIRONMENTAL PROTECTION

The California Environmental Protection Agency's programs promote the state's economy in a sustainable manner by reducing greenhouse gas emissions, enhancing environmental quality, and protecting public health.

The Secretary coordinates the state's regulatory programs and provides fair and consistent enforcement of environmental law. The Governor's Budget includes \$4.3 billion (\$460 million General Fund, \$3.8 billion special funds, and \$16.8 million bond funds) for programs included in this Agency.

The Administration's climate resilience efforts are referenced in the Five-Year Infrastructure Plan and Climate Change Chapter.

DEPARTMENT OF TOXIC SUBSTANCES CONTROL REFORM

Since 2019, the Department has improved its stewardship of public resources by conducting a comprehensive review of its programs and making significant improvements to the quality and timeliness of its services. However, the Department needs sustainable ongoing funding to reduce toxic chemicals, particularly in vulnerable communities. To prevent toxic contamination going forward, the Budget will accelerate progress toward the cleanup of contaminated properties. Furthermore, through the reform proposal, the Department will be able to make progress toward better and timelier permit decisions, increase enforcement against those who violate hazardous waste control laws, and compel the use of safer chemicals in consumer products.

GOVERNANCE AND FISCAL STABILITY

The Administration is committed to transparency and accountability, and the Budget proposes statutory changes and funding to establish and staff a five-member Board of Environmental Safety that will set fees through regulation, hear permit appeals, and provide strategic guidance to the Department. This will create a transparent decision-making process for all stakeholders. The Board will also employ an independent Ombudsperson who will report to the chairperson of the Board and serve as an impartial resource to the public. The Budget proposes \$3 million General Fund in 2021-22 for the Board, with costs shifting to the Department's special funds in 2022-23.

To enable the Department to meet its statutory mission, the Budget also includes statutory changes that will provide sustainable funding on an ongoing basis. The Budget includes one-time General Fund support and proposes a structure for potential future increases in the Hazardous Waste Control Account and the Toxic Substances Control Account. This sustainable funding model will enable the Department to enhance its ability to enforce hazardous waste laws, investigate and remediate contaminated sites, and more effectively direct the use of safer chemicals and manufacturing processes in the state. Although the Department has made substantial progress improving all of its programs, the remaining challenges facing the Department cannot be addressed without a sustainable funding structure. This effort will be comprised of three core elements:

- **Fee Authority**—The Budget proposes statutory changes to authorize the Board to utilize a public fee-setting process, with spending levels subject to the budget process. This will create fiscal stability for the future.
- **Hazardous Waste Control Account Fee Restructure**—Hazardous waste management fees should equitably distribute the cost of managing hazardous waste and reflect the polluter pays principle. The proposed statutory language will streamline the existing fee structure and will provide the Board with the ability to set fees through a public process. The Budget also proposes a \$22.5 million one-time General Fund backfill for this Account.
- **Toxic Substances Control Account**—The Budget proposes statutory changes that would authorize the Board to adjust the environmental fee through a public process. The Budget also proposes a \$13 million one-time General Fund backfill for this Account.

SITE CLEANUPS

In conjunction with governance and fiscal reform and to support community development and job creation, the Budget proposes \$300 million one-time General Fund to accelerate the cleanup of contaminated properties in impacted communities. This investment will be allocated using a risk-based approach founded on health-based criteria. This funding is contingent upon enactment of the Administration's governance and fiscal reform package.

Orphan sites are properties where no financially viable, potentially responsible party exists to pay for the cleanup and are not federal Superfund sites. The Department is in the process of identifying orphan sites that could be remediated in the next four years. Additionally, this proposal includes investments in potential pollution investigation and the establishment of a grant program that incentivizes development and investment in vulnerable communities. These efforts will be accomplished in partnership with communities by funding training and skills development, which will provide community members with jobs to assist with the cleanup and redevelopment of the remediated sites in their communities.

As referenced in the Housing and Homelessness Chapter, the Budget also includes \$500 million one-time General Fund for infill infrastructure grants to facilitate affordable and sustainable infill housing development on brownfield sites. Developing these sites creates an opportunity to leverage private sector resources for the cleanup of these properties.

The Budget also proposes \$31.4 million one-time General Fund for the Department to meet the state's existing commitment to clean up 3,200 residential properties with specified lead contamination levels that surround the Exide facility. Exide, a former lead-acid battery recycling company in Vernon, had been operating under an interim hazardous waste facility permit prior to 2013. The areas immediately surrounding the Exide facility were found to be contaminated with dangerously high levels of lead, extending up to 1.7 miles from the facility. In May 2015, the facility was closed. To date, the state has provided over \$251 million General Fund for residential cleanup and other costs associated with Exide.

The Administration remains committed to pursuing cost recovery from responsible parties for Exide. The Budget includes one-time funding of \$14 million General Fund, and \$2.5 million ongoing funding from the Lead-Acid Battery Cleanup Fund, for these and future cost recovery efforts.

The state continues to monitor the progress of the facility closure, which is being conducted by a trustee pursuant to a court order.

SAFE AND SUSTAINABLE PEST MANAGEMENT

To protect and enhance the health of California residents, the state's policies must accelerate the transition away from harmful pesticides while continuing to provide nutritious food through a strong agricultural economy. This transition must incorporate science; include collaboration between communities, workers, growers, and consumers; drive innovative solutions; and provide technical assistance to increase adoption of integrated pest management (IPM) practices.

To facilitate this transition, the Budget proposes to replace the current flat-fee mill assessment on pesticide sales with a risk-based tiered mill assessment, where higher toxicity pesticides are assessed a higher fee. Phased in over four years, this tiered fee will discourage the use of toxic pesticides in favor of safer, more sustainable agricultural and non-agricultural pest management practices and will fund the following multi-faceted effort to support this transition.

Significant Adjustments:

- IPM—\$20 million ongoing to expand IPM practices across California, including (1) investments in IPM research, education and extension programs to support sustainable pest management; (2) bolstering the University of California and California State University IPM programs to support grower implementation of safer alternatives to high-risk pesticides; and (3) support for other state-level IPM programs.
- Strengthened Enforcement and Air Monitoring—\$16.5 million ongoing to enhance enforcement of pesticide use laws and regulations to improve worker and community health and safety. The Budget increases funding to support local enforcement by County Agricultural Commissioners and also provides resources to increase air monitoring for pesticides, generating data to identify pesticide exposures and guide regulatory efforts.
- Community Engagement—\$1.5 million ongoing to support community engagement, particularly with pesticide-impacted disadvantaged communities, to seek input from agricultural communities and farmworkers during the transition to safer pest management practices.

CIRCULAR ECONOMY

The average Californian generates over one ton of trash per year, which produces greenhouse gas emissions, demonstrating the work the state has yet to do in creating a true circular economy that recognizes this waste as a potential economic resource to be reduced, reused, or remanufactured into new products. This gap in the state's waste and recycling system, which has endured several years of unstable international recycling markets, has been exacerbated by the challenge of the COVID-19 Pandemic. As the state focuses on economic recovery, now is the time to rethink waste as an opportunity to maximize creation of in-state jobs while combating climate change.

Modernizing the waste and recycling system requires a return to the basics of resource conservation and maximizing the value of material to be turned into new products. Re-envisioning recycling systems into a circular economy will require different strategies. For example, the state, pursuant to Chapter 395, Statutes of 2016, initiated a path to reduce organic material in landfills, which accounts for two-thirds of landfill waste and is the third largest source of methane in the state. To combat climate change, successfully implementing this organic recycling program will close the loop by recognizing the greater value of turning organic waste into new organic products while creating 2,000 permanent jobs in the state.

For other material types, the Department of Resources Recycling and Recovery (CalRecycle) oversees decades-old programs that are not designed to create a circular economy and therefore have varying degrees of success. The Budget proposes \$5 million from the Beverage Container Recycling Fund in both 2020-21 and 2021-22 and statutory changes to expand pilot programs to expand consumer redemption in communities underserved by recycling centers. The Budget also proposes ongoing funding from the Beverage Container Recycling Fund to implement Chapter 115, Statutes of 2020, requiring that plastic beverage containers contain at least 50 percent post-consumer recycled content by 2030.

In addition, CalRecycle will embark on an evaluation of existing program grants, loans, and payments to identify opportunities to better align with a circular economy approach, combat climate change, and support economic recovery. The Administration also remains supportive of extended producer responsibility policies, especially where further system redesign is needed to achieve a circular economy.

JUDICIAL BRANCH

The Judicial Branch consists of the Supreme Court, courts of appeal, trial courts, and the Judicial Council. The trial courts are funded with a combination of General Fund, county maintenance-of-effort requirements, fines, fees, and other charges. Other levels of the Judicial Branch receive most of their funding from the General Fund. The Budget includes total funding of \$4.1 billion (\$2.1 billion General Fund and \$2 billion other funds) in 2021-22 for the Judicial Branch, of which \$2.2 billion is provided to support trial court operations. The Judicial Council is responsible for managing the resources of the Judicial Branch.

Three important historical events led to the current trial court system. First, the Trial Court Funding Act of 1997 consolidated the costs of operating California's trial courts at the state level. The Act was based on the premise that state funding of court operations was necessary to provide more uniform standards and procedures, economies of scale, structural efficiency, and access for the public. Second, California voters passed a constitutional amendment in 1998 that provided for voluntary unification of the superior and municipal courts in each county into a single, countywide trial court system. By 2001, all 58 counties had voted to unify their municipal and superior court operations. Third, the Trial Court Facilities Act of 2002 transferred responsibility and ownership of court facilities from counties to the state.

The 2020 Budget Act included a \$200 million ongoing General Fund reduction for the Judicial Branch (\$176.9 million for the trial courts and \$23.1 million for the State Level Judiciary). The Judicial Branch has implemented various cost saving measures to achieve these reductions, including furloughs and employee compensation reductions,

limited court closures, operating cost reductions, and reengineering court processes to create efficiencies. Even with these reductions, the Judicial Branch has continued to adjust operations to provide Californians with access to justice.

MAINTAINING ACCESS TO JUSTICE DURING COVID-19

The Judicial Branch has had to radically change its operations to protect the public from the spread of COVID-19 while also maintaining access to justice. Actions taken by the Judicial Council and all levels of court administration include extending court deadlines, suspending jury trials, using technology to conduct proceedings remotely, and suspending evictions and foreclosures. These actions have resulted in more limited operations while the courts modified processes and procedures to adapt to the pandemic, and in some instances, resulted in periods of courtroom or courthouse closures.

These changes have delayed normal court operations. To maintain timely access to justice in the trial courts and to help courts address impacts of the disruptions caused by the pandemic, the Budget includes \$72.2 million ongoing General Fund, which represents an overall increase of 3.7 percent compared to the 2020 Budget Act. This funding will assist courts in continuing to provide fair and timely access to justice, including taking actions to continue making modifications to improve court processes. This funding will also support the courts' efforts to implement recently enacted legislation.

Self-help centers are especially critical since the pandemic has exacerbated issues accessing justice for low-income Californians. The Budget includes \$19.1 million ongoing General Fund for the trial courts to continue providing self-help services for unrepresented litigants.

The Budget also includes \$11.7 million one-time General Fund in 2020-21 for the trial courts to process the anticipated increase in unlawful detainer and small claims filings resulting from Chapter 37, Statutes of 2020 (AB 3088). AB 3088 provided relief to tenants and landlords by, among other things, delaying the date trial courts could process unlawful detainers to February 1, 2021, and allowing landlords to recover unpaid rental debt through small claims court until February 1, 2025. This will result in a significant increase in workload for the trial courts beginning in 2020-21 and additional resources are necessary to address this workload. The Administration proposes that the Legislature take action on this funding early in 2021.

PANDEMIC EARLY DISPOSITION CALENDAR PROGRAM

Due to the COVID-19 Pandemic, many courts are significantly delayed in processing criminal cases in which the defendant has been arraigned but there has been minimal progress toward case resolution through plea or trial. The Chief Justice initiated a program to provide more timely adjudication of criminal cases during the COVID-19 Pandemic, making temporary assigned judges available to conduct readiness conferences or cover matters for local trial court judges assigned to these conferences. Readiness conferences provide an opportunity to discuss potential resolutions, such as a plea bargain, before going to trial. While the program is not mandated, for courts that implement a readiness conference program, defendants would be required to appear, either through counsel or by the defendant if self-represented. Conferences could take place in person or through remote appearance by leveraging the technologies and processes implemented during the pandemic.

To build on the Chief Justice's efforts, the Administration plans to work with the Legislature and the Judicial Council to establish a Pandemic Early Disposition Calendar Program, creating an opportunity for certain defendants to be eligible for diversion. Consideration could be given to dismiss charges for defendants who have no violations or new charges while participating in a diversion program. This program is intended to maintain public safety, reduce the number of pending criminal cases within the trial courts, and provide victims and offenders more timely resolution.

REDUCING CRIMINAL FINES AND FEES FOR LOW INCOME CALIFORNIANS

Chapter 92, Statutes of 2020 (AB 1869) eliminated the ability of state and local agencies to impose certain administrative fees for criminal offenses, such as fees imposed to recover costs related to providing public defense and probation supervision, commencing July 1, 2021.

Over the past two decades, the state has substantially increased fines, fees, assessments, and surcharges levied on individuals convicted of criminal offenses to generate funding for specific state and local programs and services. The Judicial Council estimates these fines and fees generated approximately \$1.2 billion in revenue in 2019-20.

Recognizing the financial hardship these increased fines and fees have created for low-income individuals, the 2018 Budget Act included \$3.4 million General Fund for the Judicial Council to implement an eight-court pilot program to allow indigent and low-income individuals to apply online to have their fines and fees from traffic

infractions reduced in accordance with their ability to pay. Currently, six courts have implemented the pilot program, which reduces fines and fees for eligible participants by at least 50 percent and allows them to make payments over a period of time.

The Budget includes \$12.3 million General Fund in 2021-22, increasing to \$58.4 million ongoing General Fund by 2024-25, to expand this program statewide and incorporate both traffic and non-traffic infractions. The ongoing costs include \$2.7 million to implement an online application system and \$55.7 million to backfill the estimated loss in revenue to support trial court operations as a result of the penalty reductions. The Judicial Council will implement this program on a phased schedule, with several courts joining each year.

Expanding the online ability to pay program statewide provides targeted relief for low-income individuals while maintaining accountability. Furthermore, it maintains judicial discretion and uses technology to allow for the online adjudication of infractions which makes trial courts more efficient and equitable.

OTHER SIGNIFICANT ADJUSTMENTS

The Budget also includes the following for the Judicial Branch:

- Trial Court Trust Fund Revenue Backfill—\$118.3 million total General Fund to continue backfilling the Trial Court Trust Fund for a decline in revenues expected in 2021-22.
- Facility Operations and Maintenance—\$53.5 million ongoing General Fund to support maintenance, utility, and lease costs for trial court and the Courts of Appeal facilities.
- Trial Court Employee Benefit Adjustment—\$39.1 million ongoing General Fund for trial court employee health benefit and retirement costs.
- Deferred Maintenance—\$30 million one-time General Fund in 2021-22 to support deferred maintenance projects for trial courts and the Courts of Appeal.
- Trial Court Facility Modifications—\$18.9 million General Fund in 2021-22 and \$48.8 million in 2022-23 to make facility modifications in two trial courts in Orange and San Diego Counties to correct deficiencies identified by the State Fire Marshal and mitigate public safety risks for court users.
- Construction Fund Consolidation—The Budget combines the Immediate and Critical Needs Account (ICNA) and the State Court Facilities Construction Fund (SCFCF), which are the primary fund sources for the Judicial Branch facilities program. Due to

the steady decline in fine and fee revenue, both funds are currently projected to become insolvent in the next few years. Therefore, the Budget consolidates the ICNA and SCFCF to allow for the resulting fund to remain solvent in 2021-22, and for the Judicial Council to maintain existing service levels for its facilities program.

This page intentionally blank to facilitate double-sided printing.

CRIMINAL JUSTICE

DEPARTMENT OF CORRECTIONS AND REHABILITATION

The California Department of Corrections and Rehabilitation (CDCR) incarcerates people convicted of the most violent felonies, supervises those released to parole, and provides rehabilitation programs to help them reintegrate into the community with the tools to be drug-free, healthy, and employable members of society by providing education, treatment, and rehabilitative and restorative justice programs. The Budget proposes total funding of \$13.1 billion (\$12.7 billion General Fund and \$345 million other funds) for the Department in 2021-22.

The COVID-19 Pandemic has impacted every aspect of prison operations and the state has taken swift action to mitigate the spread of the virus. These actions have significantly impacted current population projections. The 2020 Budget Act projected an overall adult inmate average daily population of 122,536 in 2020-21. The average daily adult inmate population for 2020-21 is now projected to be 97,950, a decrease of 20 percent from spring projections.

Some of this decrease is attributable to suspending county intake in response to the COVID-19 Pandemic, which when resumed, will increase the population. Current projections show the adult inmate population is trending downward and is expected to decrease by another 2,626 offenders between 2020-21 and 2021-22.

In addition, beginning July 1, 2020, CDCR implemented a community supervision program to enable CDCR to increase physical distancing as well as limit the introduction and spread of COVID-19 within its facilities. Inmates are eligible if they are within 180 days of release; are not serving a current term for domestic violence, a violent crime, or are required to register as a sex offender; and do not have a risk assessment score that indicates a high risk for violence. About two-thirds of these offenders were released to Post Release Community Supervision (county probation) and one-third were released to state parole. CDCR continues to release eligible inmates within 180 days of their natural release. CDCR also previously reviewed and released offenders deemed at high risk for COVID-19 as part of case-by-case offender reviews. Similar reviews are ongoing with a focus on determinately sentenced offenders within 12 months of release. Additionally, on July 9, 2020, CDCR applied a one-time 12-week positive programming credit to all eligible inmates to recognize the impact the COVID-19 Pandemic has had on inmates' access to programs and credit earnings.

Proposition 57, the Public Safety and Rehabilitation Act of 2016, established a durable solution to end federal court oversight and create more incentives for inmates to participate in rehabilitative programs. Proposition 57 is currently estimated to reduce the average daily adult inmate population by approximately 7,300 in 2021-22 (about 3,500 less than projected in the 2020 Budget Act), and by approximately 13,000 in 2023-24 (about 500 more than projected in the 2020 Budget Act).

The 2020 Budget Act projected an overall parolee average daily population of 47,929 in 2020-21. The average daily parolee population is now projected to be 45,924 in 2021-22, a decrease of approximately four percent from spring projections.

COVID-19 UPDATE

COVID-19 continues to spread among CDCR inmates and staff statewide. In December 2020, for the first time, active inmate cases rose to over 9,000 and active staff cases rose above 2,600. All 35 institutions have had active cases at some point. As of mid-December, 103 inmates had died from COVID-19 at 17 different institutions.

As of mid-December, Division of Juvenile Justice (DJJ) facilities had 6 active ward cases (down from a peak of 56 in late July and early August) and 47 active staff cases. No wards have died from COVID-19.

CDCR has taken proactive measures to reduce the presence and spread of COVID-19 in its institutions. Among other things, CDCR has restricted inmate movement; activated gyms, dayrooms, and temporary tent facilities to create physical distancing; modified

the parole suitability hearing process to take place by video and telephone conference; restricted family visitation and provided inmates with free telephone calls and video visitation opportunities; initiated a staff screening process upon entering facilities; suspended large-scale construction projects within the secure perimeter of CDCR facilities; and suspended in-person rehabilitative programs and education classes. CDCR also delayed the Basic Correctional Officer Academy, modified the Academy's training to provide for physical distancing, and employed the California Prison Industry Authority to produce cloth face masks and hand sanitizer for inmates and staff. In November 2020, the Department also started requiring all staff, contractors and vendors to wear disposable procedure masks while on prison grounds, rather than the previously required cloth masks. The Department is providing these masks on a daily basis upon entry to the prison.

Beginning in June, CDCR began expanded employee testing for COVID-19 at its skilled nursing facilities consistent with guidance from the California Department of Public Health. This guidance includes baseline testing of all employees and separate protocols for continued testing, the frequency of which is dependent on whether an institution has an active outbreak. CDCR has also implemented expanded employee testing protocols at institutions without skilled nursing facilities. On average, on a monthly basis, CDCR conducts approximately 128,000 tests on employees and 70,000 tests on inmates. Given the significant increase in COVID-19 cases among staff and inmates, CDCR implemented weekly testing of all staff at all institutions in late November 2020. CDCR expects to continue weekly testing through the end of January 2021, or until such time that there is a significant decrease in positive cases.

CDCR began distributing vaccines to staff and inmates in its skilled nursing facilities in mid-December. CDCR and the Receiver's Office will follow state public health guidance for further distributions.

By mid-December, CDCR had spent approximately \$408.3 million during 2019-20 and 2020-21 on COVID-19 activities including staff and inmate testing, cleaning, tents, and personal protective equipment purchases. By the end of 2020-21, CDCR expects to spend up to \$723.8 million more. The Budget includes \$281.3 million one-time General Fund in 2021-22, for these COVID-19 activities and purchases. For more information, please refer to the COVID-19 Pandemic Response Chapter.

In addition, the Budget provides limited-term resources of \$51 million General Fund in 2021-22, growing to \$77.6 million through 2024-25, for increased workers' compensation costs associated with Chapter 85, Statutes of 2020 (SB 1159), which creates a rebuttable presumption that an employee's illness related to COVID-19 is an occupational injury.

PROJECT HOPE

Project Hope provides non-congregate quarantine and isolation sheltering to individuals returning to the community from California state prisons. Through Project Hope, individuals who tested positive for COVID-19 or were exposed to COVID-19 while incarcerated are able to safely finish their medically directed quarantine or isolation to help prevent disease transmission into their communities. CDCR, the California Governor's Office of Emergency Services, and the Department of General Services collaboratively provide safe transportation, non-congregate hotel accommodations, and meal services to all participants. Project Hope is a voluntary program available to both parolees and individuals releasing to Post Release Community Supervision. Project Hope does not replace existing post-incarceration transition programs managed by the state, counties, and local service providers, and participants of Project Hope remain under the jurisdiction and supervision of either state parole or county probation departments. As of December 17, 2020, Project Hope has served approximately 934 returning individuals since its inception in April 2020.

SUSPENSION OF INTAKE TO STATE PRISONS

As mentioned earlier, in late March the state halted intake and/or transfer of inmates from county jails into state prisons to reduce the risk of COVID-19 entering the state prison system. CDCR resumed intake on a limited basis in late August, although public health conditions subsequently halted intake again in late November. As public health conditions allow, CDCR plans to resume intake with continued precautions including offering testing to all inmates upon intake and instituting a mandatory 14-day quarantine period in its reception centers.

The suspension of intake has resulted in greater numbers of inmates being held in county jails. In circumstances where CDCR cannot accept the intake and/or transfer of an inmate from a county jail, the state is required to reimburse counties for holding inmates. As of December 1, 2020, the state has provided \$38.8 million General Fund, with an additional payment of \$40.4 million pending, to county sheriffs and county corrections departments for housing inmates due to the temporary stoppage of prison intake. This reflects payments for inmates held in county jails from March through November, and reimbursements will continue until such time that all inmates are transferred to state prison. Current projections suggest a total of \$163.4 million in additional reimbursement through June 30, 2021.

PRISON CAPACITY AND CLOSURES

The adult prison population has steadily declined over many years, presenting opportunities for CDCR to eliminate its reliance on contract prison capacity. CDCR terminated its final remaining contract to house inmates out of state in June 2019. In addition, CDCR terminated six of seven in-state contracts by October 2020, and the Budget reflects closing the final in-state contract correctional facility by May 2021. Due to the significant continued decline in the population, and consistent with the 2020 Budget Act, the Department plans to close Deuel Vocational Institution by September 2021, achieving savings of \$113.5 million General Fund in 2021-22, and \$150.6 million General Fund beginning in 2022-23. The Administration plans to close a second state-operated prison in 2022-23.

While CDCR's population is projected to decline over the next year, COVID-19 has presented a significant challenge for the Department. New consideration must be given to the long term use of dormitories, placements of older inmates, and the need for dedicated space to isolate inmates in the event of additional outbreaks of either COVID-19 or other airborne communicable diseases. The Department is considering long-term strategies for a safer and more resilient prison system into the future.

FOCUS ON INMATE REHABILITATION AND REENTRY

The Administration is committed to improving outcomes for incarcerated individuals and enhancing public safety by improving rehabilitation and reentry programs. The 2020 Budget Act made critical near-term investments to support this long-term goal, such as reduction of reception center processing times to allow inmates to begin participating in academic and rehabilitative programming sooner; changes to good conduct credits to provide greater incentives for inmates to engage in good conduct such as participating in work and program assignments; and establishment of a Youth Offender Rehabilitative Community at Valley State Prison to create an environment conducive to positive behavioral programming and targeted educational programs. The Budget builds upon those investments with adaptations necessary due to the COVID-19 Pandemic. In total, the Budget includes \$546.9 million General Fund for rehabilitative programs—nearly double the funding level in 2012-13.

TECHNOLOGY FOR INMATES PARTICIPATING IN ACADEMIC PROGRAMS

Access to remote rehabilitative programming is critical to providing incarcerated individuals continued programming during the COVID-19 Pandemic. Remote

programming is also an important factor in providing rehabilitation access to those individuals who may not have access to in-person training, such as those with medical conditions. The Budget includes \$23.2 million General Fund in 2021-22, and \$18 million ongoing General Fund, for information technology to enhance access to rehabilitative programming. Specifically, the proposal includes the purchase of approximately 38,000 laptop computers for use by academic program participants (such as students in basic adult education, GED, or community college courses), as well as the expansion of virtualization infrastructure, network bandwidth, and the creation of a secure online academic portal that will allow students to complete educational curriculum outside of the classroom.

STAFF DEVELOPMENT AND SUPPORT

Creating a prison environment that is safe, secure, and conducive to rehabilitation, requires a professional, well-trained workforce. Correctional officers serve an especially important role in the rehabilitation efforts of the Department. The Budget includes \$21.2 million General Fund in 2021-22, decreasing to \$16.1 million ongoing General Fund in 2024-25, to enhance staff development through new training for correctional officers. These efforts will involve repurposing the former Northern California Women's Facility into a new hands-on training facility and will focus on effective and realistic training.

INFRASTRUCTURE SUPPORT AND MODERNIZATION

The state's prison infrastructure requires investments for the safety of staff and inmates. Although the state has made significant investments in upgrading health care facilities, some core infrastructure has significantly deteriorated and improvements must be made.

ROOF REPLACEMENT

Failing prison roofs have resulted in damage to electrical systems and housing units, interruptions in rehabilitation and education programs, and mental health treatment. The Budget includes \$33.6 million General Fund over two years for roof replacement projects at California State Prison, Los Angeles County. This is part of a multi-year plan to replace aging and deteriorating roofs across the state prison system. To date, 11 institutions have received one-time funding for major roof replacement and repair projects. In addition to California State Prison, Los Angeles County, 14 institutions remain scheduled for future roof replacement and repair projects over the next 7 years.

HEALTH CARE FACILITY UPDATES AT THE CALIFORNIA REHABILITATION CENTER

Existing health care facilities at the California Rehabilitation Center are located in buildings approaching 75 years old that do not have adequate storage for medication and medical supplies, which restricts workflow and makes it difficult to maintain inmate-patient privacy. The Budget includes \$6.8 million one-time General Fund to replace damaged flooring, walls, wall-mounted air conditioning units, counters, and storage spaces in existing health care treatment areas. This project will also replace existing medication distribution windows with newer windows that are consistent with current standards and will allow for improved medication distribution. The California Rehabilitation Center is one of the older facilities in the state prison system. These upgrades are necessary to maintain this facility, which is better geographically situated to recruit staff, including health care staff.

DEFERRED MAINTENANCE

The Budget includes \$50 million one-time General Fund in 2021-22, to address the Department's highest priority deferred maintenance projects. CDCR has numerous critical maintenance projects, which have resulted in essential infrastructure systems deteriorating to the point of failure. Although the Department has made significant strides in reducing its deferred maintenance backlog in recent years, total costs of identified deferred maintenance projects are estimated at approximately \$1 billion.

CELLULAR INTERDICTION

The Department currently uses technology called the Managed Access System to block unauthorized cellular usage within its prisons. While the Department works to prevent the introduction of contraband cell phones onto prison grounds, cell phones are still located and confiscated. This system disables contraband cell phones by intercepting calls and stopping them from being completed. The Budget includes \$1.8 million ongoing General Fund to maintain the use of the current Managed Access System which would otherwise expire May 2021, with the Inmate/Ward Telephone System contract. Although the continuation of the Managed Access System results in increased costs to the state, it also results in reduced calling costs to inmates and their families when using the Inmate/Ward Telephone System.

OTHER SIGNIFICANT ADJUSTMENTS

- *Armstrong Court Compliance*—In September 2020, the U.S. District Court for the Northern District of California ordered CDCR to develop a plan within 21 days, to be

implemented in the months thereafter, to address several mandated reforms at the Richard J. Donovan Correctional Facility (RJD). These reforms include: (1) installation of security cameras throughout the prison within 90 days; (2) use of body-worn cameras within 60 days; (3) modifications of the staff complaint and disciplinary processes; and (4) increases to supervisory staffing and training. While the state has appealed this order, the Budget includes \$13.5 million General Fund in 2020-21, \$10.1 million General Fund in 2021-22, and \$6.9 million General Fund beginning in 2022-23 for these purposes. This also includes funding for the installation of security cameras on two yards at the California State Prison, Los Angeles County.

- **Increased Healthy Menu Options**—To improve health and well-being of the inmates, CDCR is implementing healthier menus within its institutions. The updated menu addresses inmates' overall healthy eating patterns and is based on the U.S. Department of Agriculture's dietary guidelines. The Budget includes \$7.5 million ongoing General Fund to support this change.
- **Transgender, Nonbinary, and Intersex Inmate Housing and Search Preferences**—The Budget includes \$2.8 million General Fund in 2021-22, declining to \$1.2 million ongoing General Fund, to develop and implement policies related to Chapter 182, Statutes of 2020 (SB 132), the Transgender Respect, Agency, and Dignity Act. SB 132 requires CDCR to house, and conduct physical searches of, transgender, nonbinary, and intersex inmates according to their gender identity and preference. Funding will be used to update data repositories with gender identity markers; process transgender, nonbinary, and intersex housing change requests; and train correctional staff on safe housing practices.

INMATE MEDICAL CARE AND MENTAL HEALTH SERVICES

The Budget continues the state's commitment to improve the Department's delivery of health care services to inmates. The Budget dedicates \$3.4 billion ongoing General Fund for health care services programs, which provide access to mental health, medical, and dental care that is consistent with the standards and scope of services appropriate within a custodial environment.

FEDERAL RECEIVERSHIP OVERSEEING PRISON MEDICAL CARE

In 2005, a federal court established a receivership to oversee prison medical care. To date, the Receiver has transitioned oversight of 19 institutions back to the state. The Budget includes \$4 million General Fund in 2021-22, increasing to \$11.6 million ongoing General Fund in 2023-24, to enhance quality management and patient safety by

providing staff to evaluate risks and implement best practices to improve the health care delivery system.

DIVISION OF JUVENILE JUSTICE REALIGNMENT

Consistent with Chapter 337, Statutes of 2020 (SB 823), the Division of Juvenile Justice (DJJ) will stop the intake of wards on June 30, 2021, with limited exceptions. The 2021-22 estimated population is expected to be 729, a reduction of 126 compared to the spring projections, reducing costs by \$10.1 million General Fund in 2021-22. The DJJ is expected to close on June 30, 2023. For more information, please refer to the Health and Human Services Chapter.

Pursuant to SB 823, and to facilitate the transition of youth offenders from state to county care, the Board of State and Community Corrections will distribute one-time funds of \$9.6 million General Fund in 2020-21, for the Regional Youth Programs and Facilities Grant Program. SB 823 also included ongoing funding for the Juvenile Justice Realignment Block Grant as follows: \$46.5 million General Fund in 2021-22, \$122.9 million in 2022-23, \$195.9 million in 2023-24, and \$212.7 million ongoing beginning in 2024-25, for county probation departments to take over responsibility for youth who will no longer go to the DJJ. County probation departments are integral to the success of the realignment of juvenile offenders from the state to counties.

LOCAL PUBLIC SAFETY AND REHABILITATION

COUNTY PROBATION DEPARTMENTS

Probation has broad responsibilities that include crime prevention, rehabilitation through community supervision, overseeing the local juvenile justice system and promoting healthy families and communities. When probation departments are successful they reduce recidivism and state prison costs, and contribute to improving outcomes for offenders.

Probation has been at the forefront of criminal justice reform and, even in the face of budget downturns, has continued to innovate and improve its approach to community safety. In recent years, probation has been tasked with increased responsibilities through juvenile and adult realignments. Probation has continually accepted and embraced these responsibilities, leading to reduced incarceration rates and improved

outcomes, as evidenced in reforms such as the California Community Corrections Performance Incentive Act of 2009 (SB 678), discussed below.

Chapter 328, Statutes of 2020 (AB 1950), provides a significant opportunity for county probation to refocus efforts and provide enhanced services earlier in the probation term to increase success and reduce recidivism. County probation departments will also now support the entire juvenile justice continuum with the implementation of SB 823.

The Budget makes an additional investment of \$50 million one-time General Fund in 2020-21 for county probation departments to support these transitions. The Administration proposes that the Legislature take action on this funding early in 2021.

These funds may be used for a broad range of services with an emphasis on keeping juveniles and adults out of the criminal justice system, moving them quickly and successfully through the system, and keeping them from reentering the system. Enhancing services in the community will enable probation to better meet the treatment and programming needs of adult and juvenile offenders, while also providing the courts confidence in probation as an alternative to incarceration.

ADULT PROBATION

In 2009, the state recognized the importance of investing in probation to reduce state prison costs with the passage of the California Community Corrections Performance Incentive Act of 2009 (SB 678). SB 678 provides performance-based funding to share General Fund savings with county probation departments that reduce or maintain low revocation rates to prison from the probation population. Based on county-reported data from calendar year 2019, the 2020 Budget Act allocated \$112.6 million General Fund to counties.

The COVID-19 Pandemic and its impacts to law enforcement and court processing resulted in significantly fewer revocations. In addition, AB 1950, which caps probation terms at one or two years will also impact revocation rates.

Since these two factors impact the current calculations in a way that has little relation to probation department performance, the Budget provides \$122.9 million ongoing General Fund to county probation departments, based on the highest payment to individual counties over the prior three fiscal years. These funds will continue to support county probation departments' efforts to reduce or maintain low revocation rates while recognizing the unprecedented impacts of the COVID-19 Pandemic and changes to

statewide probation policy. The Administration intends to revisit the performance-based formulas after trends in the probation population stabilize.

JUVENILE PROBATION

County probation departments are supporting the implementation of SB 823, which closes state facilities to juvenile offenders on June 30, 2021. In order to successfully implement this change counties and probation departments must work toward the development of appropriate placements and rehabilitative programs. The realignment of youthful offenders to the counties allows for enhanced collaboration between juvenile delinquency and dependency, but more specialized placements must be developed to rehabilitate youthful offenders and avoid adult commitments. As mentioned previously in this Chapter, the Board of State and Community Corrections is distributing \$9.6 million General Fund in 2020-21, to support facility upgrades and specialized program development and the Budget includes \$46.5 million General Fund in 2021-22, for counties to support implementation of SB 823.

POST-RELEASE COMMUNITY SUPERVISION

The Budget includes \$19.5 million one-time General Fund in 2021-22, for county probation departments to supervise the temporary increase in the average daily population of offenders on Post-Release Community Supervision as a result of the implementation of Proposition 57.

PROPOSITION 47 SAVINGS

In November 2014, voters passed Proposition 47, which requires misdemeanor rather than felony sentencing for certain property and drug crimes and permits inmates previously sentenced for these reclassified crimes to petition for resentencing. Proposition 47 requires the Department of Finance to annually estimate savings to the state resulting from the measure in the preceding fiscal year and that an equivalent amount from the General Fund be deposited into a special fund for specified purposes.

