

## **Dance Chemistry Collaboration**

Wednesday, August 5, 2020

I just wanted to share this with you. The project blossomed for the original proposal.

**Dance & Chemistry collaboration video has been completed!** We were set back due to COVID but managed to finish it. All the hard work was well worth it. Now just waiting on captioning. You will see two links, one of a photo montage and the other of the short film.

Melissa Berkley Shepherd from Broadcast Services created this photomontage for the archival of the film shoot. Sometimes people forget all the behind the scenes work, which is why we wanted to include the process not only the product. All photos were taken by photography student Eduardo Gonzalez. Enjoy the short video
