Faculty Request
for Regional Collaborative 'Academic Resource Innovation Hub'

Why This Matters

Both Faculty and Administrators would like to see this innovative work continued.

Connection to CCW and LA SIM regional projects

During Round 2.1 & 2.2 in May, 2019, the CE Dean's held a CCW strategic planning retreat to help reverse enrollment declines. A major driver of declines was the consumer preferences relating to the actual educational "product", including course content and delivery. They decided to increase their support of LA19 faculty to take on this challenge.

WHAT

The Steering Committee started a "collective accountability network" for strategically planning a CCLA19 Academic Resource Innovation Hub. The Hub will provide faculty from all 19 colleges with the opportunity to collaborate and share best practices and innovations for curriculum. It is a space for GE/CE cross-college/cross-discipline collaboration, faculty professional development, alignment with industry with accelerating roll-out of regional "at- scale projects like Amazon Web Services (AWS), and regional acceleration of successful local CE initiatives.

CCLA FACULTY REQUESTS

Faculty is requesting financial support for the continued planning and execution of an CCLA19 Academic Resource Innovation Hub. In July at a Summit, faculty will be developing two potential plans that will be presented to the

To be Presented in August at Governance Meeting:

Measurable Outcomes:

Completion, retention,

Jobs and wage gains

WHY

The Academic Resource Innovation Hub was a response to several CCLA19 challenges including disruptive change, declining enrollments, and the need to support the local economy. Benefits of such collaboration include: (1) shared resources, (2) creating efficiency, reducing duplication and (3) access to scalable and customizable solutions for curriculum. Every CE top code could benefit.