The Department of Finance currently estimates net General Fund savings of \$114.8 million, an increase of \$11.9 million over the estimated savings in 2020-21. This is attributable primarily to increased savings resulting from the end of the state's reliance on contract facilities to house prison inmates. These funds will be allocated according to the formula outlined in the initiative, which requires 65 percent be allocated for grants to public agencies to support various recidivism reduction programs (such as

mental health and substance use services), 25 percent for grants to support truancy and dropout prevention programs, and 10 percent for grants for victims' services.

COUNTY JAIL RELINQUISHMENTS

The Board of State and Community Corrections administers five financing programs for adult jail facilities in counties statewide. Since these programs commenced, several county recipients have relinquished their awards and some counties realized minor project savings that remain unspent. Approximately \$202 million is currently available for allocation. The Administration supports reallocating these bonds to purchase or modify community mental health facilities. For more information, please refer to the Housing and Homelessness and Health and Human Services Chapters.

PENAL CODE REVIEW

COMMITTEE ON REVISION TO THE PENAL CODE

The Budget includes \$494,000 ongoing General Fund for additional staffing for the Committee on Revision of the Penal Code. The Committee was established on January 1, 2020, to study and recommend changes to simplify and rationalize California's criminal laws and will produce its first set of recommendations in January 2021. The Committee's first year of work has confirmed the need for additional legal staff to address the complexity and scope of California's criminal justice system.

DEPARTMENT OF JUSTICE

As chief law officer of the state, the Attorney General has the responsibility to see that the laws of California are uniformly and adequately enforced. This responsibility is fulfilled through the diverse programs of the Department of Justice (DOJ). The Department provides legal services on behalf of the people of California; serves as legal counsel to state agencies; provides oversight, enforcement, education, and regulation of California's firearms laws; provides evaluation and analysis of physical evidence; and supports data needs of California's criminal justice community. The Budget includes total funding of approximately \$1.1 billion, including \$358 million General Fund, to support DOJ.

POLICE USE OF FORCE INVESTIGATIONS

Chapter 326, Statutes of 2020 (AB 1506), requires a state prosecutor to investigate incidents of an officer-involved shooting resulting in the death of an unarmed civilian, and makes the Attorney General the state prosecutor unless otherwise specified or named. The Budget includes \$13 million General Fund in 2021-22, increasing to \$13.5 million ongoing, to establish three teams, one in each of the northern, central, and southern regions of California, to conduct these investigations across the state. AB 1506 also requires DOJ, commencing July 1, 2023, to operate a Police Practices Division to review and make recommendations on the use of deadly force policies of law enforcement agencies. The Administration is committed to working with DOJ on the implementation of this Division in the future.

SIGNIFICANT ADJUSTMENTS

- Bureau of Forensic Services—\$16 million (\$6 million General Fund and \$10 million Fingerprint Fees Account) in 2021-22, increasing to \$28.3 million ongoing (\$18.3 million General Fund and \$10 million Fingerprint Fees Account), to backfill the continued decline in fine and fee revenues in the DNA Identification Fund. This funding will enable DOJ to continue processing forensic evidence for client counties.
- Consolidated Science Forensic Laboratory—\$6.5 million one-time General Fund for DOJ to build a new facility to expand forensic capacity and capability, and to allow California to remain on the cutting edge of forensic science and technology.
- Healthcare Rights and Access Workload—\$2.1 million ongoing Public Rights Law Enforcement Special Fund to address workload concerns in the recently established Healthcare Rights and Access Unit within the Division of Legal Services.
- Chapter 337, Statutes of 2020 (SB 823)—\$1.9 million General Fund in 2021-22, and \$1 million in 2022-23, to convene a working group to submit a plan for the replacement of the Juvenile Court and Probation Statistical System with a modern database, as part of the realignment of the Division of Juvenile Justice to the counties.
- Chapter 319, Statutes of 2020 (AB 3121)—\$1.1 million General Fund in 2021-22 and 2022-23, to support the Task Force to Study and Develop Reparation Proposals for African Americans, with a Special Consideration for African Americans Who are Descendants of Persons Enslaved in the United States.

- Chapter 292, Statutes of 2020 (AB 2847)—\$674,000 Dealers Record of Sale Special Account in 2021-22, and \$1.3 million in 2022-23, for information technology resources to update systems to track microstamp information as required by the bill.

DIGITAL TRANSFORMATION AND RESULTS-ORIENTED GOVERNMENT

Building upon the state's 2019 investment in digital innovation, the Government Operations Agency (GovOps), California Department of Technology (CDT), Office of Digital Innovation (ODI), and Department of General Services (DGS), will accelerate the digital transformation of services and how they are delivered to nearly 40 million Californians by working collaboratively with state agencies and departments to find innovative ways to adapt and deliver core government functions online while improving business processes and consumer interactions. Efforts will stabilize critical services and Information Technology (IT) infrastructure and security, modernize and improve the user experience, empower the use of data, and implement policy changes that will make government operations more efficient and effective for all Californians.

DIGITAL TRANSFORMATION

The events of 2020 highlighted the urgent need to modernize government services in an online environment. The state recognizes the need to optimize technology infrastructure and investments, foster digital services, and use data to inform decision-making. Government modernization will lead to improved and equitable decisions, services, and outcomes for Californians.

The ODI, an office within GovOps, is tasked with improving the service delivery functions of state entities, while CDT is primarily responsible for overseeing departments in their utilization of technology services and works with state entities so that new and existing services meet the needs of a modern California.

STABILIZE CRITICAL SERVICES AND IT INFRASTRUCTURE AND SECURITY

In order to transform the way individuals engage with government online, the first step is to provide a stable and secure information technology foundation. Historically, individual state departments have been responsible for the ongoing maintenance and operation of their technology systems, including scaling them to meet Californians' needs. When systems fail, departments rely on CDT to make emergency repairs. Unfortunately, reacting to an emergency when it occurs is neither helpful to the department nor the individuals reliant on the services provided. As such, the state must establish a proactive and preventative approach so its critical technology systems are resilient enough to prevent failures and recover rapidly when they do occur.

The Budget includes \$11.4 million one-time General Fund (\$9.4 million General Fund in 2022-23 and \$6.4 million ongoing General Fund) for CDT to target critical services, perform a rigorous assessment of the most vital and at-risk services, develop report cards, drive interventions and improvements, and identify key safeguards. The CDT will prioritize departments by Essential State Function as identified in the state's Continuity of Operation Plans. Focus has begun on services associated with the COVID-19 Pandemic, including those in the California Department of Public Health (CDPH), the Governor's Office of Emergency Services, and the Employment Development Department (EDD).

The Budget also includes \$20.1 million ongoing General Fund to conduct IT security assessments of state departments in an efficient and effective manner by funding these assessments up front, allowing departments the ability to use the savings from not having to reimburse CDT for the cost of the assessment, to remediate security deficiencies. This increases the speed in which security risks are resolved.

MODERNIZE AND IMPROVE THE USER EXPERIENCE

While CDT is primarily responsible for overseeing departments' utilization of technology services, including information security, project delivery and workforce development, CDT also enables the state to leverage its current investments in data and information. This creates new and innovative approaches to information sharing that provide governments, individuals, and businesses the opportunity to make decisions in the context of more information.

GovOps, CDT, ODI, and DGS will begin the next steps in modernizing and improving the way in which individuals engage with state government. Significant projects include:

- Developing a new CA.gov portal providing essential digital services in one website.
- Researching the development of a Digital ID system to be used across all state departments.
- Accepting credit card payments at all public-facing state departments.
- Migrating state department websites to CDT's Web Enterprise Platform and evaluating compliance with the Americans with Disabilities Act accessibility requirements.
- Transitioning all state forms to be signed and submitted electronically.
- Creating an all-electronic process for regulations submitted by departments to the Office of Administrative Law for approval.

The CDT's innovation efforts are complemented by ODI. The ODI was established in 2019 to focus on the end user and how the end user engages with government. The ODI puts the end user at the center of service design and uses qualitative and quantitative user research to inform everything from discovery to delivery. To date, ODI's focus has been in collaboration with CDT, managing a series of critical projects aimed at helping CDPH and EDD with COVID-19 response activities. Significant accomplishments to date include:

- Alpha.ca.gov Project—Prototyped a redesigned CA.gov website, successfully demonstrating how user research, content design, and performant technology can make services and information easy to find, easy to understand, and easy to use through a single web portal.
- COVID19.ca.gov—Created the state's public COVID-19 information web portal in collaboration with multiple state departments and agencies. The portal was built in four days using the reusable assets and tools created by the Alpha.ca.gov project. ODI updates guidance, design, and code daily, constantly iterating, making the site easier for the end user.
- EDD Strike Team—Helped prioritize problems, identify root causes, scout potential solutions and offer guidance to EDD on how to make system and operational improvements, including implementing a new identity verification and fraud

prevention system, simplifying the unemployment insurance application, and streamlining Workshare.

In addition, several departments have projects underway to add online services and improve existing systems to better serve Californians. The Department of Consumer Affairs and the Department of Alcoholic Beverage Control are making it easier to apply, renew, and pay fees for various licenses as well as adding more forms and information online. Other modernization efforts in process include making it easier to apply for and track college financial aid, bringing business forms and filings online, developing electronic health care record systems as well as updating legacy systems to be more stable and nimble. These projects will make it easier for individuals to obtain much needed information and services.

RESULTS-ORIENTED AND INCLUSIVE GOVERNMENT

The COVID-19 Pandemic has forced systemic changes to government operations and GovOps was charged with rethinking business practices including the expansion of telework strategies, reconfiguring office space, reducing leased space, and promoting flexible work schedules for employees. GovOps is also leading a government-wide effort to reduce disparities and promote equity and inclusion in the work place.

The Budget includes \$57.4 million ongoing General Fund savings to reflect operational efficiencies within state departments and agencies directed in the 2020 Budget Act through the implementation of new operational policies and practices throughout the state.

EQUITY AND INCLUSION

As part of transforming state operations, it is imperative that state processes and policies be established to serve the people of California in accessible, equitable, and inclusive ways. In September 2019, the Administration convened the California Leads Taskforce under the direction of GovOps Agency that includes the following topics: Sexual Harassment Discrimination Prevention and Response, Diversity and Inclusion, Public Safety Diversity, and Racial and Gender Pay Equity. These task forces have developed actions to create a more inclusive, respectful, and equitable workplace. The Budget includes \$290,000 ongoing General Fund to establish the state's first ever Chief Equity Officer within GovOps, which will build upon and implement the work of the California Leads Taskforce. The Chief Equity Officer will develop a uniform

framework for creating equitable policies, practices, and metrics for hiring and procurement.

Further, the Administration is collaborating with the Department of Developmental Services and Department of Rehabilitation to begin a new State Employment Initiative to employ more persons with disabilities in the state workforce. Currently, five departments are part of the pilot program to bring both awareness of state jobs and full-time employment to the disabled community.

PLAN FOR TELEWORK

At the start of the COVID-19 Pandemic, the state faced challenges with transitioning large segments of its employees to a remote work environment quickly, with as little disruption as possible to the public. Since the initial rollout of the emergency telework guidance in March 2020, GovOps and DGS have:

- Developed a new comprehensive statewide telework policy.
- Launched www.telework.govops.ca.gov as an online resource for agencies and departments to explore telework collaboration and optimization strategies.
- Promoted telework by engaging in pilot programs to expand the use of telework and serve as best practice case studies for other agencies and departments.
- Established a new statewide policy allowing the use and acceptance of e-Signatures on most standard agency and departmental forms.

State departments and agencies will continue implementing telework best practices into their operations, including identifying positions that can telework full-time or part-time in a post-pandemic environment. Agencies and departments are also encouraged to attend the California Department of Human Resources Lean Academy, which is designed to help improve processes and quality from the point of view of the customer and eliminate waste. These permanent operational changes throughout the state are expected to lead to ongoing savings for many state entities.

REDUCE AND RECONFIGURE OFFICE SPACES

As a result of an expected increase in telework over the long-term, DGS is evaluating the state's portfolio of leases to determine which agencies and departments may be able to reduce the use of state space. Departments and agencies are also looking for opportunities to reconfigure their workspaces to include additional meeting rooms and hoteling space that will reduce the state's overall footprint. Reducing space decreases

not only the lease costs but also energy costs. Departments and agencies are continuing to work with DGS on potential restacking opportunities in state-owned buildings and leased properties. Current efforts include:

- The Natural Resources Agency is leveraging ongoing telework to reduce its space needs upon relocation to their new headquarters building in August 2021. The new headquarters building will accommodate more staff with less space.
- DGS is analyzing its own lease space needs, freeing up space to relocate an additional department into its facilities, thereby resulting in rent savings to DGS.
- The Department of FI\$Cal, as part of a telework pilot program, is relinquishing much of its leased office space as they transition most staff to permanent telework resulting in approximately \$1 million in ongoing savings.
- The California Department of Tax and Fee Administration is reviewing with DGS its building project to identify efficiencies due to increased permanent telework amongst its staff.

REDUCE TRAVEL AND FLEET COSTS

With the successful implementation of virtual meeting tools and the planned expanded use of telework into the future, the amount of travel and fleet usage by state departments and agencies will decline. Most state entities have now successfully implemented online tools into their operations that allow them to virtually conduct meetings and collaborate on projects and other critical functions. GovOps in collaboration with DGS is working on the following statewide travel and fleet cost reduction strategies that complement the changing work environment for state departments and agencies while also achieving operational savings:

- Directing departments and agencies to reduce statewide travel costs by utilizing video conferencing for meetings or trainings, where possible, and eliminate unnecessary travel.
- Updating existing policy and developing a new technology solution to default to the lowest logical airfare price when making reservations through the state's travel system. This will reduce ticket costs by up to 60 percent.
- Establishing a statewide policy on installation and utilization of Telematics devices (a mini GPS device that tracks distance, time, location, speed, etc.) for state vehicles, which when fully implemented, will better assist the state in managing its fleet, resulting in reduced fuel and maintenance costs, and minimizing accidents.

- Developing a plan to evaluate state fleet home storage permits.

REDESIGN PROCUREMENT PROCESSES

The state needs to leverage its buying power as a force for economic recovery and equity, while also achieving better outcomes. The state is transforming its procurement processes to improve the experience for both the vendor community and state entities. This means framing procurements as challenges and statements of need instead of being prescriptive about solutions. Streamlining and simplifying the procurement lifecycle will also help level the playing field and open up state contracts to a broader diversity of firms, including small businesses. Procuring from small businesses creates and sustains jobs that strengthen the economy. DGS will implement and educate departments on a Small Business First Policy and increase outreach for California's minority-owned businesses.

Technology procurement redesign starts with a deep analysis of technology spending to identify opportunities for shared services and scale discounts. On the project delivery side, the state will no longer pursue large “rip and replace” capital IT projects. Instead, it is adopting a modular and iterative approach, where functionality is built and released in smaller projects and in close collaboration with the end users.

EMPOWER THE USE OF DATA

In order to effectively and efficiently provide critical services in a user-friendly way, the state is improving the use of its data. To effectively provide services, especially to the most vulnerable residents, the state needs to be able to evaluate what works and what does not through robust use of data and evidence. GovOps recently published a Statewide Data Strategy that will allow the state to develop the infrastructure, processes, and people to manage, access, and use data efficiently, effectively, securely, and responsibly. The Budget includes \$558,000 ongoing General Fund for the state's Chief Data Officer to implement the Statewide Data Strategy.

STATE OPERATIONS STRATEGIC PLANNING

To guide the state into a results-oriented operational environment, GovOps will facilitate the development of a multi-year strategic plan to transform state government. This transformation effort will begin with establishing a set of cross governmental goals that create a more resilient and responsive state government. This will be a first of its kind statewide strategic plan focused solely on state operations. The GovOps Center for Government Excellence and Transformation will assist this effort by weaving together

earlier and new initiatives into a delivery strategy that builds the capacity to transform government for the modern era and measures the outcomes of its efforts.

LABOR AND WORKFORCE DEVELOPMENT

LABOR AND WORKFORCE DEVELOPMENT

The California Labor and Workforce Development Agency (Labor Agency) serves California workers and businesses by improving access to employment, education and training programs in connection with employers' need for talent, enforcing California labor laws to ensure workers are protected and employers compete on a level playing field, and administering employment-related benefits that promote equity throughout the state.

The COVID-19 Pandemic has had devastating impacts on California's workers, disproportionately impacting low-wage earners, and businesses. California's unemployment rate increased from a record low of 3.9 percent in February 2020 to a record high of 16.4 percent in April and May. The COVID-19 Pandemic forced dramatic downturns in many industries and almost complete shutdowns in others. Almost half of all leisure and hospitality workers lost their jobs, while higher wage sectors such as professional and business services largely shifted to working from home.

As a result of the COVID-19 Pandemic, the federal government enacted a stimulus package in spring 2020 to expand and increase unemployment insurance benefits, including the creation of a new program to provide benefits to individuals who traditionally would not have been eligible for regular unemployment. The federal government also provided expanded paid sick and medical leave to certain workers

who were unable to work as a result of becoming ill from COVID-19 or self-quarantining.

EMPLOYMENT DEVELOPMENT DEPARTMENT

The Employment Development Department (EDD) administers the state's Unemployment Insurance (UI), Disability Insurance, and Paid Family Leave programs. EDD also provides a range of employment and training services in partnership with state and local agencies and organizations throughout California connecting employers with job seekers.

UNPRECEDENTED UNEMPLOYMENT RATES

As many businesses began to shut down in March, UI claims spiked. The immediate surge forced EDD to make adjustments to its approach and processes while simultaneously transitioning many employees to a telework environment. To address the overwhelming number of applications, EDD immediately redirected staff, extended traditional work hours, adopted operational and technological changes to gain efficiencies and maximize capacity, and began to hire and train additional UI claims processors. EDD recruited the assistance of other state departments, resulting in hundreds of state employees trained to assist on both a limited and long-term basis. EDD also extended its call center hours and contracted with vendors to increase customer service capacity to handle the high volume of incoming inquiries.

While EDD was significantly challenged by the surge in UI claims as a result of the COVID-19 Pandemic, it was also hampered by a decades-old technology system that made coding any program changes extremely difficult, cumbersome, and slow.

EMPLOYMENT DEVELOPMENT DEPARTMENT STRIKE TEAM

Despite EDD's efforts, the backlog of UI claims continued to grow. In late July, the Governor announced the creation of an EDD Strike Team tasked to create a blueprint for improvements and modernization of EDD's business processes to more efficiently process UI claim applications and improve the customer experience. Outlined in their September report, the EDD Strike Team made 100 consolidated recommendations; EDD is anticipated to have completed half of them by year-end and developed timelines for completion of the remaining recommendations. Most notably, EDD has taken steps to address the top four recommendations, as follows:

- Develop dashboards that measure daily the different UI claims process.

- Procure and deploy an identification verification solution—ID.me to increase security and reduce processing times.
- Adopt and implement a plan to reduce the substantial backlog of UI claims.
- Complete the deployment of the document upload software for UI applicants.

MITIGATING FRAUD

The pandemic and surge in claims not only created a backlog and overwhelming workload for EDD: as in many other states, opportunists took advantage of the crisis through identity theft and exploiting newly established federal UI benefits, in particular the Pandemic Unemployment Assistance (PUA) program, which had a less stringent verification process than the base UI program. After a spike in PUA claims in June and July, EDD took action to halt the automatic backdating of incoming PUA claims in early September and implemented a front-end technology application, known as ID.me, to assist with identity verification of users and to authenticate registrants prior to filing benefit claims. These efforts have significantly reduced the fraudulent claims and the Governor has formed a taskforce led by the Governor's Office of Emergency Services to coordinate with federal, state and local law enforcement entities to identify, investigate, and prosecute fraudulent activity within the UI system. Further, EDD is continuing to identify systems and assess tools that will help to further detect fraud and prevent fraudulent claims.

UNEMPLOYMENT INSURANCE TRUST FUND

The federal government allowed states to borrow from the federal UI trust fund with no interest through 2020 (the recent federal COVID-19 relief bill extends this to March 14, 2021). However, beyond this date, states will owe interest on any remaining balance. EDD estimates California will have a \$21.5 billion UI Trust Fund deficit as of the end of 2020, rising to \$48.3 billion by the end of 2021. The projected deficit will surpass borrowing from the Great Recession, when California borrowed over \$65 billion in loans and paid \$1.4 billion in interest from 2011-2018. At its highest point, the state owed \$11 billion in 2011.

The Budget includes \$555 million one-time General Fund for the anticipated interest payment (accrued interest for six months) due in September 2021. Federal law requires interest payments to be made from state funds annually until the UI loan principal is repaid. With the recently enacted federal COVID-19 relief bill, interest will be waived through March 14, 2021; however, the anticipated loan interest repayment estimates do not reflect this relief and will be updated at the May Revision.

DEPARTMENT OF INDUSTRIAL RELATIONS

The Department of Industrial Relations (DIR) protects and improves working conditions by administering and enforcing laws related to wages, workplace safety and health, retaliation, and workers' compensation benefits. The department's Division of Occupational Safety and Health, better known as Cal/OSHA, enforces workplace safety laws by investigating workplace hazards and health and safety violations.

PROTECTING WORKERS IN A PANDEMIC, AND BEYOND

The COVID-19 Pandemic has placed unprecedented strain on DIR's resources and workforce. DIR has accelerated hiring throughout the Department, and in Cal/OSHA specifically, to fill the high number of existing vacancies. Newly appointed leadership has overhauled hiring protocols in coordination with California Department of Human Resources, built a pipeline of potential hires, and placed qualified inspectors and staff in all roles across the Department. These reforms aggressively target DIR's goals of filling existing vacancies by summer 2021.

SIGNIFICANT ADJUSTMENTS:

- The Budget includes language to allow DIR to increase resources mid-year by up to \$14.4 million and 70 positions for Cal/OSHA to hire additional workplace safety inspectors when the Department meets its hiring goals.
- The Budget includes \$8.6 million and 43 positions to implement and enforce recently enacted legislation that makes it easier for first responders, health care workers, and people who contract COVID-19 due to an outbreak at a workplace to access necessary workers' compensation benefits. Additional resources allow DIR to investigate workplaces that violate COVID-19 specific guidelines and regulate businesses for adequate personal protective equipment stockpiles for future crises.

WORKFORCE DEVELOPMENT BOARD

Getting Californians back to work is key to California's economic recovery. As noted above, some sectors have been hit harder by the COVID-19 Pandemic and may not recover. These workers will require retraining and learning new marketable skills. The California Workforce Development Board (Board) is in a position to offer support to this group. The Board invests in partnerships to generate greater economic and racial

equity, economic competitiveness, and opportunities to maximize the contributions of diverse communities. The Board's efforts also prioritize combating climate change. Through the High Road Training Partnership (H RTP) workforce development strategy, the Board builds regional partnerships among workers, employers, community-based organizations, and training institutions to meet industry needs and develop pathways to good quality jobs. The Budget proposes \$25 million one-time General Fund as part of an early action package to expand the H RTP model in several specified industry sectors.

The Budget also includes \$407 million federal trust fund in 2020-21, to continue Workforce Innovation Opportunity Act (WIOA) training and apprenticeship services programs for adult, youth, and dislocated workers. This includes a 15-percent state discretionary allocation, for statewide workforce activities that support innovation and targeted programs for veterans, English Language Learners and people with disabilities. These workforce activities also include the Regional Workforce Accelerator program to develop equitable strategies to improve employment outcomes for disadvantaged workers, with a focus on immigrant communities, homeless individuals, and workers displaced by the COVID-19 Pandemic. The WIOA discretionary funding also supports CalAssist, an innovative effort to utilize technology to better connect the unemployed across programs—e.g., UI and Department of Social Services program beneficiaries—to the benefits, employment, and support programs in their area through automatic matching.

The state will also be partnering on a jobs platform that seeks to democratize job searches by connecting job seekers, who can learn specific skills, with companies looking to hire workers with these skills while closing opportunity gaps.

FUTURE OF WORK COMMISSION

In addition, the Governor's Future of Work Commission was established to study and provide recommendations to California leaders to support inclusive, long-term economic growth and prosperity for all Californians, starting with workers and their families. The Commission is made up of a broad cross-section of leaders representing employers, unions, workers in low-wage industries, education, technology, venture capital and government. After a series of convenings, the Commission plans to issue a report in January 2021 that discusses the impacts of technology on workers, employers, jobs and society; methods of promoting better job quality, wages, and working conditions; worker safety net protections; and workforce training for jobs of the future.

DEPARTMENT OF BETTER JOBS AND HIGHER WAGES

In light of the projected changes to the workforce brought about by the COVID-19 Pandemic, California must reevaluate how it administers its training and apprenticeship programs, allowing its Labor Agency departments to work more efficiently to reduce the impact to employers while increasing benefits to the workers it supports. Historically, the state has created workforce programs in various entities in response to specific needs and available funding. This has resulted in a fragmented workforce system and programs disbursed in various state entities. However, as rapid advancements in technology, automation, and artificial intelligence reshape the economy and the nature of work, more needs to be done to promote high-quality jobs and economic security for workers, families, and communities. Aligning fragmented workforce programs is a necessary component of these efforts.

The Budget proposes a new Department of Better Jobs and Higher Wages and statutory changes to consolidate the workforce functions currently spread across the Labor and Workforce Development Agency. The Department will be comprised of the California Workforce Development Board, the Employment Training Panel, and Workforce Services Branch and Labor Market Information Division, which are currently in the Employment Development Department, and the Division of Apprenticeship Standards currently in the Department of Industrial Relations.

TRANSPORTATION

Job creation is foundational to the state's recovery from the significant impacts of the COVID-19 Pandemic. The Department of Transportation (Caltrans) currently estimates that approximately 11,000 jobs are created for every billion dollars spent on highway infrastructure. The California Transportation Commission allocated \$22 billion for more than 1,200 projects in 2020, which will create thousands of jobs and spur economic recovery. The projects funded will support a safe, sustainable state transportation system that reduces congestion, improves the environment, and facilitates job creation and economic development. Nearly 40 percent of the funds approved by the Commission during the past year come from the Road Repair and Accountability Act of 2017, enacted by Chapter 5, Statutes of 2017 (SB 1), and the Commission estimates that its project allocations over the past three years from all state and federal sources have generated 350,000 jobs.

The Budget continues to support job creation by including total funding of \$20.6 billion for all departments and programs administered within the California State Transportation Agency. The majority of this funding supports a range of projects to repair and improve the state's transportation infrastructure. In addition, over \$3 billion in fuel excise tax revenues goes to cities and counties for local streets and roads. While this project funding benefits the state's travelling public, it is also a major driver of employment and economic stimulus.

DEPARTMENT OF TRANSPORTATION INVESTMENTS AND JOB CREATION

The repair, maintenance, and efficient operation of the state's transportation system are vital to California's economic growth and recovery. Following several decades of state and local transportation funding falling dramatically below the levels needed to maintain the system, the Legislature passed SB 1, which provided stable, ongoing, long-term funding for both state and local transportation infrastructure priorities. In the years since, Caltrans has moved forward with a number of projects that continue to create jobs.

The COVID-19 Pandemic has led to dramatic reductions in travel across the country and the state. As a result, the fuel excise tax revenues used to fund transportation projects, while still growing moderately, are expected to be lower than pre-pandemic forecasts by a total of \$1.5 billion through 2024-25. As the Administration continues to prioritize economic recovery and investments in California's transportation infrastructure, Caltrans has used its share of the additional SB 1 revenues to accelerate projects and support creation of new jobs in the transportation sector. The Budget maintains sufficient planning and engineering staffing levels to continue developing and designing previously programmed projects. Caltrans plans to award all of the projects it currently has programmed for construction in the coming year, and this project development work will prepare for additional federal stimulus funding as it becomes available. The recently enacted federal COVID-19 relief bill provides \$10 billion for highway projects, of which California is likely to receive approximately \$900 million. When combined with the more than \$500 million California received in the redistribution of federal funding that went unused in other states, California is on track to move forward with all planned projects.

Caltrans continues to make progress on the commitments made in SB 1, which invests an additional \$5.4 billion annually over the next decade to fix California's transportation system. In the three years since the passage of SB 1, Caltrans has improved the condition of 6,400 lane miles of highway pavement in California, exceeding projections. In the same time period, Caltrans has repaired 635 bridges, which reflects an increase of almost 300 bridges over what would have been possible without the funding provided by SB 1. For the four-year period from 2020-21 through 2023-24, \$17.4 billion is programmed for new and ongoing state highway repair and rehabilitation projects in the State Highway Operations and Protection Program (SHOPP). SB 1 has increased available SHOPP funding capacity by nearly \$2 billion annually since 2018-19.

Over this same four-year period, \$2.4 billion will be available for the State Transportation Improvement Program, which provides funding for future multi-modal transportation improvements throughout California. This program supports the implementation of regional Sustainable Community Strategies (75 percent), as well as interregional travel (25 percent). An additional \$1 billion to address traffic congestion, \$900 million to provide projects that support walking and biking, and \$800 million for partnerships with local transportation agencies are also included during this period. Transportation projects will continue to be a strong source of job creation in the state.

HIGH-SPEED RAIL AND JOB CREATION

The state's High-Speed Rail project is another important job creator. The High-Speed Rail Authority continues to construct the Central Valley segment to provide electrified High-Speed Rail from Merced to Bakersfield with Proposition 1A bonds, federal funds, and 25 percent of the continuously appropriated Cap and Trade auction proceeds. The Authority recently announced it has passed the milestone of more than 5,000 construction jobs added to the Central Valley project, and the state has committed \$1.1 billion to locally-sponsored projects in northern and southern California that will improve local rail service and benefit High-Speed Rail when the system is connected to those areas.

ADDRESSING CLIMATE CHANGE

As the state continues to invest in the road maintenance and repairs identified above, it is doing so in ways that are resilient in the face of climate change. The California State Transportation Agency continues to address the impacts of the transportation sector on climate change and greenhouse gas emissions, pursuant to the goals and requirements in Executive Orders N-19-19 and N-79-20. The State Transportation Agency is directed to leverage over \$5 billion in annual state transportation spending for construction, operations, and maintenance to help reverse the trend of increased fuel consumption and reduce greenhouse gas emissions associated with the transportation sector.

The Agency will work collaboratively with other state departments and agencies to identify near term actions and investment strategies and to improve clean transportation and sustainable freight and transit options. Currently, the Agency is working with Caltrans, the California Transportation Commission, the Department of Finance, and other state agencies to develop the Climate Action Plan for Transportation Infrastructure (CAPTI) by July 15, 2021. The CAPTI will identify near-term

actions and investment strategies to leverage existing state transportation funds to help reverse the trend of increased fuel consumption and reduce greenhouse gas emissions from the transportation sector, while continuing the SB 1 commitment to a "fix-it-first" approach to our transportation system. Specifically, the CAPTI will (1) build towards an integrated, statewide rail and transit network, (2) support bicycle, pedestrian, and micro-mobility options, (3) support the deployment of light, medium, and heavy-duty zero-emission vehicle infrastructure, and (4) support innovative solutions to congestion designed to encourage people to shift from cars to other modes of transportation. The CAPTI will identify the actions necessary to change the state's transportation project planning and programming to reach California's climate change goals.

Investment in public transportation and intercity rail will continue to be a key component of the state's resilience in the face of climate change. Public transit and intercity rail services provide essential transportation to Californians, however ridership has been deeply impacted during the COVID-19 Pandemic. This has resulted in significant financial hardship for these entities. In April, the California State Transportation Agency awarded \$500 million in Transit and Intercity Rail Capital Program grants to support transit agencies' long-term, transformative capital projects to be completed in the years to come and aid in economic recovery. The federal CARES Act provided nearly \$3.7 billion in funding directly to local transit agencies, with another \$95 million available through Caltrans for rural transit and intercity bus services. However, many agencies furloughed workers and curtailed service due to significant reductions in revenues and higher expenses related to serving essential workers and other travelers during the COVID-19 Pandemic.

While transit agency budgets have been strained, the Budget continues to address the limited mobility options throughout the state by including nearly \$1.3 billion to support transit and rail—including \$667 million in State Transit Assistance, \$487 million for the Transit and Intercity Rail Capital Program, and \$107 million for the Low Carbon Transit Operations Program. To assist transit agencies and support economic recovery, the Administration continues to quickly allocate CARES Act funding, expedite rural distributions, and work with the federal government to obtain ongoing federal support. The recent federal COVID-19 relief bill is expected to provide more than \$2 billion in additional funding directly to local transit agencies. In addition, the Administration is recommending regulatory and reporting relief related to the Transportation Development Act on a permanent basis, allowing agencies to plan with more certainty and flexibility for the expenditure of state transit resources. These efforts will allow transit agencies to prevent additional furloughs and service reductions, while providing resource certainty that will make planning for recovery and rehiring of workers more

certain. The Administration is also supporting future cost savings and ridership increases for transit and rail systems through its support of contactless payments across California through the California Integrated Mobility Program at Caltrans.

TRANSFORMATIONS AT THE DEPARTMENT OF MOTOR VEHICLES (DMV)

Prior to the COVID-19 Pandemic, the DMV began implementing more streamlined processes to make the customer experience more efficient in anticipation of the federal REAL ID deadline of October 2020, including launching a redesigned, responsive website and adding credit card kiosks in some field offices. However, the COVID-19 Pandemic forced all DMV field offices to temporarily close from late March through early May for health and safety concerns. The DMV has continuously adjusted its operations to address changing health and safety challenges caused by the pandemic. This has included expediting online modernization processes, adjusting driver's license renewal requirements to reduce office crowds, periodically suspending driving tests, providing personal protective equipment for staff, initiating teleworking and new communications alternatives, and providing media notifications about pandemic-related changes to DMV processes and protocols.

While DMV offices are now open to serve the public, the DMV continues to encourage customers to use its online services, expanded virtual services, and other service channels to complete transactions, including eligible driver's license and vehicle registration renewals. In recent months, the DMV has had to upgrade its technology to transform many of its systems and processes, including simplifying authentication and account creation for online services, operationalizing a virtual field office, enabling new and expanded online services for web and mobile devices, and expanding credit card and mobile wallet payment options to all DMV offices.

The federal deadline for obtaining a REAL ID compliant driver's license or identification card, or other federally accepted document, to board domestic flights or enter secure federal facilities has been extended to October 2021. The Budget includes approximately \$186 million, including \$152 million one-time for up to more than 1,300 temporary positions to address REAL ID demands prior to the enforcement date, and \$34 million ongoing for 258 positions to continue a number of operational improvements. The DMV will be able to address the REAL ID demand with fewer positions than in recent years, due largely to operational improvements such as

TRANSPORTATION

updated digital platforms and improved online services, which have created a more customer-friendly experience while reducing transaction time.

GENERAL GOVERNMENT AND STATEWIDE ISSUES

This chapter describes items in the Budget that are statewide issues or related to various departments.

BROADBAND

Universal access to high-speed Internet is critical to the state's economy, education, and basic health and well-being. The COVID-19 Pandemic has underscored the need for all Californians to have a robust connection that supports distance learning, telework, telehealth, and everyday needs. Long-standing inequities in Internet availability, affordability, and quality have persisted for too long.

California's connectivity needs and challenges are immense. More Californians are disconnected than any other state; more than 673,000 households do not have high-speed broadband connection. A full 33 percent of rural households in the state have no high-speed broadband. Tribal lands are also disproportionately impacted, with 24 percent of homes without access.

Even for those with an available connection, broadband service can still be out of reach because it is unaffordable. Hidden fees and expensive devices can make access unattainable. An estimated 31 percent of Californians with Internet access have not adopted broadband at benchmark speeds. While 1.6 million Californians subscribe

to the state's low-income subsidy program—the California LifeLine Program—this program does not provide sufficient service to support teleworking or distance learning. The state's largest Internet Service Providers (ISPs) offer reduced-cost programs for low-income individuals, but subscribership is limited, to only about 500,000 users. These programs do not meet the needs of the estimated 4.7 million Californians who live in poverty.

California will meet these challenges with a coordinated state effort based on key actions over the next five years to provide every Californian a reliable and affordable connection. To be effective, there must be collaboration between state, federal, and local governments, regional agencies, Native American tribes, the private sector, and members of the public.

