

**TILLEMA
VETERINARY
CLINIC**

We are looking for a full time assistant who has experience in the following areas:

- **Taking vials on patients (Temp, HR, RR, MM, CRT etc.)**
- **Animal restraint**
- **Blood draw**
- **SubQ and IM injections**
- **Surgical Monitoring**
- **Catheter placement**

Our clinic is a mixed animal practice so on any given day we see dogs, cats, pot belly pigs, goats, sheep, cattle, horses and llamas/alpacas. We are a small team of "go the extra mile" personalities looking to add to our family.

Punctuality, honesty and a strong work ethic are the traits we are looking for in an assistant.

We also need someone that is great at multi-tasking and handling an ever-changing work load because our Dr. sees patients both in clinic and out in the field (mobile calls).

Qualified candidates email their resumes to:
