

Grant Seeking Progress Report - CCPT2

11/14/2014

Marie Tyra and I had an opportunity to review our progress and tentative plan for the California Career Pathways 2 grant activities and leadership this morning in light of new information coming out of a workshop held earlier this week. As you know several meetings have already taken place organized by a steering committee, Mt. SAC, Citrus, ESGVROP and SGVEP. The workshop provided clarity about the nature, structure, and funding (grant and ongoing) of activities proposed in a successful application:

- Consortia must be existing and the players have history of successful collaboration
- Funded activities and personnel, including oversight for the consortium (grant director) must continue for the 4 year life of the grant
- Data reporting is required throughout the 4 years of the grant
- Grand funding will be for 2 years, only. No roll-over.
- Given the short duration the likelihood of start-up activities reaching implementation is small. Emphasis is on expanding existing relationships and systems. Leveraging existing resources.

Thank you for your support of this initiative.

Sarah Daum
Dean of Technology and Health