In late 2019, the Governor launched the Broadband for All initiative, and issued Executive Order N-73-20 in August to mobilize state agencies and resources to bridge the Digital Divide and start the California Broadband Action Plan development process. The Plan provides a blueprint to guide coordinated actions to put California on a path toward complete broadband availability, reliability, and affordability. The Plan, adopted in December, lays out three main goals: that all Californians have access to high-performance broadband at home, that all Californians can afford broadband and the devices necessary to access the Internet, and that all Californians can access training and support to enable digital inclusion.

These actions carry out the recommendations of the Final Report of the Co-Chairs of the Governor's Task Force on Business and Jobs Recovery to continue efforts to close the Digital Divide and promote telemedicine.

It is essential that California take future steps to support the expansion of broadband infrastructure, improve and restructure the state's existing Universal Service programs to support broadband subsidies, and address inequities in how these programs are funded. California must make broadband service affordable by eliminating hidden fees on customers' bills and safeguarding consumer protection.

Finally, local governments and regional agencies must be supported in identifying gaps in broadband availability and improving broadband infrastructure within their jurisdictions.

These changes will allow all Californians to participate in the state's economic recovery and growth.

EMPLOYEE COMPENSATION AND COLLECTIVE BARGAINING

As a result of the COVID-19 Recession, and absent the receipt of additional federal funds, reductions in state employee compensation costs were necessary to balance the 2020 Budget Act. At the 2020 May Revision, declining revenues and fiscal uncertainty required difficult budget reductions, including the state asking employees through collective bargaining to make needed adjustments. All 21 bargaining units immediately came to the table and successfully reached agreements to achieve the necessary savings through the Personal Leave Program (PLP) 2020. As part of the PLP 2020 agreements, 19 of the 21 bargaining units agreed to continue the state employee compensation reductions through the 2021-22 fiscal year.

Although fiscal risk remains high, the revenue picture has improved. Given the updated revenue projections and the scope of the Budget, employee compensation reductions may not be necessary during the 2021-22 fiscal year. Accordingly, the California Department of Human Resources (CalHR) anticipates inviting bargaining units through collective bargaining to modify the side letter agreements that extended the PLP 2020 through the 2021-22 fiscal year immediately following the May Revision.

The Budget includes \$42.1 million ongoing (\$29.5 million ongoing General Fund) for increases related to minimum wage changes in Chapter 4, Statutes of 2016 (SB 3), 2022 calendar year increases in health care and dental premiums and enrollment for active state employees, and savings related to health affordability payments for several bargaining units.

Collective bargaining negotiations will continue with three bargaining units representing attorneys and administrative law judges, scientists, and health and social services employees, whose contracts expired in July 2020. Bargaining will commence in Spring 2021 with two bargaining units representing firefighters, and craft and maintenance employees, whose contracts expire in Summer 2021.

CHILDCARE BARGAINING

In July, Child Care Providers United (CCPU) was certified by the Public Employment Relations Board as the certified provider organization for the state's family childcare providers to act as the representative to meet and negotiate with the state. Although family childcare providers are not state or public employees, CalHR is the Governor's designee to meet and confer regarding matters within the scope of representation. As such, the state is committed to collective bargaining with CCPU, which commenced in

December 2020. See the Health and Human Services Chapter for more information on childcare.

PAYING DOWN UNFUNDED PENSION LIABILITIES

The long-term stability of the state's retirement benefits depends on reducing the state's \$167.2 billion unfunded pension liability. Recent state actions to address those liabilities include the reform of public pension law under the Public Employees' Pension Reform Act of 2013 (PEPRA) and the implementation of a funding strategy to pay down the California State Teachers' Retirement Systems (CalSTRS) unfunded liability. These efforts, in tandem with nearly \$10.2 billion in additional pension payments during 2017-18 through 2020-21, and on top of required annual payments to both the California Public Employees' Retirement Systems (CalPERS) and CalSTRS, have placed the state in a better fiscal position to provide retirement security for government workers while allowing short-term flexibility to respond to the fiscal pressures of the COVID-19 Pandemic and Recession.

STATE EMPLOYEES' RETIREMENT CONTRIBUTIONS

The Budget includes \$5.5 billion one-time (\$3 billion General Fund) for the statutorily required annual state contribution to CalPERS for state pension costs. This is a \$115 million overall net decrease as compared to 2020-21, resulting from reduced employer contribution rates due to the application of a \$2.5 billion pension payment to the state's unfunded liabilities over 2019-20 to 2021-22, as authorized by Chapter 16, Statutes of 2020 (AB 84), and the payroll impact of the 2020 PLP. Included in these contributions are \$682 million one-time General Fund for California State University retirement costs.

Additionally, the Budget includes \$1.5 billion in one-time Proposition 2 debt repayment funding in 2021-22 to further reduce the state's CalPERS unfunded liability. This will result in up to \$3.5 billion in additional estimated savings to the state over the next three decades. Based on current revenue projections, an additional \$4.1 billion in Proposition 2 funding would be paid to CalPERS over the remaining forecast period (2022-23 to 2024-25), depending on the availability of Proposition 2 debt funding.

TEACHERS' RETIREMENT CONTRIBUTIONS

The Budget includes \$3.9 billion one-time General Fund for the statutorily required annual state contribution to CalSTRS. This is a roughly \$430 million increase as compared to 2020-21 due to payroll growth and the anticipated decision by the Teachers' Retirement Board to increase the state contribution rate, as permitted by statute. This contribution amount includes a \$173 million payment for the CalSTRS Defined Benefit Program to allow the funding plan to stay on track to be fully funded by 2046.

In addition to the state's required contributions, the Budget includes a \$410 million one-time Proposition 2 supplemental pension payment to be paid to CalSTRS in 2021-22 toward the state's share of the CalSTRS Defined Benefit Program unfunded liability. This payment is estimated to result in \$982 million net savings to the state through 2045-46. An additional \$602 million in Proposition 2 funding is estimated to be paid to CalSTRS over the remaining forecast period based on the availability of those funds.

STATE HEALTH CARE BENEFITS

The state is projected to spend \$6.8 billion ongoing on health care benefits in 2021-22 for more than 850,000 state employees, retirees, and their family members. This includes \$2.8 billion for retiree health care benefits for 2021-22, which has grown by 74 percent compared to what the state paid in 2012-13 (\$1.6 billion).

Through the collective bargaining process, the state's 21 employee bargaining units agreed to prefund retiree health benefits. Additionally, as determined annually by CalHR, related excluded and exempt employees also prefund retiree health benefits. As a result, more than \$3.2 billion is currently set aside in the prefunding trust fund to pay for future retiree health benefits, which has an estimated \$91.9 billion unfunded liability to be paid down by 2046. By the end of 2020-21, the trust fund balance will approach \$4.1 billion in assets.

The Budget includes \$310 million one-time Proposition 2 funding for the employer's share of General Fund prefunding contributions and an additional \$616 million one-time Proposition 2 funding to help reach full funding for retiree health benefits by 2046. Because employee prefunding contributions are suspended in 2020-21 due to the PLP 2020, \$616 million one-time will be provided by the state employer on behalf of employees, based on the actuarial liability for each bargaining unit.

The State Retirement and Health Care Contributions Figure provides a historical overview of contributions to CalPERS, CalSTRS, the Judges' Retirement System (JRS), the Judges' Retirement System II (JRS II), and the Legislators' Retirement System (LRS) for pension and health care benefits.

2019-20	5,946	716	3,323	242	91	1	3,371	1,844	326	562
2020-21	4,925	680	3,428 ^{4/}	225	86	1	3,665	2,023	357	600
2021-22 ^{9/}	4,808	682	3,858	193	86	1	4,045	2,350	413	1,292 ^{10/}

^{1/} The chart does not include contributions for University of California pension or retiree health care costs.

^{2/} The chart does not reflect the following pension payments: \$6 billion supplemental payment to CalPERS in 2017-18 authorized by Chapter 50, Statutes of 2017 (SB 84), additional payments to CalPERS and CalSTRS authorized in Chapter 33, Statutes of 2019 (SB 90), and Chapter 859, Statutes of 2019 (AB 118), and Proposition 2 payments to CalPERS and CalSTRS proposed in the 2021 Governor's Budget.

^{3/} In addition to the Executive Branch, this chart includes Judicial and Legislative Branch employees. Contributions for judges and elected officials are included in JRS, JRS II, and LRS. Amounts displayed in the CalPERS column include statewide contributions to the five CalPERS state plans, including contributions from employers that are not included in the annual Budget Act.

^{4/} As part of the 2020 Budget Act, the Teachers' Retirement Board's statutory authority to adjust the state contribution rate for fiscal year 2020-21 was suspended. The amount shown excludes the additional \$297 million in supplemental pension payment from Proposition 2 debt payment funding authorized in the Budget.

^{5/} The state continues to make employer contributions to the Legislators' Retirement System. CalPERS reported the estimated 2020-21 contribution amount is \$84,308.

^{6/} These amounts include health, dental, and vision contributions for employees within state civil service, the Judicial and Legislative Branches, and the California State University (CSU).

^{7/} Amount reflects the employer contribution to pay down the Other Post-Employment Benefits (OPEB) unfunded liability.

^{8/} Amount includes a one-time prefunding contribution of \$240 million pursuant to Chapter 2, Statutes of 2016 (AB 133).

^{9/} Estimated as of the 2021 Governor's Budget. Of the total estimated 2021-22 contributions, contributions sourced from the General Fund are estimated to be \$2,304 million for CalPERS, \$682 million for CSU CalPERS, \$1,899.6 million for Active Health and Dental, and \$926 million for OPEB Prefunding. Fiscal year 2021-22 contributions to CalSTRS, JRS, JRS II, LRS, and Retiree Health & Dental (including CSU) are all General Fund costs.

^{10/} Amount includes \$616 million to help ensure full funding by 2046, which is provided by the employer on behalf of the employees, based on the actuarial liability for each bargaining unit, since employee prefunding contributions were suspended in 2020-21 due to the Personal Leave Program 2020.

CANNABIS

Enacted in 2015, the Medical Marijuana Regulation and Safety Act created a regulatory framework for medical cannabis in California and distributed the responsibility for state licensing between three state entities—the Bureau of Cannabis Control within the Department of Consumer Affairs, the Department of Food and Agriculture, and the Department of Public Health. In November 2016, voters approved Proposition 64, the Adult-Use of Marijuana Act, which legalized the recreational sale and use of cannabis to people over the age of 21 and levied new excise taxes on the cultivation and retail sale of state-regulated cannabis. Chapter 27, Statutes of 2017 (SB 94), integrated medicinal and adult-use regulations to create the Medicinal and Adult-Use Cannabis Regulation and Safety Act, merging the medical and adult-use cannabis regulatory frameworks into a single system to govern the commercial cannabis industry in California.

DEPARTMENT OF CANNABIS CONTROL

In an effort to improve access to licensing and simplify and centralize regulatory oversight of commercial cannabis activity, the 2020 Governor's Budget included an announcement of the Administration's intention to consolidate licensing and associated regulatory functions into a new Department of Cannabis Control by July 1, 2020, and noted a more detailed plan and proposal would be submitted to the Legislature that spring. However, those plans were interrupted by the COVID-19 Pandemic, which required the Administration to re-evaluate its ability to implement the consolidation as scheduled. Subsequently, the Administration placed the consolidation and establishment of the new department on hold until the 2021 Governor's Budget.

The Budget includes \$153.8 million Cannabis Control Fund to reflect the consolidation of the functions and positions of the Bureau of Cannabis Control, the Department of Food and Agriculture, and the Department of Public Health into a new stand-alone Department of Cannabis Control within the Business, Consumer Services, and Housing Agency on July 1, 2021.

This proposal seeks to further the goals of legalization and regulation by creating a single point of contact for cannabis licensees, local governments, and other stakeholders. With a focus on making licensing and compliance more straightforward, transparent, and efficient, this proposal aims to simplify participation in the legal market and support the successful and safe operation of a cannabis business in compliance with state law. Further, centralizing the licensing programs' enforcement efforts will result

in more effective enforcement that better protects public health, safety, and lands, and makes it more costly and inefficient to participate in the illicit cannabis industry.

The Bureau currently has a specialized Equity-Local Liaison Unit within its Licensing Division. The staff within this unit work directly with local jurisdictions who offer an equity program to identify and work directly with equity applicants and licensees, as well as serve as the statewide point of contact for all local jurisdictions.

Under the new Department of Cannabis Control, the services of this unit will be expanded to all equity applicants and licensees across all license types. The unit will continue to work closely with and support the work of local jurisdictions as they implement their equity programs, including the continuation of workshops held jointly with local jurisdictions to provide information to, and answer questions from, applicants and licensees about the state resources available to them.

Of the 621 positions in the new department, 598 are existing and 23 are new, primarily to establish an executive management structure consistent with that of other state departments. There are also two new positions related to Chapter 270, Statutes of 2020 (AB 1525) to process requests from financial institutions and accountants who engage with cannabis businesses for license-related information, including track and trace data. This data sharing will facilitate the ability of financial institutions to comply with due diligence reporting requirements to federal regulating agencies, thereby creating the potential for increased access to banking services for licensees.

In addition to the budget changes, the Administration will propose statutory changes to effectuate the consolidation and make related improvements.

UPDATED ALLOCATION OF THE CANNABIS TAX FUND

Proposition 64 specified the allocation of resources in the Cannabis Tax Fund, which are continuously appropriated. Pursuant to Proposition 64, expenditures are prioritized for regulatory and administrative workload necessary to implement, administer, and enforce the Cannabis Act, followed by research and activities related to the legalization of cannabis and the past effects of its criminalization. Once these priorities have been met, the remaining funds are allocated to: (1) youth education, prevention, early intervention, and treatment; (2) environmental protection; and (3) public safety-related activities. The Budget estimates \$443.1 million will be available for these purposes in 2021-22, and the structure of these allocations is unchanged from 2020-21:

- Education, prevention, and treatment of youth substance use disorders and school retention—60 percent (\$265.9 million).
- Clean-up, remediation, and enforcement of environmental impacts created by illegal cannabis cultivation—20 percent (\$88.6 million).
- Public safety-related activities—20 percent (\$88.6 million).

These figures reflect an increase of \$146.2 million compared to the allocation estimates in the 2020 Budget Act.

Lastly, the Budget includes statutory changes to establish permanent funding authority from the Cannabis Tax Fund for the local equity grant program that is administered by the Governor's Office of Business and Economic Development (GO-Biz). This change will provide permanent support so GO-Biz can help expand the work of facilitating greater equity in business ownership and employment in the cannabis market. The Budget includes \$15.5 million ongoing Cannabis Tax Fund for this program.

CALIFORNIA PRIVACY PROTECTION AGENCY

Proposition 24, the California Privacy Rights Act of 2020, approved by California voters in November 2020, created the California Privacy Protection Agency. The Agency is vested with administrative power, authority, and jurisdiction to implement and enforce the California Consumer Privacy Act of 2018, which is aimed at protecting the use of personal information and the promotion of public awareness and understanding of the risks, rules, and rights related to the collection, use, sale, and disclosure of personal information, including the rights of minors. The Budget includes \$5 million General Fund in 2020-21 and \$10 million ongoing General Fund beginning in 2021-22 to support the operations of the Agency.

STATE APPROPRIATIONS LIMIT

Under the Gann Limit, which was approved by the voters through Proposition 4 in 1979, growth in appropriations made by the state is limited, and the state is required to reallocate and refund any revenue in excess of the state appropriations limit. The growth limit only applies to appropriations from proceeds of taxes, and excludes a number of expenditure categories, such as debt service, qualified capital outlay costs, and emergencies. The limit for each year is based on the limit from the prior year, adjusted for changes in state per capita personal income and changes in population

(composed of state civilian population growth and K-14 average daily attendance growth). Any excess spending above the limit over a two-year period is divided equally between transfers to schools and community colleges (50 percent), and some form of refunds to taxpayers (50 percent).

The state has exceeded its appropriations limit only once, in 1986. In recent years, however, state appropriations have been trending closer to the limit, and in the 2018-19 fiscal year, total spending exceeded the limit by \$1.867 billion dollars. Strong revenue growth in these years, coupled with more moderate growth in the appropriations limit, served to shrink the room under the limit. Two of the three growth factors, the change in civilian population and the change in K-14 average daily attendance, have dropped to less than one percent and been negative, respectively, in a number of recent years.

The Budget presently projects that the 2019-20 fiscal year's appropriations are below that year's limit by \$1.765 billion. Given that the overage in the 2018-19 fiscal year exceeds the amount under the limit in the subsequent 2019-20 fiscal year, if this estimate remained the same in the Budget Act, the state would be over the limit in this two-year period by \$102 million. This in turn would trigger \$51 million in additional transfers to K-14 education, and \$51 million in taxpayer refunds.

It is important to note that this estimate will change again at the May Revision. First, final adjustments to both revenues and expenditures for the 2019-20 fiscal year will not be completed until the upcoming May Revision. Second, there are number of expenditures, including significant emergency expenditures that the state has made or is planning to make that may be excludable under Proposition 4. The Administration will update its estimates and make a recommendation at the May Revision if further action must be taken under Proposition 4.

ECONOMIC OUTLOOK

The lack of effective and coordinated federal action allowed COVID-19 to spread in the United States, with clear consequences for public health. To prevent further loss of life, state and local governments have closed schools, implemented public health guidelines, and restricted unsafe activities. There were 25 million fewer employed Americans in April 2020, during the trough of the COVID-19 Recession, than in February 2020, the official start of the COVID-19 Recession. Job losses were concentrated in low-wage sectors in both the U.S. and California. California low-wage sector jobs were still approximately 10 percent below their February levels in November whereas the Standard and Poor's 500 Index (S&P 500) reached record highs, highlighting the disparate impacts of the COVID-19 Recession. As discussed in the Demographic Information Chapter, many households and workers have not benefited from the growth over the previous ten years, and the COVID-19 Recession has exacerbated this inequality.

The Budget forecast was finalized in November and does not reflect the recent federal COVID-19 relief bill enacted last month. In the forecast, more than one million Californians were expected to lose their Pandemic Unemployment Assistance benefits at the end of 2020. Almost three million Californians receiving regular state unemployment insurance were expected to exhaust benefits in the second quarter of 2021. The U.S. forecast also assumed that a vaccine would only become available in mid-2021. Under these assumptions, U.S. real GDP levels are expected to return to fourth quarter 2019 levels by the first quarter of 2022. However, jobs in leisure and hospitality may never recover to their 2019 level, and retail jobs are expected to continue their

long-term decline. In California, the state is not expected to return to the overall level of 2019 jobs until 2025. The May Revision forecast will be updated to include the faster-than-expected deployment of vaccines as well as any additional economic policy changes between November 2020 and April 2021. Risks to the outlook include a fall in the stock market, a second round of job losses that affect higher-income workers, slower job growth from businesses closing, and a failure to address structural inequality at a time when climate risks are also increasing.

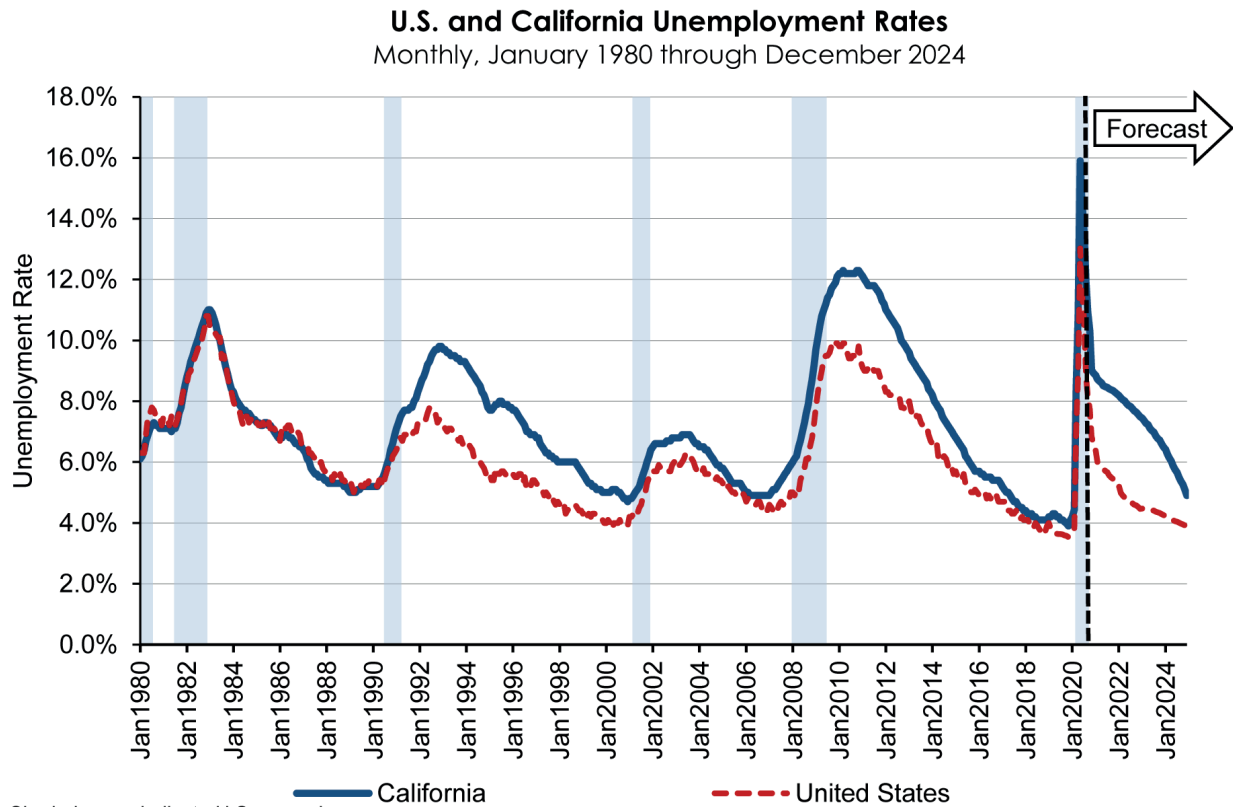

TEN YEARS OF GROWTH

In February 2020, both the U.S. and California were at historically low unemployment rates following ten years of growth. U.S. real GDP grew by 2.2 percent in 2019, with California growing by 3.4 percent. California maintained its rank as the fifth-largest economy in the world in 2019 with a current-dollar GDP of \$3.1 trillion, or 14.6 percent of U.S. GDP.

As the economy grew, the U.S. unemployment rate fell from a peak of 10 percent in October 2009 to 3.5 percent in September 2019, the lowest rate since December 1969. There were fewer than 5.8 million unemployed Americans in February 2020, the lowest level since January 2001, despite a labor force that is 14 percent larger. Similarly, the California unemployment rate fell from 12.3 percent in November 2010 to a record low 3.9 percent in August 2019. In January 2020, there were around 750,000 unemployed civilians in California, the lowest level since July 1989, despite a labor force that is 30 percent larger. (See figure on U.S. and California Unemployment Rates.)

The U.S. added over 14 million nonfarm jobs from the pre-Great Recession peak to February 2020. More than 2 million jobs, or one of every seven U.S. jobs, were added in California. Job growth in the nation and in the state were concentrated in low-wage sectors, accounting for three out of every four jobs added. A sector is categorized as low-wage if its average wage was below the 2019 nonfarm average wage of around \$61,000 for the nation or around \$76,000 for California. By that measure, four out of the eleven major industry sectors are low-wage: trade, transportation and utilities, educational and health services, leisure and hospitality, and other services. (See figure on Nonfarm Employment and Average Wages by Major Industry Sectors in 2019.)

While the economy expanded, wages did not increase as much. In California, inflation-adjusted average wages grew by around 1 percent per year from 2010 to 2019. High-wage sector average wages grew by 13 percent, while low-wage average wages grew by 3.5 percent from 2010 to 2019. In current dollars, California average

Shaded areas indicate U.S. recessions.

Source: U.S. Bureau of Labor Statistics; CA Employment Development Department, Labor Market Information Division; CA Department of Finance, Governor's Budget Forecast.

wages grew by 34.8 percent, with high-wage sectors growing by 39.8 percent and low-wage sectors growing by 28 percent.

At the same time, the California median home sales price reached a then-record high of \$617,400 in August 2019, more than double the nation's median home sales price of \$278,200. Even during record low unemployment, one in five households spent at least 50 percent or more of their income on housing costs. One in eight homeowners spent 50 percent or more of their income on housing costs, but more than one in four renters spent that much.

A SHOCK TO THE SYSTEM

The COVID-19 Pandemic forced a sudden drop in economic activity in March and April 2020. Both the Federal Reserve and Congress acted swiftly; however, the economic disruptions were widespread and continue to affect the economy.

Nonfarm Employment and Average Wages by Major Industry Sectors in 2019

	Nonfarm Employment			Average Wages	
	U.S. (Thousands)	California (Thousands)	California (% of U.S.)	U.S. (\$)	California (\$)
Total Nonfarm	150,935	17,400	11.5%	61,080	75,759

FEDERAL SUPPORT

During two emergency meetings in March 2020, the Federal Reserve reduced the federal funds rate target to a range of 1 percent to 1.25 percent and then to a range of 0 percent to 0.25 percent in anticipation of the economic impact of the COVID-19 Pandemic. This followed three cuts in the second half of 2019, which reduced interest rates from a pre-COVID-19 Recession peak of 2 percent to 2.25 percent in July 2019 to a range of 1.5 percent to 1.75 percent in October 2019. It also announced various policies to assist lenders and to support growth including injecting around \$700 billion into the economy. During the Great Recession, interest rates remained at around 5.25 percent for a year before being gradually reduced to a range of 0 percent to 0.25 percent in December 2008. The Federal Reserve left rates unchanged at that range until December 2015, when it increased the rate to a range of 0.25 percent to 0.5 percent.

Congress passed the \$2.2 trillion Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 27, 2020, the largest fiscal stimulus in U.S. history. The package included one-time stimulus check payments to qualifying taxpayers, with a maximum credit of \$1,200 for single filers and \$2,400 for married or joint filers plus \$500 per

qualifying child. Through the end of August 2020, over 153 million stimulus payments were made in the U.S., including 18 million payments in California, with an average payment of \$1,800 in the nation and \$1,600 in the state. The CARES Act provided support to businesses through the Paycheck Protection Program (\$669 billion in two phases), and corporate assistance (\$500 billion), and to state and local governments (\$340 billion). It also supplemented unemployment insurance benefits by extending the time individuals could claim benefits, extended eligibility to self-employed and independent contractors, added \$600 per week to all forms of unemployment insurance through July 31, and paid for a larger share of benefits to relieve future employers (\$300 billion).

Congress passed a federal COVID-19 relief bill last month. This included another round of stimulus check payments (\$166 billion) of up to \$600 per individual. The package also extended unemployment insurance to self-employed and independent contractors and provided an additional \$300 per week to all recipients through March 14, 2021 (\$120 billion). Another \$284 billion was allocated for the Paycheck Protection Program, including to businesses who received funding from the CARES Act. Finally, \$250 billion was made available for schools, vaccine purchases, rental assistance, and various other support programs. The federal eviction moratorium, which was initially scheduled to expire at the end of December, was extended through January 31, 2021.

HISTORIC IMPACTS OF THE COVID-19 RECESSION ON THE ECONOMY

GROSS DOMESTIC PRODUCT

Even with these measures, the economic impacts of the COVID-19 Recession were much larger than during the Great Recession. The fall in economic activity in March was large enough for the first quarter of 2020 U.S. real GDP to shrink by 5 percent on a seasonally adjusted annualized rate (SAAR), and for the California economy to contract by 4.3 percent. In the second quarter of 2020, U.S. real GDP fell by a record 31.4 percent SAAR, dwarfing the previous record decline of 10 percent in the first quarter of 1958.

California real GDP contracted by a record 31.5 percent SAAR in the second quarter of 2020, the twenty-third largest fall in real GDP amongst all states. The largest state decreases were in Nevada and Hawaii at -42.2 percent, while Delaware had the smallest contraction, at -21.9 percent.

In the third quarter, U.S. real GDP grew at a record high 33.4 percent SAAR, bringing it to first quarter 2018 levels. The previous record increase in U.S. real GDP of 16.7 percent occurred in the first quarter of 1950. Goods spending, which accounted for about 25 percent of overall GDP in 2019, was already 7.1 percent above its pre-pandemic level in the third quarter. Services spending, with a 2019 GDP share of nearly 45 percent, remained around fourth quarter 2015 levels. In comparison, California real GDP grew by 31.2 percent in the third quarter of 2020, bringing it to first quarter 2019 levels.

UNEMPLOYMENT AND JOBS

The U.S. unemployment rate reached a record high of 14.7 percent in April 2020, and California reached a record 16.4 percent in April and May 2020. State unemployment rates ranged from 8.7 percent in Nebraska to 30.1 percent in Nevada in April 2020, and California's unemployment rate was the eleventh highest amongst all states.

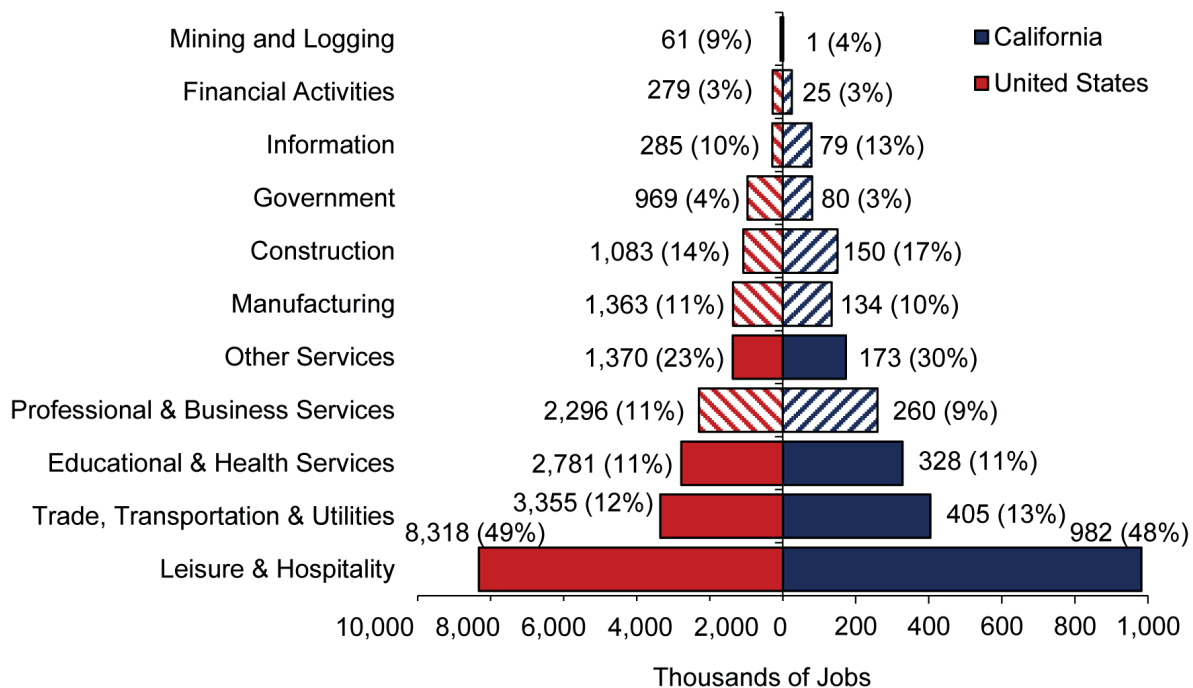

U.S. nonfarm jobs decreased by a record 22.2 million from February to April 2020, and this decrease of 14.5 percent was more than double the decrease of 6.3 percent over the span of two years during the Great Recession. California's nonfarm jobs decreased by 2.6 million in March and April. The decrease of 14.9 percent in California also exceeded the decrease of 8.5 percent during the Great Recession. Three out of four jobs lost in the U.S and in California in March and April 2020 were in low-wage sectors, erasing all the job gains in California since the Great Recession. (See figure on U.S. and California Jobs by Industry.)

HOUSING

The housing market has rebounded quickly despite the COVID-19 Recession, signaling the continuing ability of high-income households to purchase homes. The California median home sales price was \$579,770 in February 2020, compared to \$270,100 for the nation and averaged over \$600,000 in March through May before setting new record highs from June to September 2020. The California median home sales price exceeded \$700,000 for the first time in August 2020, at \$706,900, and reached the record high of \$712,430 in September 2020. (See figure on California Median Home Sales Price of Existing Single-Family Homes.) Through November 2020, the California median home sales price was up 9.2 percent on average compared to the same period in 2019 and sales volume was up by 1.3 percent. Similarly, the U.S. median home sales prices also hit a record high of \$313,000 in October 2020 before falling to \$310,800 in November 2020, which was 14.6 percent higher than in November 2019. The U.S. existing home sales volume was around its highest level since December 2006 and was 25.8 percent higher than in November 2019.

U.S. and California Jobs by Industry

(Job Losses in April 2020 Relative to February 2020;
Solid Bars Represent Low-Wage Sectors)

Source: U.S. Bureau of Labor Statistics; CA Employment Development Department, Labor Market Information Division.

STOCK MARKET

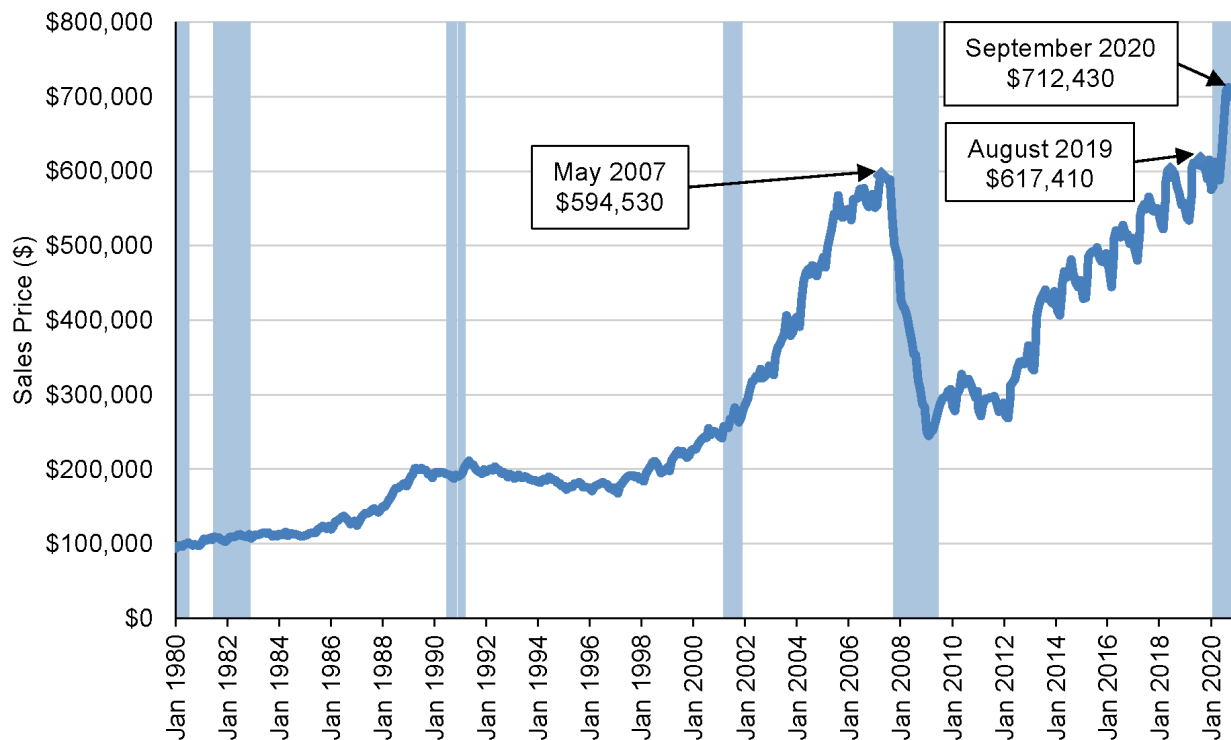

The S&P 500 Index fell by 33.9 percent from a high of 3,386 in February to 2,237 in March, compared to a drop of 56.7 percent over a period of 16 months during the Great Recession. The S&P 500 Index recovered within five months, compared to four years during the Great Recession and has since continued to set new record highs. (See figure on S&P 500 Index.)

