complio

Eliminates challenges at each step of the compliance process

Complio takes you from Step One to Step **Done**.

Complio electronically tracks immunizations and background checks.

1. SUBSCRIBE
American DataBank will create a custom Complio website for your applicants to utilize, unifying your institution and our platform.

2. UPLOAD & ENTER
With Complio's cloud-based document management system, users can upload varying file formats, save files for future use, associate documents to specific items, and download a unified PDF if necessary.

Complio is designed for maximum flexibility to accommodate evolving and complex requirements, allowing your applicants to easily enter their information and your administrators to efficiently evaluate compliance.

3. REVIEW
Complio's exclusive features make reviewing records simple and fast. Our system support a paperless environment while multi-layer security measures protect sensitive information stored within the system. Stored documents remain secure and only authorized users can access the information. Complio is available through any internet connection.

4. REPORT
Users and Administrators can generate *Passport Reports* which provides a snapshot of an applicant's compliance. Administrators can produce detailed reports based on categories, items, overall compliance, or any combination. Within Complio, Administrators can filter, sort, customize, and quickly download reports to accommodate their reporting needs.
