

vaccine Logistics Subgroup Update – January 29, 2021

- The Closed MPOD Worksheet was completed and submitted to LACDHP on Monday, January 25, 2021.
 - A meeting is scheduled with the LACDPH Health Emergency Management team is scheduled for Monday, February 1, 2021. With multiple shifts in both National and State strategies over the last several weeks, this call should provide clarity on the path forward.
- The State unveiled yet another new platform for vaccine distribution called My Turn <https://myturn.ca.gov/>. It is currently being piloted in Los Angeles and San Diego Counties. Governor Newsom describes the platform as end to end – from patient through to state reporting. It is unclear what this means for existing/potential providers. This will be discussed during the meeting with LACDPH.
- In collaboration with the Department of Research and Institutional Effectiveness, a draft survey for employees about the COVID-19 vaccine has been created. The primary goal of this survey is to assist with logistics planning for a potential vaccination clinic.
 - The survey will be review by the Vaccine Logistics Subgroup next week and will go out shortly thereafter.
- Dr. Walker and Prof. Fiorito from Nursing have both worked local vaccine distribution sites. They will be sharing their insights at our next subgroup meeting.