THE ROAD AHEAD

The Budget incorporates federal policies and programs authorized as of November 2020, when the forecast was finalized. At that time, more than one million Californians were on the Pandemic Unemployment Assistance program and were expected to lose their benefits at the end of 2020. Additionally, almost three million Californians receiving regular state unemployment insurance were expected to exhaust their benefits in the second quarter of 2021. (See figure on Californians Receiving Unemployment Insurance Benefits.) The recent federal COVID-19 relief bill enacted last

month was not incorporated in the Budget forecast but will be included in the May Revision forecast.

The state moratorium on evictions will end on January 31, 2021. According to data from the Household Pulse Survey in late November, over a quarter of California renters reported slight or no confidence in making December's rent or had deferred rent payments during November. Housing disruptions make it more difficult to find or maintain work, and the slower recovery for these Californians is included in the baseline forecast. However, the extension of eligibility for unemployment insurance and additional funds for renter assistance included in the recent federal COVID-19 relief bill enacted last month should help offset some of the negative impacts of the COVID-19 Recession.

THE NATION

The forecast projects GDP to grow by 3.1 percent in 2021 after a contraction of 3.6 percent in 2020. Growth is expected to decelerate to around 2.5 percent through

Shaded areas indicate U.S. recessions.
Source: S&P Dow Jones Indices.

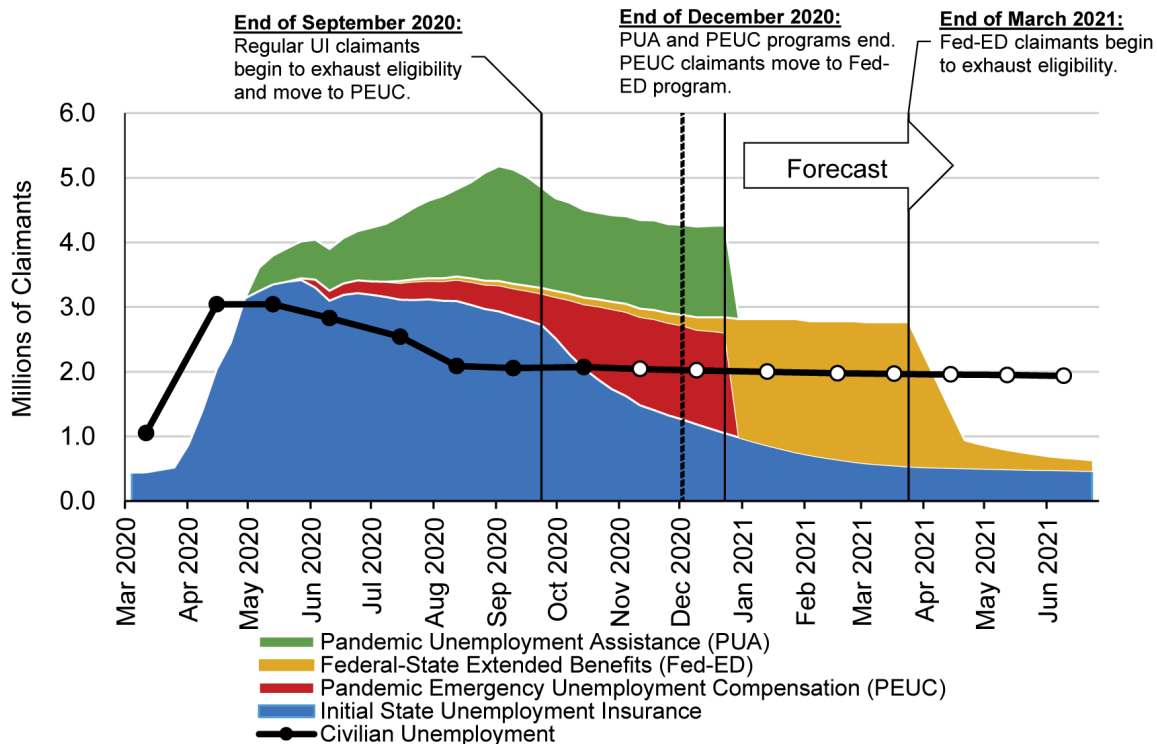

2024. U.S. real GDP levels are expected to return to fourth quarter 2019 levels by the first quarter of 2022. (See figure on Selected Economic Indicators.) The U.S. forecast assumed a continuation of economic policy as of November 2020 and that the recovery in real GDP occurs without additional monetary or fiscal stimulus. With the enactment of the recent federal COVID-19 relief bill last month, this will be revised in the May Revision forecast.

The U.S. unemployment rate decreased to 6.7 percent in November 2020 but the labor force was still 4.1 million people or 2.5 percent smaller than in February. The U.S. added a total of 12.3 million nonfarm jobs from May to November, or 55.6 percent of jobs lost in March and April, with jobs in high-wage sectors being 4.8 percent below February levels while low-wage sector jobs were 8.1 percent lower. The U.S. forecast projects that the recovery in the labor market will continue but at a slower rate.

After record losses to the labor market in 2020, the U.S. forecast projects the labor force will have decreased by 1.5 percent in 2020 before growing by 1.7 percent in 2021, allowing it to recover to its 2019 level in 2021. The U.S. labor force growth is then projected to decelerate to about 0.7 percent by 2024. The U.S. unemployment rate is

 CA Department of Finance, Governor's Budget Forecast.

projected to have averaged 6.8 percent in the fourth quarter of 2020, bringing the 2020 annual average to 8.1 percent. The number of unemployed Americans is projected to fall to 9.3 million in 2021 from 13 million in 2020, and to decline to 4 million by 2024. The official unemployment rate is projected to decrease to 4 percent by 2024.

In contrast to the six years it took for a fall of 6.3 percent in nonfarm jobs to recover after the Great Recession, the fall of 14.5 percent in nonfarm jobs in March and April is projected to be recovered by mid-2022. Some low-wage sectors that were hard-hit by the COVID-19 Recession, such as leisure and hospitality, and retail, are projected to remain below their 2019 levels at the end of the forecast period.

U.S. personal income increased by 10.4 percent year-over-year in the second quarter of 2020 (up \$1.9 trillion year-over-year), as transfers increased by a record high \$2.6 trillion due to stimulus checks from the CARES Act and the extended unemployment insurance benefits. All other major U.S. personal income components, such as wages and proprietor's income, declined.

Forecast based on data available as of November 2020.								
Percent changes calculated from unrounded data.								
Source: CA Department of Finance, Governor's Budget Forecast.								

In the second quarter of 2020, an increase in income and a decrease in consumption led to net private savings, increasing from \$1.6 trillion in the first quarter of 2020 to \$4.7 trillion in the second quarter. This represents more than a quarter of aggregate after-tax income in the second quarter of 2020, and compares to 7.5 percent in 2019. The forecast assumed that the personal savings rate will decrease to about 9 percent by the fourth quarter of 2021 and slowly decrease to about 8.7 percent by 2024.

Low demand for goods and services because of the COVID-19 Pandemic put downward pressures on prices. Headline inflation as measured by the Consumer Price Index (CPI) is expected to have slowed in 2020, led by softening demand for gasoline, transportation, apparel and shelter. After averaging 1.8 percent in 2019, headline CPI is expected to have decelerated to 1.2 percent in 2020. As oil prices gradually recover in 2021 and overall demand starts to increase again, CPI is expected to accelerate to an average of 2.2 percent during the forecast window.

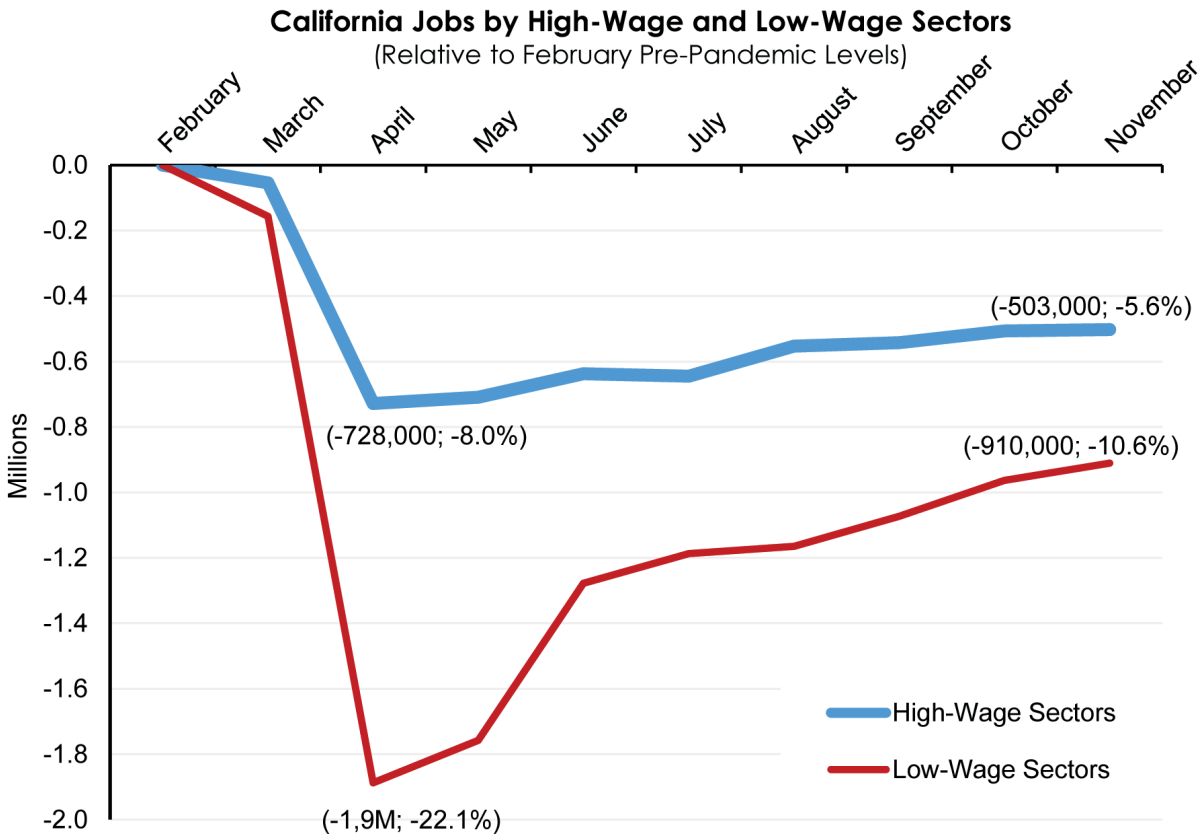

CALIFORNIA'S OUTLOOK

When finalized in November, the Budget forecast assumed that most unemployment insurance recipients would lose benefits in the first half of 2021, and the eviction moratorium would expire on January 31, 2021. This was projected to lead to an overall decrease in personal income in California as benefits run out and transfers contract, which will put many households at risk, exacerbating income inequality that existed before the COVID-19 Recession. Several programs were extended in the recent federal COVID-19 relief bill enacted last month; however, this was not included in the Budget forecast. The May Revision forecast will be updated to incorporate any changes in economic policy between November 2020 and April 2021.

The California unemployment rate decreased to 8.2 percent in November 2020 but there were 1.4 million fewer employed Californians and 783,000 more unemployed civilians in November than in February. California nonfarm employment was 16.2 million with low-wage sectors being 10.6 percent lower versus 5.6 percent for high-wage sectors. (See figure on California Jobs by High-Wage and Low-Wage Sectors.)

California's economic recovery is projected to continue and the forecast assumed that the expiration of unemployment benefits and the ending of the eviction moratorium will weigh on growth in the first half of 2021. With the recent federal COVID-19 relief bill, growth is likely to be faster than assumed in the baseline Budget forecast, but income inequality will persist.

California's unemployment rate is expected to average 8.5 percent in 2021, following 10.3 percent in 2020. Proposition 22, approved by voters in November 2020, is expected to decrease growth in wage employment. Employers of independent contractors are not required to pay into unemployment insurance, disability insurance, or provide family or annual leave. While the unemployment rate is projected to decrease, the quality of jobs is also expected to be lower. Labor force participation rate (LFPR)—the percentage of working age population in the labor force—decreased

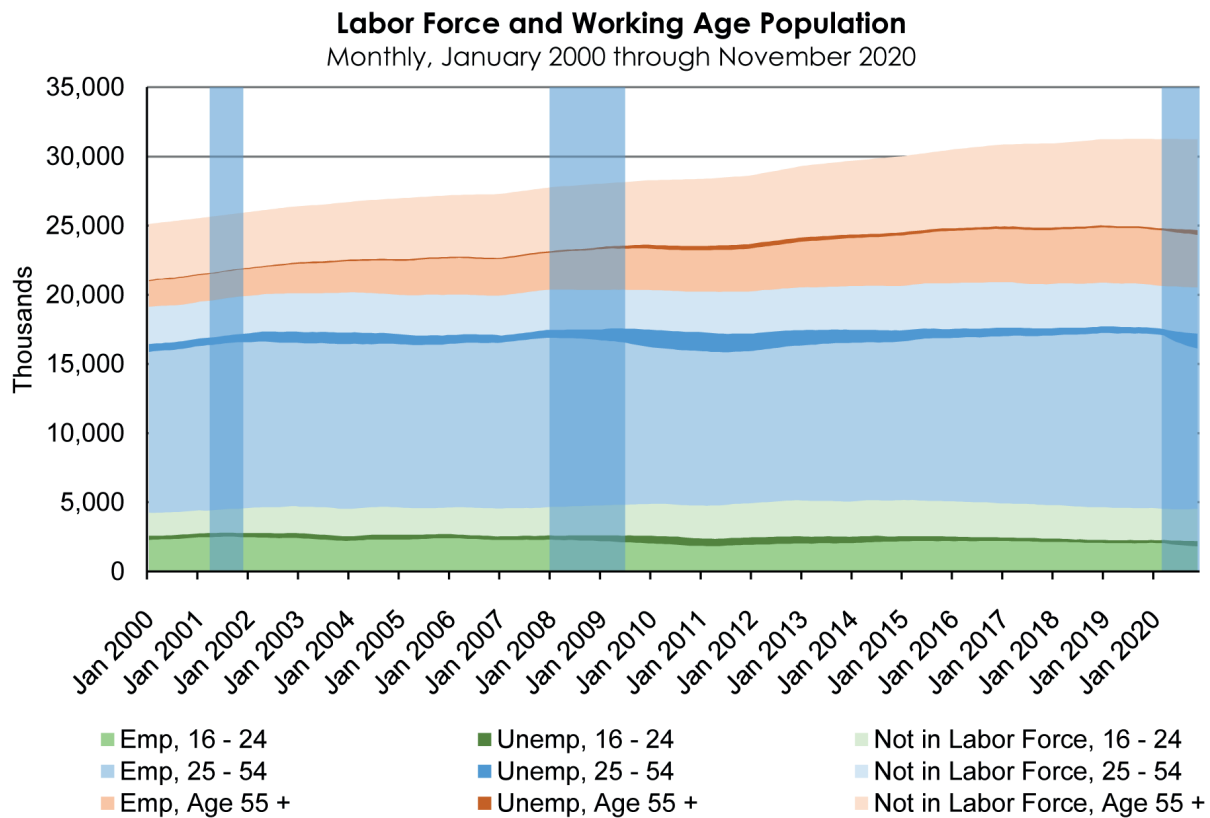

Source: CA Employment Development Department, Labor Market Information Division.

from 62.3 percent in the first quarter to 59.8 percent in the second quarter of 2020, the lowest participation rate on record. (See figure on California Labor Force and Working Age Population.) The California labor force is expected to decline in the second quarter of 2021, before growing around 0.7 percent by 2024.

Businesses are expected to continue to operate at limited capacity into 2021. Increased automation and a shift to online retailing will lead to permanent job declines in leisure and hospitality, retail, and other services. This will slow overall job growth as these industries were among the largest employers in California prior to the COVID-19 Pandemic. However, due to the loss in lower-wage jobs, average wages are projected to have increased by 6.2 percent in 2020.

The job recovery is expected to be faster in industries that are less reliant on in-person contact, and in industries that are currently facing increased demand, such as wholesale trade, transportation and warehousing, and construction. Nonfarm employment for California is projected to recover to pre-pandemic levels in 2025. (See figure on the Change in Jobs by Sector: 2024 Q4 relative to 2020 Q1.)

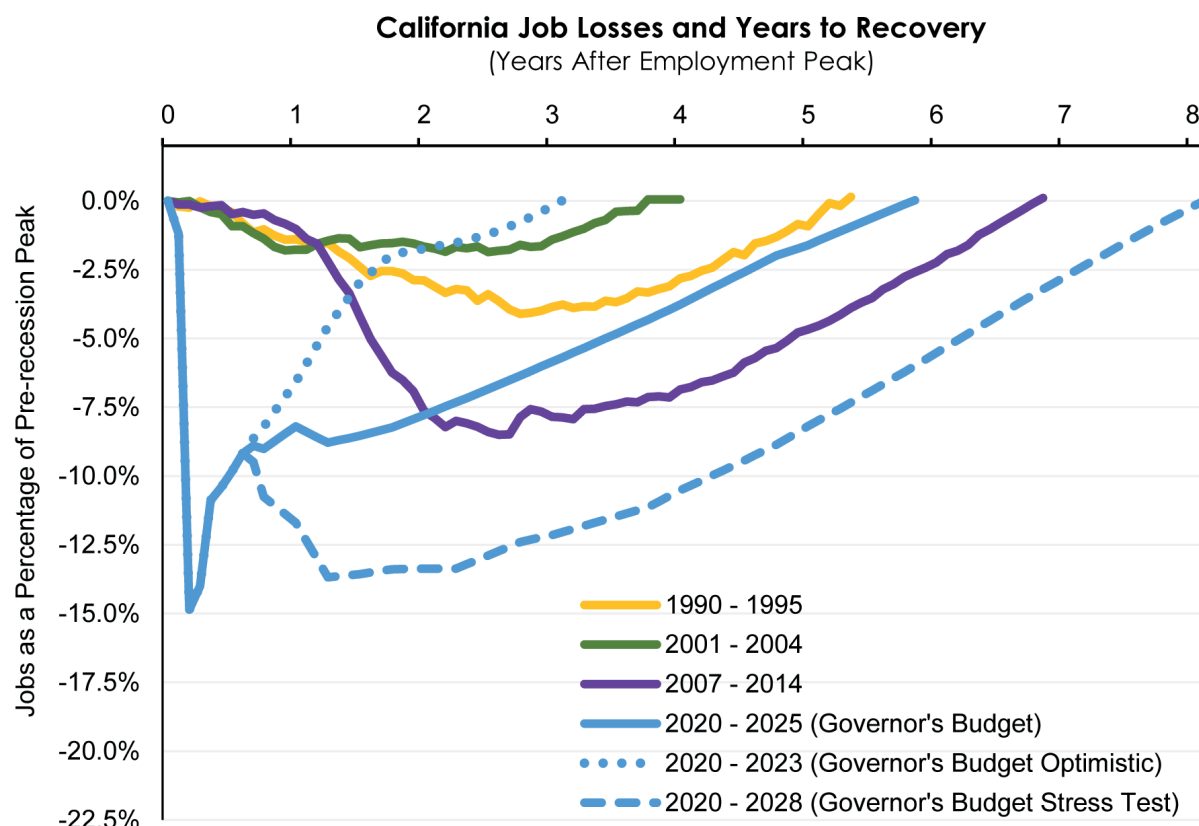

Shaded areas indicate U.S. recessions.

Source: CA Employment Development Department, Labor Market Information Division.

An Optimistic Scenario modeled by the Department of Finance that assumed continuation of federal assistance beyond the CARES Act projects that the recovery in jobs would speed up to return to pre-pandemic levels within three years. This scenario included another round of Paycheck Protection Program loans, an extension of the Pandemic Unemployment Assistance program, extended eligibility, an unemployment benefit supplement of \$600 per week through the end of 2021, and an extension of the state eviction moratorium also through the end of 2021. Under the Optimistic Scenario, Californians can continue to meet their spending needs and businesses can continue to operate, supporting job growth. The recent federal relief bill passed by Congress was smaller in scope and duration than the stimulus package assumed in this Optimistic Scenario. (See figure on California Job Losses and Years to Recovery.)

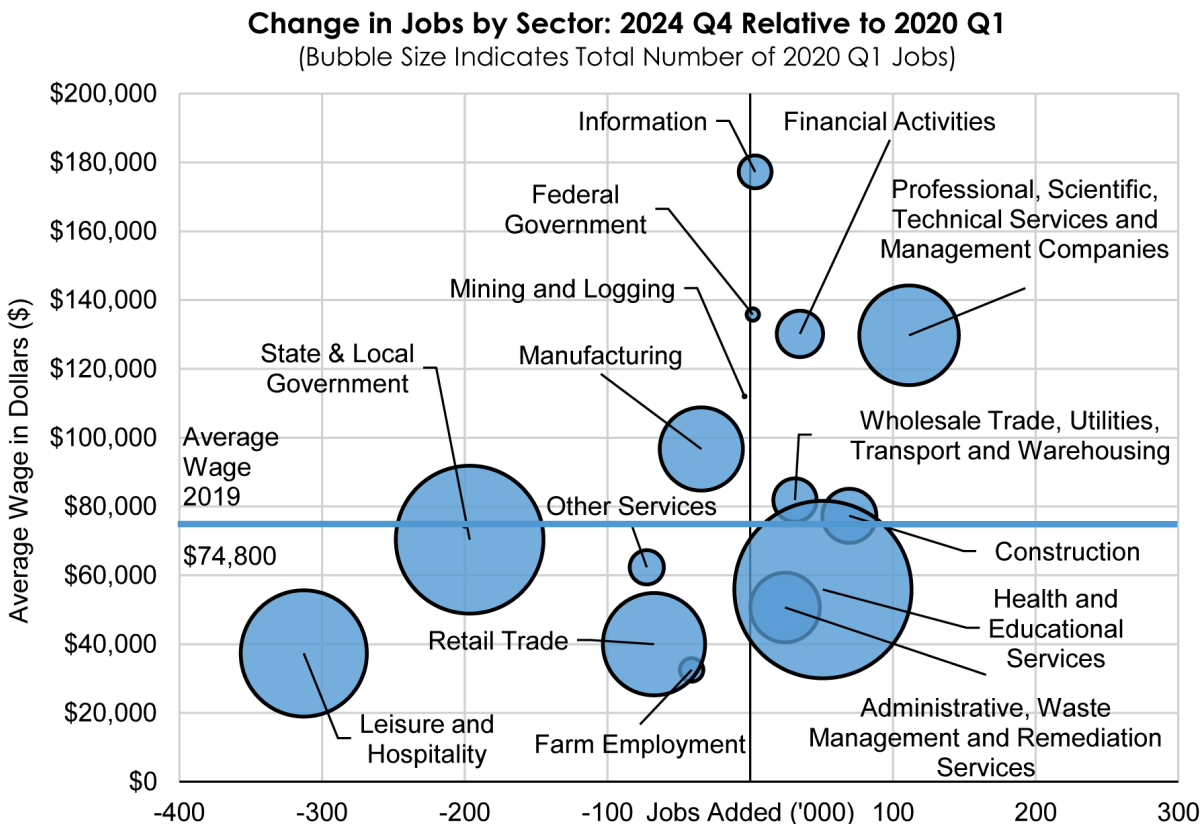

Despite lower employment and falling total wages, total personal income in California is projected to grow by 4.9 percent in 2020, due largely to transfer payments, which include assistance to individuals such as unemployment benefits and Social Security. Transfer payments are projected to have increased by 44.1 percent or by \$165 billion in 2020. This would be the largest annual percentage increase in transfers in the history of the series dating back to 1998. Unemployment benefits payments are projected to

Source: CA Employment Development Department, Labor Market Information Division;
CA Department of Finance, Governor's Budget Forecast.

have risen to around \$119.4 billion in 2020 after totaling only \$5 billion in 2019. In 2021, total personal income is projected to fall by 4.6 percent as stimulus payments and unemployment benefits were expected to end. After a projected decline of 2.3 percent in 2020, proprietors' income is expected to fall further by 6.3 percent as the forecast assumed that the Paycheck Protection Program would end. Rental income is projected to fall by 2.2 percent in 2021, the first annual decrease since 2007. The forecast projects personal income to start growing at 2 percent in 2022 and to accelerate to 4.8 percent by 2024, in keeping with California's historical share of U.S. personal income of about 13 percent. (See figure on Contributions to California Personal Income Growth.)

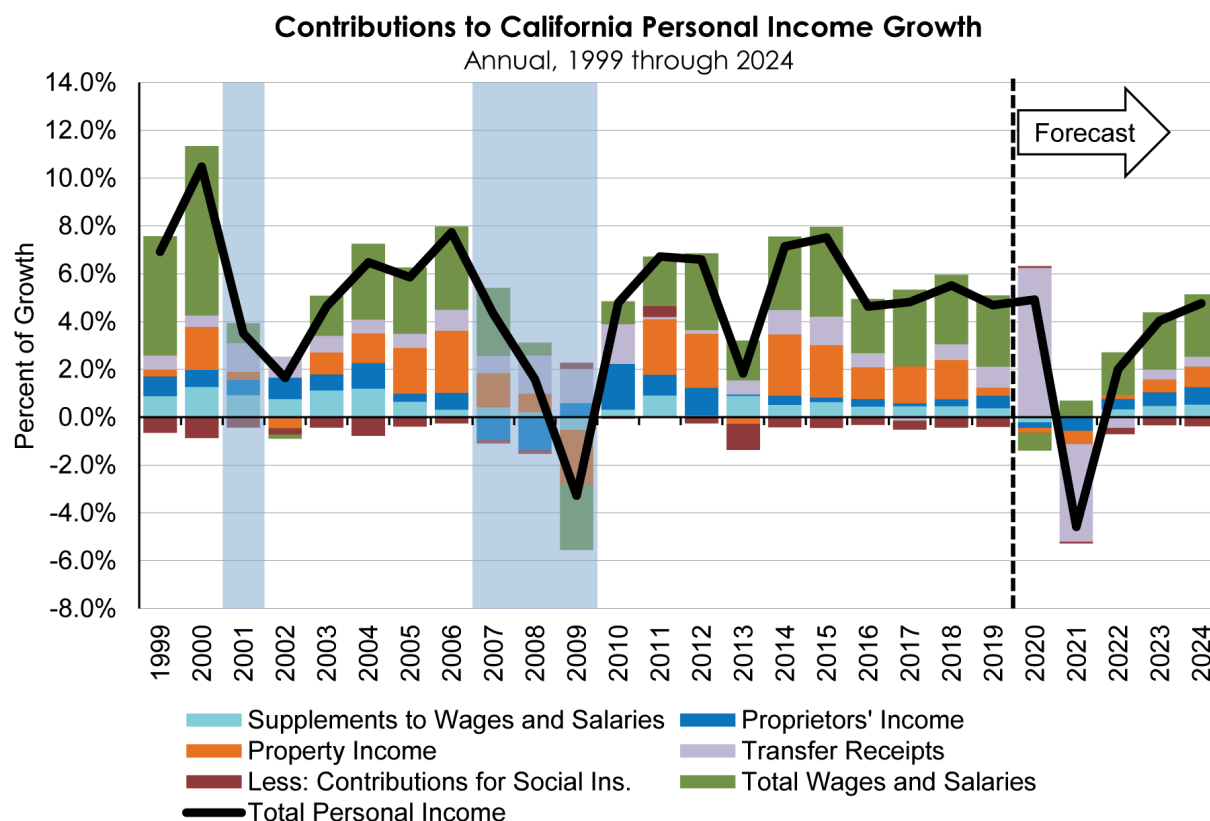

While the market for existing homes has been resilient, total permits for new construction are expected to decline by 10.3 percent to 101,000 units in 2020 and by 2.3 percent to 99,000 units in 2021 before steadily increasing to reach growth of 7.4 percent by 2024. Total permits averaged 96,000 units on a seasonally adjusted annualized rate through September, down 11.1 percent from the same period in 2019. This was driven by multi-family units, which averaged 43,200 units, or 18.3 percent lower than in the first three quarters of 2019, while single-family units were down by 4.2 percent, at an

Source: CA Employment Development Department, Labor Market Information Division;
CA Department of Finance, Governor's Budget Forecast.

average of 52,800 units. Total permits are projected to exceed the 2019 pre-pandemic level of 113,000 units in 2024, with a total of 118,000 units. (See figure on Number of Permits Issued per Year.)

Due to higher housing costs in the state, California inflation is expected to have averaged 1.7 percent in 2020, 0.5 percentage point higher than the nation. California inflation reflects the rate of change in CPI for the metropolitan areas of Los Angeles, Riverside-San Bernardino, San Diego, and San Francisco. The expected decrease in inflation rates in 2020 is projected to be driven by a decline in energy prices for gasoline, transportation and apparel as people cut back on non-essential travel and discretionary purchases of clothing and accessories. This is projected to be offset by an acceleration in demand for some essentials, such as food, fuel and utilities, and medical care. In 2021, inflation is expected to accelerate to 2.8 percent, led by recovery in gasoline, transport and apparel prices, and as overall demand strengthens.

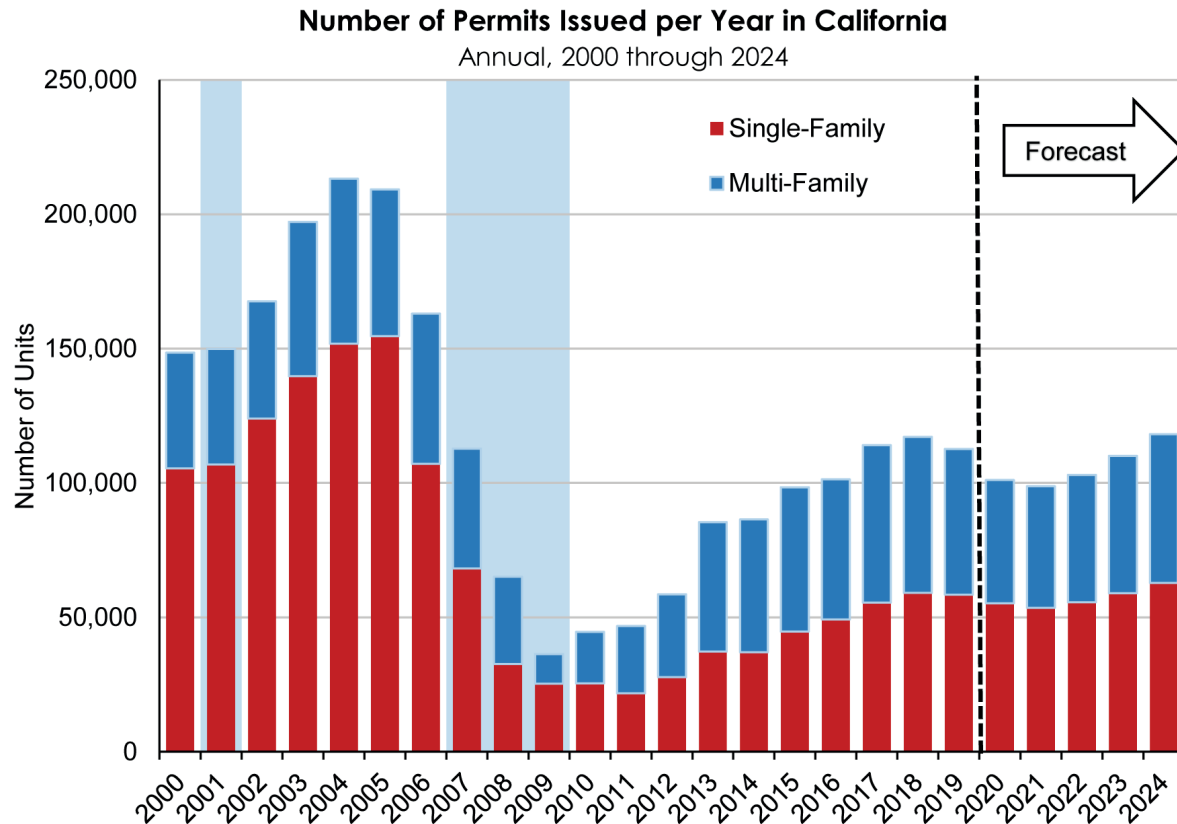

Shaded areas indicate previous U.S. recessions.

CONTINUING RISKS

With the recession lingering and economic inequality intensifying since the COVID-19 Pandemic began, risks continued to increase throughout 2020. While the comparative insulation of high-income workers has supported the economy, evidenced by record high housing and stock prices, subtle shifts in high-wage sectors could tip the scales and slow the recovery or lead into a more generalized recession affecting all sectors. Risks continue to include a fall in the stock market, more widespread job losses, more businesses closing, and a failure to address structural inequality at a time when climate risks are also increasing.

Most of the burden of the COVID-19 Recession has been relatively isolated to industries and individuals working in public-facing sectors. If more businesses enter bankruptcy and unemployment increases among high-income workers, the economy would face additional stresses as modeled in the Stress Test scenario. (See figure on California Job Losses and Years to Recovery.) This scenario would more closely resemble the unfolding of the Great Recession, which also began in a single sector of the economy with the collapse of the housing market. As the shock spread through the financial system, it

Shaded areas indicate previous U.S. recessions.

Source: CA Homebuilding Foundation; CA Department of Finance, Governor's Budget Forecast.

affected the rest of the economy. Under the Stress Test scenario, California would lose jobs in both low- and high-wage sectors in the first half of 2021, reversing economic growth from the second half of 2020. It would then grow more slowly compared to the baseline afterwards. California nonfarm employment would recover to pre-pandemic levels three years later than in the baseline scenario, around 2028. The Stress Test scenario did not include any additional federal assistance beyond the CARES Act.

The stock market has benefited from federal policy to cushion the financial sector, and the large increase in savings also likely led to more investment in stocks. The shift towards telework has supported information and technology companies and sectors, which also tend to be among the top S&P 500 companies. However, risks of a second and potentially worse stock market downturn remain. Mirroring consumption patterns, the growth of S&P 500 company stock prices has been sharply divided, with the technology-heavy and consumer discretionary sectors growing while other sectors such as energy decrease.

Climate change and extreme weather events continue to be a risk to California. Calendar year 2020 was California's most widespread wildfire year on record, with over

4 million acres burned throughout the state as of mid-December—more than twice the previous record of over 2 million acres burned in 2018. The ongoing risk of worsening wildfire seasons will likely affect individuals' and businesses' livelihoods and decisions on where to reside and conduct business, which may impact the growth of regions that are most at risk, as well as cities and towns which are regularly impacted by smoke and pollution. Rising sea levels may also introduce new challenges to some coastal communities in the future. Finally, other environmental risks such as the ongoing threat of droughts remain.

REVENUE ESTIMATES

Entering 2020, the U.S. economy had experienced the longest expansion in its history. Despite this record period of growth, inequality increased substantially since the Great Recession, with the greatest income gains going to those individuals who already had significant wealth. In the second quarter of 2020, the long-running economic expansion came to an end as the COVID-19 Pandemic forced dramatic downturns in many industries and almost complete shutdowns in others. The COVID-19 Pandemic has exacerbated inequality as most of the job losses fell on low-wage earners. Because withholding actually increased somewhat during 2020 in the face of record unemployment and significant wage declines, it appears that high-wage taxpayers have not been significantly adversely affected by the economic downturn caused by the COVID-19 Pandemic.

In addition to strong wage growth, the rebounding stock market means that capital gains, which accrue largely to high-income households, are likely to show strong growth this year. Because the economic pain of the COVID-19 Pandemic has been felt largely by low-income taxpayers, and because of California's progressive tax structure, California's revenues have only suffered a moderate slowdown, much smaller than what was expected when the 2020 Budget Act was adopted last June. As discussed in the Economic Outlook Chapter, the Governor's Budget forecast did not include the federal relief bill enacted in late December, and the additional low-income support will reduce the risks to those households. The effects of the federal relief bill will be included in the May Revision forecast, but at this time its effects on higher-income households and revenues are expected to be minimal.

The General Fund revenue forecast has improved dramatically relative to the 2020 Budget Act. As a result, before accounting for transfers such as to the Budget Stabilization Account, General Fund revenue is higher than the 2020 Budget Act projections by nearly \$71 billion from 2019-20 through 2021-22. The Governor's Budget reflects actual and anticipated reimbursements from the federal government totaling approximately \$9.9 billion for reimbursement of costs associated with the state's response to recent (2017, 2018, and 2020) wildfires and the COVID-19 Pandemic.

The 2021-22 Governor's Budget General Fund Revenue Forecast figure compares the revenue forecasts, by source, in the 2020 Budget Act and the Governor's Budget.

Revenue, including transfers, is expected to be \$163 billion in 2020-21 and \$158 billion in 2021-22. The projected increase since the 2020 Budget Act can be attributed to three main factors: a less severe economic downturn than was anticipated at the 2020 Budget Act, a significantly greater unequal spread of the wage losses in the downturn between high-wage and lower-wage segments of the population, and a stronger stock market than was expected. The personal income tax forecast has been significantly upgraded, reflecting all three of the factors. The sales tax forecast has improved considerably due to the less severe recession and the consequently improved outlook for consumption of tangible goods and for investment. The corporation tax forecast has improved moderately primarily reflecting a reduced downturn in proprietorship income. Over the next three fiscal years, personal income tax is up almost \$58 billion, sales tax is up almost \$9 billion, and corporation tax is up \$1.3 billion. Accruals of revenues to previous years for corporation tax, personal income tax, and sales tax reduce the 2018-19 beginning balance by \$560 million.

The Capital Gains Revenue figure shows revenue from capital gains as a percentage of total General Fund tax revenue. As seen from this figure, the amount of capital gains revenue in the General Fund can vary greatly over time and from year to year. For instance, in 2009, capital gains contributed only \$2.3 billion to the General Fund. By 2012, that revenue had increased to \$10.4 billion, and for 2020 it is expected to hit \$17.3 billion—the highest amount ever.

The Capital Gains Realizations figure shows capital gains reported on California tax returns from 1970 through projections for 2021. Although the level of capital gains has grown significantly since 1970 (along with the economy and total personal income tax revenue), capital gains volatility has been a constant. History shows that high levels of capital gains eventually drop off.

The highest-income Californians pay a large share of the state's personal income tax. For the 2018 tax year, the top 1 percent of income earners paid over 46 percent of personal income taxes. This percentage has been greater than 40 percent in every year since 2004, except for 2009. The share of total adjusted gross income from the top 1 percent of income earners has increased from 13.8 percent in 1993 to 24 percent in 2018. This number has exceeded 20 percent also in every year since 2004, except for 2009. Consequently, changes in the income of a relatively small group of taxpayers can have a significant impact on state revenues.

Capital Gains Realizations
(Dollars in Billions)

These two related phenomena—significant reliance of the General Fund on capital gains and on taxes paid by a small portion of the population—underscore the difficulty of forecasting personal income tax revenue. Proposition 2 helps address some of the state's revenue volatility by requiring the transfer of capital gains revenue that is greater than 8 percent of General Fund tax revenue to the Rainy Day Fund and to pay down state debts. The Rainy Day Fund can be drawn down only if the Governor declares a budget emergency and, even then, no more than 50 percent of the Fund can be drawn down in the first year.

SYSTEM OF TAXATION

The state's tax system is detailed in the Outline of State Tax System figure. Tax collections per capita and per \$100 of personal income are displayed in Schedule 2 in the Appendix. The revenue generated from each state tax from 1970-71 through 2021-22 is displayed in Schedule 3 in the Appendix.

Although there are a variety of taxes in California's tax system, the system is heavily dependent on the personal income tax, and particularly on personal income taxes paid by high-income individuals. While this dependence leads to a greater level of volatility, it has actually been a buffer for revenues in the current recession. This economic downturn has had a significant negative impact on lower-wage households, but the taxpayers who California depends on for much of its tax revenue have generally not been impacted as severely, and have, in some cases, actually benefited from current economic conditions.

The past two recessions in 2001 and 2008 have led to significant revenue declines because the economic distress was spread more evenly over the population and because the stock market suffered significant and long-term declines. In 2001, income earned by the top 1 percent fell from 27 percent of the total in the prior year to just under 20 percent and net capital gains realizations fell from \$120 billion to \$42 billion. In 2008, the share earned by the top 1 percent fell from 25 percent to 21 percent and capital gains realizations fell from \$132 billion to \$56 billion. In those two years, personal income tax revenues dropped by 26 percent and 20 percent, respectively. For 2020, the share of income is likely to increase for the top 1 percent of tax returns, capital gains realizations are forecast to increase from \$163 billion to \$173 billion, and personal income tax revenue is expected to grow by 5 percent.

One of the main reasons this recession was less severe than anticipated was the unprecedented level of federal assistance provided, including direct payments to many households, loans and grants for businesses to help them keep workers employed, and enhanced unemployment benefits. In fact, personal income in 2020 is expected to grow by 4.9 percent, due largely to more than \$150 billion in additional transfers in the form of stimulus checks and unemployment insurance. The personal income series is different from income that is taxable for personal income tax purposes. In particular, taxable income does not include transfers. On the other hand, taxable income includes capital gains, whereas personal income does not. There are other differences between personal income and taxable income, but these two are the most significant.

^{1/} Minimum Tax is \$800 per year for existing corporations. New corporations are exempt for their first taxable year.

^{2/} This tax is levied at the combined rate of 10 cents/pack of 20 cigarettes for the General Fund, 25 cents/pack for the Cigarette and Tobacco Products Surtax Fund, 2 cents/pack for the Breast Cancer Fund, 50 cents/pack for the California Children and Families First Trust Fund, and \$2 for the California Healthcare, Research and Prevention Tobacco Tax Act of 2016. The additional \$2 excise tax was effective as of April 1, 2017.

^{3/} The surtax rate is determined annually by the California Department of Tax and Fee Administration and is equivalent to the combined rate of tax applied to cigarettes, with funding for the Cigarette and Tobacco Products Surtax Fund and California Children and Families First Trust Fund. Effective July 1, 2019, through June 30, 2020, the rate is 56.93 percent of the wholesale cost.

^{4/} Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. Special rates also apply to certain pension and profit sharing plans, surplus lines, certain health insurance, and nonadmitted insurance.

^{5/} For return to cities and counties. Trailer coach license fees are deposited in the General Fund.

^{6/} As part of SB 1 implemented beginning November 1, 2017, the rate was increased from 29.7 cents to 47.3 cents and indexed for inflation beginning in 2020-21. The fund is used for administrative expenses and apportionment to State, counties and cities for highways, airports, and small craft harbors.

^{7/} As part of SB 1, the rate was increased from 16 cents to 36 cents and indexed with inflation beginning in 2020-21.

^{8/} For support of State Department of Motor Vehicles, California Highway Patrol, other agencies, and motor vehicle related programs. A \$10 increase was effective April 1, 2017.

^{9/} Proposition 30 was passed by the California voters in November 2012. Proposition 30, for tax years 2012 through 2018, created three new income tax brackets with rates of 10.3 percent for taxable income over \$250,000, 11.3 percent for taxable income over \$300,000, and 12.3 percent for taxable income over \$500,000. Proposition 55 was passed by the California voters in November 2016 and extended these new income tax brackets until 2030.

^{10/} The 7.25-percent rate includes the rates for General Fund, Special Funds, and uniform local rates. Additionally, cities and counties may generally assess up to an additional 2.00 percent to the statewide rate.

The significant increase in transfers, particularly the expanded unemployment compensation, has been a primary support for the economy and likely held off a more pronounced downturn. However, the Governor's Budget forecast assumes that support for the unemployed would end early in 2021. The Budget forecast did not assume any additional federal stimulus support, or continued support for unemployed persons beyond what was in place at the end of November.

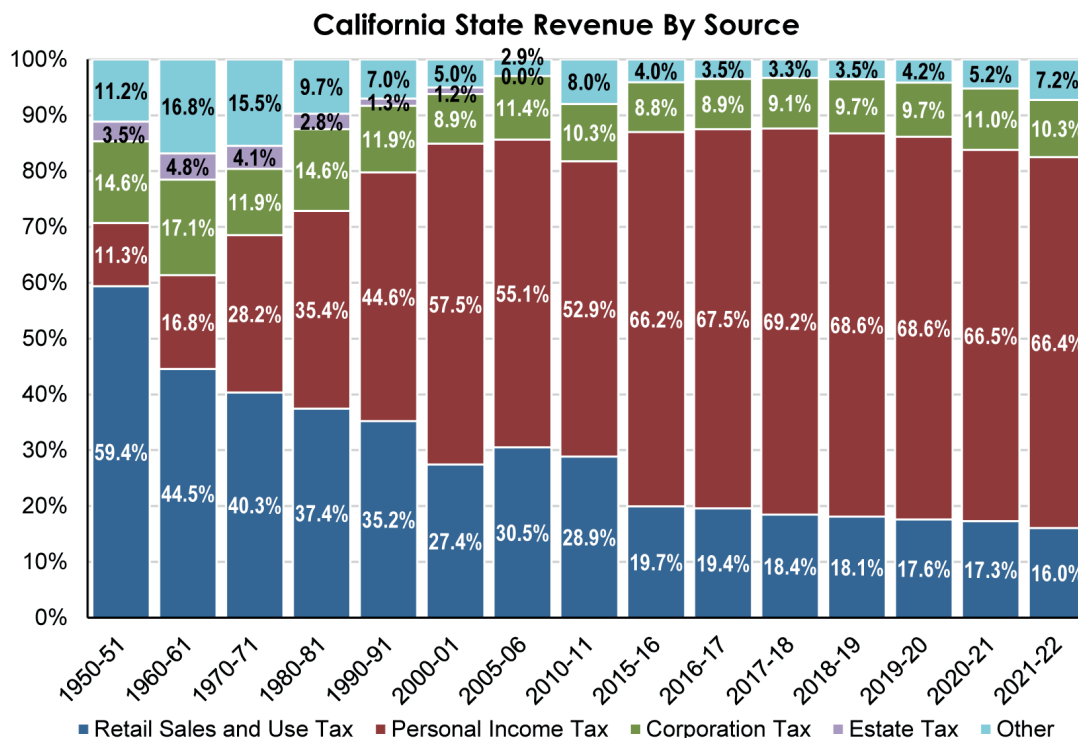

It was expected that this loss of compensation will cause a slowdown in economic growth. The slowdown should not be a significant drag on the income of high-income households, however, and thus will only have a slight dampening impact on revenue. However, if the impact of the slowdown spreads to higher-income individuals or the stock market, then the impact on revenues could be significant. This is a major risk for the revenue forecast. While the enactment of the recent federal COVID-19 relief bill includes extended unemployment compensation will provide a direct support to the economy as a whole in 2021, it may not have a significant impact on revenue since the forecast already assumes that high income personal income taxpayers will be largely insulated from the downturn.

GENERAL FUND REVENUE

The California State Revenue by Source figure shows how the breakdown of General Fund revenues by tax source has changed over time. In 1950-51, sales tax revenue made up over 50 percent of General Fund revenues while personal income tax revenue made up just more than 11 percent. That relationship has changed dramatically over time, and, for 2021-22, personal income tax makes up 66.4 percent of all General Fund revenues.

LONG-TERM FORECAST

The Long-Term Revenue Forecast figure shows the forecast for the three largest General Fund revenues (personal income tax, sales tax, and corporation tax) from 2019-20 through 2024-25. Total General Fund revenue from these sources is expected to grow from \$139 billion in 2019-20 to \$155.8 billion in 2024-25. The average year-over-year growth rate for this period is 1.9 percent. Although this average growth rate is significantly better than what was forecast for the 2020 Budget Act, it is far lower than the average growth rate since the 2009-10 fiscal year of 6.4 percent.

Long-Term Revenue Forecast - Three Largest Sources

(General Fund Revenue - Dollars in Billions)

	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25	Average Year-Over- Year Growth
Personal Income Tax	\$99.5	\$102.2	\$107.4	\$108.4	\$109.3	\$112.4	2.1%
Sales and Use Tax	25.5	26.5	25.9	26.7	27.4	28.2	1.3%
Corporation Tax	14.0	16.9	16.6	15.8	14.9	15.2	1.6%
Total	\$139.0	\$145.7	\$149.9	\$150.9	\$151.6	\$155.8	1.9%

Note: Numbers may not add due to rounding.

The economic forecast reflects economic growth after 2020 with real GDP growth averaging 2.8 percent through 2024. These forecasts will be revised at the May Revision to account for the effects of the late December federal COVID-19 relief bill.

STRESS TEST

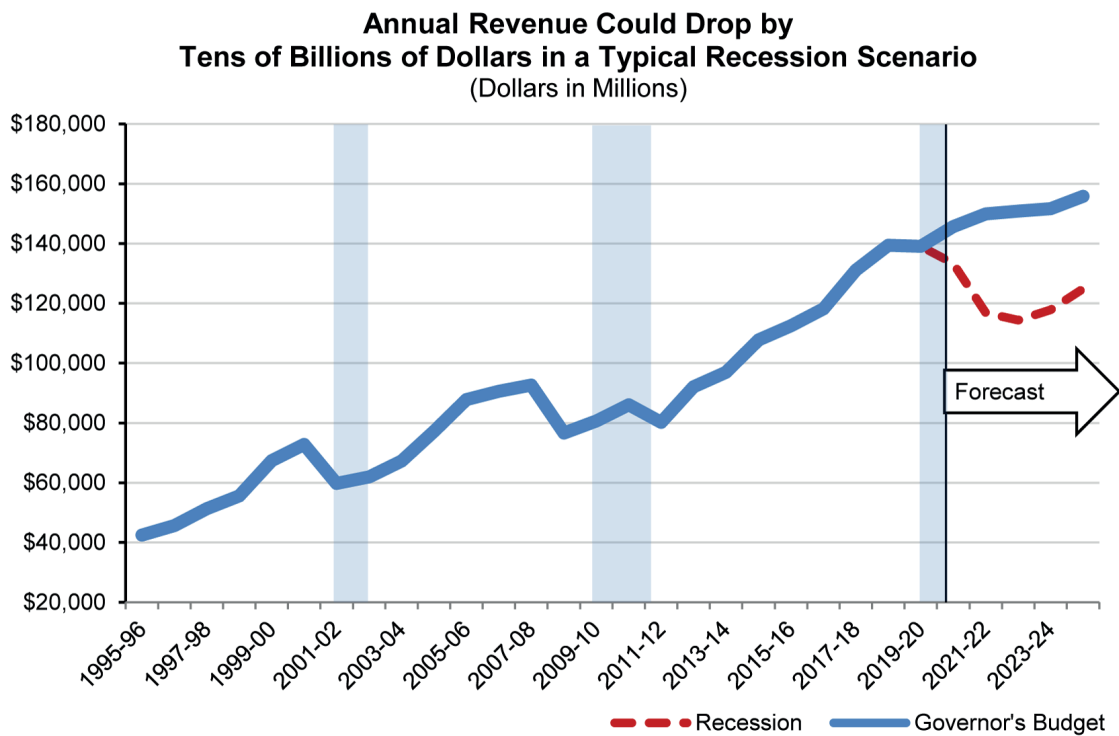

The economic recovery is forecast to continue. However the lapsing of COVID-19-related economic support in early 2021 was expected to be a drag on growth, particularly to the prospects of low-income households who have borne the brunt of the pandemic. A main risk to California revenues is a spreading of the economic effects of the COVID-19 Pandemic to high-income households, who have

largely been shielded and which have kept personal income tax revenues high. A fall in the stock market, more widespread unemployment, or a sharp rise in bankruptcy filings could all shift more of the burden of the COVID-19 Pandemic to high-income households and ripple through to declines in revenue. In addition, climate change and extreme weather events pose risks to both economic and revenue growth. The recently enacted federal COVID-19 relief bill reduces the likelihood of a continued recession or the slowdown that is built into the underlying economic forecast. It is not likely that this bill will cause revenues to increase significantly relative to the baseline forecast. However, the revenue forecast will be updated for the May Revision when the impact of the relief bill is more apparent.

If the economy slows down more than expected in the first quarter of 2021, revenue declines could be significant. The Recession Scenario Revenue figure shows a history of California's three largest revenue sources—personal income tax, sales tax, and corporation tax—along with revenue projections for the budget forecast and for a scenario that assumes a continuation and expansion of the recession through the end of 2021. Under this scenario, revenue losses result from a decline in wages of about 10 percent compared to the forecast (about \$7 billion in revenue) and by a significant drop in capital gains realizations due to a 45-percent stock market correction. The shaded areas in this figure reflect the timing of the 2001 recession, the 2008-09 recession, and the current recession combined with the extended recession scenario. While the actual revenue declines in the past two recessions were significant (as shown in this figure), tax law changes temporarily increased revenues to lessen the declines. Revenue losses in this recession forecast would total over \$100 billion (an average of over \$30 billion per year) for three years, continue with more years of revenue declines in the range of \$30 billion, and lead to a permanently lower revenue base compared to the current forecast.

TAX PROPOSALS

The Budget includes several proposals intended to encourage economic recovery, support for those most hurt by the current economic situation, and incentives for progress in achieving California's climate goals. Many of these proposals—a temporary increase in CalCompetes credits, a one-time expansion of the California Alternative Energy and Transportation Financing Authority sales tax exclusion, and a temporary deferral of property tax reassessment for zero-emission vehicle charging stations—are discussed in more detail in other chapters (Equitable and Broad-Based Economic Recovery Chapter and Climate Change Chapter).

This discussion will focus on the two remaining proposals.

GOLDEN STATE STIMULUS

The Golden State Stimulus is intended to provide immediate cash support to families most likely to have suffered economically from the COVID-19 Pandemic. Regardless of income, all Californians pay a variety of taxes, including on the purchase of taxable goods. This proposal would refund \$600 of those taxes to all 2019 taxpayers who received a California Earned Income Tax Credit (Cal EITC) in 2020 as well as to 2020 taxpayers with individual tax identification numbers (ITINs) who receive a Cal EITC in 2021. Focusing on EITC recipients allows for a timely identification and location of the population that likely started 2020 with few resources. Lower-wage workers also disproportionately lost their jobs during the pandemic. The payments would be sent in February and March of 2021. ITIN taxpayers would receive the additional tax refund after they file their 2020 tax return, typically in February through April of 2021. The timing of these refunds is meant to help low-income households facing the end of the eviction moratorium. This tax refund is expected to cost \$2.4 billion in 2020-21.

ELECTIVE S-CORPORATION TAX

The Elective S-corporation Tax is an additional 13.3 percent rate on taxable income on top of the regular 1.5 percent. As corporations, S-corporations are allowed to deduct

that tax from their taxable income for federal and state tax purposes. Shareholders pay personal income taxes on S-corporation income, at a rate of up to 13.3 percent. In return for the Elective S-corporation Tax, the S-corporation shareholders are allowed a credit against tax equal to 13.3 percent of their S-corporation income. This tax would help taxpayers recoup some of the tax benefits lost by Californians when the State and Local Tax deduction was limited as part of the 2017 federal Tax Cut and Jobs Act. The Elective S-corporation Tax is expected to on net produce a revenue gain between \$0 and \$20 million starting in 2021-22.

PERSONAL INCOME TAX

While the personal income tax forecast has been significantly upgraded since the 2020 Budget Act, the compounded annual growth rate is below typical rates seen prior to the COVID-19 Pandemic. For example, from 2012-13 to 2018-19, annual personal income tax revenues grew at a rate above 6 percent, while from 2018-19 to 2021-22 annual growth is only expected to be around 3 percent. The personal income tax is the state's largest revenue source and is expected to comprise 66.4 percent of all General Fund revenues in 2021-22.

The personal income tax is expected to generate \$99.5 billion in 2019-20, \$102.2 billion in 2020-21, and \$107.4 billion in 2021-22. These figures reflect an increase of \$3.9 billion in 2019-20, \$24.6 billion in 2020-21 and \$29.8 billion in 2021-22, relative to the 2020 Budget Act.

Modeled closely on federal income tax law, California's personal income tax is imposed on net taxable income—gross income less exclusions and deductions. The tax rate structure is progressive over the income spectrum. Since the 2012 tax year, the marginal rates ranged from 1 percent to 12.3 percent, not including a 1-percent surcharge on taxable income above \$1 million for the Mental Health Services Act tax. Proposition 30 created three additional income tax brackets beginning in 2012 with rates of 10.3 percent for taxable income above \$500,000, 11.3 percent for taxable income above \$600,000, and 12.3 percent for taxable income above \$1 million, with the income thresholds indexed for inflation. Proposition 30 held these tax brackets in effect for seven years—tax years 2012 to 2018. Voters approved Proposition 55 in November 2016, extending the three additional tax brackets through tax year 2030.

The largest income source for the personal income tax is wages and salaries. Although the year-over-year growth rate for wages tends to be less volatile than other income sources, wages and salaries include some unpredictable types of compensation such

as stock grants, restricted stock units, stock options, and bonus payments. In 2018, taxes attributable to wages and salaries accounted for nearly 58 percent of personal income tax revenues.

A higher forecast for economic wages, combined with wage growth accruing disproportionately to higher-income earners that are taxed at higher rates, is expected to increase withholding receipts by about \$24 billion over fiscal years 2020-21 and 2021-22. Economic wage growth was revised higher in 2020 from -12.8 to -1.5 percent. However, based on the strong tax withholding that occurred in 2020 in spite of the drop in economic wages, the wage declines are likely being felt largely by low-income households, while high-income households are either unaffected, or, in some cases, actually seeing wage increases during the COVID-19 Pandemic. Therefore, the 1.5-percent drop in wages masks the fact that many households, particularly those that were already in a precarious economic situation, are facing significant declines in their wages. The expected growth for economic wages is reduced from 3.2 percent to 1.4 percent in 2021. While the forecast for the levels of economic wages and personal income tax withholding receipts has been upgraded significantly, sectors that comprise more low-wage earners such as retail and leisure and hospitality are faring relatively poorly compared to higher-income sectors due to the COVID-19 Pandemic.

This forecast assumes that there will not be a significant change in migration patterns between California and other states, with net outflows appearing to have continued in 2020. International immigration typically brings hundreds of thousands of people to the state, outweighing the losses in domestic migration. However, immigrant visa processing has been largely suspended since the beginning of the pandemic. As a result of the large increase in teleworking brought about by the COVID-19 Pandemic, it is possible that there will be a significant increase in out-migration from California. If the increase occurs, is large enough, and tends to affect mainly high-income households, actual personal income tax revenues may fall significantly below projections.

A portion of personal income tax revenue is deposited into a special fund instead of the General Fund. Proposition 63, passed in November 2004, imposes a surcharge of 1 percent on taxable income over \$1 million. Revenue from the surcharge is transferred to the Mental Health Services Fund and used to fund mental health programs. Revenues of \$2.4 billion are estimated for 2019-20. The forecast also projects annual revenues of \$2.5 billion for 2020-21 and \$2.6 billion for 2021-22. The General Fund and the Mental Health Services Fund shares of personal income tax revenues for 2019-20 through 2021-22 are shown in the Personal Income Tax Revenue figure.

This forecast reflects a one-time revenue reduction of \$2.4 billion in 2020-21 for the provision of low-income tax refunds. The policy changes included in the Budget related to the expansion of the California Competes Tax Credit and the Main Street Small Business Hiring Tax Credit are expected to reduce personal income tax revenues by \$9.5 million in 2020-21 and \$35.8 million in 2021-22. In addition, the Elective S-corporation Tax and owner credit is expected to reduce personal income tax revenues on an ongoing basis by an unknown amount starting in 2021-22. These reductions will be more than offset by revenue gains at the entity level.

Personal Income Tax Revenue

(Dollars in Thousands)

	2019-20 Preliminary	2020-21 Forecast	2021-22 Forecast
General Fund	\$99,509,305	\$102,208,381	\$107,360,147
Mental Health Services Fund	2,369,653	2,540,417	2,635,717
Total	\$101,878,958	\$104,748,798	\$109,995,864

CAPITAL GAINS

The stock market has grown much more in 2020 than in a typical recession, which benefits mainly higher-income households. Taxes attributable to capital gains made up 16.5 percent of personal income tax revenue in 2018, which is only 4.8 percentage points below the last cyclical peak in 2007 of 21.4 percent. Capital gains realizations in 2020, 2021 and 2022 were revised sharply higher since the 2020 Budget Act forecast from \$119 billion to \$174 billion in 2020, \$70 billion to \$185 billion in 2021, and from \$84 billion to \$177 billion in 2022 based on a stock market forecast that has been revised significantly upward. There are two factors that are likely contributing to the strength of the stock markets. One factor is the Federal Reserve's expansionary monetary policy and the other factor is an increased savings rate for high-income households. The COVID-19 Pandemic has made the consumption of certain services, such as travel and entertainment, difficult. This constrained consumption has likely led to higher savings rates for high-income households. Combined with low interest rates, this is likely to lead to high-income households investing in corporate equities.

The Governor's Budget forecast projects that the S&P 500 will be at 3,589 in the first quarter of 2021, and will contract annually at approximately 0.25 percent. The 2020 Budget Act had forecast the S&P 500 to be at 2,060 in the first quarter of 2021, and to grow at 5.5 percent per year. Capital gains decline from their peak levels in 2021 to reach 4.5 percent of personal income by 2025, the same year reversion to this level was

assumed in the Budget Act. Due to the slight declines expected from the stock market due to its current high valuation, year-over-year declines in capital gains realizations are expected for 2022, 2023, 2024 and 2025.

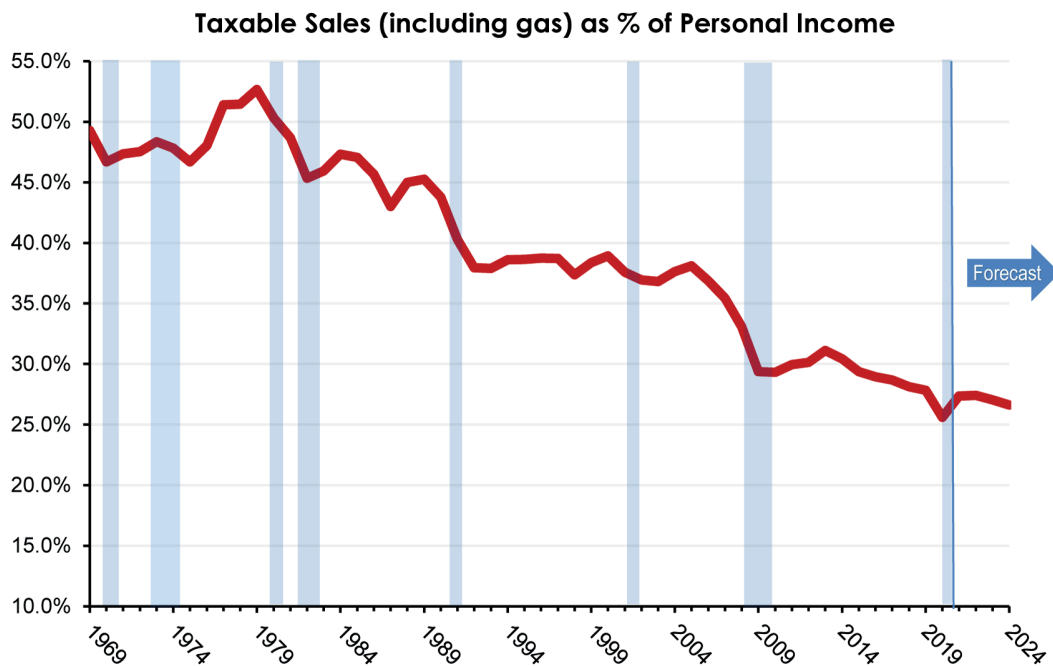

The higher levels and valuations in the stock market and the higher levels of forecasted capital gains increase the risk of a large stock market drop leading to a large decline in capital gains revenues. The forecast for capital gains realization in 2020 and 2021 represent 6.3 percent and 7 percent of California personal income, respectively. These levels are still below but approaching the peaks of 8.4 percent in 2007 and 10.4 percent in 2000. Following those prior peaks, capital gains as a percent of personal income declined to 1.9 percent in 2009 and 2.8 percent in 2002, which represented peak-to-trough declines in capital gains realizations of 78 percent and 72 percent, respectively.

SALES AND USE TAX

The severity of the COVID-19 Pandemic's effect on taxable spending has proven to be far smaller than expected, due in part to a shift in spending from services to goods, which are more likely to have sales tax levied on them than services. The sales and use tax (sales tax) generated General Fund revenue of \$25.5 billion in 2019-20 and is expected to generate \$26.5 billion in 2020-21 and \$25.9 billion in 2021-22. Relative to the 2020 Budget Act, these figures reflect an increase of \$555 million in 2019-20, an increase of \$5.9 billion in 2020-21, and an increase of \$2.3 billion in 2021-22. Receipts from the sales tax, the state's second largest revenue source, are expected to contribute 16 percent of all General Fund revenues in 2021-22.

The sales tax is generally applied to the sale of merchandise, including vehicles, in the state. Sales tax revenues are forecast by relating taxable sales to consumption of taxable goods and business investment. Forecasted levels of sales tax revenue are much higher than those of the 2020 Budget Act, with a significantly more optimistic economic forecast leading to an upgraded forecast for both consumer spending and private investment. The state has benefitted from legislation passed in the wake of *South Dakota vs. Wayfair, Inc.*, which has allowed California to capture taxes on sales that have shifted online due to COVID-19. Preliminary tax return data indicates that online taxable sales more than tripled in the first half of calendar year 2020 when compared to the first half of calendar year 2019. Finally, the forecast continues to reflect the long-term trend of deterioration of the sales tax base. This deterioration is evidenced by taxable sales as a percentage of personal income declining from over

50 percent in the late 1970s to 28 percent in 2019 as shown in the Taxable Sales as a Percentage of Personal Income figure.

The State Sales Tax Revenue figure displays total sales tax revenues for the General Fund and various special funds for 2019-20 through 2021-22.

State Sales Tax Revenue
(Dollars in Thousands)

	2019-20 Actual	2020-21 Forecast	2021-22 Forecast
General Fund	\$25,495,445	\$26,508,494	\$25,924,665
Sales and Use Tax-1991 Realignment	3,584,804	3,768,502	3,736,906
Sales and Use Tax-2011 Realignment	7,050,195	7,427,178	7,276,713
Public Transportation Account	917,430	735,995	763,838
Total	\$37,047,874	\$38,440,169	\$37,702,122

The State and Local Sales Tax Rates figure displays the individual elements of the state and local sales tax rates.

The Combined State and Local Sales and Use Tax Rates by County figure shows combined state and local tax rates for each county, including special rates for certain cities within those counties. The average statewide sales tax rate was 8.56 percent at the beginning of 2020-21.

State and Local Sales and Use Tax Rates (as of January 1, 2021)

State Rates		
General Fund	3.9375%	The permanent rate of 3.94% may be temporarily reduced by 0.25% if General Fund operating reserves exceed specified levels.
Local Revenue Fund 2011	1.0625%	Revenues attributable to a rate of 1.0625 percent are dedicated to the Local Revenue Fund 2011 for realignment.
Local Revenue Fund	0.50%	Dedicated to local governments to fund health and social services programs transferred to counties as part of 1991 state-local realignment.
Local Uniform Rates^{1/}		
Bradley-Burns	1.00%	Imposed by city and county ordinance for general purpose use. ^{2/}
Transportation Rate	0.25%	Dedicated for county transportation purposes.
Local Public Safety Fund	0.50%	Dedicated to cities and counties for public safety purposes by Proposition 172.
Local Add-on Rates^{3/}		
Transactions and Use Taxes	up to 2.00%	May be levied in 0.125% or 0.25% increments up to a combined maximum of 2.00% in any county. ^{4/} Any ordinance authorizing a transactions and use tax requires approval by the local governing board and local voters.
^{1/} These locally imposed taxes are collected by the state for each county and city and are not included in the state's revenue totals.		
^{2/} The city tax constitutes a credit against the county tax. The combined rate is never more than 1 percent in any area.		
^{3/} These taxes may be imposed by voters in cities, counties, or special districts. The revenues are collected by the state for each jurisdiction and are not included in the state's revenue totals.		
^{4/} Various jurisdictions are authorized in statute to have a higher cap than 2.00%.

Food service sales were the largest contributors to the sales tax base in calendar year 2019, comprising around 12.2 percent of taxable sales. Motor vehicle and parts dealers were the second-largest contributor to the sales tax base in 2019, with 12.1 percent. The third most significant contributor to the sales tax base is wholesale trade, which comprised 11.7 percent of the sales tax base.

Since July 1, 2010, the General Fund portion of the sales tax no longer applies to gasoline. Taxable sales, excluding gasoline, increased by 3.6 percent in 2018-19. Based on preliminary data, estimates of taxable sales decreased by 2.2 percent in 2019-20. Taxable sales are expected to increase by 5.4 percent in 2020-21 and decrease by 2 percent in 2021-22.

A General Fund sales tax exemption for manufacturing equipment commenced July 1, 2014. The sales tax exemption applies to purchases of manufacturing or biotechnology research and development equipment valued at up to \$200 million in qualifying purchases per business per year. The exemption was expanded beginning in 2018 to include manufacturing equipment used in electric power generation and agricultural processing. The revenue loss from the utilization of this exemption was \$281 million in 2019-20, and is forecast to be \$291 million in both 2020-21 and 2021-22.

The U.S. Supreme Court's ruling in *South Dakota v. Wayfair, Inc.* in June 2018 clarified states' authority to require out-of-state sellers to collect use tax. Previously, California individuals were responsible for reporting and paying use tax on out-of-state purchases. The California Department of Tax and Fee Administration required out-of-state retailers to collect and remit use tax beginning on April 1, 2019 if in the preceding or current calendar year their sales into California exceed \$100,000 or 200 or more separate on-line transactions. Additionally, California passed the Marketplace Facilitator Act, Chapter 5, Statutes of 2019, which raised the sales threshold to \$500,000, eliminated the 200-transaction test, and mandated that online marketplace operators, as defined, collect and remit sales tax for all sales made on their platforms beginning October 1, 2019. These policies helped capture much of the shift to online transactions in the COVID-19 Pandemic.

The expansion of the Main Street Small Business Tax Credit and the one-time expanded allocation for the California Alternative Energy and Advanced Transportation Financing Authority sales and use tax exclusion program are together expected to reduce General Fund sales tax revenues by \$19 million in 2020-21 and \$67 million in 2021-22. See the Equitable and Broad-Based Recovery Chapter for more information.

CORPORATION TAX

The upgrade to the corporation tax revenue forecast is due to an improved forecast for C-corporation profits as large businesses that pay the significant majority of the state corporate taxes have in large part been able to adapt to the COVID-19 Pandemic. However, corporate profits are still expected to decline by 5 percent in 2020-21 and grow only 2 percent in 2021-22, which is below normal growth rates that are in line with nominal GDP that is typically around 4 to 5 percent. The forecast for S-corporation profits, which are taxed at 1.5 percent at the business entity level, was also upgraded since the 2020 Budget Act. S-corporation profits are forecast to decline by 10.1 percent in 2020-21 and then grow by 1.6 percent in 2021-22, well below normal growth rates that would be in line with nominal GDP.

The corporation tax is expected to generate \$14 billion in 2019-20, \$16.9 billion in 2020-21, and \$16.6 billion in 2021-22. These figures reflect increases of \$165 million in 2019-20, \$414 million in 2020-21, and \$737 million in 2021-22 above 2020 Budget Act projections. Corporation tax revenues are expected to contribute 10.3 percent of all General Fund revenues in 2021-22, down more than 4 percentage points from the 14.6 percent contributed in 1980-81.

The temporary business tax credit limitation and temporary suspension of net operating loss provisions that were adopted in the 2020 Budget Act are expected to increase corporate tax revenue by \$3.7 billion in 2020-21 and by \$3.3 billion in 2021-22. These estimates were downgraded from the 2020 Budget Act by \$475 million in 2020-21 and upgraded by \$190 million in 2021-22. The revenue estimate related to these provisions is highly uncertain and represents a significant risk to the corporate tax revenue forecast.

The policy changes included in the Budget related to the expansion of the California Competes Tax Credit and the Main Street Small Business Hiring Tax Credit are expected to reduce corporate tax revenues by \$9.5 million in 2020-21 and \$40.8 million in 2021-22. In addition there will be additional, ongoing, and unknown revenue gains from the Elective S-corporation Tax as well as revenue losses beyond the budget year related to the \$500 million increase in the budget year allocation of low-income housing tax credits.

INSURANCE TAX

Most insurance policies written in California are subject to a 2.35-percent gross premiums tax. This tax takes the place of all other state and local taxes on insurance

companies except those on real property and motor vehicles. In general, the basis of the tax is the amount of "gross premiums" received, less returned premiums. The insurance tax is expected to generate General Fund revenues of \$3.3 billion in 2020-21 and \$3.3 billion in 2021-22. These figures reflect an increase of \$267 million in 2020-21 and \$231 million in 2021-22 above 2020 Budget Act projections.

ALCOHOLIC BEVERAGE TAXES

In addition to the sales tax paid by retail purchasers, California levies an excise tax on distributors of beer, wine, and distilled spirits. The tax rates per gallon are applied as follows: (1) \$0.20 for beer, dry wine, and sweet wine; (2) \$0.30 for sparkling wine; and (3) \$3.30 for distilled spirits.

Alcoholic beverage revenue estimates for each type of beverage are based on projections of total per capita consumption and population growth. Overall, consumption growth of alcoholic beverages is expected to be flat in 2020-21 and 0.4 percent in 2021-22. Revenues from this tax were \$383 million in 2019-20 and are forecast to be \$385 million in 2020-21 and \$389 million in 2021-22.

CANNABIS EXCISE TAXES

Proposition 64, commonly referred to as the Adult Use of Marijuana Act, levies excise taxes on the cultivation and retail sale of both recreational and medical cannabis as of January 1, 2018. The cultivation tax is paid on all recreational and medicinal cultivation of cannabis, and was increased, to adjust for inflation, to \$9.65 per ounce of flower, \$2.87 per ounce of trim, and \$1.35 per ounce of fresh cannabis plant on January 1, 2020. The increase scheduled for 2021 was paused in order to provide tax relief to the cannabis industry. In addition, there is a 15-percent tax on the retail price of cannabis. Cannabis excise taxes generated \$491 million in 2019-20 and are expected to generate \$544 million in 2020-21 and \$658 million in 2021-22.

CIGARETTE TAX

The California Healthcare, Research and Prevention Tobacco Tax Act of 2016 (Proposition 56), passed by the voters in November 2016, increased the excise tax rate on cigarettes, tobacco products, and electronic cigarettes. The excise tax increased by \$2 from 87 cents to \$2.87 per pack of 20 cigarettes on distributors selling cigarettes in California, effective April 1, 2017. The equivalent excise tax on the distribution of other

tobacco products such as cigars, chewing tobacco, pipe tobacco, and snuff also increased by \$2 from a \$1.37-equivalent to a \$3.37-equivalent tax, effective July 1, 2017. Lastly, Proposition 56 newly imposes the \$3.37-equivalent tobacco products tax on electronic cigarettes. The \$1.37-equivalent portion of that tax was imposed beginning April 1, 2017, while the additional \$2-equivalent tax was imposed beginning July 1, 2017. The ad valorem excise tax rate on other tobacco products is calculated annually by the California Department of Tax and Fee Administration based on the wholesale price of cigarettes and the excise tax on cigarettes. Chapter 34, Statutes of 2020 (SB 793) was enacted on August 28, 2020, and will ban all flavored tobacco products, including mentholated cigarettes and flavored e-cigarette liquids, beginning January 1, 2021. However, a referendum was submitted to the California Attorney General to overturn SB 793 and instead allow voters to decide on the flavor ban in the November 2022 statewide election. The California Secretary of State has until January 21, 2021 to verify signatures on the referendum. If the referendum is certified for the November 2022 election, then the flavor ban will be suspended until that time. Current cigarette and tobacco revenue estimates assume that the referendum does not have sufficient signatures and the flavor ban goes into effect on January 1, 2021.

Revenues from the tax on cigarettes and other tobacco products are distributed as follows:

- Ten cents of the per-pack tax is allocated to the General Fund.
- Fifty cents of the per-pack tax, and an equivalent rate levied on non-cigarette tobacco products, goes to the California Children and Families First Trust Fund for distribution according to the provisions of Proposition 10 of 1998.
- Twenty-five cents of the per-pack tax, and a rate equivalent to 87 cents levied on non-cigarette tobacco products and electronic cigarettes, is allocated to the Cigarette and Tobacco Products Surtax Fund for distribution as determined by Proposition 99 of 1988.
- Two cents of the per-pack tax is deposited into the Breast Cancer Fund.
- As of April 1, 2017, two dollars of the per-pack tax, and an equivalent rate levied on non-cigarette tobacco products and electronic cigarettes, goes to the California Healthcare, Research and Prevention Tobacco Tax Act of 2016 Fund for distribution according to the provisions of Proposition 56 of 2016.

Projections of cigarette tax revenues are based on projected per-capita consumption of cigarettes, population growth, and the impact from the higher smoking age as well

as the increased prices due to Proposition 56. Revenue estimates for other tobacco products, which now include electronic cigarettes, also reflect recent law changes. The cumulative effect of product price and tax increases, the increasingly restrictive environments for smokers, and anti-smoking campaigns (including state campaigns funded by Proposition 99 Tobacco Tax and Health Protection Act revenues and revenues from the Master Tobacco Settlement) have reduced cigarette consumption considerably.

Annual per-capita consumption (based on population ages 18-64) was 184 packs in 1980-81, 123 packs in 1989-90, 84 packs in 1997-98, and 24 packs in 2019-20. Total tax-paid packs of cigarettes sold in 2019-20 were 597 million. In 2020-21, tax-paid packs of cigarettes sold are forecast to decline to 572 million.

The Tobacco Tax Revenue figure shows the distribution of tobacco tax revenues to the General Fund and various special funds for 2019-20 through 2021-22.

Tobacco Tax Revenue

(Dollars in Millions)

	2019-20 Actual	2020-21 Forecast	2021-22 Forecast
General Fund	\$60.2	\$54.7	\$46.4
Cigarette and Tobacco Products Surtax Fund	\$215.7	\$202.4	\$174.1
Breast Cancer Fund	\$11.9	\$10.9	\$9.3
California Children and Families First Trust Fund	\$327.5	\$318.1	\$309.4
California Healthcare, Research and Prevention Tobacco Tax Act of 2016	\$1,342.5	\$1,249.8	\$1,063.0
Total	\$1,957.8	\$1,835.9	\$1,602.1

OTHER REVENUES

UNCLAIMED PROPERTY

The Budget reflects receipts in unclaimed property of \$437 million in 2020-21 and \$452 million in 2021-22. These numbers reflect ongoing efforts to maintain compliance of holders of unclaimed property with Unclaimed Property Law.

PROPERTY TAXES

Although the property tax is a local revenue source, the amount of property tax generated each year has a substantial impact on the state budget because local property tax revenues allocated to K-14 schools generally offset General Fund expenditures.

The Governor issued an executive order that waived penalties for property taxes paid after April 10, 2020 for taxpayers who demonstrate they have experienced financial hardship due to the COVID-19 Pandemic through May 6, 2021. Preliminary data for the secured property tax roll indicates that property tax collections increased 5.5 percent in 2019-20, which is modestly below the average growth of the prior five years of 6.2 percent but still in line with historical norms.

Assessed value growth is estimated based on statistical modeling and evaluations of real estate trends. The median sales price of existing single-family homes was just under \$600,000 in 2019, and hit new record highs above \$700,000 for the state as a whole. It is expected to rise by 10 percent in 2020, with activity in the 2020 calendar year driving 2021-22 assessed valuations for property tax purposes. This represents an acceleration in growth from 2015 to 2019 when median prices increased at an average rate of 5.7 percent. However, despite strong median price growth in residential single-family homes, the forecast for housing permits is expected to be weak in 2020 and decline 10.3 percent compared to the prior year, with particular weakness in multi-family units. While residential real estate turnover slowed down considerably due to the COVID-19 Pandemic in March through May 2020, turnover rebounded strongly and has been above pre-pandemic levels beginning July 2020.

Statewide property tax revenues are estimated to increase 4.6 percent in 2020-21 and 5.6 percent in 2021-22, up from 3.5 percent in 2020-21 and 5.5 percent in 2021-22 at the 2020 Budget Act, due in large part to the assumption of a lower rate of delinquencies. Approximately 48 percent (\$47 billion) of 2021-22 property tax revenues will go to K-14 schools. This includes \$2.6 billion that schools are expected to receive in 2021-22 pursuant to the dissolution of redevelopment agencies.

SPECIAL FUND REVENUE

The California Constitution and state statutes specify into which funds certain revenues must be deposited and how they are to be spent.

Total special fund revenues, excluding transfers, are estimated to be \$58 billion in 2021-22. Taxes and fees related to motor vehicles are expected to comprise 32.3 percent of all special fund revenue in 2021-22. The principal sources are motor vehicle fees (registration, weight, and vehicle license fees) and motor vehicle fuel taxes. During 2021-22, it is expected that about \$18.7 billion in revenues will be derived from the ownership or operation of motor vehicles.

MOTOR VEHICLE FEES

Motor vehicle fees and taxes consist of vehicle license, registration, weight, drivers license, and other charges related to vehicle operation. The Motor Vehicle Fees Special Fund Revenue figure displays revenue from these sources from 2019-20 through 2021-22.

Motor Vehicle Fees Special Fund Revenue

(Dollars in Thousands)

	2019-20 Actual	2020-21 Forecast	2021-22 Forecast
Vehicle License Fees	\$2,806,823	\$2,995,688	\$2,943,423
Registration, Weight, and Other Fees	5,178,671	5,455,120	5,559,683
Transportation Improvement Fee	1,737,699	1,833,000	1,909,000
Total	\$9,723,193	\$10,283,808	\$10,412,106

The Vehicle License Fee (VLF) is imposed on vehicles registered in California that travel on public highways. The current VLF tax rate is 0.65 percent plus a graduated fee at \$25 to \$175 per vehicle. These taxes are imposed in lieu of a local personal property tax on automobiles and are administered by the Department of Motor Vehicles. The number of vehicles in the state, the ages of those vehicles, and their most recent sales price affect the amount of VLF collected. The total number of vehicles in California—automobiles, trucks, trailers, and motorcycles, including vehicles registered in multiple states—is estimated to be 32.7 million in 2020-21 and 33.2 million in 2021-22. New vehicles registered in 2019-20 decreased 14.6 percent from the prior year as vehicle sales dropped significantly beginning in March due to the COVID-19 Pandemic. The forecast projects that vehicle sales will rebound and that there will be 2.3 million new vehicles registered in 2020-21 and 2.2 million new registered vehicles in 2021-22; however, these levels are still modestly below the 2.3 to 2.4 million new vehicle registrations seen in the prior five years from 2014-15 to 2018-19.

Beginning April 1, 2017, the base vehicle registration fee of \$43 increased by \$10 and was newly indexed to inflation. The total vehicle registration fee is expected to be \$92 in 2021, which includes \$61 for the base vehicle registration fee, \$28 for a CHP fee that continues to be indexed to inflation, and \$3 for an alternative fuel/technology fee not indexed for inflation.

In addition to the VLF, truck owners pay a fee based on vehicle weight. Weight fee revenues are expected to be \$1.2 billion in both 2020-21 and 2021-22.

Beginning July 1, 2020, an additional \$100 annual registration fee was imposed on zero-emission vehicles (ZEV) that are model 2020 or newer. The new ZEV revenue is expected to be \$7 million in 2020-21 and \$14.7 million in 2021-22, and will be used to fund transportation projects.

MOTOR VEHICLE FUEL TAXES

The motor vehicle fuel tax (gas tax), diesel fuel tax, and use fuel tax are the major sources of funds for maintaining, replacing, and constructing state highway and transportation facilities. Over one-third of these revenues are apportioned to local jurisdictions for a broad range of local road projects, including both maintenance of existing roads and construction of new roads. In addition, some jurisdictions choose to spend a portion of their allocation on improvements to the state highway system in their region to decrease traffic congestion. Motor vehicle fuel tax collections are shown in the Motor Vehicle Fuel Tax Revenue figure.

Motor Vehicle Fuel Tax Revenue

(Dollars in Thousands)

	2019-20 Forecast	2020-21 Forecast	2021-22 Forecast
Gasoline ^{1/}	\$6,544,213	\$6,782,059	\$7,340,699
Diesel	1,253,450	1,240,765	1,298,013
Total	\$7,797,663	\$8,022,824	\$8,638,712

^{1/}Does not include jet fuel.

Gasoline consumption was down 8.4 percent in 2019-20 compared to the prior fiscal year. Demand for gasoline was significantly reduced in the second half of the fiscal year by stay-at-home orders related to the COVID-19 Pandemic. Gasoline consumption is expected to continue its pandemic-related decline, decreasing by 3.8 percent in 2020-21 before recovering 5 percent in 2021-22. In the long run, continued gains in the average fuel economy of cars and trucks combined with the state's policies to reduce

greenhouse gas emissions are expected to support long-term declines in gasoline consumption.

Diesel consumption increased by 3.7 percent in 2019-20 as the strength in months leading up to the COVID-19 Pandemic in March more than offset pandemic-related weakness in the last part of the fiscal year. Because most diesel fuel is consumed by the commercial trucking industry, consumption is generally affected most significantly by general economic conditions. Therefore, because of the economic disruption resulting from the pandemic, diesel consumption is expected to decline by 4.9 percent in 2020-21, followed by a rebound of 2 percent in 2021-22. Long-term growth is expected to be negative 0.4 percent per year, reflecting a moderating economy and gradually improving fuel economy of the fleet.

The gas tax is collected from distributors when fuel is loaded into ground transportation for transport to retail stations. This fuel is taxed at a rate of 50.5 cents per gallon in 2020-21 and will be taxed at the rate of 52 cents per gallon in 2021-22.

Distributors pay the diesel fuel tax, which applies to both pure diesel fuel and blends, at the fuel terminal. The excise tax on diesel will be 38.5 cents per gallon for 2020-21 and will be 39.6 cents per gallon in 2021-22. Dyed diesel fuel, which is used for off-highway purposes such as farm equipment, is not taxed.

DEMOGRAPHIC INFORMATION

California's population growth has been slowing through 2019, and the disruptions of the COVID-19 Pandemic have increased deaths and reduced international migration. Public health shutdowns complicated a 2020 Census that forms the benchmark for understanding Californians and their circumstances until 2030. In addition, households were already grappling with inequality and a high cost of living. The COVID-19 Pandemic placed a heavier burden on those with the least.

2020 U.S. CENSUS

The 2020 Census was the most challenging in history. This was the first census to include an online option, and the U.S. Census Bureau was also planning to test new ways to use multiple sources of government administrative data. The first wave of COVID-19 Pandemic shutdowns coincided with the April 1 count date. Census offices were required to close, forcing delays in outreach efforts, the enumeration of group quarters, and non-response follow up. This altered schedule for completion of the census shortened the time period to check and confirm the accuracy of the count. In addition, prior to the start of the census, concerns about the inclusion of a citizenship question created skepticism and fear about responding among California's foreign-born population.

California had been preparing for three years to address the challenges of conducting the 2020 Census in a state as diverse as California. The state allocated \$187.2 million to establish the California Complete Count Committee (CCCC) which worked with local

partners to conduct extensive outreach programs to encourage Californians to participate in the census. Through these efforts, California increased its self-response rate from 68.2 percent in 2010 to 69.6 percent in 2020 despite the COVID-19 Pandemic. The U.S. Census Bureau collected inputs for households that didn't respond to achieve census information from 99.9 percent of California households.

As part of the preparations to incorporate new population information and use state administrative data more efficiently, the CCCC and the Department of Finance, in partnership with RAND, are conducting an intensive follow-up survey. This survey will assist the state in judging how to incorporate new data and methods for population estimates and projections, as well as understanding the effectiveness of CCCC operations and areas of improvement in outreach for the 2030 Census.

The U.S. Constitution requires that a census be conducted each decade. It also mandates that national and state population counts are expected by December 31, 2020 for congressional apportionment. Population counts are expected to be provided to states by April 1, 2021, for redistricting state and local political areas, but there is some uncertainty whether these deadlines will be met.

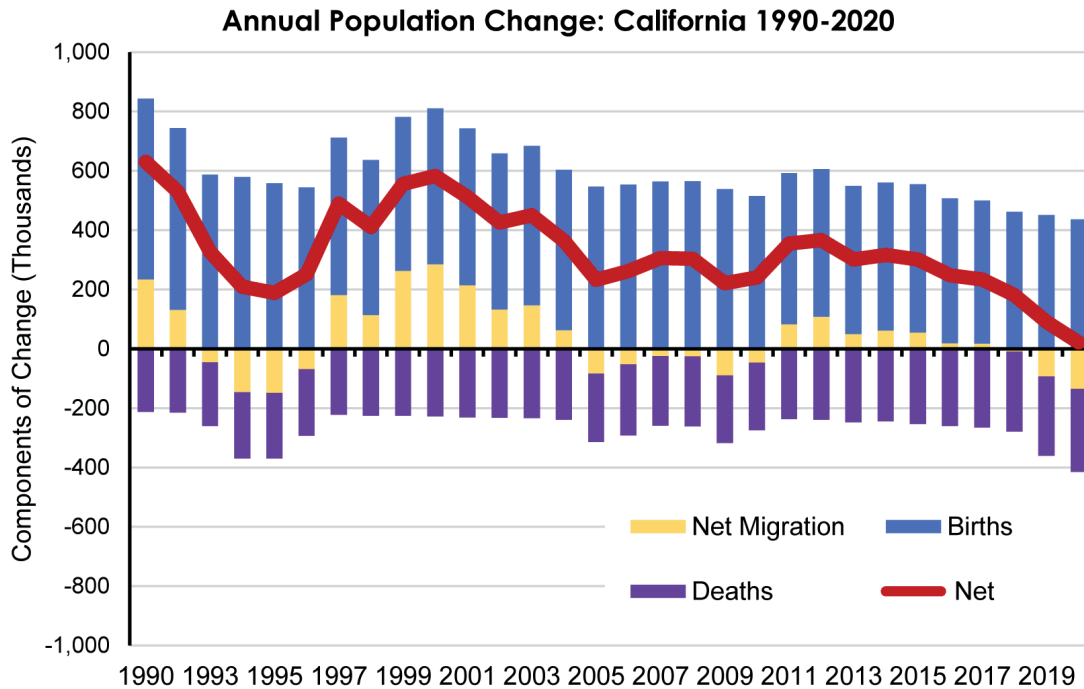

In addition to apportionment and redistricting, census data will be used as the benchmark for population estimates for the next decade, the base population for the American Community Survey and the distribution of billions of dollars in federal funding. In California, census data will become the new benchmark in state estimates starting with July 2021 estimates to be released in December 2021 and new population projections released in early 2022.

DEMOGRAPHIC OUTLOOK

California's population growth continues to slow as births fall, deaths from an aging population rise, and net migration into the state declines. California's population was estimated at 39.8 million as of July 1, 2020, up only 0.05 percent over July 1, 2019. The state's 0.6-percent average rate of growth since 2010 is comparable to the national growth rate during the same period (0.7 percent), and more than three times the European Union's population growth rate (0.2 percent).

In the last 40 years, California's population has grown from 23 million to almost 40 million. No state in the last 120 years has grown as fast as California, highlighting the unique nature of the post-World War II years. In the coming years, the state faces declining fertility rates as people spend more time in school, delay marriage, and face higher

costs of having children. The state is also likely to face lower net migration, given a sustained deficit in domestic net migration, and recent decreases in foreign net migration.

By far, the most important change across the last decade has been the drop in natural increase, or births minus deaths. Births have declined over 15 percent during the decade, while deaths have increased by over 10 percent (excluding COVID-19 deaths), as the share of the population over age 65 has grown much more rapidly than the total population. The combined effect is a drop of over 0.5 percent annually in California's growth rate, much larger than effects stemming from migration.

In normal years, California has positive international immigration which contributes a significant share to net growth in population. The political climate surrounding immigration in the last few years has put downward pressure on immigration. However, in 2020, international migration was further constrained by decisions the federal administration made to address the COVID-19 Pandemic. The suspension of immigration processing from May through December 2020 had significant impacts on the growth of California. While a continuing trend of higher domestic out-migration led to a net domestic outflow of almost 261,000, the declines in international migration are largely the reason for California's slowest growth rate in the last 100 years.

Regionally, inland counties continue to have the highest population growth rates, continuing a trend started in 2016. Most of the urban coastal counties have grown at a much slower pace and some have lost population. Despite the pandemic accelerating moves away from the coast, smaller rural counties lost population or grew very little as other amenity or cost-of-living factors have made other rural states more attractive. By the end of September, weekly deaths in California averaged over 700 above the three-year 2017-19 average, or roughly 15 percent higher. While official COVID-19 deaths account for some of this increase, the rest are attributable to other causes, including cancer, strokes, and heart disease. The impact of the COVID-19 Pandemic is likely broader than just the disease itself; it includes other deaths resulting from individuals delaying medical care and avoiding the emergency room for fear of the virus.

Among notable population challenges the COVID-19 Pandemic has brought are changes to group living environments. Federal and state prisons and assisted living facilities have had high infection rates. College dormitories were closed as classes converted to distance learning and students returned home. Population associated with these facilities are expected to continue to drop in the coming year which will have disparate impacts across the state.

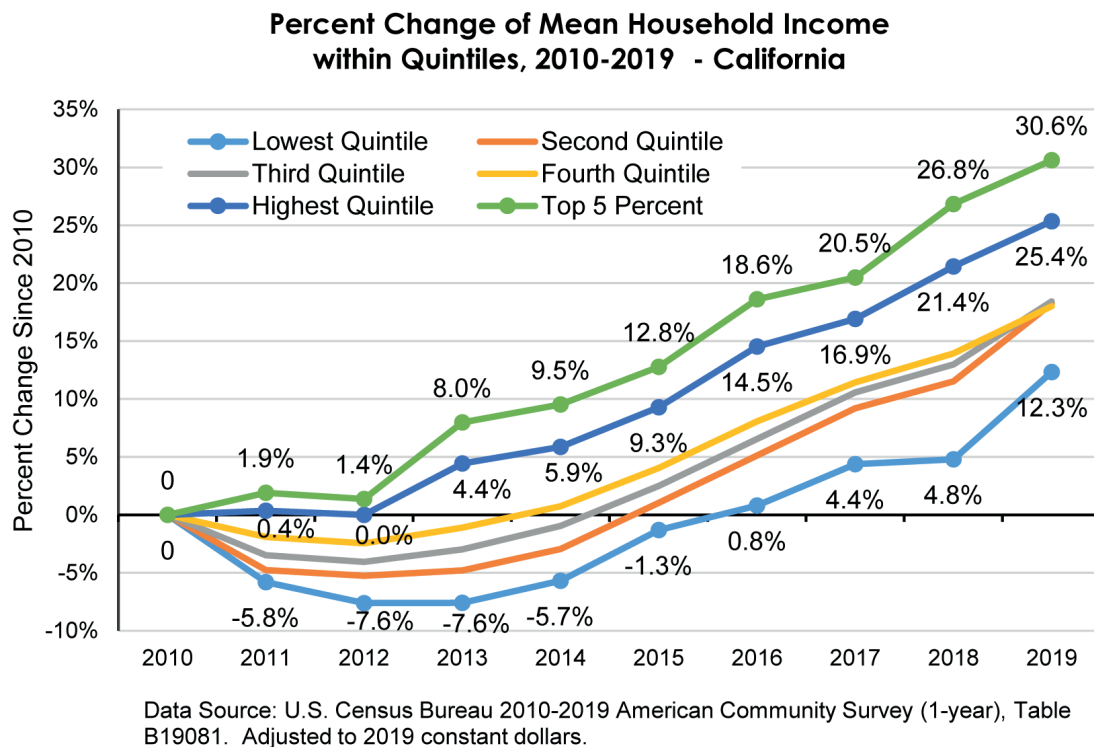

INEQUALITY — BEFORE AND AFTER COVID-19

The official poverty rate for California in 2019 from the 2019 American Community Survey (ACS) was 11.8 percent, down from 12.8 percent in 2018 and 15.8 percent in 2010. California is ranked twenty-sixth among all states. This was the lowest official poverty rate for California since 1990. The official poverty rate from the ACS looks only at the monetary income and structure of the family compared to standard thresholds for the U.S., and does not account for a higher cost of living in California. The Supplemental Poverty Measure from the Current Population Survey (CPS) sets thresholds based on geography and expands the definition of income to include the value of state and federal in-kind benefits. It also considers expenditures such as medical out-of-pocket payments, taxes, child care, commuting costs, and others. California's Supplemental Poverty Rate in 2019 was 16.6 percent, the highest of all states.

While 2020 data will not be available until September 2021, the U.S. Census Bureau has been collecting a Household Pulse Survey to measure more recent trends. As documented below, the pandemic hit lower-income households and workers hardest.

INCOME INEQUALITY

From 2010 to 2019, aggregate household income grew by 29 percent. However, some income groups fared better than others. The mean of a household income quintile (one-fifth of the total number of households) can be calculated by dividing aggregate household income for that group by the number of households. The mean household income for the state's top 5 percent of earners grew by more than 30 percent from 2010 to 2019, while household income for the lowest 20 percent of earners grew by 12 percent, (see figure on Percent Change of Mean Household Income).

Recovery from the Great Recession in terms of household income took longer for California households in the lowest quintile than it did for highest income households. Households in the top 5 percent and highest quintile did not experience reductions in mean income following the recession. By contrast, mean incomes of households in the lowest quintiles fell annually until 2014 (fourth quintile), 2015 (second and third quintile) and 2016 (lowest quintile) compared with the 2010 baseline.

From 2010 to 2019, income inequality expressed as the gap between the highest and lowest income levels has increased throughout the United States. However, the gap in California is much larger than for the United States. Household income in California for

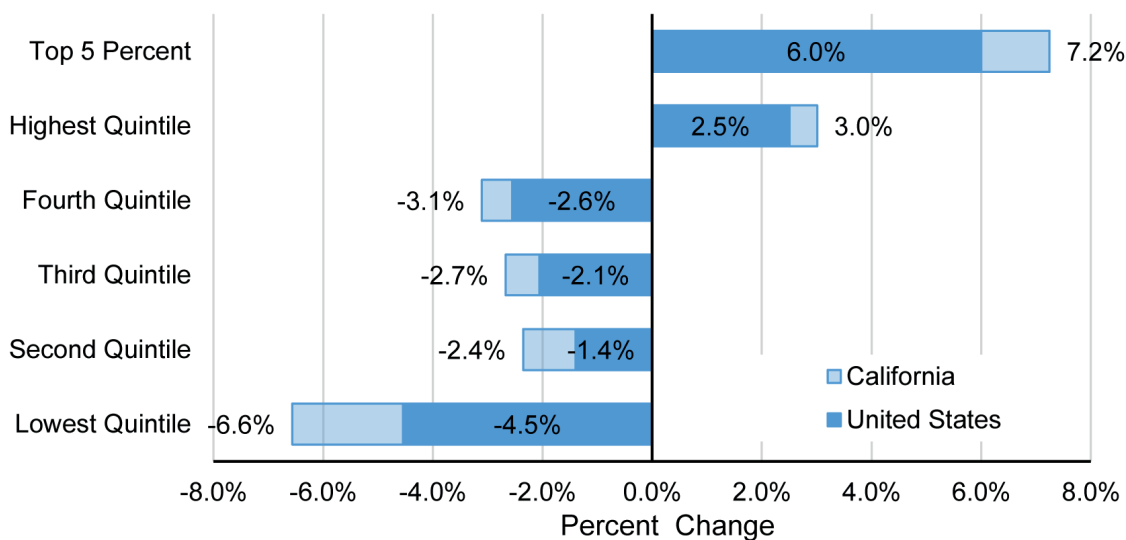

Mean Household Income by Quintile, California and US
(2019 constant dollars)

Quintile	California			United States		
	2010	2019	Percent Change	2010	2019	Percent Change
Lowest	\$15,118	\$16,981	12.3%	\$13,287	\$14,521	9.3%
Second	\$39,837	\$47,103	18.2%	\$34,675	\$39,139	12.9%
Third	\$68,138	\$80,693	18.4%	\$58,703	\$66,006	12.4%
Fourth	\$108,178	\$127,666	18.0%	\$92,577	\$103,917	12.2%
Highest	\$235,622	\$295,369	25.4%	\$201,812	\$238,035	17.9%
Top 5 Percent	\$406,552	\$531,014	30.6%	\$352,258	\$430,662	22.3%

the lowest quintile grew from \$15,000 to \$17,000, an increase of 12 percent. By contrast, income for households in the highest quintile grew from \$235,000 to \$295,000, an increase of 25 percent.

Further, shares of household income for the bottom four quintiles all fell (with household shares in the lowest quintile falling the furthest) while shares for the top quintile and top 5 percent of households increased. California's shares showed the same pattern, but reflected an even greater shift in household income between the bottom four quintiles and the highest quintile and top 5 percent of households than for the United States. Shares of household income by quintile measures the aggregate household income in each quintile as a percentage of the total aggregate income.

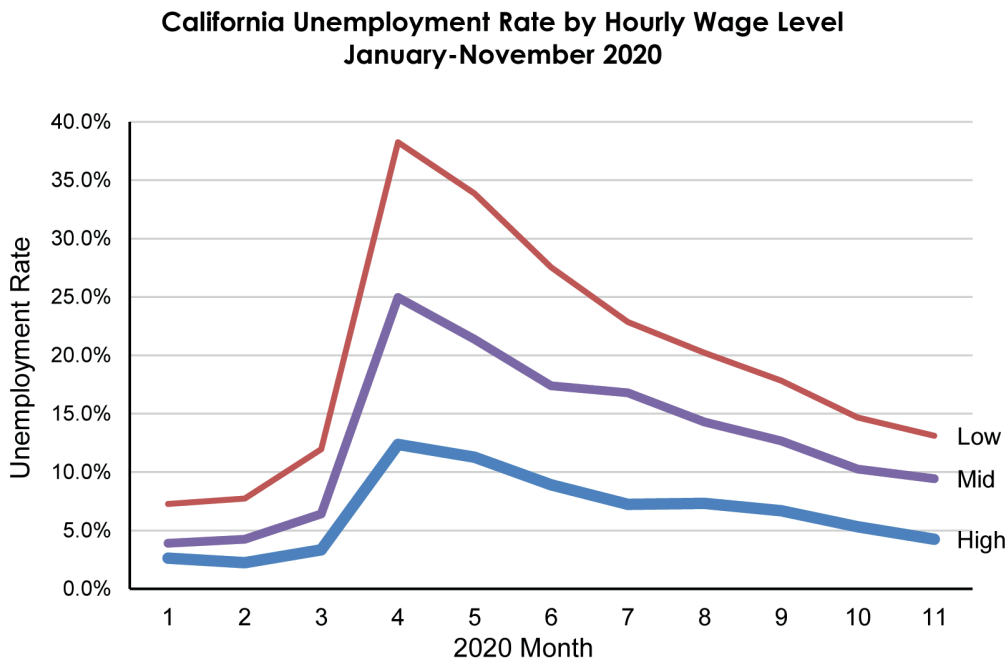

Percent Change in Share of Aggregate Household Income by Quintile - California and United States 2010-2019

Data Source: U.S. Census Bureau 2010-2019 American Community Survey (1-year), Table B19081.
Adjusted to 2019 constant dollars.

The COVID-19 Pandemic has disrupted the California economy, as discussed in the Economic Outlook Chapter, which includes information by industry sector, such as manufacturing or government. While showing broad patterns, these industry classifications can mask differences between workers. Analysis of the monthly data from the U.S. Census Bureau reveals the negative effects of the pandemic have been borne differently by workers at different wage levels, as classified by occupation.

From March to April, total employment in California dropped almost 20 percent according to the U.S. Census Bureau. However, the number of low-wage workers dropped by 39.6 percent compared to 20.2 percent for mid-wage and 10.5 percent for high-wage. The return to pre-COVID-19 employment levels in November has been faster for mid- and high-wage jobs as employment has returned to 98.9 percent and 93.8 percent, respectively, of the level in January 2020. However, the employment for low-wage workers in November was 82 percent of the January 2020 level. The unemployment rates for each wage level also reflects this trend.

Data Source: Special tabulations from the Current Population Survey Basic Monthly file, Jan-Nov, 2020
Hourly Wage Level: Low: Under \$16; Mid: \$16-\$27.99; High: \$28 or more

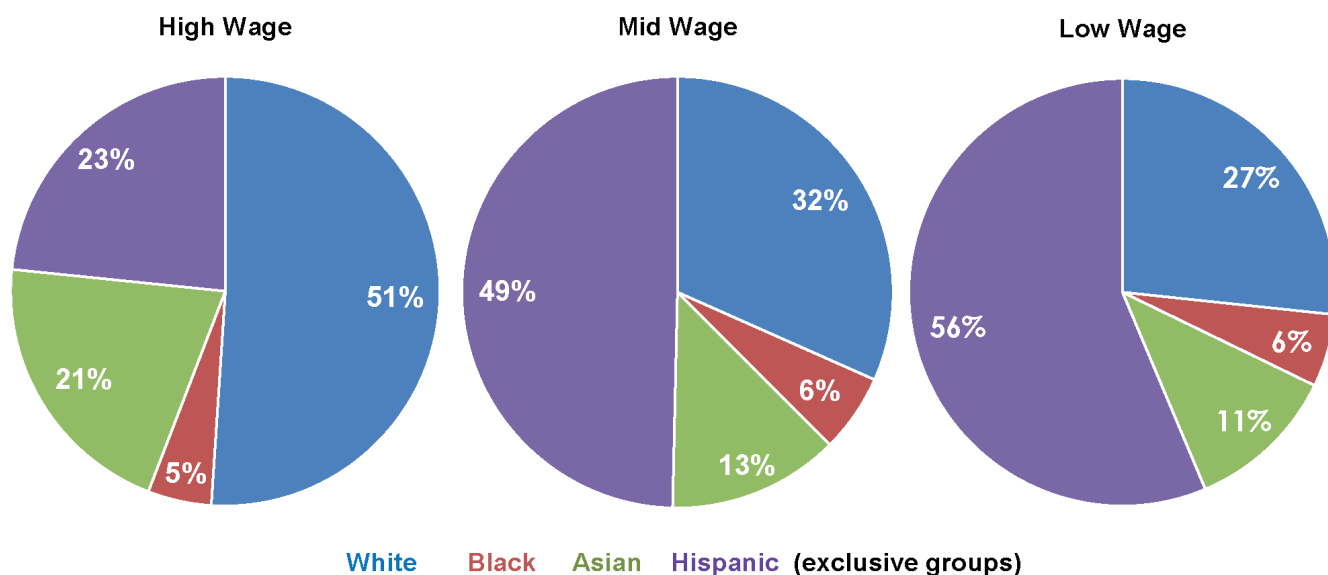

High-wage jobs earn more than \$28 per hour. Mid-wage workers earn \$16 to \$27.99 per hour and low-wage earners receive less than \$16 per hour. High-wage occupations include health professionals, engineers and scientists, computer and software

DEMOGRAPHIC INFORMATION

developers, and construction and skilled crafts workers. Mid-wage workers are managers, office clerks, equipment repairers, mechanics, and health technicians. High- and mid-wage jobs are more likely to be able to telework or be classified as essential. Low-wage jobs, such as restaurant workers and retail salespersons, are unable to perform their jobs remotely. The low-wage occupations make up the majority of the labor force in the industries of Agriculture, Trade, and Accommodation & Food Services. Retail trade, Accommodations, such as hotels and vacation resorts, and Food Services, including restaurants and catering venues, have faced the most stringent limitations and closures as California combats the COVID-19 Pandemic.

The impact of the COVID-19 Pandemic on low-wage jobs reveals the inequity by the groups that hold those jobs. There is a clear difference in the distribution by race and ethnicity by wage level. Whites make up 51 percent of the high wage labor force occupations compared to only 23 percent of Hispanics. At the other end in the low-wage labor force, the split is reversed – 27 percent for Whites and 56 percent for Hispanics.

Distribution of Race - Ethnicity by Hourly Wage Level, January 2020

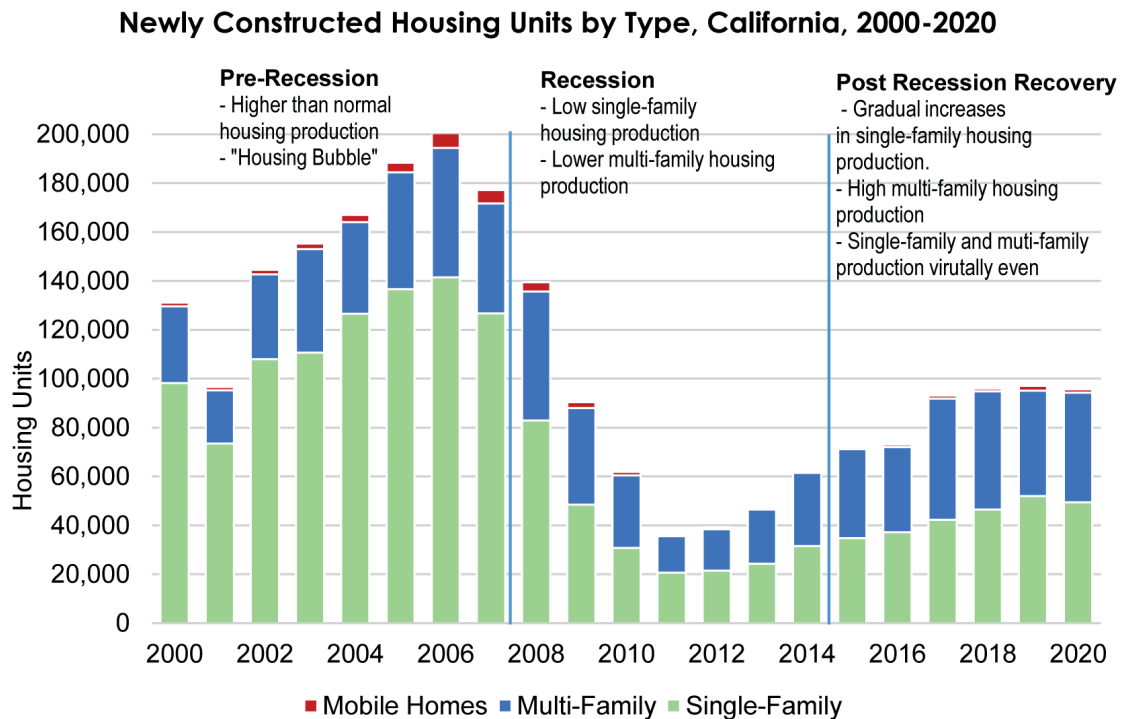

Data Source: Special tabulations from the Current Population Survey Basic Monthly file, January 2020
Hourly Wage Level: Low: Under \$16; Mid: \$16-\$27.99; High: \$28 or more

HOUSING INEQUALITY

Californians have faced housing shortages for decades. Shortly after the Great Recession, single-family housing construction stalled while multi-family construction slowed but continued in densely populated urban areas.

From 2014 to 2019, the slower pace of new housing construction continued but showed signs of improving with an average of 88,000 new housing units built per year. New single-family and multi-family housing construction was almost equal with 51 percent as single-family and 49 percent as multi-family. New single-family housing unit growth has started to rebound the past three years averaging over 49,000 new single-family units per year but is nowhere near the three years before the recession (2004-2006) when 135,000 new single-family housing units were built per year.

Data Source: Department of Finance, *E-5 Population and Housing Estimates for Cities, Counties and the State — January 1, 2011-2020*.

The COVID-19 Pandemic particularly affected lower-income households that struggled to pay rent. In 2019, almost one in five households in the state spent 50 percent or more of their income on housing costs. This includes one in four renter households, and one in eight owner households. Compared to 2007 pre-recession levels, the number of renter households spending half or more of their income on housing increased from 1.3 million

to 1.5 million in 2019, while the number of owner households in this category declined from 1.4 million to about 900,000.

About one in five California households is either not current on rent or mortgage payments, or has slight or no confidence that their household can pay the next month's rent or mortgage on time, according to the mid-November 2020 Household Pulse Survey. The population 18 years and older living in renter-occupied housing had consistently lower confidence in their ability to make their next housing payment on time than people living in owner-occupied housing since the start of the survey in April 2020. About 23.4 percent of renters had slight or no confidence compared to 17.0 percent of adults in mortgage holder households during mid-November 2020.

Characteristics of Individuals with Moderate to High Confidence in Making Next Rent Payment

Percent of Those Responding to Survey	
Age 18-39	77.2
Age 40-54	64.7
Age 55+	85.9
Women	71.1
Men	84.1
White	86.0
Black	55.0
Hispanic	72.1
Bachelor's Degree or Higher	86.3
High School/ GED	68.5
Less than High School	65.0
Household without Unemployment	93.6
Household with Unemployment	67.7
Income less than \$50,000	69.0
Income greater than \$100,000	91.0

Data Source: U.S. Census Bureau, Household Pulse Survey, Week 19.

The confidence of California's ability to make their next rent payment on time depends on age, race, educational attainment, and other characteristics. As the table shows, people aged 40 to 54 years old had the lowest confidence in their ability to pay their next rent on time among all adults. Women had lower confidence than men did. Hispanic or Latino and Black non-Hispanic populations had lower confidence than White, non-Hispanic. People with a Bachelor's degree or higher were more confident than people with high school diploma/GED or no high school diploma. Not surprisingly, Californians had lower confidence in their ability to pay rent if they lived in households where someone experienced a loss of employment income since March. People with

household income less than \$50,000 had lower confidence in their ability to pay rent than people with household income \$100,000 and higher.

With federal and state eviction moratoriums expiring at the end of 2020 or early 2021, many renters are at risk of losing their housing. As of mid-November 2020, approximately 10 percent of adults in California were living in households not current on rent or mortgage, where eviction or foreclosure in the next two months were either very likely or somewhat likely.

Chief Economist and PBM

APPENDICES AND SCHEDULES

Budget Process Overview

The Governor's Budget is the result of a process that begins more than one year before the Budget becomes law. When presented to the Legislature on or before January 10 each year, the Governor's Budget incorporates revenue and expenditure estimates based upon the most current information available through early to mid-December. In the event the Governor would like to change the Budget presented to the Legislature, including adjustments resulting from changes in population, caseload, or enrollment estimates, the Department of Finance proposes adjustments to the Legislature during budget hearings through Finance Letters in the spring. In May, Finance submits revised revenue and expenditure estimates for both the current and budget years to the Legislature. This update process is referred to as the May Revision. Finance also prepares monthly economic and cash revenue updates during the fiscal year. The list below describes the key documents used in the budget process.

Title	Purpose	Prepared/Issued by	When
Budget Letters	Convey the Administration's guidelines for budget preparation to agencies and departments.	Governor/Finance	January through December
Budget Change Proposals	Documents that propose to modify or change the existing level of service, propose new programs, or remove existing programs.	Agencies and departments submit to Finance analysts for review.	August and September
Governor's Budget	Governor's proposed budget for the upcoming fiscal year.	Governor/Finance	January 10
Governor's Budget Summary	A narrative summary of the Governor's proposed budget.	Governor/Finance	January 10
Budget Bill	Requests spending authorization to carry out the Governor's expenditure plan (serves as a legislative budget decision document).	Finance/Legislature	January 10
Multi-Year Projection	Estimated General Fund revenues and expenditures for the ensuing fiscal year and the three fiscal years thereafter, as required by Section 12.5 of Article IV of the California Constitution.	Finance	January, May, and Budget Enactment
Analysis of the Budget	Analysis of the Budget, including recommendations for changes to the Governor's Budget.	Legislative Analyst's Office	February
May Revision	Update of General Fund revenues, expenditures, and reserve estimates based on the latest economic forecast, and changes in population, caseload, or enrollment estimates.	Finance	Mid-May
Budget Act	The primary annual expenditure authorization, as approved by the Governor and Legislature, including a listing of the Governor's vetoes, if any.	Legislature/Governor	Late June or upon enactment of the Budget
Final Budget Summary	Update of the individual Budget Act items of appropriation, with changes by the Governor's vetoes, and includes certain budget summary schedules.	Finance	Summer/Fall
Final Change Book	Update of changes to the detailed fiscal information in the Governor's Budget.	Finance	Summer/Fall

Adjustments in Accounting Methods and Prior Year Fund Balances

Government Code section 13344 requires the Department of Finance to note in the Governor's Budget or related documents any adjustments of prior year fund balances and accounting methods. This requirement is to achieve the closest possible comparability of the Governor's Budget with the State Controller's Budgetary-Legal Basis Annual Report.

Accounting Methods

No major changes have been implemented or proposed since last year's report.

Prior Year Fund Balances

Government Code section 13344 requires every state agency to prepare and maintain financial and accounting data for inclusion in the Governor's Budget, Budget Act and related documents, and the State Controller's Budgetary-Legal Basis Annual Report, according to the methods and bases provided in regulations, budget letters, and other directives of Finance. Consistent with this requirement, Finance has continued its efforts in instructing and assisting departments in the reconciliation of special funds between the Governor's Budget documents departments provide to Finance and the year-end financial statements they provide to the State Controller's Office. Departments that are the designated fund administrators continue to be primarily responsible for the reconciliation, and Finance works very closely with them to ensure this is or will be completed for all special funds. Special fund balances included in the Governor's Budget have been reconciled using the best information available at the time. However, final balances for the Budgetary-Legal Basis Annual Report and certain actual revenue or expenditure amounts are not available during the preparation of the Governor's Budget. Therefore, there will be some remaining variances in the spring when final balances become available. Finance will follow up the efforts in the spring to evaluate if additional budget changes are necessary.

Statewide Financial Information

Provides various statewide displays of financial information included in the Budget that may be the most useful to the public, private sector, or other levels of government. Each statewide display includes a description of the information included.

Schedule 1 General Budget Summary—Total statewide revenues and expenditures for the General Fund and special funds, and expenditure totals for selected bond funds.

Schedule 2 Summary of State Tax Collections—State tax collections per capita and per \$100 of personal income.

Schedule 3 Comparative Yield of State Taxes—Revenues for major state taxes for General Fund and special funds.

Schedule 4 Position and Salary Cost Estimates—Position data and corresponding dollar amounts.

Schedule 5A Statement of Estimated Accounts Payable and Accounts Receivable—Actual payable and receivable amounts as of the end of the last fiscal year, and estimated amounts for the end of the current fiscal year and the next fiscal year.

Schedule 5B Actual Past Fiscal Year Cash Flow—Actual receipts, disbursements, borrowable resources, and cash flow loan balances for the last fiscal year.

Schedule 5C Estimated Current Fiscal Year Cash Flow—Projected receipts, disbursements, borrowable resources, and cash flow loan balances for the current fiscal year.

Schedule 5D Estimated Budget Fiscal Year Cash Flow—Projected receipts, disbursements, borrowable resources, and cash flow loan balances for the next fiscal year.

Schedule 6 Summary of State Population, Employees, and Expenditures—Historical data of state population, employees, personal income, revenues, and expenditures.

Schedule 8 Comparative Statement of Revenues—Detail of General Fund and special fund revenues by source for the past, current, and budget years within the following categories: (1) major taxes and licenses, (2) minor revenues, and (3) transfers and loans.

Schedule 9 Comparative Statement of Expenditures—Detail of General Fund, special fund, selected bond fund, and federal fund expenditures included in the Governor's Budget by the following categories: (1) State Operations, (2) Local Assistance, (3) Capital Outlay, and (4) Unclassified.

Schedule 10 Summary of Fund Condition Statements—A listing in alphabetical order of the beginning reserve, revenues, expenditures, and ending reserve for the General Fund and each special fund for the past, current, and budget years.

Schedule 11 Statement of General Obligation Bond and Commercial Paper Debt of the State of California—List of all general obligation bonds, including: maturity dates, authorized amount of bond issues, amounts of unissued bonds, redemptions, and outstanding issues, as well as authorized and outstanding commercial paper.

Schedule 12A State Appropriations Limit Summary—Summary of Schedules 12B through 12E provides a calculation of the appropriations subject to the State Appropriations Limit and the Limit Room.

Schedule 12B Revenues to Excluded Funds—List of revenues in special funds NOT included in the calculation of total appropriations subject to the State Appropriations Limit.

Schedule 12C Non-Tax Revenues in Funds Subject to Limit—Total of non-tax General and special fund revenues deposited in funds that are otherwise included in the calculation of total appropriations subject to the State Appropriations Limit.

Schedule 12D State Appropriations Limit Transfer from Other Funds to Included Funds—Detail of transfers between funds that are used in calculating the appropriations subject to the State Appropriations Limit.

Schedule 12E State Appropriations Limit Excluded Appropriations—Exclusions from appropriations subject to the State Appropriations Limit.

Schedule 13 Proposition 98 Final Certification—Factors, data, and calculations used to certify the prior year Proposition 98 funding level pursuant to Chapter 39, Statutes of 2018.

<i>Safety Net Reserve Fund</i>		450,000	--		
<i>Public School System Stabilization Account</i>		2,987,283	--		

Note: Totals may not add due to rounding.

^{1/} The General Budget Summary includes the revenues and expenditures of all the state funds that reflect the cost of state government and selected bond fund expenditures. The transactions involving other non-governmental cost funds are excluded.

^{2/} The Reserve for Liquidation of Encumbrances represents an amount which will be expended in the future for state obligations for which goods and services have not been received at the end of the fiscal year. This reserve treatment is consistent with the accounting methodology prescribed by Generally Accepted Accounting Principles (GAAP) and Government Code Sections 13306 and 13307.

^{3/} The Special Funds for Economic Uncertainties and the Reserves for Economic Uncertainties are reserve accounts for the General and special funds as provided by Section 5 of Article XIII B of the California Constitution.

¹ Includes the 0.5 percent Local Revenue Fund, the 1.0625 percent Local Revenue Fund 2011, and the state sales tax rate of 6 percent from April 1, 2009 to June 30, 2011. Includes the 0.25 percent sales tax, effective July 1, 2004 through December 31, 2015, for repayment of economic recovery bonds. Includes passage of Proposition 30, which increased the General Fund sales tax rate from January 1, 2013 to December 31, 2016.

² Includes the revenue for a 1-percent surcharge on taxable incomes over \$1 million, with proceeds funding mental health programs. Includes the 0.25-percent surcharge and reduced dependent exemption credit effective for tax years 2009 and 2010. Also includes the impact of Propositions 30, which establishes three additional tax brackets for tax years 2012 through 2018. In November 2016, voters approved Proposition 55, which extends the three additional tax brackets through 2030.

³ Includes the corporation tax, corporation income tax, LLC fees, and minimum franchise tax for corporations, partnerships, LLCs, and LLPs. From 1989 to 1997, it included the unitary election fee. Includes impact of Proposition 39 beginning in tax year 2012. Includes estimated \$3.7 billion in 2020-21 and \$3.3 billion in 2021-22 for temporary limitation of credit usage suspension of net operating losses.

⁴ Proposition 99 (November 1988) increased the cigarette tax to \$0.35 per pack and added an equivalent tax to other tobacco products. The Breast Cancer Act added \$0.02 per pack effective 1/1/94. Proposition 10 (November 1998) increased the cigarette tax to \$0.87 per pack and added the equivalent of \$1.00 tax on other tobacco products. Proposition 56 (November 2016) increased the cigarette tax to \$2.87 per pack, effective April 1, 2017, and added the equivalent of a \$2.00 tax to other tobacco products, effective July 1, 2017. Proposition 56 also defined electronic cigarettes as other tobacco products for purposes of taxation. Reflects assumption that a flavor ban on cigarette and tobacco products goes into effect January 1, 2021.

⁵ Proposition 6, an initiative measure adopted by the voters in June 1982, repealed the inheritance and gift taxes and imposed instead an estate tax known as "the pick-up tax," because it is designed to pick up the maximum credit allowed against the federal estate tax. The federal estate tax has undergone many changes since 2001. It was reinstated in January 2013 for deaths on and after January 1, 2013. The new federal tax operates in such a way to effectively eliminate the state pick-up estate tax.

⁶ Includes insurance gross premiums tax on Medi-Cal managed care plans through June 30, 2013, to provide interim funding for the Healthy Families and Medi-Cal programs. Includes a reduction for the managed care organizations tax of about \$200 million per year from 2016-17 through 2018-19.

⁷ Alcoholic beverage excise taxes were increased effective July 15, 1991.

⁸ Motor vehicle fuel tax (gasoline) and use fuel tax (diesel and other fuels). The gasoline excise tax was 29.7 cents per gallon for the first four months of 2017-18, 41.7 cents for the next 20 months through 2018-19, 47.3 cents in 2019-20, and indexed annually for inflation thereafter. The diesel excise tax was 16 cents for the first four months of 2017-18, 36 cents through 2019-20, and annually indexed for inflation thereafter.

⁹ Registration and weight fees, motor vehicle license fees, and other fees. Includes \$800 million in 2017-18, \$1.7 billion in both 2018-19 and 2019-20, and \$1.8 billion in 2020-21 from a graduated fee at \$25 to \$175 per vehicle.

¹⁰ As of January 1, 2018, Proposition 64 levied a new excise tax on the cultivation of cannabis at an initial rate per ounce of \$9.25 for flower, \$2.75 for leaves, and \$1.29 for plant, adjusted for inflation beginning in 2020. In addition, there is a 15-percent tax on the retail price of cannabis.

⁴¹ Estimated.

Finance Glossary of Accounting and Budgeting Terms

The following terms are used frequently throughout the Governor's Budget, the Governor's Budget Summary, the annual Budget (Appropriations) Bill, the Enacted Budget, and other documents. Definitions are provided for terms that are common to many of these publications. For definitions of terms unique to a specific program area, please refer to the individual budget presentation. Certain terms may be interpreted or used differently depending on the context, the audience, or the purpose.

Abatement

A reduction to an expenditure that has already been made. In state accounting, only specific types of receipts are accounted for as abatements, including refund of overpayment of salaries, rebates from vendors or third parties for defective or returned merchandise, jury duty and witness fees, and property damage or loss recoveries. (See SAM 10220 for more detail.)

Abolishment of Fund

The closure of a fund pursuant to the operation of law. Funds may also be administratively abolished by the Department of Finance with the concurrence of the State Controller's Office. When a special fund is abolished, all of its assets and liabilities are transferred by the State Controller's Office to a successor fund, or if no successor fund is specified, then to the General Fund. (GC 13306, 16346, SAM 7455.)

Account

A classification code used in FI\$Cal (PeopleSoft) to identify an asset, liability, fund balance, receipt, expenditure, transfer, or statistical measurement in a transaction. Accounts combine several legacy codes in the Uniform Codes Manual such as the general ledger code, receipt and object of expenditure codes into a single account code. (See also "Chart of Account Crosswalk" and "Uniform Codes Manual.")

Accruals

Revenues or expenditures that have been recognized for that fiscal year but not received or disbursed until a subsequent fiscal year. Annually, accruals are included in the revenue and expenditure amounts reported in departments' budget documents and year-end financial reports. For budgetary purposes, departments' expenditure accruals also include payables and outstanding encumbrances at the end of the fiscal year for obligations attributable to that fiscal year.

Accrual Basis of Accounting

The basis of accounting in which transactions are recognized in the fiscal year when they occur, regardless of when cash is received or disbursed. Revenue is recognized in the fiscal year when earned, and expenditures are recognized in the fiscal year when incurred generally when goods/services are received or when contracts are performed) Also referred to as the full accrual basis of accounting. (SAM 7440)

Administration

Refers to the Governor's Office and those individuals, departments, and offices reporting to it (e.g., the Department of Finance).

Administration Program Costs

The indirect costs of a program, typically a share of the costs of the administrative units serving the entire department (e.g., the Director's Office, Legal, Personnel, Accounting, and Business Services). "Distributed Administration" costs represent the distribution of the indirect costs to the various program activities of a department. In most departments, all administrative costs are distributed. (See also "Indirect Costs" and "Statewide Cost Allocation Plan.")

Administratively Established Positions

Positions authorized by the Department of Finance during a fiscal year that were not included in the Budget. Such positions terminate at the end of the fiscal year, or in order to continue, must meet certain criteria under Budget Act Control Section 31.00. (CS 31.00.)

Agency

A legal or an official reference to a government organization at any level in the state organizational hierarchy. (See the UCM for the hierarchy of State Government Organizations.)

or:

A government organization belonging to the highest level of the state organizational hierarchy as defined in the UCM. An organization whose head (Agency Secretary) is designated by Governor's order as a cabinet member.

Allocation

A distribution of funds or costs from one account or appropriation to one or more accounts or appropriations (e.g., the allocation of employee compensation funding from the statewide 9800 Budget Act items to departmental appropriation items). (SAM 9200 et seq.)

Allotment

The approved division of an amount (usually of an appropriation) to be expended for a particular purpose during a specified time period. An allotment is generally authorized on a line item expenditure basis by program or organization.

Amendment

A proposed or accepted change to a bill in the Legislature, the California Constitution, statutes enacted by the Legislature, or ballot initiative.

A-Pages

A common reference to the Governor's Budget Summary. Budget highlights now contained in the Governor's Budget Summary were once contained in front of the Governor's Budget on pages A-1, 2, etc., and were, therefore, called the A-Pages.

Appropriated Revenue

Revenue which, as it is earned, is reserved and appropriated for a specific purpose. An example is student fees received by state colleges that are by law appropriated for the support of the colleges. The revenue does not become available for expenditure until it is earned.

Appropriation

Authorization for a specific agency to make expenditures or create obligations from a specific fund for a specific purpose. Appropriations are usually limited in amount and period of time during which the expenditure is to be recognized. For example, appropriations made by the Budget Act are available for encumbrance for one year, unless otherwise specified. Appropriations made by other legislation are available for encumbrance for three years, unless otherwise specified, and appropriations stating "without regard to fiscal year" shall be available from year-to-year until fully expended. Legislation or the California Constitution can provide continuous appropriations, and voters can also make appropriations by approving ballot measures. An appropriation shall be available for encumbrance during the period specified therein, or if not specified, for a period of three years after the date upon which it first became available for encumbrance. Except for federal funds, liquidation of encumbrances must be within two years of the expiration date of the period of availability for encumbrance, at which time the undisbursed (i.e., unliquidated) balance of the appropriation is reverted into the fund. Federal funds have four years to liquidate. (GC 16304, 16304.1, SAM 8325, 8326.)

Appropriation Without Regard to Fiscal Year (AWRTFY)

An appropriation for a specified amount that is available from year-to-year until fully expended.

Appropriations Limit, State (SAL)

The constitutional limit on the growth of certain appropriations from tax proceeds, generally set to the level of the prior year's appropriation limit as adjusted for changes in cost of living and population. Other adjustments may be made for such reasons as the transfer of services from one government entity to another. (Article XIII B, § 8; GC 7900 et seq; CS 12.00.)

Appropriation Schedule

The detail of an appropriation (e.g., in the Budget Act), showing the distribution of the appropriation to each of the programs or projects thereof.

Assembly

California's lower house of the Legislature composed of 80 members. As a result of Proposition 140 (passed in 1990) and Proposition 28 (passed in 2012), members elected in or after 2012 may serve 12 years in the Legislature in any combination of four-year state Senate or two-year state Assembly terms. (Article IV, § 2 (a).)

Audit

Typically a review of financial reports or performance activity (such as of an agency or program) to determine conformity or compliance with applicable laws, regulations, and/or standards. The state has three central organizations that perform

audits of state agencies: the State Controller's Office, the Department of Finance, and the California State Auditor. Many state departments also have internal audit units to review their own internal functions and program activities. (*SAM 20000, etc.*)

Augmentation

An increase to a previously authorized appropriation or allotment. This increase can be authorized by Budget Act provisional language, control sections, or other legislation. Usually, a Budget Revision or an Executive Order is processed to the State Controller's Office to implement the increase.

Authorized

Given the force of law (e.g., by statute). For some action or quantity to be authorized, it must be possible to identify the enabling source and date of authorization.

Authorized Positions

In the Salaries and Wages publication, the past year total authorized positions represent the number of actual positions filled for that year as reported by the State Controller's Office. For current year, total authorized positions include all regular ongoing positions approved in the Budget Act for that year, adjustments to limited-term positions and temporary help, and positions authorized through enacted legislation. For budget year, the number of authorized positions is the same as current year except for adjustments to remove expiring positions. (*GC 19818*)

Availability Period

The time period during which an appropriation may be encumbered (i.e., committed for expenditure), usually specified by the law creating the appropriation. If no specific time is provided in legislation, the period of availability is three years. Unless otherwise provided, Budget Act appropriations are available for one year. However, based on project phase, capital outlay projects may have up to three years to encumber. An appropriation with the term "without regard to fiscal year" has an unlimited period of availability and may be encumbered at any time until the funding is exhausted.

(See also "Encumbrances.")

Balance Available

In regard to a fund, it is the excess of resources over uses. For budgeting purposes, the balance available in a fund condition is the carry-in balance, net of any prior year adjustments, plus revenues and transfers, minus expenditures. For accounting purposes, the balance available in a fund is the net of assets over liabilities and reserves that are available for expenditure.

For appropriations, it is the unobligated, or unencumbered, balance still available.

Baseline Budget

Also referred to as Workload Budget. (See "Workload Budget.")

Bill

A draft of a proposed law presented to the Legislature for enactment. (A bill has greater legal formality and standing than a resolution.)

Bond Funds

For legal basis budgeting purposes, funds used to account for the receipt and disbursement of non-self-liquidating general obligation bond proceeds. These funds do not account for the debt retirement because the liability created by the sale of bonds is not a liability of bond funds. Depending on the provisions of the bond act, either the General Fund or a sinking fund pays the principal and interest on the general obligation bonds. The proceeds and debt of bonds related to self-liquidating bonds are included in non-governmental cost funds. (SAM 14400.)

Budget

A plan of operation expressed in terms of financial or other resource requirements for a specific period of time. (GC 13320, 13335; SAM 6120.)

Budget Act (BA)

An annual statute authorizing state departments to expend appropriated funds for the purposes stated in the Governor's Budget and amended by the Legislature. (SAM 6333.)

Budget Bill

Legislation presenting the Governor's spending proposal for the next fiscal year. The Budget Bill is prepared by the Department of Finance and submitted to each house of the Legislature in January (accompanying the Governor's Budget). The Budget Bill's authors are typically the budget committee chairpersons.

The California Constitution requires the Legislature to pass the Budget Bill and send it to the Governor for signature by June 15 each year. The Budget Bill becomes the Budget Act upon signature by the Governor, after any line-item vetoes. (Art. IV, § 12(c); GC 13338; SAM 6325, 6333.)

Budget Change Proposal (BCP)

A proposal to change the level of service or funding sources for activities authorized by the Legislature, propose new program activities not currently authorized, or to eliminate existing programs. The Department of Finance annually issues a Budget Letter with specific instructions for preparing BCPs. (SAM 6120.)

Budget Cycle

The period of time required to prepare the state financial plan and enact that portion of it applying to the budget year. Significant events in the cycle include:

- Preparation of the Governor's proposed budget (most activities occur between July 1 and January 10).
- Submission of the Governor's Budget and the Budget Bill to the Legislature (by January 10).
- Submission to the Legislature of proposed adjustments to the Governor's Budget
 - April 1—adjustments other than Capital Outlay and May Revision.
 - May 1—Capital Outlay appropriation adjustments.
 - May 14—May Revision adjustments for changes in General Fund revenues, expenditure adjustments to reflect updated revenue, and funding for Proposition 98, caseload, and population.
- Review and revision of the Governor's Budget by the Legislature.
- Return of the revised budget to the Governor by June 15, for signature after any line-item vetoes.
- Signing of the budget by the Governor. (*Art. IV, § 10, GC 13308, SAM 6150.*)

Budget Letter

Budget and accounting policies and instructions issued by the Department of Finance to supplement the budgeting and accounting chapters of the State Administrative Manual.

Budget Period

The FISCAL (PeopleSoft) Terminology for Fiscal Year. (See also "Fiscal Year.")

Budget—Program

A program budget expresses the operating plan in terms of the costs of activities (programs) to be undertaken to achieve specific goals and objectives.

The Governor's Budget is a program budget, but also includes detailed categorization of proposed expenditures for goods and services (Expenditures by Category) related to the state operations of each department. (*GC 13336; SAM 6210, 6220.*)

Budget Position Transparency and Expenditure by Category Redistribution

On a biennial basis beginning with the 2016-17 Budget, the salaries and wages associated with historically vacant positions have been reallocated to expenditure categories where resources are actually being expended in the current and budget years. Reductions in Regular Ongoing Positions as a result of this process are for display purposes only and do not impact departments' ability to hire up to their legislatively authorized staffing level.

Budget Position Transparency represents a department's historically vacant positions and associated salaries and wages expenditures that are being reallocated. Expenditure by Category Redistribution represents the reallocation of the salaries and wages dollars to staff benefits and/or operating expenses and equipment.

Budget Request

A term used in the FI\$Cal (Hyperion) System reflecting any change to the currently enacted budget or proposed budget. This may be a Budget Change Proposal, revenue estimate change, or legislative action. A budget request is a way for each department to submit incremental requests for, or to make adjustments to, funding.

Budget Revision (BR)

A document prepared by the department that cites a legal authority to authorize a change in an appropriation. A BR must be approved by the Department of Finance. Typically, BRs either increase the appropriation or make adjustments to the categories or programs within the appropriation as scheduled. (SAM 6533, 6542, 6545.)

Budget Year (BY)

The next state fiscal year, beginning July 1 and ending June 30, for which the Governor's Budget is submitted (i.e., the year following the current fiscal year). (See also "Fiscal Year.")

Business Unit

The four-digit code assigned to each state governmental entity (or a program) for fiscal system purposes. The business unit is the first segment of the budget item/appropriation number. (UCM.)

Capital Outlay (CO)

A character representing expenditures of funds to acquire land, plan and construct new buildings, expand or modify existing buildings, and/or purchase equipment related to such construction. (CS 3.00.)

Carryover

The unencumbered balance of an appropriation that continues to be available for expenditure in years subsequent to the year of enactment. For example, if an appropriation has multiple years available to encumber, any unencumbered balance at the end of the first year is carried over to the following fiscal year.

Cash Basis of Accounting

The basis of accounting in which revenues and expenditures are recognized when cash is received or disbursed. (SAM 7440.)

Cash Flow Statement

A statement of cash receipts and disbursements for a specified period of time.

Category (as used in FI\$Cal/Hyperion)

A grouping of related types of expenditures, such as personal services, operating expenses and equipment, special items of expense, unclassified, local costs, capital

costs, and internal cost recovery; or, revenues (including revenue transfers). The Governor's Budget includes an "Expenditures by Category" section for each department at this level. (UCM.)

Changes in Authorized Positions

A schedule in the Governor's Budget that reflects staffing changes made subsequent to the adoption of the current year budget and enacted legislation. This schedule documents changes in positions for various reasons. Some examples are: actual expenditures in the past year, as well as transfers, positions established, selected re-classifications, and proposed new positions included in BCPs, for the current or budget year.

Chapter

The reference assigned by the Secretary of State to an enacted bill, numbered sequentially in order of enactment each calendar year. The enacted bill is then referred to by this "chapter" number and the year in which it became law. For example, *Chapter 1, Statutes of 2017*, would refer to the first bill enacted in 2017.

Character of Expenditures

A classification identifying the major purpose of an expenditure, such as state operations, local assistance, capital outlay, or unclassified. (UCM.)

Chart of Account (COA) Crosswalk

A detailed guide found on the Department of Finance's website that crosswalks the Account Category Code used by FI\$Cal departments to the legacy general ledger, receipts and object of expenditures codes in the Uniform Codes Manual. (See also "Account" and "Uniform Codes Manual.")

Claim Schedule

A manual request from a state department to the State Controller's Office to disburse payment from a legal appropriation or account for a lawful state obligation. The claim schedule identifies the appropriation or account to be charged, the payee(s), the amount(s) to be paid, and an affidavit attesting to the validity of the request. Claims against the state for which there is no provision for payment (e.g., no appropriation available for payment), will be submitted to the Department of General Services. (See also "Voucher.") (SAM 7340)

COBCP

Capital outlay budgets are zero-based each year; therefore, the department must submit a written capital outlay budget change proposal for each new project, or subsequent phase of an existing project, for which the department requests funding. (SAM 6818.)

Conference Committee

A committee of three members (two from the majority party, and one from the minority party) from each house, appointed to meet and resolve differences between versions of a bill (e.g., when one house of the Legislature does not concur with bill amendments made by the other house). If resolution cannot be reached, another conference committee can be selected, but no more than three different

conference committees can be appointed on any one bill. Budget staff commonly refer to the conference committee on the annual budget bill as the "Conference Committee." (SAM 6340.)

Continuing Appropriation

An appropriation for a set amount that is available for more than one year. (SAM 8326.)

Continuous Appropriation

Constitutional or statutory expenditure authorization that is renewed each year without further legislative action. The amount available may be a specific, recurring sum each year; all or a specified portion of the proceeds of specified revenues that have been dedicated permanently to a certain purpose; or, whatever amount is designated for the purpose as determined by formula, e.g., school apportionments. Note: Government Code section 13340 sunsets statutory continuous appropriations on June 30 with exceptions specified in the section and other statutes. Control Section 30.00 of the annual Budget Act traditionally extends the continuous appropriations for one additional fiscal year. (GC 13340; SAM 8326.)

Control Sections

Sections of the Budget Act (i.e., 1.00 to the end) providing specific controls on the appropriations itemized in Section 2.00 of the Budget Act. (See more detail under "Sections.")

Cost-of-Living Adjustments (COLA)

Increases provided in state-funded programs that include periodic adjustments predetermined in state law (statutory, such as K-12 education apportionments), or established at optional levels (discretionary) by the Administration and the Legislature each year through the budget process.

Current Year (CY)

A term used in budgeting and accounting to designate the operations of the present fiscal year in contrast to past or future periods. (See also "Fiscal Year.")

Debt Service

The amount of money required to pay interest on outstanding bonds and the principal of maturing bonds.

Department

A governmental organization, usually belonging to the third-level of the state organizational hierarchy, as defined in the Uniform Codes Manual. (UCM.)

Department of Finance

The Department is a fiscal control agency. The Director of Finance is appointed by the Governor and serves as the chief fiscal policy advisor. The Director sits as a member of the Governor's cabinet and senior staff.

Principal functions are as follows:

- Establish appropriate fiscal and accounting policies to carry out the state's

programs.

- Prepare, explain, and administer the state's annual financial plan (budget), which the Governor is required under the State Constitution to present to the Legislature by January 10 of each year.
- Analyze legislation that has a fiscal impact.
- Provide fiscal and accounting training, advice, and consulting services to state departments.
- Monitor/audit expenditures by state departments to ensure compliance with law, approved standards, and policies.
- Develop economic forecasts and revenue estimates.
- Develop population and enrollment estimates and projections.
- Review expenditures for information technology activities of departments.

(GC 13000 et seq.)

Detailed Budget Adjustments

Department Detailed Budget Adjustments are included in departmental budget displays to provide the reader a snapshot of proposed expenditure and position adjustments, why those changes are being proposed, and their dollar and position impact.

Detail of Appropriations and Adjustments

A budget display for each organization that reflects appropriations and adjustments by fund source for each character of expenditure (i.e., state operations, local assistance, and capital outlay). (SAM 6478.)

Employee Compensation/Retirement

Salary, benefit, employer retirement rate contribution adjustments, and any other related statewide compensation adjustments for state employees. Various 9800 Items of the Budget Act appropriate funds for compensation increases for most state employees (excluding Higher Education and some others); that is, they appropriate the incremental adjustment proposed for the salary and benefit adjustments for the budget year. The base salary and benefit levels are included in individual agency/departmental budgets.

Enacted Budget

A publication produced by Finance to reflect budget details as enacted. It is similar in detail as in the Governor's Budget. A PDF of this publication is available on Finance's eBudget website.

Enactment Year (ENY)

See Year of Appropriation (YOA).

Encumbrance

The commitment of all or part of an appropriation. Encumbrances represent valid obligations related to unfilled purchase orders or unfulfilled contracts. Outstanding encumbrances are recognized as budgetary expenditures in the individual department's budget documents and their individual annual financial reports. For the General Fund budgetary purposes, the Department of Finance makes a

statewide adjustment to remove the total outstanding encumbrances from overall General Fund expenditures and show the amount as a reserve in the fund balance, in accordance with Government Code section 13307. For other funds, such encumbrance adjustments are not made in the budget totals, and encumbrances are treated as budgetary expenditures that decrease the fund balance of these funds. (SAM 8340.)

Enrolled Bill Report (EBR)

An analysis prepared by Finance on legislative measures passed by both houses and referred to the Governor, to provide the Governor's Office with information concerning the measure, with a recommendation for action by the Governor. While approved bill analyses become public information, EBRs do not. Note that EBRs are not prepared for Constitutional Amendments, or for Concurrent, Joint, or single house resolutions, because these are not acted upon by the Governor. (SAM 6965.)

Enrollment, Caseload, and Population Adjustments

These adjustments are generally formula or population driven and are components of the workload budget. (See Workload Budget.)

Executive Branch

One of the three branches of state government, responsible for implementing and administering the state's laws and programs. The Governor's Office and those individuals, departments, and offices reporting to it (the Administration), are part of the Executive Branch.

Executive Order (EO)

A budget document issued by the Department of Finance ordering the State Controller's Office to make an adjustment in their accounts. The adjustments are typically authorized by Budget Act provisional language, Budget Act control sections, and other statutes. An EO is used when the adjustment makes increases or decreases on a statewide basis, involves two or more appropriations, or makes certain transfers or loans between funds.

Exempt Employees

State employees exempt from civil service pursuant to subdivision (e), (f), or (g), of Section 4 of Article VII of the California Constitution. Examples include department directors and other gubernatorial appointees. (SAM 0400.)

Expenditure

Expenditures reported on a department's year-end financial reports and "past year" budget documents consist of amounts paid and accruals (including outstanding encumbrances and payables) for obligations created for the last fiscal year. "Current year" and "budget year" expenditures in budget documents are estimates for the respective fiscal year. (See "Encumbrance," also referred to as "budgetary expenditures.")(SAM 8360.)

Expenditure Authority

The authorization to make an expenditure (usually by a budget act appropriation, provisional language, or other legislation).

Expenditures by Category

A budget display for each department that reflects actual past year, estimated current year, and proposed budget year expenditures presented by character of expenditure (e.g., state operations and/or local assistance) and category of expenditure (e.g., personal services, operating expenses and equipment).

3-year Expenditures and Positions

A display at the start of each departmental budget that presents the various departmental programs by title, dollar totals, positions, and source of funds for the past, current, and budget years.

Federal Fiscal Year

The accounting period of the federal government, which begins on October 1 and ends the following September 30. For example, a reference to federal fiscal year 2019 means the period beginning October 1, 2018 and ending September 30, 2019.

Federal Funds

For legal basis budgeting purposes, classification of funds into which money received in trust from an agency of the federal government will be deposited and expended by a state department in accordance with state and/or federal rules and regulations. State departments must deposit federal grant funds in the Federal Trust Fund or other appropriate federal fund in the State Treasury.
(GC 13326 (*Finance approval*), 13338 *approp. of FF*, CS 8.50.)

Feeder Funds

For legal basis accounting purposes, funds into which certain taxes or fees are deposited upon collection. In some cases, administrative costs, collection expenses, and refunds are paid. The balance of these funds is transferable at any time by the State Controller's Office to the receiving fund, in most cases, the General Fund.

Final Budget

Generally refers to the Governor's Budget as amended by actions taken on the Budget Bill (e.g., legislative changes, Governor's vetoes). Note: subsequent legislation (law enacted after the Budget Bill is chaptered) may add, delete, or change appropriations, or require other actions that affect a budget appropriation.

Final Budget Summary

A document produced by the Department of Finance after enactment of the Budget Act, which reflects the Budget Act, any vetoes to language and/or appropriations, technical corrections to the Budget Act, and summary budget information. (See also "Budget Act" and "Final Change Book.") (SAM 6130, 6350.)

Final Change Book

A document produced by the Department of Finance after enactment of the Budget Act. It includes detailed fiscal information on the changes made to the budget bill that accompanies the Governor's Budget as submitted to the legislature on or before January 10 of each year. It contains a detailed list of changes in Budget Act items, non-Budget Act items, and control sections for state operations, local

assistance, capital outlay, and unclassified items. The Final Change Book also includes fiscal summaries. (SAM 6355)

Finance Letter (FL)

Proposals made by the Director of Finance to the chairpersons of the budget committees in each house to amend the Budget Bill and the Governor's Budget from that submitted on January 10 to reflect a revised plan of expenditure for the budget year and/or current year. Specifically, the Department of Finance is required to provide the Legislature with updated expenditure and revenue information for all policy adjustments by April 1, capital outlay technical changes by May 1, and changes for enrollment, caseload, population, updated revenues, and Proposition 98 by May 14. (GC 13308.)

FI\$Cal

The acronym for the Financial Information System for California, the state's integrated financial and administrative IT system that supports accounting, budgeting, cash management, and procurement functions.

Fiscal Committees

Committees of members in each house of the Legislature that review the fiscal impact of proposed legislation, including the Budget Bill. Currently, the fiscal committees include the Senate Budget and Fiscal Review Committee, the Senate Appropriations Committee, the Assembly Appropriations Committee, and the Assembly Budget Committee. The Senate Budget and Fiscal Review Committee and the Assembly Budget Committee are broken into subcommittees responsible for specific state departments and/or subject areas. Both houses also have Revenue and Taxation Committees that are often considered fiscal committees.

Fiscal Impact Analysis

Typically refers to a section of an analysis (e.g., bill analysis) that identifies the costs and revenue impact of a proposal, and to the extent possible, a specific numeric estimate for applicable fiscal years.

Fiscal Year (FY)

A 12-month period during which revenue is earned and received, obligations are incurred, encumbrances are made, appropriations are expended, and for which other fiscal transactions are recognized. In California state government, the fiscal year begins July 1 and ends the following June 30. If reference is made to the state's FY 2019-20, this is the time period beginning July 1, 2019 and ending June 30, 2020. (GC 13290.)

Floor

The Assembly or Senate chambers, the term used to describe the location of a bill, or the type of session. Matters may be referred to as "on the floor."

Form 9

A request by a department for space planning services (e.g., new or additional space, lease extensions, or renewals desired by an agency in non-institutional buildings, whether state-owned or state-leased, relocatable buildings, and trailers)

and also reviewed by the Department of Finance. (SAM 6453.)

Form 22

A department's request to transfer money to the Architectural Revolving Fund (e.g., for building improvements), reviewed by the Department of Finance. (GC 14957; SAM 1321.1.)

Fund

A legal budgeting and accounting entity that segregates moneys or other resources in the State Treasury for obligations, subject to specific restrictions or limitations. A separate self-balancing set of accounts must be maintained for each fund to show its assets, liabilities, reserves, and balance, as well as its revenue and expenditures. (SAM 7400.)

Fund Balance

For accounting purposes, the excess of a fund's assets over its liabilities. For budgeting purposes, the excess of a fund's resources over its expenditures.

Fund Condition Statement

A budget display, included in the Governor's Budget, summarizing the operations of a fund for the past, current, and budget years. The display includes the beginning balance, prior year adjustments, revenue, transfers, loans, expenditures, the ending balance, and any reserves. Fund Condition Statements are required for all special funds. The Fund Condition Statement for the General Fund is Summary Schedule 1. Other funds are displayed at the discretion of the Department of Finance.

General Fund (GF)

For legal basis accounting and budgeting purposes, the predominant fund for financing state government programs, used to account for revenues that are not specifically designated to be accounted for by any other fund. The primary sources of revenue for the General Fund are personal income tax, sales and use tax, and corporation taxes. The major uses of the General Fund are education (K-12 and higher education), health and human services programs, and correctional programs.

Generally Accepted Accounting Principles (GAAP)

The accounting principles, rules, conventions, and procedures that are used for accounting and financial reporting. GAAP for governments are set by the Governmental Accounting Standards Board (GASB), the accounting and financial reporting standards setting body for state and local governments.

Governmental Cost Funds

For legal basis accounting and budgeting purposes, funds that derive revenue from taxes, licenses, and/or fees.

Governor's Budget

The publication the Governor presents to the Legislature by January 10 each year. It contains recommendations and estimates for the state's financial operations for the budget year. It also displays the actual revenues and expenditures of the state for the prior fiscal year, and updates estimates for the current year revenues and

expenditures. This publication is also produced in a web format known as the Governor's Proposed Budget Detail on the Department of Finance's website. *(Article IV, § 12; SAM 6120, et seq.)*

Governor's Budget Summary

A companion publication to the Governor's Budget that outlines the Governor's policies, goals, and objectives for the budget year. It provides a perspective on significant fiscal and/or structural proposals. This publication is also produced in a web format known as the Governor's Proposed Budget Summary on the Department of Finance's website.

Grants

Typically used to describe amounts of money received by an organization for a specific purpose but with no obligation to repay (in contrast to a loan, although the award may stipulate repayment of funds under certain circumstances). For example, the state receives some federal grants for the implementation of health and community development programs, and the state also awards various grants to local governments, private organizations, and individuals according to criteria applicable to a given program.

Indirect Costs

A cost that cannot be easily identified to a specific cost objective (e.g., program, organizational unit, project), but it is used for a common or joint purpose. Indirect costs benefit more than one cost objective and, therefore, must be allocated.

Initiative

The power of the electors to propose statutes or Constitutional amendments and to adopt or reject them. An initiative must be limited to a single subject and be filed with the Secretary of State with the appropriate number of voter signatures in order to be placed on the ballot. *(Article II, § 8.)*

Item

A coding scheme or structure for an appropriation reflecting the respective Business Unit, reference number, and fund (if applicable). (See "Appropriation.")

Judgments

Usually refers to decisions made by courts against the state. Payment of judgments is subject to a variety of controls and procedures.

Language Sheets

Copies of the current Budget Act appropriation items provided to the Department of Finance and departmental staff each fall to update for the proposed Governor's Budget. These updated language sheets become the proposed Budget Bill. In the spring, language sheets for the Budget Bill are updated to reflect revisions to the proposed appropriation amounts, Item schedule(s) and provisions, and become the Budget Act.

Legislative Analyst's Office (LAO)

A non-partisan organization that provides advice to the Legislature on fiscal and policy matters. For example, the LAO annually publishes a detailed analysis of the

Governor's Budget, which becomes the initial basis for legislative hearings on the Budget Bill. (SAM 7360.)

Legislative Counsel Bureau

A staff of attorneys who draft legislation (bills) and proposed amendments, and review, analyze, and render opinions on legal matters for the legislative members.

Legislative Counsel's Digest

A summary of what a legislative measure does, contrasting existing law and the proposed change. This summary appears on the first page of a bill.

Legislature, California

A two-house body of elected representatives vested with the responsibility and power to make laws affecting the state (except as limited by the veto power of the Governor). (See also "Assembly" and "Senate.")

Line Item

See "Object of Expenditure."

Local Assistance (LA)

The character of expenditures made for the support of local government or other locally administered activities.

Major Regulation

Any proposed rulemaking action adopting, amending, or repealing a regulation subject to review by the Office of Administrative Law (OAL) that will have an economic impact on California business enterprises and individuals in an amount exceeding 50 million dollars in any 12-month period between the date the major regulation is estimated to be filed with the Secretary of State through 12 months after the major regulation is estimated to be fully implemented (as estimated by the agency), computed without regard to any offsetting benefits or costs that might result directly or indirectly from that adoption, amendment, or repeal. An agency proposing a major regulation must submit a Standardized Regulatory Impact Assessment to the Department of Finance for review, and the agency must include Finance's comments and the agency's response when transmitting the proposed major regulation to OAL. (GC sections 11346-11348 of Article 5, Chapter 3.5, Part 1, Division 3, Title 2; SAM 6600-6616; California Code of Regulation, title 1, sections 2000-2004.)

Mandates

See "State-Mandated Local Program." (UCM.)

May Revision

An annual update to the Governor's Budget containing a revised estimate of General Fund revenues for the current and ensuing fiscal years, any proposals to adjust expenditures to reflect updated revenue estimates, and all proposed adjustments to Proposition 98, presented by the Department of Finance to the Legislature by May 14 of each year. (See also "Finance Letter.") (SAM 6130; GC 13308.)

Merit Salary Adjustment (MSA)

A cost factor resulting from the periodic increase in salaries paid to personnel occupying authorized positions. Personnel generally receive a salary increase of five percent per year up to the upper salary limit of the classification, contingent upon the employing agency certifying that the employee's job performance meets the level of quality and quantity expected by the agency, considering the employee's experience in the position.

Merit salary adjustments for employees of the University of California and the California State University are determined in accordance with rules established by the regents and the trustees, respectively.

Funding typically is not provided for MSAs in the budget; given normal attrition rates, additional costs usually must be absorbed within existing resources. (GC 19832.)

Minor Capital Outlay

Construction projects, or equipment acquired to complete a construction project, estimated to cost less than \$656,000 plus any escalation per Public Contract Code section 10108. (SAM 6807.)

Modified Accrual Basis

The basis of accounting in which revenues are recognized if the underlying transaction has occurred as of the last day of the fiscal year and the amount is measurable and available to finance expenditures of the current period (i.e., the actual collection will occur either during the current period, or soon enough after the end of the current period, to be used to pay current year-end liabilities). Expenditures are recognized when the obligations are created, except for amounts payable from future fiscal year appropriations. This basis is generally used for the General Fund and special funds. (SAM 7440.)

Non-Add

Refers to a numerical value that is displayed in parentheses for informational purposes, but is not included in computing totals, usually because the amounts are already accounted for in the budget system or display.

Non-Governmental Cost Funds

For legal basis purposes, a classification for funds that used to budget and account for revenues derived from sources other than general and special taxes, licenses, and fees, or certain other state revenues. Generally, expenditures of these funds do not represent a cost of government.

Object of Expenditure (Objects)

A classification of expenditures based on the type of goods or services received. For example, the budget category of Personal Services includes the objects of Salaries and Wages and Staff Benefits. The Governor's Budget includes an "Expenditures by Category" section for each department at this level. These objects may be further subdivided into line items/object details such as State Employees' Retirement and Workers' Compensation. (See also "Account.") (UCM.)

Obligations

Amounts that a governmental unit may legally be required to pay out of its resources. Budgetary authority must be available before obligations can be created. For budgetary purposes, obligations include payables for goods or services received, but not yet paid for, and outstanding encumbrances (i.e., commitments for goods and services not yet received nor paid for).

One-Time Cost

A proposed or actual expenditure that is non-recurring (usually only in one annual budget) and not permanently included in baseline expenditures. Departments make baseline adjustments to remove prior year one-time costs and appropriately reduce their expenditure authority in subsequent years' budgets.

Operating Expenses and Equipment (OE&E)

A category of a support appropriation that includes objects of expenditure/accounts such as general expenses, printing, communication, travel, data processing, equipment, and accessories for the equipment. (SAM 6451.)

Out-of-State Travel (OST) blanket

A request by a state agency for Governor's Office approval of the proposed out-of-state trips to be taken by that agency's personnel during the fiscal year. (SAM 0760-0765.)

Overhead

Those elements of cost necessary in the production of an article or the performance of a service that are of such a nature that the amount applicable to the product or service cannot be determined directly. Usually they relate to those costs that do not become an integral part of the finished product or service, such as rent, heat, light, supplies, management, or supervision. (See also "Indirect Costs.")

Overhead Unit

An organizational unit that benefits the production of an article or a service but that cannot be directly associated with an article or service to distribute all of its expenditures to elements and/or work authorizations. The cost of overhead units are distributed to operating units or programs within the department. (See "Administration Program Costs.")

Past Year

The most recently completed fiscal year. (See also "Fiscal Year.")

Performance Budget

A budget wherein proposed expenditures are organized and tracked primarily by measurable performance objectives for activities or work programs. A performance budget may also incorporate other bases of expenditure classification, such as character and object, but these are given a subordinate status to activity performance.

Personal Services

A category of expenditure that includes such objects of expenditures as the

payment of salaries and wages of state employees and employee benefits, including the state's contribution to the Public Employees' Retirement Fund, insurance premiums for workers' compensation, and the state's share of employees' health insurance. (See also "Object of Expenditure.") (SAM 6403.)

Plan of Financial Adjustment (PFA)

A plan proposed by a department, approved by the Department of Finance, and the State Controller's Office (SCO), to allocate costs paid from one item to one or more items within a department's appropriations. A PFA might be used, for example, to allow the department to pay all administrative costs out of its main item and then transfer the appropriate costs to the correct items for their share of the costs paid. The SCO transfers the funds upon receipt of a letter (transaction request) from the department stating the amount to be transferred based on the criteria for cost distribution in the approved PFA. For FI\$Cal departments, the SCO transfers the funds for PFA transactions using FI\$Cal's PFA functionality, which permits the allocation of costs based on the criteria for cost distribution in the approved PFA. (SAM 8452 et seq.)

Pooled Money Investment Account (PMIA)

A State Treasurer's Office accountability account maintained by the State Controller's Office to account for short-term investments purchased by the State Treasurer's Office as designated by the Pooled Money Investment Board on behalf of various funds.

Pooled Money Investment Board (PMIB)

A board comprised of the Director of Finance, the State Treasurer, and the State Controller, the purpose of which is to design an effective cash management and investment program, using all monies flowing through the Treasurer's bank accounts and keeping all available monies invested, consistent with the goals of safety, liquidity, and yield. (SAM 7350.)

Positions

See "Authorized Positions."

Price Increase

A budget adjustment to reflect the inflation factors for specified operating expenses consistent with the budget instructions from the Department of Finance.

Prior Year Adjustment

In a Fund Condition Statement in the Governor's Budget, an adjustment for the difference between previously estimated accruals used in the development of the last Governor's Budget and actual expenditures or revenues. The adjustment amount is generally included to realign the beginning fund balance to ensure accurate fund balances.

Pro Rata

The amount of state administrative costs, paid from the General Fund and the Central Service Cost Recovery Fund (e.g., amounts expended by central service departments such as the State Treasurer's Office, State Personnel Board, State

Controller's Office, and Department of Finance for the general administration of state government), that are chargeable to and recovered from special funds (other than the General Fund, Central Service Cost Recovery Fund, and federal funds) as determined by the Department of Finance. (GC 11010, 11270-11275, 13332.03; SAM 8753, 8754.)

Program Budget

See "Budget—Program or Traditional."

Program Cost Accounting

A level of accounting that identifies costs by activities performed in achievement of a purpose in contrast to the traditional line-item format. The purpose of accounting at this level is to produce cost data sufficiently accurate for allocating and managing program resources. (SAM 7131.)

Programs

Activities of a business unit grouped on the basis of common objectives. Programs can be further divided into subprograms.

Project Approval Lifecycle

The process to assess the full implications of a proposed information technology project that contains analyses of options, cost estimates, and other information. (SAM 4920-4928.)

Proposed New Positions

A request for an authorization to expend funds to employ additional people to perform work. Proposed new positions may be for an authorization sufficient to employ one person, or for a sum of funds (blanket) from which several people may be employed. (See also "Changes in Authorized Positions.")

Proposition 98

An initiative passed in November 1988, and amended in the June 1990 election, that provides a minimum funding guarantee for school districts, community college districts, and other state agencies that provide direct elementary and secondary instructional programs for kindergarten through grade 14 (K-14), beginning with fiscal year 1988-89. The term is also used to refer to any expenditures that fulfill the guarantee. (Article XVI, § 8.)

Provision

Language in a bill or act that imposes requirements or constraints upon actions or expenditures of the state. Provisions are often used to constrain the expenditure of appropriations but may also be used to provide additional or exceptional authority. (Exceptional authority usually begins with the phrase "Notwithstanding...".)

Public Service Enterprise Funds

For legal basis accounting purposes, the fund classification that identifies funds used to account for the transactions of self-supporting enterprises that render goods or services for a direct charge to the user (primarily the general public). Self-supporting enterprises that render goods or services for a direct charge to other state

departments or governmental entities, account for their transactions in a Working Capital and Revolving Fund. (*UCM, Fund Codes—Structure (Source Classification).*)

Reappropriation

The extension of an appropriation's availability for encumbrance and/or expenditure beyond its set termination date and/or for a new purpose. Reappropriations are typically authorized by statute for one year at a time, but may be for some greater or lesser period.

Recall

The power of the electors to remove an elected officer. (*Article II, § 13.*)

Redemption

The act of redeeming a bond or other security by the issuing agency.

Reference Code

A three-digit code identifying whether the item is from the Budget Act or some other source (e.g., legislation), and its character (e.g., state operations). This is the middle segment of the budget item/appropriation number. (*UCM, Fund Source/Appropriation Coding.*)

Referendum

The power of the electors to approve or reject statutes or parts of statutes, with specified exceptions and meeting specified deadlines and number of voters' signatures. (*Article II, § 9.*)

Refund to Reverted Appropriations

A receipt account to record the return of monies (e.g., abatements and reimbursements) to appropriations that have reverted. (*SAM 7680*)

Reimbursement Warrant (or Revenue Anticipation Warrant)

A warrant that has been sold by the State Controller's Office as a result of a cash shortage in the General Fund, the proceeds of which will be used to reimburse the General Cash Revolving Fund. The Reimbursement Warrant may or may not be registered by the State Treasurer's Office. The registering does not affect the terms of repayment or other aspects of the Reimbursement Warrant. (*GC 17240-17255*)

Reimbursements

An amount received as a payment for the cost of services performed/to be performed, or of other expenditures made for, or on behalf of, another entity (e.g., one department reimbursing another for administrative work performed on its behalf). Reimbursements represent the recovery of an expenditure. Reimbursements are available for expenditure up to the budgeted amount (scheduled in an appropriation), and a budget revision must be prepared and approved by the Department of Finance before any reimbursements in excess of the budgeted amount can be expended. (*SAM 6463.*)

Reserve

An amount of a fund balance set aside to provide for expenditures from the unencumbered balance for continuing appropriations, economic uncertainties, future apportionments, pending salary or price increase appropriations, and appropriations for capital outlay projects.

Revenue

Any addition to cash or other current assets (e.g., accounts receivables) that does not increase any liability or reserve and does not represent the reduction or recovery of an expenditure (e.g., reimbursements/abatements). Revenues are a type of receipt generally derived from taxes, licenses, fees, or investment earnings. Revenues are deposited into a fund for future appropriation, and are not available for expenditure until appropriated. (*UCM, Receipt Codes.*)

Revenue Anticipation Notes (RANs)

A cash management tool generally used to eliminate cash flow imbalances in the General Fund within a given fiscal year. RANs are not a budget deficit-financing tool.

Revenue Anticipation Warrant (RAW)

See "Reimbursement Warrant."

Reversion

The return of the unused portion of an appropriation to the fund from which the appropriation was made, normally two years (four years for federal funds) after the last day of an appropriation's availability period. The Budget Act often provides for the reversion of unused portions of appropriations when such reversion is to be made prior to the statutory limit. The reversion may also occur upon order of Finance. (GC 16304, 16304.1)

Reverted Appropriation

An appropriation that is reverted to its fund source after the date its liquidation period has expired.

Revolving Fund

Generally refers to a cash account known as an office revolving fund (ORF). It is not a fund but an advance from a primary support item. Departments may use the cash advance to disburse ORF checks for immediate needs, as specified in SAM. The cash account is subsequently replenished by a State Controller's Office transfer from a department appropriation. The size of departmental revolving funds is subject to Department of Finance approval within statutory limits. (*SAM 8100, et seq.*)

SAL

See "Appropriations Limit, State."

Salaries and Wages Supplement

An annual publication, issued shortly after the Governor's Budget, containing a summary of all positions by department, unit, and classification for the past, current, and budget years, as of July 1 of the current year. This publication is also displayed on the Department of Finance's website. (See "Schedule 7A.")

Schedule

The detail of an appropriation in the Budget Bill or Act, showing its distribution to each of the programs, or projects thereof.

or:

A supplemental schedule submitted by departments to detail certain expenditures.

or:

A summary listing in the Governor's Budget.

Schedule 7A

A summary version of the State Controller's Office detailed Schedule 8 position listing for each department. The information reflected in this schedule is the basis for the "Salaries and Wages Supplement" displayed on the Department of Finance's website. (See "Salaries and Wages Supplement") (SAM 6415-6418.)

Schedule 8

A detailed listing generated from the State Controller's Office payroll records for a department's past, current, and budget year positions as of June 30 and updated for July 1. This listing must be reconciled with each department's personnel records and becomes the basis for centralized payroll and position control. The reconciled data should coincide with the level of authorized positions for the department per the final Budget. (SAM 6424-6429, 6448.)

Schedule of Federal Funds and Reimbursements, Supplementary

A supplemental schedule (DF-301) submitted by departments during budget preparation that displays federal expenditures by source. (SAM 6460.)

Schedule of Operating Expenses and Equipment, Supplementary

A supplemental schedule (DF-300) submitted by departments during budget preparation that details by object the expenses included in the Operating Expenses and Equipment category. (SAM 6454, 6457.)

Section 1.50

Section of the Budget Act that (1) specifies a certain format and style for the codes used in the Budget Act, (2) authorizes the Department of Finance to revise codes used in the Budget Act to provide compatibility with the Governor's Budget and records of the State Controller's Office, and (3) authorizes the Department of Finance to revise the schedule of an appropriation in the Budget Act or in other spending authority outside of the Budget Act for technical changes that are consistent with legislative intent. Examples of such technical changes to the schedule of an appropriation include the distribution of any unallocated amounts within an appropriation, adjustments of schedules to facilitate departmental accounting operations, and the augmentation of reimbursement amounts when the Legislature has approved the budget for the department providing the reimbursement. The Section also authorizes Finance to make certain technical corrections related to the implementation of and conversion into FI\$Cal.

Section 1.80

Section of the Budget Act that includes periods of availability for Budget Act appropriations.

Section 8.50

A Control Section of the Budget Act that provides the authority to increase federal fund spending authority.

Section 26.00

A Control Section of the Budget Act that provides the authority for the transfer of funds from one program or function within a schedule to another program or function within the same schedule, subject to specified limitations and reporting requirements to the Legislature. (SAM 6548.)

Section 28.00

A Control Section of the Budget Act that authorizes the Director of Finance to approve the augmentation or reduction of items of expenditure for the receipt of unanticipated federal funds or other non-state funds, and that specifies the related reporting requirements to the Legislature. Appropriation authority for unanticipated federal funds is contained in Section 8.50. (SAM 6551-6557.)

Section 28.50

A Control Section of the Budget Act that authorizes the Department of Finance to augment or reduce the reimbursement line of an appropriation schedule for reimbursements received from other state agencies. It also contains specific reporting requirements to the Legislature. (SAM 6551-6557.)

Section 30.00

A Control Section of the Budget Act that amends Government Code section 13340 to sunset continuous appropriations.

Section 31.00

A Control Section of the Budget Act that grants departments the authority to administratively establish or reclassify positions. This section states that administratively establishing positions outside of the budget process requires both Finance's approval and legislative notification. Administratively established positions are to be temporary and expire June 30 of the current year, unless extended by Finance and the Legislature during the following budget cycle. Additionally, Section 31.00 requires Finance to review all reclassification requests involving a position meeting a specified threshold.

Senate

The upper house of California's Legislature consisting of 40 members. As a result of Proposition 140 (1990, term limits) and Proposition 28 (2012, limits on Legislators' terms in office), members elected in or after 2012 may serve 12 years in the Legislature in any combination of four-year state Senate or two-year state Assembly terms. (Article IV, § 2 (a).)

Service Revolving Fund

A fund used to account for and finance many of the client services rendered by the Department of General Services. Amounts expended by the fund are reimbursed by sales and services priced at rates sufficient to keep the fund solvent. (SAM 8471.)

Settlements

Refers to any proposed or final settlement of a legal claim (usually a suit) against the state. Approval of settlements and payments for settlements are subject to numerous controls. (See also "Judgments.") (GC 965.)

Shared Revenue

A state-imposed tax, such as the gasoline tax, which is shared with local governments in proportion, or substantially in proportion, to the amount of tax collected or produced in each local unit. The tax may be collected either by the state and shared with the localities, or collected locally and shared with the state.

Sinking Fund

A fund or account in which money is deposited at regular intervals to provide for the retirement of bonded debt.

Special Fund for Economic Uncertainties

A fund in the General Fund (a similar reserve is included in each special fund), authorized by statute and Budget Act Control Section 12.30, to provide for emergency situations. (GC 16418, 16418.5.)

Special Funds

For legal basis budgeting purposes, funds created by statute, or administratively per Government Code section 13306, used to budget and account for taxes, licenses, and fees that are restricted by law for particular activities of the government.

Special Items of Expense

An expenditure/account category that covers non-recurring large expenditures or special purpose expenditures that generally require a separate appropriation (or otherwise require separation for clarity). (SAM 6469; UCM.)

Sponsor

An individual, group, or organization that initiates or brings to a legislator's attention a proposed law change.

Spot Bill

An introduced bill that makes non-substantive changes in a law, usually with the intent to amend the bill at a later date to include substantive law changes. This procedure provides flexibility to meet the deadline for the introduction of bills.

Staff Benefits

An object of expenditure representing the state costs of contributions for employees' retirement, OASDI, health benefits, and non-industrial disability leave benefits. (SAM 6412; UCM.)

State-Mandated Local Program

State reimbursements to local governments for the cost of activities required by legislative and executive acts. This reimbursement requirement was established by Chapter 1406, Statutes of 1972 (SB 90) and further ratified by the adoption of Proposition 4 (a constitutional amendment) at the 1979 general election. (*Article XIII B, § 6; SAM 6601.*)

State Operations (SO)

A character of expenditure representing expenditures for the support of state government, exclusive of capital investments and expenditures for local assistance activities.

Statewide Cost Allocation Plan (SWCAP)

The amount of state administrative costs (e.g., amounts expended by central service departments such as the State Treasurer's Office, the State Personnel Board, the State Controller's Office, and the Department of Finance for the general administration of state government) chargeable to and recovered from federal funds, as determined by the Department of Finance. These statewide administrative costs are for administering federal programs, which the federal government allows reimbursement. (*GC 13332.01-13332.02; SAM 8753, 8755-8756 et seq.*)

Statute

A written law enacted by the Legislature and signed by the Governor (or a vetoed bill overridden by a two-thirds vote of both houses), usually referred to by its chapter number and the year in which it is enacted. Statutes that modify a state code are "codified" into the respective Code (e.g., Government Code, Health and Safety Code). (See also "Bill" and "Chapter.") (*Article IV, § 9.*)

Subcommittee

The smaller groupings into which Senate or Assembly committees are often divided. For example, the fiscal committees that hear the Budget Bill are divided into subcommittees generally by departments/subject area (e.g., Education, Resources, General Government).

Subventions

Typically used to describe amounts of money expended as local assistance based on a formula, in contrast to grants that are provided selectively and often on a competitive basis. For the purposes of Article XIII B, state subventions include only money received by a local agency from the state, the use of which is unrestricted by the statutes providing the subvention. (*GC 7903.*)

Summary Schedules

Various schedules in the Governor's Budget Summary that summarize state revenues, expenditures, and other fiscal and personnel data for the past, current, and budget years.

Sunset Clause

Language contained in a law that states the expiration date for that statute.

Tax Expenditures

Subsidies provided through the taxation systems by creating deductions, credits, and exclusions of certain types of income or expenditures that would otherwise be taxable.

Technical

In the budget systems, refers to an amendment that clarifies, corrects, or otherwise does not materially affect the intent of a bill.

Tort

A civil wrong, other than a breach of contract, for which the court awards damages. Traditional torts include negligence, malpractice, and assault and battery. Recently, torts have been broadly expanded such that interference with a contract and civil rights claims can be torts. Torts result in either settlements or judgments. (GC 948, 965-965.9; SAM 6472, 8712; Budget Act Items 9670.)

Traditional Budget

See "Budget—Program or Traditional."

Transfers

As displayed in fund condition statements, transfers reflect the movement of resources from one fund to another based on statutory authorization or specific legislative transfer appropriation authority.

Trigger

An event that causes an action or actions. Budget "trigger" mechanisms have been enacted in statute under which various budgeted programs are automatically reduced if revenues fall below expenditures by a specific amount.

Unanticipated Cost/Funding Shortage

A lack or shortage of (1) cash in a fund, (2) expenditure authority due to an insufficient appropriation, or (3) expenditure authority due to a cash problem (e.g., reimbursements not received on a timely basis). (See Budget Act Items 9840 and 9850.)

Unencumbered Balance

The balance of an appropriation not yet committed for specific purposes. (See "Encumbrance.")

Uniform Codes Manual (UCM)

A document maintained by the Department of Finance that sets standards for codes and various other information used in state fiscal reporting systems. These codes identify, for example, business units, programs, funds, receipts, line items, and objects of expenditure. The Accounts used in FISCAL combine the legacy general ledger code, receipt and object of expenditure codes in a single classification code. (See also "Account" and "Chart of Account Crosswalk")

Unscheduled Reimbursements

Reimbursements collected by an agency that were not budgeted and are

accounted for by a separate reimbursement category of an appropriation. To expend unscheduled reimbursements, a budget revision must be approved by the Department of Finance, subject to any applicable legislative reporting requirements (e.g., CS 28.50).

Urgency Statute/Legislation

A measure that contains an "urgency clause" requiring it to take effect immediately upon the signing of the measure by the Governor and the filing of the signed bill with the Secretary of State. Urgency statutes are generally those considered necessary for immediate preservation of the public peace, health, or safety, and such measures require approval by a two-thirds vote of the Legislature, rather than a majority. (*Article IV, § 8 (d)*). However, the Budget Bill and other bills providing for appropriations related to the Budget Bill may be passed by a majority vote to take effect immediately upon being signed by the Governor or upon a date specified in the legislation. (*Article IV § 12 (e) (1)*.)

Veto

The Governor's Constitutional authority to reduce or eliminate one or more items of appropriation while approving other portions of a bill. (*Article IV, § 10 (e)*; SAM 6345.)

Voucher

A request from a state department using FISCAL to the State Controller's Office to disburse payment from a legal appropriation or account for a lawful state obligation. The voucher identifies the appropriation or account to be charged, the payee, the amount(s) to be paid, and an affidavit attesting to the validity of the request.

Warrant

An order drawn by the State Controller directing the State Treasurer to pay a specified amount, from a specified fund, to the person or entity named. A warrant generally corresponds to a bank check but is not necessarily payable on demand and may not be negotiable. (SAM 8400 et seq.)

Without Regard to Fiscal Year (WRTFY)

Where an appropriation has no period of limitation on its availability.

Working Capital and Revolving Fund

For legal basis accounting purposes, fund classification for funds used to account for the transactions of self-supporting enterprises that render goods or services for a direct charge to the user, which is usually another state department/entity. In contrast, self-supporting enterprises that render goods or services for a direct charge to the public account for their transactions in a Public Service Enterprise Fund.

Workload Budget

Workload Budget means the budget year cost of currently authorized services, adjusted for changes in enrollment, caseload, population, statutory cost-of-living adjustments, chaptered legislation, one-time expenditures, full-year costs of partial-year programs, costs incurred pursuant to Constitutional requirements, federal mandates, court-ordered mandates, state employee merit salary adjustments, and state agency operating expense and equipment cost adjustments. (GC 13308.05.)

This definition is related to the calculation of the workload budget required by Section 36 of Article 13 of the California Constitution.

Year of Appropriation (YOA)

Refers to the first fiscal year of enactment or availability, whichever is later. Also referred to as the Enactment Year, or ENY.

Year of Budget (YOB)

The fiscal year revenues and expenditures are recognized. For revenues, this is generally the fiscal year when revenues are earned, measurable, and "available." For expenditures, this is generally the fiscal year when obligations, including encumbrances, have been created during the availability period of the appropriation. When the availability period of encumbrance of an appropriation is one year (e.g., most Budget Act items), the YOB is the same as the year of appropriation (YOA) and the year of completion (YOC). However, when the availability period is more than one year, the YOB may be any fiscal year during the availability period, including the YOA or the YOC, as appropriate. For example, an appropriation created in 2016-17 and is available for three years, the YOA is 2016 and the YOC is 2018. If an obligation is created in 2017-18, the YOB for this obligation is 2017. In FISCAL (PeopleSoft), the YOB is referred to as Budget Period. The rules of recognition are not the same for all funds depending on the appropriate basis of accounting for the fund types or other factors.

Year of Completion (YOC)

The last fiscal year for which the appropriation is available for expenditure or encumbrance.
